tudents swarming Ahearn Field House at fall registration dug deep into their pockets as tuition increased 10 percent for Kansas residents and 12.5 percent for non-residents. But while tuition increased, enrollment decreased. The number of students attending dropped 1 percent for a total enrollment of 21,222.

*Beyond* the hiked tuition and decreased enrollment, the campus maintained a friendly atmosphere. A new program called K-State Cares, the Activities Carnival and the Welcome Back Concert helped incoming students adjust to Big Eight college life.

Furious over proposed cuts of *the* speech pathology and social work programs, students brought their anger to the *surface* by circulating petitions and speaking out against the proposal. Carlotte Moore, senior in social work, said, "If you cut this program, you cut me."

Beyond campus controversies, national debates focused

upon presidential candidates George Bush, Bill Clinton and Ross

to welcome Yeltsin, who visited the farm to learn Kansas farming techniques. Yeltsin enjoyed his visit and said, "Kansas has the best freedom, the best wheat and the best farmers in the world."

Yeltsin wasn't the only one who liked Kansas. Country singer Garth Brooks, who performed for a sold-out Bramlage Coliseum crowd on Sept. 12, said he would like to stay in Kansas and let the rest of the world come to him.

### Fans at the concert

were so enthusiastic that Brooks said, "You guys came to get serious. I like that."

To avoid long lines and angry fans, tickets were sold in the summer through the mail. The tickets sold quickly, but some were set aside for a special student lottery. All 2,800 students who participated received a pair of tickets.

Football ticket sales increased significantly, and a record-setting crowd of 32,712 fans attended the opening game. A feature in the Aug. 31 issue of Sports Illustrated brought the team to the surface, focusing national attention on the program and the University.

To the public eye, it was a year like any other with budget problems, athletic victories and defeats, and an ever-changing curriculum. But the details that made the year unique were found beyond the surface.

marching band students.

Before, during and after the K-State football games, fans could count on seeing the K-State Marching Band perform on the field of the KSU Stadium. After the Temple game the band was moved to the end zone section to perform due to the noise distractions for the K-State coaches and players. Matt Skar, sophomore in education, played the National Anthem with band at the home game against Temple. (Photos by Mike Welchans and J.Kyle Wyatt)

**E**xpressions of pain take over J. Kyle Wyatt's, freshman in English, face as the artist at Fine Line Tattoos in Topeka creates the tattoo. Wyatt said getting the tattoo hurt. "Sometimes it did, other times it felt like he was rubbing sandpaper on my back." Before the process began, Wyatt said he watched the artist wash his hands and put on fresh surgical gloves, change the ink and get out sterilized needles. (Photo by David Mayes)

**T**attoos represent various meanings to the owner. Wyatt's tattoo symbolized the history of his ancestors. The picture stood for protection against evil and the words *sinn fein* translated to "ourselves alone." "It will proclaim my feelings for my ancestry and my friend for the rest of my life," Wyatt said of his friend David Mayes, senior in history, who accompanied Wyatt to Fine Line. "It symbolizes the friendship between Dave and me. It is a friendship that is as permanent as my new tattoo." (Photo by David Mayes)

# MORE THAN A *Permanent* CRAZE

**O**ne fad of the '90s made a more permanent fixture of itself than the Chia Pet and the pet rock. Planted under the skin at the depth of a dime, tattoos were there to stay. The tattoo craze ran full-force, and the reasons for the increase in popularity were varied.

"Tattoos have been much more mainstream in the last couple of years, especially with students. It's just more socially acceptable now," said Teddie Fischer, tattoo artist at Fine Line tattoo studio in Topeka. "People are just now feeling that it's OK to have one."

A wide variety of people decided to sit under the needle.

"In our Junction City parlor, we get military personnel. However, most of our customers are just average everyday people. About half are men and half are women," Fischer said. "In the last two years or so, we have seen more collegestudents. In fact, fraternities and sororities will often have their letters placed on their ankles."

Many tattoo designs were offered.

Cartoon characters such as Bart Simpson, Calvin and Hobbes and the Tasmanian Devil were popular choices. But many people designed their own.

"A lot of people don't know what to expect when they come in," Fischer said. "They don't think that we'll have that many designs, but we have thousands on file to choose from. However, many do choose to design their own."

John Berberich, freshman in arts and sciences, got his tattoo at Fine Line. Berberich picked his tattoo in memory of one of his friends who

had died.

"I got a joker on a pole," he said. "It was the one my friend was going to get before he died."

The average tattoo design took about 45 minutes to apply, but some designs took up to three hours. The amount of pain experienced depended on the tattoo's location.

"As far as the pain, it is tolerable. It's not something you would sit still for under normal circumstances," said Scott Schafer, tattoo artist at Fine Line. "The rib cage and the tailbone are the most painful spots. There are a lot of nerve endings in these places. Most people put a lot of thought into it before they come in, and are committed to the process."

Matt James, sophomore in journalism and mass communications, said he wasn't prepared for the procedure to be so painful.

**"It was excruciating, ridiculous and miserable," James said.**

**"Everybody told me it wouldn't hurt. They lied."**

Some people were worried about the risk of AIDS involved in getting a tattoo, but Fine Line used steam to sterilize the equipment, the same procedure used in sterilizing surgical equipment. The tattoo parlor also followed other rules, such as refusing to tattoo anyone under the age of 18 without parental consent, or anyone intoxicated.

Fad or not, the tattoos were there to stay. Fischer said the increased popularity of tattoos made promoting them unnecessary.

"We don't sell tattoos," Fischer said, "tattoos sell themselves."

BY TED KADAU AND STEPHANIE HOELZEL

Wyatt stands looking at the rows of books. Fine Line tattoo studio offered thousands of tattoo patterns, but some people designed their own. "I asked Jon the tattoo artist who he tattoos now. I had always stereotyped people who got tattoos as Harley riders," Wyatt said. "My stereotype was not accurate. He told me most of his customers are college students getting their greek letters on their ankles." (Photo by David Mayes)

# GENERATING *Purple* PRIDE

**P**urple balloons lined Poyntz Avenue sidewalks. Little girls dressed in cheerleader uniforms, and little boys and adults flaunted K-State apparel. People filled the street to kickoff the fourth annual Purple Power Play on Poyntz.

The festivities began on Sept. 17, two days before the opening football game. Vendors roamed the street selling food, balloons and football tickets. After donating food to the Flint Hills Breadbasket, fans had pictures taken with Willie Wildcat. Musical groups, ranging from country to old rock, performed. The scene was set for the pep rally.

This year, Purple Power Play on Poyntz was extended to generate more spirit.

"We extended it to three days this year so we could keep everyone psyched up," said Jim Dailey, intern for KQLA-FM 103.9 radio station.

Power Play offered the community a way to show support for another football season.

"Community support for Kansas State is excellent. This is a good example of how the community backs the University," said Laura Mitchell, senior in psychology.

After performances by the Classy Cats, the marching band and the cheerleaders, Bill Snyder, head football coach, was introduced. The 1991 Coach of the Year, who was present at the first Power Play, addressed a crowd twice as big as it had ever been.

There was a lot of cheering when Snyder introduced the leaders of the football team. Brooks Barta, senior in education and team captain, promised the team would work hard. He said if everyone did, they would win because "nobody has a

heart like a Wildcat."

The end of the pep rally signaled the beginning of the money toss. A thousand dollars worth of money was thrown off the top of the mall to a mob of people in front of the entrance. Along with the money, small purple and white footballs, orange basketballs and coupons were also thrown.

Brian Underwood, freshman in park resources management, saw a small boy get knocked down when he was trying to reach an envelope of money near three older boys.

Underwood caught an envelope and decided to give up his prize, but he didn't realize what it was.

**"The boy opened the envelope and there was \$20 inside. I sure could have used that \$20," Underwood said.**

Elmo and the Deadbeats played at the street dance the next evening for those who listened despite the chilly weather. A giant purple Wildcat logo was painted on Poyntz Avenue in front of the mall.

Saturday's activities began with a parade of high school bands, who marched along Poyntz Avenue from the City Park to the mall.

After the parade, people decorated their cars to caravan to the football field. Participants received a free parking pass.

The growing popularity of the football team caused a stir with the students, families and businesses. Their enthusiasm and support was evident at the Purple Power Play on Poyntz.

"Next year, I'm going to tell people about it and take more people with me," said Becky Busenbark, sophomore in biology.

BY JENNI STIVERSON

# KIDS *Discover* CAMPUS

**W**earing purple t-shirts and macaroni necklaces, children between the ages of 5-13 invaded campus last summer through Summer Adventure, a day camp sponsored by the Division of Continuing Education.

The program started with a week long pre-session, followed by four two-week sessions. Dick Claussen, director of Summer Adventure, said about 80 students were enrolled in each session.

Claudia Lawrence, program coordinator for Summer Adventure, said the program provided a change of pace for children so they didn't feel like they were in school.

"We try to use the resources of the community and the campus," Lawrence said. "We try to give them something they wouldn't normally receive in school."

**Participants attended 45-minute activity sessions with children in their own age groups. Activities included physical education, art, drama, dance, sign language, music, math**

and language arts, and were taught by college students. Swimming lessons, taught by certified instructors from University for Man, were also part of the program.

Amy Laytimi, graduate teaching assistant in music and camp counselor, said many counselors were education majors. The camp provided them with the opportunity to gain teaching experience.

"The program provides the children enrichment, without using

grades. It also teaches the older children leadership skills because they help with the groups," Laytimi said. "The program benefits the children a great deal."

Extravaganza, a time set aside for special activities, was held every afternoon. Activities included touring a radio station, Derby Food Center and the horticulture department. The children also had the chance to inspect a helicopter from Fort Riley.

On some days, all age groups gathered together for Extravaganza. These featured guest speakers, talent shows and dance parties at the Union Station. McGruff the Crime Dog appeared at one meeting.

Karen Galloway, senior in elementary education, was a leader and counselor at the camp. She said there were always new activities that benefited both the children and the counselors.

"Summer Adventure helped the children learn in a fun and different way. It was expression through drama, art and all of the activities," Galloway said. "The camp

provided me and the children with a learning experience. I got to know the children. I was with them all day through the good, the bad, the happiness and the sadness. The best part was that I could be a kid again."

Andrew Elmore, a 12-year-old from Manhattan, said he was enrolled in four weeks of Summer Adventure. He said the program was more fun than school.

"You learn, but you don't get the homework," Elmore said.

**P**epper Pond Farm is home to over 30 different varieties of peppers ranging in heat levels from one to 10. All the peppers were organically grown without chemical fertilizers and pesticides. (Photo by J. Kyle Wyatt)

# RED HOT *Vegetable* VENTURE

**J**ohn Fulkerson, a 1992 K-State graduate in horticulture, returned to school as a non-traditional student to learn to grow the unusual.

After working seven years in sales, the former landscape architecture major, purchased his own farm.

On his eight acres located east of Manhattan, Fulkerson started Pepper Pond Farm. The pride of Fulkerson's farm, as the name indicated, was his peppers. The farm's 1,000 plants, representing 30 different varieties, were sold to restaurants, supermarkets and farmers markets.

"Peppers are an up-and-coming food," he said. "They are truly gaining in popularity. People will be cooking with chilli peppers more and more."

The peppers were rated on different levels, according to their heat. Each pepper was given a number from zero to 10, with 10 being the hottest. Pepper Pond Farm had every level of pepper, and Fulkerson said he grew the world's hottest pepper. It was the habanero pepper which had a rating of 10. Fulkerson said a bite as small as one-eighth of a dime would burn a taster's mouth.

One of Fulkerson's favorite was his datil pepper sauce, Bottled Hell.

"It is excellent on meat, tacos and corn chips," Fulkerson said. "The name, Bottled Hell, fits perfectly because it is blasting hot."

Fulkerson's commitment has earned the support of one observer.

"He's dedicated to what he's doing," said Connie, Fulkerson's wife and K-State employee, "and he's dedicated to the organic method."

A great deal of care was required to keep the peppers healthy.

"It (the farm) is a time commit-

ment," Fulkerson said. "It takes hundreds of hours to keep up with the peppers."

Living in the country, the Fulkersons found they had different worries than in the city.

"In town when it hails, you're worried about the roof or the car," Connie Fulkerson said. "Here, it's the vegetables."

When thunderstorms approached, Fulkerson was nervous.

**"To watch a crop destroyed in a matter of minutes is not a fun thing," Fulkerson said. "It's given me a different perspective on what farmers go through."**

The time commitment and financial obligation made Fulkerson unsure of the farm's future.

"When you work hard on something, you hope there is a payoff," he said. "We went into this project blindly, and it has sure been a rich experience."

He hoped to continue farming on a part-time basis. He said the customer interaction was his favorite part of the job.

"I have learned a lot from the customers, and I hope they have learned a lot about peppers," he said. "I sure hope that next year they don't ask, 'where's the pepper man?'"

Fulkerson said his education didn't stop after he received his diploma. He said here was a difference between growing 10 plants in class and 1,000 plants on his farm.

"I think I got a good education at K-State," he said. "But just because you have a degree doesn't mean you know everything. You need to get your hands dirty and make mistakes."

BY CHAD CLEMENT AND KIM HAFNER

COUNTRIES

# Growing

TOGETHER

BY LAJEAN RAU

Boris Yeltsin visited the family of Lajean Rau, senior in journalism and secondary education, during the summer of 1992. Lajean's brother, Bruce, senior in landscape architecture, and sister Darlene, sophomore in secondary education, also attended K-State.

Russian President Boris Yeltsin made a lot of friends in Kansas this summer.

He visited my family's farm as part of his trip to Kansas in mid-June after a successful trip to Washington, D.C., which resulted in more than 30 agreements between Russia and the United States. While in Kansas, he also stopped at Wichita's Dold meat packing plant at Wichita State University.

His message was the same everywhere he went.

"There will never be a war between our two countries," Yeltsin said. "We are friends now."

"I don't come to your country for handouts, but for partnership," he said atop a wooden flatbed trailer-stage at my family's farm.

His commanding voice, energetic manner and frank speech wowed the crowd of about 400, made up mostly of friends of our family, farmers and representatives of the more than 20 farm organizations that sponsored his stop at our farm.

His visit to our home began with a private meeting with the family. Flanked by politicians and dignitaries, including members of the Kansas congressional delegation, Gov. Joan Finney and the U.S. ambassador to Russia, Yeltsin and his wife, Naina, took an impromptu tour of our house.

"It is true you live better than the president of Russia," he said, carefully looking over each room. "I could only hope to have a refriger-

ator this large in my own home."

Yeltsin and my dad sat at our dinner table, looked at family pictures and talked "farm talk". He asked about crop yields, cattle weight gain and implements, barely giving his interpreter time to translate.

Yeltsin's eyebrows raised at the answers to his questions.

"The wheat you grow comes from Russia, I am told," Yeltsin said, looking up from the table to the more than 15 people surrounding it. "And now, your yields are three times what we grow there."

Yeltsin said he had much to learn from my family and from other American farmers.

"My people want to work, and

*Continued on page 18*

Yeltsin speaks to a crowd of around 400 guests at the Rau family farm during his visit to Kansas. The visit consisted of a tour of the Rau farm and interviews with the press. (Photo by Mike Welchans)

## GROWING TOGETHER

*Continued from page 17*

they have good minds," he said, putting his finger to his temple. "But they have been brainwashed for so many years. Now it can change. We will never go back."

Yeltsin moved toward the couch for a picture with my family, ducking with a hearty laugh to avoid getting his white hair caught in the ceiling fan.

**My family gave the Yeltsins a framed photograph of our family, which was taken in a nearby wheat field.**

The Yeltsins presented my parents with a hand-painted, wooden tea set.

"This is old Russian art," Yeltsin said. "My people have been doing this for hundreds of years."

"You can use it for vodka or tea," he said, tipping one of the cups and getting a laugh.

Sensing his discomfort, my dad motioned for Yeltsin to take his tie off. Yeltsin promptly pulled the tie over his head, laughing and thanking my dad. He had already shed his coat earlier in the day.

Naina Yeltsin, who stood quietly in the background most of the day, put the tie in her purse.

When Yeltsin walked out into the Kansas heat, the circus began. Hundreds of people flocked around as my dad tried to continue the tour outside. But the up-close-and-personal time was over. Yeltsin shook hands and spoke to the people. From a distance, he was as down-to-earth and compelling as he had been across our table.

Yeltsin took the wheel of the combine, waving his arms for the crowd and media to clear the way.

Naina Yeltsin looked on with worried eyes.

"He does not know how to drive

this," she said.

Yeltsin spoke atop the trailer-stage to the crowd that had been waiting several hours in the summer sun to see him.

"I know now that I made the right decision when I picked Kansas to come to," Yeltsin said, waving his arms, then putting his hand to his heart. "I will tell you, Kansas has the best freedom, the best wheat and the best farmers in the world."

When asked by a television reporter what he would take back to his country from the visit, Yeltsin motioned around the farm and said, "Everything—together with the family."

Yeltsin stayed until he had only 10 minutes to make it to McConnell Air Force Base for his 3:30 p.m. departure to Ontario, Canada, where he was meeting with the Canadian government.

As the Yeltsins were rushed toward the waiting motorcade, they looked into the crowd for members of my family, reaching to shake our hands and thank us again. Yeltsin hugged my dad and disappeared into the limousine.

But before it could pull away, my mom appeared with an iced tea, which she quickly passed through an open window.

"They're so hot," she said. "I could tell they needed something to drink."

A half an hour after Yeltsin left, about 15 of the 400 people who had stood in our yard remained. Caterers cleaned up, and Secret Service agents buzzed around.

"All that preparation, and he was here for barely an hour," my dad said.

He and my brothers changed into their work clothes and immediately headed back to the field. The visit had interrupted harvest, the busiest time of a farmer's year.

Lajeau Rau, senior in journalism and mass communications, is interviewed by members of the press on her parents' farm before the Yeltsins arrived. While there, Rau often fielded questions from reporters, giving her parents a much-needed break. (Photo by J. Matthew Rhea)

# SEEKING *Political* POWER

**H**ammering signs into yards seemed like a dirty prank kids would play, but for Michelle Smith, sophomore in political science, it was serious business. As a candidate for the Kansas Senate, Smith used the signs to help promote her political campaign.

"It was the Democratic Party that asked me to run," she said. "I had done some work on another candidate's campaign, and they encouraged me to run."

After accepting the ballot position, Smith started her political career. With past campaign experience, she understood how to handle her own. Change was the driving force behind her campaign against Lana Oleen, R-Manhattan.

"I want to see significant changes. I want to see a government that is responsive to the needs and wants of the people," Smith said.

Smith saw changes in her lifestyle, as she was challenged with the task of striking a balance between working on homework and her campaign.

"There was an OK balance, but it depended on the day. Some days it was easier than others," Smith said. "I devoted mornings to classes and school work, and afternoons were filled with campaign work."

Friends and family were instrumental in helping Smith run and promote her campaign. Many of her friends worked with her by handing out campaign materials and planning speaking engagements, but her main supporter was her husband.

"My husband helped a lot. He arranged speaking engagements, put

together and distributed brochures and also put up signs," she said. "Everybody had name tags, and they all agreed that his should say, 'emotional support.'"

While growing up in Leavenworth, Smith was exposed to the military community as well as the civilian side of life.

"I think I am tuned in to mainstream society," she said. "I grew up in a single-parent home. I've experienced the hardships of divorce on families, but I've seen the positive aspects, too."

During her four years in the U.S. Army, Smith learned about government and society. She was also exposed to international life during her three-year tour in Germany.

"I've been involved in both sides of a military community. I understand what the soldiers need and what the civilians need," she said. "Plus, I am involved in the K-State community.

With this knowledge, I feel that I could best serve the people of this district."

The campaign swallowed up much of Smith's time during the fall semester, but she said it was worth it. Although she lost the election to Oleen, Smith said she gained knowledge about the U.S. political system.

"It was definitely a learning experience," Smith said. "I would definitely make some changes next time, but I learned something and that's what matters."

Despite her defeat, Smith said she would run for office again.

"I plan to stay in Kansas and probably in this community," Smith said. "I would run again if I had the chance and the money."

HE'S GOT

# Friends

IN KANSAS

Fans' anticipation ended as country-music singer Garth Brooks stepped on Bramlage Coliseum's stage Sept. 12. Brooks performed for a sold-out crowd of 13,300 fans.

After witnessing problems other states had with crowds waiting in long lines to buy Brooks' tickets, the Bramlage staff decided to sell the tickets through a mail order and lottery system. The lottery was for students who didn't receive tickets through the mail. It was successful, as all 2,800 students who went walked away with a pair of concert tickets.

"I think the lottery system worked extremely well," said Charles Thomas, director of Bramlage Coliseum.

"It was a lot of work for my staff. We had enough ticket requests that we could have done three sold-out shows."

Some students managed to buy tickets as close as three hours before the concert. A section had been reserved for stage equipment, but ended up not being used. Brooks opened the section up to accommodate an additional 150 fans.

"We (my roommates and I) had planned on having a party because none of us had tickets. While we were getting ready, we heard on the radio they were offering behind-the-stage tickets," said Joely Callaway, senior in marketing. "We jumped into the car going 50 mph to Bramlage. I could not believe we got there in one piece and were able to get tickets."

A few students had been willing to do almost anything to get tickets. A Topeka country music radio station, WIBW-FM 97.3, awarded free tickets to fans who performed the craziest acts. Some fans swallowed worms and made human sundaes of themselves trying to win the tickets.

Fans were anxious to see Brooks, but before he took the stage, Martina McBride performed the opening act. The crowd passed time between acts by doing the wave.

"Seeing the whole coliseum doing the wave really got my blood flowing," said Jennifer Keller, sophomore in journalism and mass communications. "It gave the crowd something to do."

Richard Lutze, freshman education, and Greg Gehl, freshman in architectural engineering, await the announcement of their winning numbers. Lutze headed off to claim his ticket after hearing his lottery number called. (Photo by Craig Hacker)

## FRIENDS IN KANSAS

*Continued from page 22*

The crowd went wild when Brooks appeared through an opening in the stage floor. Brooks opened his act with the song "Rodeo" and performed popular songs from all of his albums, including the unreleased album, "The Chase." Brooks entertained the crowd with "Friends in Low Places," and encouraged the crowd to sing along. He also introduced his most recent single, "We Shall Be Free," which had gospel overtones. The crowd enthusiastically responded to the song, which pleased Brooks.

"To get that kind of a response for a song you've never heard before really makes a person feel good," Brooks said.

The crowd responded to all of Brooks' songs throughout the evening as they swayed, sang, clapped and yelled.

"He's a true entertainer," said Louis Funk, junior in civil engineering. "He's there to play for the people."

During the concert, Brooks addressed rumors circulating about his retirement. Brooks said he planned to take a vacation to spend time with his wife, Sandy, and their daughter, Taylor Mayne Pearl. He said he didn't want his fans to be angry with him if he chose not to return to the music industry.

"I don't think he's made up his mind about retirement. I just think he's trying to prepare his fans," Funk said. "It will be a great

loss if he does decide to retire, but that's his choice. He needs to do what's best for him."

After Brooks had finished performing, the audience erupted into a roar of protest that brought Brooks back on stage for an encore performance. Brooks sang another version of "Friends in Low Places." He also sang a rendition of the Georgia Satellites' hit, "Keep Your Hands to Yourself."

Brooks proved he deserved his Entertainer of the Year award as he swung into the crowd hanging from a rope. He also took one fan's camera, reclined on the stage and took a picture of himself with the camera's owner.

Another fan had her picture taken with Brooks during the three hours she spent with him.

"After the concert was over, I got to go backstage and meet him," said Kelli Darting, junior in hotel and restaurant management. "It was great, but I saw how exhausted he was. I knew then his career really was using all of his energy."

Despite Brooks' exhaustion, Darting said he had to deal with 250 screaming fans wanting autographs. Darting said she realized the kind of person he was off the stage.

"It was a very exciting experience, but once it was over I got to really thinking about it," she said. "I realized he's just an ordinary man, like you and me, with a talent and kindness he uses in just the right way to touch people's hearts."

**A**fter learning they won tickets to the Brooks show, Bloxendale and Stava celebrate. Brooks opened his act with the song "Rodeo." (Photo by Craig Hacker)

# BREAKING *A Traditional* BARRIERS

Delane Olgeirson, senior in elementary education, said she always wanted to become a teacher.

"I've had several different jobs and in almost all of them I worked with kids," she said.

Olgeirson was a non-traditional student who waited several years before entering college.

"My very first day of college was on my 36th birthday," Olgeirson said. "This really young kid sat next to me in my class and I thought, 'My God, I could be this boy's mother.' I decided then I would never think of other students as anything but my peers."

Olgeirson's husband and three daughters supported her wish to go back to school. She and her husband decided she needed to be a full-time student.

"He's been after me to go back for years," Olgeirson said. "We decided that if I wanted to graduate before our oldest daughter was ready for college, I should go full-time."

Nancy Bolsen, director of FENIX Adult Student Services, said a quarter of the total student enrollment included non-traditional students.

"Our definition of a non-traditional student is 25 or older, or married and under 25," Bolsen said. "Most of them are in the 25-39 age group, but some have been in their 50s, 60s and 70s who simply appreciate life-long learning," Bolsen said. "Some, and this is the rarity, have been in their 70s and 80s, and have come back to get their degrees."

The reasons for people returning to college varied.

"The variety (of reasons) has to do with some wanting to upgrade

their skills, such as teacher accreditation, or they want a career change," Bolsen said. "Many of them come back because of a change in life circumstances like divorce."

Some found it difficult to go back to school, but there were groups for non-traditional students that offered help, including the Non-Traditional Student Association and FENIX.

"We have child care information, travel information such as ride sharing, and ways to leave emergency numbers where a parent can be reached," Bolsen said. "We also have general information on Manhattan for those non-traditional students who move here to go to school."

Decisions to go back to school can also be hard on families.

Olgeirson's youngest daughter did not like her mother going to college.

"She missed having me there," Olgeirson said. "I'd had time to do those extra things, like extra cooking and sewing."

Olgeirson felt earning her degree was important, and put extra effort into it by taking additional classes. A degree in education required 126 hours, but Olgeirson went beyond that to earn hours in social science and history, in addition to her main area of concentration in German. With busy class schedules, Olgeirson sacrificed time with her family.

"There are times when I miss having that time (at home)," Olgeirson said. "My oldest daughter once told me she knew that what I was doing was important, but sometimes not in school because she wanted the old mom back."

# THE Faithful FOLLOWERS

BY TRINA HOLMES AND MEE SUN LEE

With 102 churches representing 43 denominations, students had a virtual smorgasbord from which to choose.

Lee Ann Sidebottom, senior in horticultural therapy, attended Sunday services at the Grace Baptist Church, but when at home she went to Methodist services. Sidebottom said she did not believe in labeling the different denominations of Christianity.

"I like the Baptist church here because they have an international Sunday school program," Sidebottom said. "I want to work with international students when I graduate."

Peter Gunadisastra, graduate student in electrical engineering, attended the College Heights Baptist Church as a "form of leisure." Gunadisastra said he met people who made him feel at home.

A Christian who hoped to become a stronger follower of the Lord, Gunadisastra enjoyed the services. He attended a Presbyterian church in Indonesia, his home country, but had no problems with attending a church of a different denomination.

"I feel like I'm learning something," he said.

Students not only learned about their religion, but taught others. Jared Swan, freshman in engineering, shared his Mormon beliefs with others.

"We (Mormons) serve on a mis-

sion for two years when we're 19. I paid for it myself and went to Sacramento, Calif.," Swan said. "I worked with Hispanic people there. I visited with them, shared my beliefs and my aspect on what life is about. This helped me learn more about my own beliefs."

Church youth groups also gave students the opportunity to meet those with similar beliefs and share social experiences.

"My church (The Church of Jesus Christ of Latter-Day Saints) has a social activity each week which is open to members and the public," Swan said. "We usually have a dance, get together and watch movies, go Christmas caroling and sponsor a needy family."

Lisa Dunham, junior in elementary education, attended the Crestview Christian Church every weekend to get the support she needed to help her make it through each school week.

"Knowing Christ gives me a more focused outlook on life," Dunham said. "Without Christ, I found my life to be chaotic and unstructured. At Crestview, I feel like part of an extended family

where nobody tries to preach to you."

Yoke Cheng Wong, junior in food science also attended services at Crestview. A Malaysian who transferred from The Wichita State University, Wong attended Sunday worship services and Chinese services.

"This is the only church which has a Chinese service in Manhattan," Wong said. "When I go to church, I become a body of the church. I know I am not alone in this world."

Stephanie Wilson, sophomore in apparel design attended services at The Church of Jesus Christ of Latter-Day Saints, also found a special meaning in church services. She said a debilitating sickness was the only excuse she would use for not going.

"I changed churches when I was a senior in high school, and that's when I gained the testimony of a Father in Heaven," Wilson said. "I enjoy going to church because of the fellowship and the people. That's why I go and keep going — there's a message that seems to be just for me."

Although students kept busy studying, many took the time to attend church services. The faithful students said religion was an important factor to help balance their week. (Photo Illustration by Mike Welchans)

# THE Personal TOUCH

BY SHANE KEYSER

He was a man beginning to show the signs of age. His breath came with an effort, and it took him longer to get up if he sat for too long. That was why he felt he had to leave.

"The cancer has slowed me down tremendously this semester. I thought I would be teaching one more semester or even one more year," said David von Riesen, retired photography instructor. "I have had cancer for three years now. It has just developed more severely this last six months. That is why I had to give up my job as a teacher."

von Riesen, 74, retired from K-State for the second time. He retired the first time from the head of Photographic Services in 1984, a position he served for 21 years. But his retirement was short, as Harry Marsh, professor of journalism, asked von Riesen if he would be interested in teaching a course in photography.

"And that's how I got started," von Riesen said.

He decided to teach his students more than just snapshot photography.

"Since Photography I is an elective course, a lot of students thought it would be easy," von Riesen said. "They found out that to really understand photography, it takes more than just taking snapshots. They learned about the various uses and various functions of a camera."

Students also learned the mechanics of processing and printing

their pictures, as well as different camera techniques.

"He was a good guy to have teaching the course. He was patient when he was teaching the more complicated and technical side of photography," said Jeff Tuttle, a K-State graduate. "He offered a lot of encouragement so the students wouldn't get discouraged."

Students learned through a series of assignments that emphasized capturing creative shots.

"They had five to six diverse assignments, other than what the students were taking pictures of ordinarily," von Riesen said. "They did night views, panning, depth-of-field exercises and found out what different exposures would do. This provided interest and creativity within the person's view of using a camera as more than just a snapshot camera."

The scope of the course went beyond textbook information.

"With all of my experience in commercial and portrait photography, I was able to talk to them about photography and give them information they wouldn't ordinarily find in textbooks," von Riesen said.

Most of his teaching hinged on a theory he developed early in his photographic career — to think and to see.

"I started with an 8 x 10 view camera," von Riesen said. "We didn't just go out and take snapshots with a camera like that. You had to set the camera up on a tripod, look through the ground glass

and through the lens to focus.

"Then you composed what you wanted and didn't have any surplus showing. If you did, you moved in closer or backed up to get the whole scene. You didn't take the time to shoot six, eight or 10 exposures. You shot one, maybe two," he said.

von Riesen said his theory developed out of this experience.

"That is where I got my whole idea of thinking and seeing. We had to think exactly of what we wanted and we had to see what we were going to get," he said.

But teaching others to think and see was hard for von Riesen and even more difficult for the students to learn.

"I still feel that none of us have it. We've got to develop that sense of thinking and seeing," von Riesen said. "We need to take time to look. I think that we've lost the ability to feel and think and see. Some are born with it, some can see what it is and what they can do with it. They are good thinkers. So many of us have to develop that ability to see beyond the surface."

After years of experience, von Riesen was still mastering his technique of thinking and seeing. Although he retired again, he won't give up photography.

"I have ideas for what I'd like to do. As I walk around I see things that would be nice to photograph," he said. "I visualize them in my mind as to what they'd be in a photograph and keep my mind active that way."

David von Riesen uses his talent and knowledge to teach students the art of photography. His theory for good photography work was to think and to see. von Riesen retired from K-State for the second time. (Photo by Shane Keyser)

After driving past this windmill several times, von Riesen took this photo five miles south of Manhattan along Highway 177.

The sparks in this scene caught von Riesen's eye. The photo was taken in one of the industrial or mechanical engineering labs on campus.

“It was a good snowy night to take a picture,” von Riesen said. The picture was taken on Poyntz Avenue looking at Manhattan High School.

Von Riesen captured a historic moment when he photographed Robert Kennedy a few months prior to his assassination. Kennedy made a campaign stop at Ahearn Field House, and was expected to announce his candidacy for the presidential race.

Von Riesen caught former President Ronald Reagan in mid-sentence while covering a Landon Lecture at K-State.

“ We need to take time to look. I think that we’ve lost the ability to feel and think and see. Some are born with it, some can see what it is and what they can do with it. They are good thinkers. So many of us have to develop that ability to see beyond the surface. ”

*David R. von Riesen*

## RELATIONSHIPS

From dealing with the frustrations of living with a sibling, to overcoming the social pressures of homosexual or interracial relationships, students discovered that sharing joys and sorrows with someone special was worth the extra effort.

Couples separated by long distances and married students also experienced the ups and downs of relationships.

"Marriage lets me share my problems and excitement with someone when I have a good day," said Stacy Lacy, senior in computer engineering. "You can't come home and hug your roomie, but you can always hug your wife."

*(Photo Illustration by Mike Welchans)*

Denise and Stacy Lacy have been mixing college and marriage for more than two years. Denise, senior in elementary education, and Stacy, senior in computer engineering, shared household duties, but since Stacy liked to cook, Denise sometimes ended up doing the dishes. (Photo by Margaret Clarkin)

# COHABITATING CUTS COSTS

**M**arried students, like other college students attended classes and worked part-time jobs. But beyond the surface, they shared a commitment of love and respect and supported each other through difficulties.

"Marriage lets me share my problems and excitement with someone when I have a good day," said Stacy Lacy, senior in computer engineering. "You can't come home to hug your roomie, but you can always hug your wife."

In addition, his wife Denise, senior in elementary education, said it was cheaper to live together because of combined supplies and divided costs.

Mark and Amy Barnett, sophomore in business administration and junior in elementary education, respectively, agreed with the Lacys.

"Rather than paying for two places, we consolidated to only one rent payment," Amy said.

Mark said it all balanced out.

"We do better on money since the utilities aren't so expensive," Mark said. "We buy more food, though, so it evens out."

There were disadvantages to marriage, too.

"Since we're both in college, there is not a lot of money," Denise said. "We're poor because we only work part-time."

Another concern for the Lacys was starting a family. Stacy said they decided to wait until they were out of college to have children so they could build a solid foundation and establish their careers.

"Our cat is our child right now. We don't want to have children until we finish school, which is another two years for me," Amy said. "It would be hard, and there's a lot we want to do before we have children. He wants to have a whole football team of children, but I'm thinking probably two or three."

Besides concerns of money and children, neither couple had conflicts about spending time together.

"Seeing each other works out well because we are at class, working from 8 a.m. to 5 p.m. or at extracurricular activities every day," Denise said.

The Lacys agreed that difficulties occurred from stress.

"I encourage him and he encourages me. I give support and a helping hand to help him through when he's having a hard time," Denise said.

Mark and Amy said their schedules were easier this year, allowing more time to study together or visit family. But there were also responsibilities to be divided.

"Mark cooks, as well as vacuums and does laundry. I do the dishes, dust and fold laundry," Amy said. "It is good to share duties. Normally, women have to do it, but we share the responsibilities."

Both couples agreed that marriage was a positive choice in their lives.

"I think the big thing is that if you really care about each other and love each other, you should get married," Stacy said. "Everything else will work out."

BY LISA STAAB

## CONCEALED IDENTITIES

A streetlight illuminated two men casually walking down the sidewalk. When they passed a crowded restaurant, customers glanced at them and then resumed eating. The same men passed by the window again — holding hands. Open mouths, angry stares, and a booming voice yelling insults accompanied their stroll. This was common in the unisexual dating world, as homosexuals were forced to hide their sexual preferences or be subjected to varying degrees of public harassment.

"I'm an open person, but I know I can't hold my boyfriend's hand in the mall," said Robert Coyle, junior in arts and sciences and 1991-92 Bisexual and Gay and Lesbian Society president. "If I do, I'll get a negative response. People stare, get all hostile and verbalize their comments. That really takes away from being comfortable and enjoying time together."

Beth (not her real name) concealed her homosexuality out of fear for her job. When her previous employer found out she was a lesbian, she was fired. But keeping her affection for her girlfriend under wraps wasn't easy.

"As I get older or crazier, one or the other, it's been easier to show my affection in public. It's kind of scary because you don't know what people will do to you," Beth said.

Although publically showing affection was more difficult for homosexuals than heterosexuals, there were similarities in how they met.

"Homosexuals go to bars in Topeka, Wichita, and Kansas City to meet people — just like heterosexuals do. We meet people through organizations or at parties," Beth said.

Coyle said it was easier for him to reveal his homosexuality at college than at his parents' home.

"I've moved out and am getting an identity of my own," he said. "My parents have less control over me here. If they would break apart, I don't have to live with them and they can't kick me out. It's the same way with friends. If they don't like it, I don't have to see them around anymore."

But Coyle said he found acceptance on campus.

"There's a lot of acceptance here," Coyle said. "Groups and organizations allow gay students to get to know one another, find positive role models and help those who want to learn more about gay lifestyles."

Some aspects of unisexual relationships were complicated. Legal problems often hindered serious commitments, making common bonds such as marriage and child rearing difficult. Beth was involved in a relationship and considered marriage a major commitment.

"I've been in a serious relationship for eight months. We are planning on getting married with a ceremony in a gay church," Beth said. "My partner and I are both Christians, so to have a church recognize us as a couple is a strong bond. I would also like to have a child. This presents a problem in itself. If two parents of the same sex are raising a child, when this child goes to school, he or she might be teased. I hope by the time I have children everyone will be more accepting."

BY TRINA HOLMES

Homosexuals, Michael Eaton, sophomore in horticulture and James Roberts, Junction City, are members of Bisexual and Gay and Lesbian Organization and the Metropolitan Community Church. The two met in March at a party and have been friends since. (Photo by David Mayes)

Born 18 minutes apart, Stacy Runnion, senior in secondary education, and fraternal twin brother Tracy, senior in fine arts, are college roommates. The two had been living with each other for the past two years. (Photo by Cary Conover)

# KEEPING FAMILY TIES

When Stacy and Tracy Runnion called home to complain about their roommate, they dialed the same number. The twin brother and sister lived together at college, and often called home to discuss problems with their mother.

"My mom must go crazy when she has her twins yelling at her on the phone," said Stacy, senior in secondary education. "We call when the other is gone to discuss our complaints. She never tells me what Tracy has to say, but suggests I be patient. She never takes sides and only offers advice."

Stacy said their mother reminded them to rely on each other and accept each other's differences. Tracy, senior in fine arts, said learning to get along with his twin helped him deal with others.

"Living together with our differences helps us compromise and understand other people," Tracy said. "I think because we are so different — and we're even related — that we realize other people have differences, too. It seems the people we love the most are the ones we treat the worst."

The twins felt comfortable being roommates.

"It seems natural living together since we are twins and the same age. We shared the same things through high school and came to the same college," said Tracy.

Stacy said arguments occasionally surfaced.

"We say the same things, but with a different viewpoint," Stacy said. "We argue about stupid little things. Since there isn't anyone else to argue with, we take our frustrations out on each other."

Even with the arguments, the twins said they enjoyed living together.

"It is nice to come home to someone to share with," Tracy said. "We are also used to arguing, and it is easier to make up."

Brothers Dave and Jim Randall also lived together. They became roommates after Jim, sophomore in agribusiness, completed four years of service in the Marines.

"When he (Jim) returned, he didn't know anyone and decided to live with me and his best friend," said Dave, senior in fine arts.

Besides being roommates and brothers, the two were also friends.

"We do things together on weekends, so we have more of a friendship. We go to parties or football games," said Jim.

Like the Runnion twins, the Randall brothers also had some arguments.

"We can fight and still make up," Dave said. "Since we lived together before, we know how to make up."

By being roommates, the siblings gained a better understanding of each other.

"We know each other better than anyone else, but when it comes down to the bottom line, we're family, and we can always rely on each other," Stacy said.

# BACKPACKING WITH BABY

**S**itting for countless hours in small desks wasn't a favorite student activity, but for pregnant students, squeezing two people comfortably into the same spot was an even greater challenge.

Dana Sprinkle, senior in elementary education, was a pregnant full-time student who had a hard time finding a comfortable way to sit.

"I couldn't lean over my desk the way I used to. I had to sit straight up. It was hard to read that way and it was uncomfortable," Sprinkle said.

Michelle Shafer, graduate teaching assistant in public speaking, had to sit sideways in the classroom desks.

"I could barely fit into those tiny desks. It was awful. Plus, if I dropped anything I couldn't lean over to pick it up. It was hell," she said.

Along with having to cope with the desks, Shafer had trouble carrying her books to campus. "I liked walking to campus when it was nice out, but into my third trimester I couldn't carry my backpack anymore. I would end up with really bad back spasms. My husband and I had to make arrangements for him to bring my books to school," Shafer said.

Besides dealing with these circumstances, Chrystal Winston, sophomore in construction science, had trouble sitting for long periods of time.

"The circulation would go out of my legs and my back would hurt during class. That made it really hard for me to sit in class," she said. "I looked forward to class breaks because I could move around. Plus, it was a great form of exercise for me."

To help cope with some of the anxieties and problems they faced during their pregnancy, the women developed strong support networks within their family and friends.

"At first I was concerned about how my husband would feel about my being pregnant. But this pregnancy made us happier and it also brought us closer together. Our friends and families were very supportive of our decision," Sprinkle said. "Their support helped me to overcome my anxiety about having a baby while I was still in school."

Sprinkle said most professors were understanding of her situation.

"I told most of my professors right away that I was pregnant. I wanted them to know that I wasn't being rude and leaving in the middle of class. They were really understanding," Sprinkle said.

As for student reactions, Sprinkle said that they were all positive. She said there was something about a baby that made everyone happy.

"I would go to class and my friends would ask me how I was feeling. They were as excited about the baby as I was," Sprinkle said. "They would even take notes and collect handouts for me when I couldn't be there."

All three women continued their schooling after their babies were born. Some sacrifices were made, but the parents felt they were worth it.

"I was supposed to student teach in the spring, but my husband and I decided that I should just take an extra semester instead of pushing myself. It was better for my health and the baby's," Sprinkle said.

BY STEPHANIE HOELZEL

# THREE'S COMPANY

Some off-campus students came home to more than the traditional roommate each night. A few apartments housed co-ed roommates, with two females and one male living together.

Kathy Wasko, junior in journalism and mass communications, Melissa Russell, junior in environmental design, and Bryan Kutz, senior in hotel and restaurant management, decided to room together.

"Bryan is only going to be here for one semester, and he didn't want to try and find an apartment that had a one-semester lease," Wasko said.

Wasko and Kutz were dating and had been for the past four years.

"We are very compatible and have similar personalities," Wasko said. "Melissa's personality is different from ours, but we all get along anyway."

Russell didn't mind living with Kutz because the three of them had been friends for a long time, Wasko said. Russell's boyfriend also didn't mind, and Wasko said that the four of them double dated sometimes.

"Having Brian live here has been good because he helps pay for the rent," Wasko said. "He also is pretty good about cleaning up after himself."

Randy Oliver, senior in arts and sciences, Heather Stayton, senior in pre-veterinary medicine, and Chanc Vanwinkle, senior in pre-veterinary medicine, also tried co-ed living. The three students all met in class.

"I started dating one of the girls, and so I decided to live with her and her roommate," Oliver said.

The three roommates split the chores and picked a day to clean.

"It is fair this way, because we all do our share of the work," Oliver said.

He said his parents did not like the idea of him living with females, but the arrangement was financially convenient.

"It is saving me money, so I'm going to stay for a while," Oliver said.

Ginger Hicks, junior in journalism and mass communications, and Laura Koerth, freshman in human ecology, shared an apartment with Dave Haas, junior in accounting.

Hicks said that she loved having a guy around the apartment.

"Dave repairs broken appliances and other things in the apartment," Hicks said. "It's also good to have a guy around for safety reasons."

Haas, a transfer student from the University of Kansas, was a friend of the two females. He didn't know many people in Manhattan, but had met Hicks through her sister. Neither Hicks nor Koerth's boyfriends or parents cared that they had a male roommate.

"I guess we're old enough now that we're trustworthy," Hicks said.

She said they got along fine, but their schedules were so different that they hardly saw each other.

Hicks said living with a male was not much different from living with a female.

"There are some things I can't do, such as walk around in next-to-nothing," Hicks said. "Our conversations are different, too. For the most part, we just sit around, watch television and study."

## RACE RELATIONS

**M**oving from California to Kansas was a little scary for Kyli Kenyon, sophomore in fine arts. Not only was the atmosphere different, but she didn't know if people would accept her Thai boyfriend of three years.

To her surprise, her new friends easily accepted him. She told them about her boyfriend, who was serving in the Air Force in Nebraska, after she was invited to a friend's party.

"I asked her if it was all right if I brought him along," Kenyon said. "After she agreed, I told her that he was Thai. She said, 'who cares.'"

Kenyon wasn't the only one who found it easy to date someone from a different race. Lea Caffrey, senior in civil engineering, had been dating a Vietnamese man for four years. She met Jonathan Nguyen, senior in business, through a group of friends her first year of college. Caffrey said she didn't have any apprehension about dating him.

"I've had Vietnamese friends since high school. It just seemed natural (to date him)," Caffrey said.

Although Caffrey was worried about how her parents would react, she said they approved of the relationship.

"It (telling them) wasn't as bad as I thought it would be. My parents love him," Caffrey said.

With parental approval, Nguyen and Caffrey introduced her younger sister to a mutual Vietnamese friend. The two of them developed a relationship, too.

Children of mixed marriages had advantages of learning two cultures. Though Nguyen had lived in the United States since he was eight years old, he still practiced his culture and planned to pass it on to his children.

"When we have kids, they will know both Vietnamese and English. He's trying to teach me some Vietnamese now," Caffrey said.

Kim Foxworthy, a teacher at the KSU Child Development Center, said students have learned to look past skin color as a way of classifying people. Foxworthy said the students in her class did not refer to a child as being black or white, but as the one with the long hair, the purple shirt or the blue hat.

Neither Kenyon nor Caffrey were worried about their children having to face prejudice.

"I don't think it matters anymore. All I know is our children will be beautiful," Kenyon said.

Prejudice was not a problem for Pakistani Salah Ali, senior in mechanical engineering, either. The problems he incurred with his American girlfriend were ones that were common in relationships.

"The biggest problem we have is she doesn't like the stubble on my face," Ali said. "Her mother loves me more than my mother."

Both Kenyon and Caffrey agreed that skin color did not matter in a relationship.

"The thing that matters is the personality, not the race," Kenyon said.

BY JENNI STIVERSON

Through the heart aches and the miles, Mike Olds, senior in journalism and mass communications, continued dating his girlfriend, although she lived in Vermont. (Photo by Craig Hacker).

# LOVE ON THE LINE

*If I see you next to never, how can we say forever?  
Wherever you go, whatever you do,  
I will be right here waiting for you.*

**S**tudents involved in long-distance relationships often felt their love lives were a line from Richard Marx's song, "Right Here Waiting."

"It's hard, but if you love someone it's worth it," said Kendall Hart, freshman in arts and sciences, whose boyfriend lived in Costa Rica.

Hart met her boyfriend through her high school Spanish teacher when she went to Costa Rica a year and a half ago.

Because they lived in different countries, visiting each other was costly. A round-trip ticket to Costa Rica cost \$600-\$700, cutting their visiting time to a minimum, making the telephone an important part of their relationship. Hart said a call cost \$1 per minute, so they only talked to each other once a month for 30 minutes.

Hart said that the most economical form of communication was writing one to two letters a week.

"It cost a stamp a page and I usually write four to five pages," Hart said.

Although her boyfriend was not as far away as Costa Rica, Janell McElroy, junior in elementary education, understood the tribulations of long-distance relationships. McElroy's boyfriend attended the University of Missouri.

"Actually, there are pros and cons (to a long-distance relationship)," McElroy said. "It's good because it tests your relationship. It's not easy, but you learn trust. The bad part is that it puts a lot of stress on when you do see him, because you feel everything must go perfectly."

Mike Olds, senior in journalism and mass communications, believed there were no benefits in dating someone not in the same location.

"There is nothing good about it," Olds said. "The bad thing is that I never see her."

Olds and his girlfriend, Colen Juwitt, met in Vermont where they worked together. Olds was a December graduate, and said he was ready to leave K-State.

"I'm ready to get out of here and be with her," Olds said. "She makes it harder for me to wait to get out of here. I am ready to get on with my life with her."

For some students, long-distance relationships were more difficult to get accustomed to than others. Hallie Walker, senior in elementary education, dated her boyfriend for four years before he left for Chicago.

"I spent so much time with him. It was like I lost my best friend," Walker said.

Walker said she didn't like the stress of a long-distance relationship.

"In a relationship you have to work hard anyway, but with the distance, it's twice as hard," Walker said.

# CNN *Journalist* VISITS

**H**e arrived on campus like an everyday man, revealing his friendliness as he spent time between meetings talking to students.

Bernard Shaw, chief anchor for the Cable News Network, visited campus Nov. 19, a day before he was to deliver the 94th Landon Lecture. Shaw spent the extra day meeting with students, faculty and administrators. He also went to Ogden Elementary School and gave a presentation to second-graders.

The next day, Shaw spoke to a capacity crowd of 1,700 people in McCain Auditorium. He addressed America's attitude toward women and said sexism hurts the entire nation.

"We in this country are not putting on the field all of our players," Shaw said. "We can't win this fight unless we change the attitude of women in this nation."

Shaw said the negative attitude of women surfaced in the questioning of Anita Hill, who made allegations of sexual harassment against Clarence Thomas when he was a Supreme Court Justice nominee.

"Regardless of your opinion of how the all-male members of the judiciary committee comported themselves in the confirmation hearings of Supreme Court Justice Clarence Thomas last fall," Shaw said, "the manner in which law Professor Anita Hill was questioned and treated had a profoundly catalytic and explosive impact on politics and American women. The nation will never be the same."

Shaw said the American public

proved they were beginning to realize the importance of women in politics by voting women into government positions. In the 1992 election, 48 women were elected to the U.S. House of Representatives and six women were elected to the U.S. Senate.

"In Washington, before election night, Mrs. Quentin Burdick of North Dakota, Barbara Mikulski of Maryland and Nancy Kassebaum of Kansas were surrounded in one of the most exclusive male-oriented clubs in this country," he said. "Now they have company."

Shaw said sexism was not limited to government positions, but existed in all areas of the work force.

"Women now constitute nearly 50 percent of the United States work force," he said. "Yet, where they work full time, women barely earn an average of 75 cents of the dollar taken home by their male co-workers."

He also said compared to men, many female employees were not given equal opportunities to succeed in their careers.

"The Center for Creative Leadership says on the average, nine out of 10 female managers are pushed into staff jobs such as human resources and public relations—positions that do not lead to the top of corporate America," Shaw said. "Presently, fewer than 6 percent of all the top executives in the United States are female."

## JOURNALIST VISITS

*Continued from page 51*

Sexism only hurts the entire nation's competitiveness in international markets, Shaw said.

"As this (sexism) happens each day in our cities and each day in our states, each day we as a nation of people suffer," he said. "When this great nation suffers, we lose another step in competition because we are failing to use fully our most precious talent and resource — our own people."

He said some corporations were starting to change their attitudes toward women, but were changing too slowly.

"Some companies and work executives are acting with conscience to change the way the work place and society treat women," he said. "Some, not a majority."

Shaw said discrimination against women not only occurred on the job and in salaries, but also in health care.

"Heart disease is the number one killer of American women," Shaw said. "But according to studies, heart disease goes undetected in women until it is virtually too late. As a result, 49 percent of women suffering heart attacks die within one year, compared with 31 percent of men."

Research in health-related issues also revealed sexism, as more money was spent researching how diseases affected men than how the same diseases affected women.

"Over the years, billions more research dollars have gone into studying heart disease among men than women, especially women over 65," Shaw said. "That is a damned outrage."

Sexism also exists in television news, he said.

"There are men over age 50 on television reporting news. They are wrinkled and gray, but we say they have the appearance of being experienced," Shaw said. "It is time

we respect the right of women to wrinkle and gray on the job."

Shaw said America must make basic changes, including stopping subtle and outright actions of sexism. As an example, he said women co-workers should be treated the same as men.

"My boss is Ted Turner," Shaw said. "When we are together, I don't greet him by saying, 'Hi, Ted honey or darling or sweetie.' If I don't do that with him or other males with whom I work, what makes me think I should be able to do it with women?"

He said men must stop treating women in ways men would never tolerate.

"We must change so those who study what we did correctly conclude our society matured and affirmed that a woman does not have to out-man a man to be respected and respectable," he said. "Sexism is a poison we have been drinking far too long."

During Robert Daly's News and Feature Writing class, Shaw listens to students' questions. Shaw told the class that the glamour of journalism had worn off for him, as the competition had become more cutthroat. (Photo by Craig Hacker)

# THE Midnight HOUR

In the wee hours of the night, most students caught up on needed sleep, partied in Aggieville, crammed for tests or worked.

Matt Lowenstein, senior in life sciences, worked as a doorman at Kite's Bar and Grille and the closing shift at Chester E. Peters Recreation Complex. He said the late shift was a good time to earn money and left his days free for other activities.

"They (his jobs) are a source of income mainly to help make it from month to month," Lowenstein said. "I'm able to take care of personal business because they (other businesses) are open during the day, like the bank, the doctor's and campus appointments."

Scott Hedge, senior in hotel and restaurant management, worked at Cactus Jack's as a management intern.

Hedge said he preferred to work during the late shift rather than early shift because the operation ran more smoothly.

"There are fewer kinks on the late shift. The problems have been worked out already that day," Hedge said. "The clientele is more relaxed, and there is not a time constraint as with the lunch rush."

For some students, a night job was easier to find. Mike Rahn, senior in agricultural economics, worked at night as a bartender at T.W. Longhorns.

"Jobs are a lot more available (at night) than jobs with a day shift, possibly due to the high rate of turnover," Rahn said. "I don't mind being a drink flinger. Sometimes you can make incredible amounts of money."

Hedge agreed, and said night jobs were ideal for college students.

"The tips are better," Hedge said. "It is good for a self-financed college student."

However, working late did have disadvantages.

"Sometimes you have to be fake to get a good tip," Rahn said, "and put up with drunks for the bucks."

Lowenstein said he often had trouble getting people to leave at closing time at both his jobs.

"It can be a real pain in the ass. People just don't want to leave at closing," Lowenstein said. "It is the same at Kite's and the Rec."

Lowenstein recalled one episode when he pushed a drunk man out of Kite's.

"It took two of us to get him out," Lowenstein said. "He kept grabbing onto the walls trying to stay inside."

Lowenstein removed him from the bar and kept a watchful eye on the man to ensure he would not re-enter.

"It was really funny after it was all said and done," Lowenstein said. "He was more of a nuisance than a threat."

Besides having to deal with people who didn't want to leave at closing time, working

a night job also took away from personal time.

"You really have to budget your time," Lowenstein said. "It's a hassle if I'm involved in another activity and have to leave for work."

Despite disadvantages, Rahn said it was a tradition in his family to work nights.

"My older brother did it (work nights), I do it and my younger brother does it," he said. "I'm glad I'm doing it while I'm still young."

Hedge and Rahn agreed it was hard to get up for early classes, but an attempt was made to work around class schedules.

"There is not a problem working around class schedules. Management is good about that," Hedge said. "I'm used to getting in at three in the morning and getting up at six. Thank God for weekends."

BY SCOTT OBERKROM

As the night drags on, Rahn sits behind the bar and listens to customers. On the nights he worked, he closed the bar, but what time he closed depended on the number of people in the bar. (Photo by Cary Conover)

Rahn serves a drink to Meryl Volgamore, sophomore in marketing. He worked an average of four hours a week at T.W. Longhorns. Rahn also worked about 20 hours a week at his other job at the University grounds department. (Photo by Cary Conover)

# AN Identity CRISIS

**R**yan Swanson, a doorman at Kite's Bar & Grille, was handed an ID displaying his sister's picture—but the girl standing in front of him was a stranger. Surprised, Swanson, senior in secondary education, did not let the girl enter the bar.

The girl was one of many minors who used fake IDs to avoid the law prohibiting underage drinking, but she was not the only one who had her fake ID confiscated.

Lisa (not her real name) used her older sister's identification. She had the fake ID for a year and used it almost every weekend, until she tried to get into a bar and the bouncer knew her sister.

"It was embarrassing, but it made me mad because I didn't want to have it taken away," Lisa said. "I was scared to go back to that bar."

Tonya (not her real name) also had a fake ID. After she had it two months, she had already used it 10 times to get into the bars free.

"I don't want to pay the \$5 cover charge," Tonya said. "It's definitely worth the price."

Prices varied, depending on the authenticity of the ID. If the creator was a friend, a bargain could be struck somewhere between \$15 to \$30. Others charged as much as \$50, depending on the time and supplies involved.

Every bar had its own method for dealing with the problem.

"We probably see about 40 fake IDs a night and take about 10," Swanson said.

He added that the fake IDs the doormen took were "blatantly bad" and had been physically altered.

TW Longhorns took 10 to 15 fake IDs per weekend, said Steve Fenske, junior in animal sciences and industry and a doorman.

John Green, junior in nuclear engineering and doorman at Kite's, worked in Aggieville for two years. He said most bars offered their doormen \$5 for each fake ID taken because a bar was fined \$300 to \$1,500 for allowing minors to drink.

Fake IDs varied as much as the people who used them.

"I think borrowing somebody else's ID is the most common," Green said. "I've seen people with my friends' IDs and one of a waitress at the bar."

Those who did not borrow an ID had their own altered or attempted to replace the photo with their own.

"Many are just someone else's ID, and they've cut their own picture out and put it on. Out-of-state IDs are used a lot," said Chris Ostrom, senior in English and door man at Snookie's Bar. "I also find a lot of expired licenses."

Green said people went to extremes to get into a bar with an age restriction.

"One guy even used his sister's ID. They actually looked a lot alike. The only reason he got caught was that the sex said female," Green said. "He tried to tell us that was a mistake."

After the IDs were taken, the Alcoholic Beverage Control used them to train people on how to recognize fake ones.

Lynda Wickstrum, Riley County Clerk for the district court's office, said the maximum punishment for having a fake ID was 30 days in jail and/or a \$500 fine.

Many of the doormen didn't agree on the risk involved.

"Unless it was an absolutely perfect job, it's not worth the risk," Fenske said. "Drink at home, then go to the bar — that's what most people do."

BY KIM McNITT

People who use fake IDs often borrowed from a friend or tried to alter their own drivers license. Liquor stores kept the fake IDs they collected and then turned them over to the Alcoholic Beverage Control office. (Photo by Mike Welchans)

Eicher performs card and coin tricks, the backbone of his shows, called slight-of-hand tricks. (Photo by J. Kyle Wyatt)

With slight-of-hand tricks, Eicher said he makes more money than the standard stage magician. Performing at trade shows, Eicher was surrounded by his audience, as opposed to being in front of a crowd, making his job more difficult. Although he doesn't use specially made props, Eicher must have many decks of cards, coins and other every day items at his disposal. (Photo by J. Kyle Wyatt)

**Eric Eicher, senior in secondary education and local magician, has been performing for the past four years. Parties and trade shows were his normal fare, but audiences ranged from children to adults. (Photo by J. Kyle Wyatt)**

# A Tricky TRADE

**W**hen Eric Eicher performed coin and card tricks in his magic shows, there was nothing magical about them.

"It's a trick. It's a card trick and nothing more. I always try to hit that as hard as I can," said Eicher, senior in secondary education. "I don't want to say that I feel it (black magic) is impossible, or that anything they (wizards) do is real. I'm not convinced I know enough to say that it isn't really happening."

Although he believed black magic might exist, he said it was mainly the mentally ill who believed magicians had real power.

"I undercut it (black magic) as much as I can because of a resurgence of the occult right now," he said. "I don't want to get mixed up with that."

Eicher's tricks involved coins and cards. He performed illusions he had perfected since he became interested in magic at age 12. His interest grew, and he eventually performed at shows across the country. In 1988, he performed full-time in Overland Park, Kan., for parties and trade shows.

Eicher said his most bizarre appearance was at the Country Club Plaza in Kansas City, Mo.

"This average Joe walks in with a dozen women and no one else in the audience. The women ranged from normal looking women to really dazzling," Eicher said. "At the end (of the show), I asked how they all knew each other."

At that point, all the women came on stage and tucked Eicher's pay into the top of his pants.

"It turns out the women were all

of his favorite strippers from Kansas City celebrating his birthday with him," Eicher said.

Since returning to school, Eicher cut back on his appearances to have time to study and avoid the constant pressure of getting booked for a show.

"The booking is a feast or famine," Eicher said. "There are times of the year when you are really busy. Then there are other times that are slow."

He learned most of his tricks from books and through lessons from other magicians. Eicher said performing magic was similar to learning to play music.

"Anytime I do a trick, it will be something I put together out of different versions of the same trick. That way, I make what I think may be the best version of the trick," Eicher said.

"Ninety-nine percent of all tricks are not worth learning. It is difficult to find tricks you can stand to do."

Eicher's proudest moment was when he devised a trick called Fast, Faster, Fastest. The trick was published in the book, "Real World Card Stuff."

"I am proud of it. It was something I had worked on over the years," Eicher said. "Now I think it is the best version of that trick I have ever seen. Other magicians might disagree — it's all ego."

Eicher enjoyed performing tricks for smaller groups, especially when the audience contained children.

"The feeling you get from a child watching in wonder is unexplainable," Eicher said. "True magicians feel the entire purpose of magic is fun for all."

BY RANDY TRAYLOR

# FOOD, *Friends* AND FUN

**A**t noon, students flocked to the K-State Union for food, friends and fun. Pushing their way through food lines to grab a quick bite to eat and socializing before wandering back to classes, students found the Union offered a welcome break in the day.

Dale Bixby, senior in chemistry, used the Union during school hours and at night. He said the Union crowd flowed in cycles during the day.

"It was full on the hour almost every day," Bixby said. "At the half hour, there was commotion because people were moving in and out."

Michele Kowalski, freshman in psychology, was a cashier for the Stateroom cafeteria. She also saw daily cycles in the lunch schedules.

"I work lunch every day except Tuesdays, and it gets pretty busy," Kowalski said. "It's usually between noon and 12:30 p.m. when the rush comes. There was also a rush around 3:30 p.m. when office workers took their breaks."

While some students circulated throughout the Union, others slept on couches and chairs in the Cats' Pause Lounge. The room provided students a quiet and relaxing area to kick back, sleep or study.

"I usually come here about once a week to study," said Ted Poppitz, freshman in arts and sciences. "It's quiet up here, a lot quieter than if I were studying at home."

Mike Baalman, senior in information studies, also studied in the Cats' Pause Lounge.

"I don't come here (the Union) very often because I work," Baalman said. "When I do, I usually go to Union Station or the Cats' Pause — those are the quieter areas."

The students not only used the Union during the day, but also stud-

ied there at night.

"I come here at night to study because it's quiet," Bixby said. "I can usually get more done here than if I stayed at home."

Chris Stipe, junior in political science, liked to study and eat at the Union.

"I eat here during the day between classes because I live too far from campus to walk home," Stipe said. "At night I usually study alone in the rear of the Stateroom. I'm a talker, so I need to be by myself in order to get anything done."

The basement of the Union offered even more activities. Students went bowling and played pool and video games. The Union Station was another popular spot where students took country dance lessons and attended a variety of cultural theme nights.

The Union Station also offered new events, including a non-traditional student dance, African-American night and jazz music night. Live entertainment, such as the band Flatlanders, also performed.

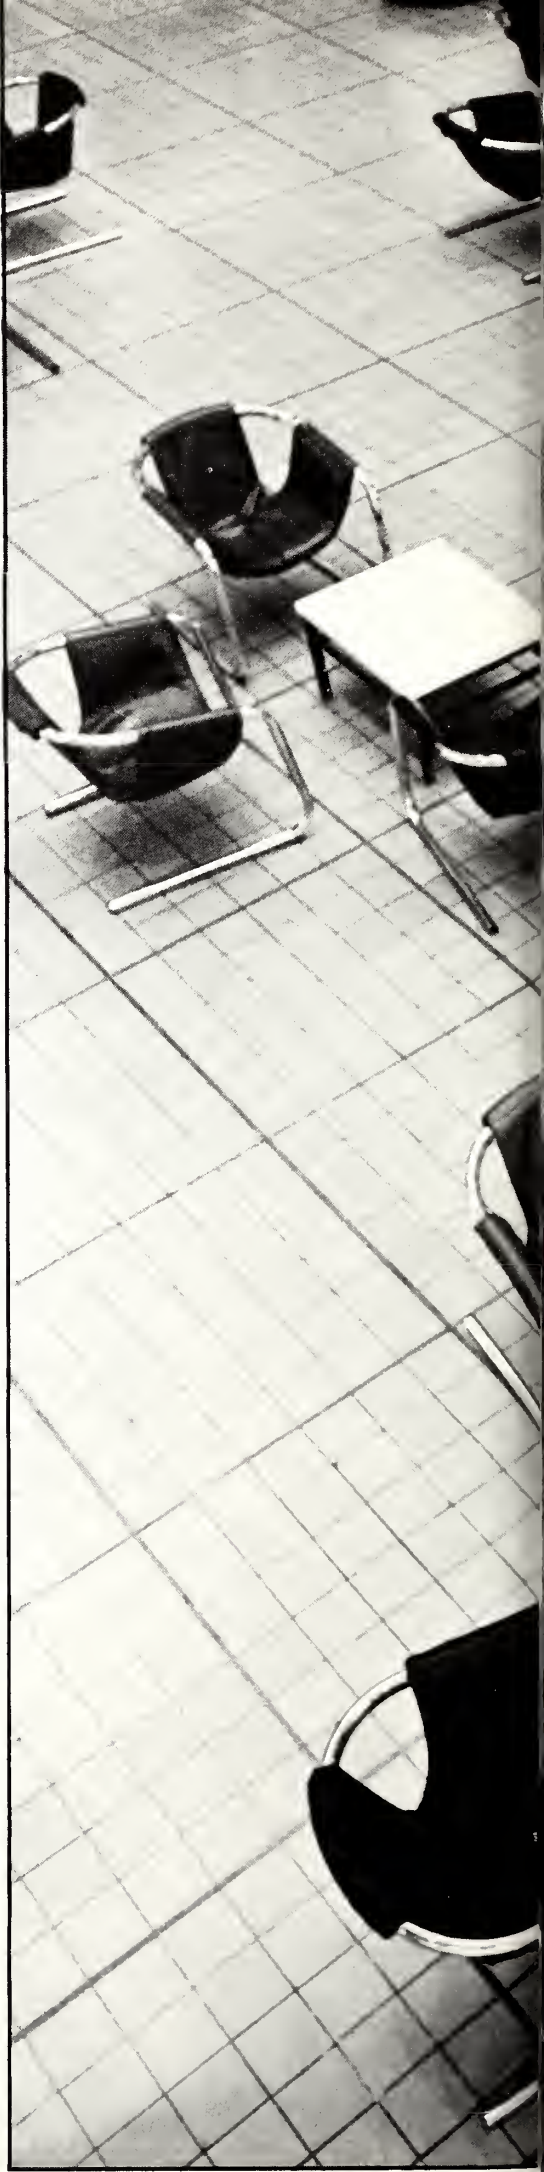

Teto Henderson, Union Station manager, said students were always around.

"When the weather is bad, we usually have more students in here between classes," Henderson said. "They study, eat or just hang out with their friends."

Finals week was always a busy time for student workers in Union Station. Because so many students took advantage of the Union, the hours were extended.

"Three semesters ago, we decided to stay open all night long to give students a place to study during the night," Henderson said. "There has been a great response from the students. That is what we're here for, to serve the students in any way we can."

Wading in synthetic Jell-O, Chris Hupe, senior in finance, prepares to hurl a fist full of slime into his opponent's face. Hupe's team, the Toxic Avengers, won the Jell-O-Rama title. (Photo by J. Kyle Wyatt)

Rubbing the Jell-O out of his hair, a tired wrestler bows his head after the match. The event was held on Nov. 6 in Weber Arena. (Photo by Shane Keyser)

A participant grabs the side of the Jell-O pit to delay his immersion in the slime. The contestants described the synthetic Jell-O mixture as slimy, cold and gritty. The Jell-O-Rama wrestling event was sponsored by Motar Board, Alpha Zeta and the Horseman's Association. (Photo by J. Kyle Wyatt)

# THE Slime PIT

What do you get when you take 300 gallons of a green, Jell-O-like liquid, pour it into a large ring made from hay bales and mattresses covered by a large tarp, add a pound or two of dirt — depending on desired consistency — and then have 30 students and two faculty members churn it for three hours?

The answer is Jell-O-Rama. A student and faculty tag team Jell-O wrestling tournament, the event was a joint fund-raising project by Mortar Board, Alpha Zeta and the Horseman's Association held on Nov. 6 in Weber Arena.

Julie Buzby, junior in animal science and industry and member of all three groups, said Jell-O wrestling was chosen because it was different than any event ever held on campus.

"We wanted something creative. Jell-O wrestling was different, and I thought it would be neat to do something for the first time on campus," she said. "We also wanted a fundraiser that would be fun to do."

Jell-O-Rama was advertised with the slogan, "Come see wrestling like you've never seen it before." Participants were told from the beginning they would not be judged on wrestling ability, due to safety concerns. Instead, they were judged on comic spirit and sportsmanship, Buzby said.

As a result, the majority of the participants dressed in some form of theme-related costumes. These ranged from The Graduates, two wrestlers who wore caps and gowns, to the Toxic Avengers, who donned ski masks for the event.

"Costumes were allowed, but not required," Buzby said. "It was a personal highlight for me to see what everyone came up with."

The men's tournament was broken into seven brackets, with the winning team from each bracket

advancing to the next level. Also, there was an exhibition match between two women's teams.

Trophies were awarded to members of the Toxic Avengers, the winning team in the men's bracket. The team consisted of Chris Hupe, senior in finance, and Blake Kaus, senior in marketing.

"We thought it would be a great way to end the week," he said. "We went into it blindly and just put our minds to having a lot of fun. Seldom do you get to dress up, get in some Jell-O, dance around and try to entertain people. We went crazy and had a good time."

Tammy Shearer, senior in accounting and historian for Mortar Board, participated in the women's exhibition because the only women's team lacked opponents.

"The other two girls signed up, so we agreed to participate," she said.

"It was a good change of pace because it was something that had never been done before, and it attracted a lot of attention."

Although many of the participants referred to the Jell-O-like substance in the pit as slime, it was actually a synthetic mixture. Buzby said it was used because it was cheaper than Jell-O and didn't harm the environment.

Another component of the slime — gritty dirt tracked in from the arena floor — was not planned.

"It was cold and gritty because it was mixed with all that dirt," Shearer said. "When I stepped onto the mat, it was really squishy and felt disgusting."

Despite the messiness, Shearer hoped future organizations would continue the event.

"I thought it was a really good time, and I hope they do it again," she said.

# Attends

# PRODUCTION

On the opening night of the play, Lacey Watson, senior in apparel design, and Jim Purvis, junior in theater, put on their make-up backstage. (Photo by Cary Conover)

**A**fter weeks of stressful rehearsals and anxiety associated with the playwright's visit, the Ebony Theatre Company's fall production was hardly a breeze to produce. On Oct. 29-31, "The First Breeze of Summer" was performed to sold-out crowds at the Purple Masque Theatre.

"It's been a doozy," said Jeneena Hubbard, sophomore in theater and stage manager for the production. "Like any other play, it had rough parts. But with the good cast and crew we had, I must say it turned out rather nicely."

The play, based loosely on playwright Leslie Lee's life, revolved around a teenage boy struggling with his emotions as he faced adulthood. The boy, Lou, not only struggled with his own identity, but was also forced to come to terms with the scandalous past of Gremmar, his grandmother. Gremmar's past was portrayed through a series of flashbacks.

"The play was about realization and reconciliation," said Margaret DeBrown, graduate student in speech and director. "Gremmar had to reconcile with her past while Lou had to deal with his future. He had to accept his color and his grandmother's imperfections."

Lee, who had not seen his play performed for 15 years, was on hand for the production. His visit was sponsored by the Ebony Theatre Company, the provost's office, the Department of Speech and the American Ethnic Studies program.

"I sat next to him during the show. After a few scenes, he told me that he liked what I had done to his play," DeBrown said. "He said that it was very touching."

As a professor of playwriting at New York University, Lee wrote more than 15 scripts for the the-

ater. For television, Lee wrote several scripts including "Almos' a Man" and "Go Tell It on the Mountain." Lee was also a former scriptwriter for "Another World," an NBC soap opera.

Jeffrey Efford, freshman in theater, portrayed Lee as a young man, and said he was impressed Lee had traveled from New York to see the production. Efford said having Lee present didn't make him nervous.

**"I really put myself into my character. I tried to block out the audience and perform my best," Efford said.**

During his visit, Lee attended several playwriting and dramatic structure classes at K-State. He also spent time giving advice to aspiring actors.

"He gave me a lot of advice," Efford said. "He told me to keep on a narrow path and put the theater before anything else."

Putting the production first was what the cast had to do, as rehearsals dominated their lives. Efford said the rehearsals were tiring, but the time spent together allowed the cast to become good friends.

"We really had a bond between us," Efford said. "During the group prayer on the last night of the show, a few of the cast members even became emotional."

Sirfredrick Rivera-Mitchell, a visiting actor from New York University, said the cast helped each other memorize their lines. Other cast members said friendships developed out of the support they gave each other.

"We have been very supportive of each other," said Tammy Grant, senior in physical sciences. "I can say that these people are really my friends now."

BY BELINDA POTTER

# A Holiday

## TRADITION

**H**opping like a bunny down the halls of McCain Auditorium, Kim Humrichouse, a professional dancer with the Tulsa Ballet Theatre, taught a dance to eight-year-olds Helen Yetter and Elizabeth Fry.

"Now lean side to side," Humrichouse said. "Keep your toes pointed. You are going to hop to the back of the stage and sit beside me on a box. You have to be still and quiet. Do you understand?"

The girls nodded in agreement, but Fry looked worried. After fidgeting for a moment, she blurted out her concern.

"Dowe have to smile?" she asked.

"No, you don't have to," Humrichouse said. "But you can if you want to."

Relieved, Fry began practicing the dance. She and Yetter were two of 37 children selected to participate in the Tulsa Ballet Theatre's performance of "The Nutcracker" Dec. 3-4 in McCain. Eighty-five children auditioned for the roles of toy soldiers, bakers, mice, angels, rabbits and clowns. Children were chosen based upon skill and size.

"The Tulsa company doesn't send anyone to conduct the auditions. We had people who were knowledgeable in dance do it," said Richard Martin, director of McCain. "We were sent instructions about the kinds of movements to look for, as well as how tall the children needed to be to fit into the costumes."

At the auditions, the children performed simple dance steps and tumbling movements.

"All of the waiting and sitting at the auditions was worth it," said eight-year-old Katie Claussen, who was cast as a toy soldier. "I'm just happy to be in it."

The children were taught their dances on the day of the first performance. Many children said they

were nervous about performing onstage in front of a large audience.

"I've watched the tape of "The Nutcracker" five times, so I pretty much know my part," Claussen said. "But I'm worried I'll trip and fall off the stage."

Although he wasn't nervous about performing, Zach Fridell, an eight-year-old toy soldier, was concerned about dress requirements.

"I got a letter in the mail telling me to put my hair in a bun," Fridell said. "I don't think they (the Tulsa company) know I'm a boy."

Despite children's worries, Martin said the sold-out performances went as smoothly as possible.

"Some of the children had a few missteps," Martin said, "but that's part of the charm with having children involved."

Parents said the performance was a good learning experience for their children.

"It's always good for kids to be in front of an audience," said Shirley Arck, whose eight-year-old daughter, Jessica, was a baker. "It helps them become more self-confident. This performance is also good because the kids can see how a professional company works."

Matt Droge, 7, said he enjoyed his role as a toy soldier because he danced beside the Nutcracker.

"We (toy soldiers) were kneeling down and the Nutcracker bowed to us," Droge said. "It was weird to be on stage because there were so many lights and so many people watching."

Many of the children said they wanted to grow up to be professional dancers. However, Fry said dancing was only her hobby.

"I'll keep doing ballet for a little while longer," Fry said, "but when I grow up I want to be a pediatrician."

# DESPERATELY Seeking SIBLINGS

Seven-year-old Maggie's laughter filled the car as she chattered about the fun she had with Carolyn. They had spent their time baking cookies and visiting the zoo. Maggie grabbed the bag of cookies she had saved for her mom, hugged Carolyn and closed the car door with a smile.

Carolyn and Maggie were a match in Manhattan's Big Brothers/Big Sisters program. Gwyn Crumplar, executive director of Manhattan's program, said there were 101 big brothers and big sisters with matches.

"The program in Manhattan is one of the most outstanding in the United States," Crumplar said. "We just had our national evaluation, and we were given excellent ratings."

Part of the success of the program was attributed to the \$32,000 raised from the Big Brothers/Big Sisters annual Bowling Classic. The money was used as salary for three full-time workers and paid for office rent and supplies. The program was supported by United Way.

Even with the program's achievements, Crumplar said 50 children were on a waiting list to be matched.

A division of the Big Brothers/Big Sisters program, called Friends of Big Brothers and Big Sisters, planned pizza parties, trips to the zoo and Halloween and Christmas parties so the children didn't feel excluded.

Fraternities and sororities also entertained children on the waiting list. Crumplar said greek organizations sponsored about five or six activities each semester.

"The sorority or fraternity sponsors an event such as skating or bowling, and they cover the cost,"

Crumplar said.

After the student participants spent time with the children, many were inspired to become more involved in the program.

"I've always thought it (being a big sister) would be neat, but I never thought I'd do it until I went to a bowling party with a group," said Lisa Harsh, junior in apparel design. "I met a little girl there who made me want to join the program."

Meeting the girl made Harsh realize the effect she could have on someone's life.

"I want to request that little girl once I am a big sister," Harsh said. "This will give me a chance to make a difference in someone's life while giving part of mine."

There were three requirements volunteers had to meet.

"They must be at least 18, own a car and have insurance coverage and commit a year to the program, spending three to six hours a week with their little (brother or sister)," said Carol Babcock, casework coordinator.

Wes Ray, senior in social work, had been matched with his little brother, Courtney Wilson, for 16 months. He said the program tried to match people according to interests.

"The interest survey is used to match your interests and highlight the kind of little (brother or sister) you'd like to have," Ray said. "We like to play basketball, go bowling, shopping, to movies and games. I help him with his homework."

Sixty-five percent of the program's volunteers were students.

"College students make great volunteers because the children love their age group," Crumplar said.

# MAKING *Musical* NEWS

**A**winding county road led to The Stump, a bar in Alta Vista, population 430. At the end of Main Street, the small building was framed by farm equipment and a snow-covered slope where children's squeals shattered the cool silence. In Aggieville, the bar would have stuck out like an oxen-pulled plow, but on Jan. 23 a sea of students crammed between its walls.

The winter night marked the debut performance of Strawboss, also known as the Kaw River Swamis, a bluegrass band mainly composed of Collegian staff members.

"Originally, we were going to do it (perform at the Stump) for nothing," said David Frese, senior in journalism and mass communications, Collegian columnist and guitar player. "When we got there, they handed us pitcher after pitcher. Then they gave us \$50 to go out and eat breakfast. We don't do it (perform) for the money — we do it just to do it."

The members played together at parties and on porches, but could not pinpoint the day when they considered themselves a band.

"Last summer when Eric (Henry) moved back to town from Hutchinson, we started getting together," said Shawn Bruce, senior in journalism and mass communications, Collegian city-government editor and guitar player. "Every time we'd get together, we'd sit around playing music. Then (Ed) Skoog started coming over, then Todd (Gish), our mandolin player, and Paul (Schmidt), our bass

player, started coming every once in a while. It just kind of took off from there."

The informal organization of the group was reflected in their refusal to become preoccupied with choosing a band name.

"Eric (Henry) has a list on his computer of about 400 conceptual names of bands," said Skoog, senior in English, Collegian columnist and banjo and mandolin player. "Strawboss was on that list. When we played at The Stump, we were the Kaw River Swamis. Not having a permanent name is part of our attempt to subvert the dominant paradigm — to bring about the worker's revolution."

Mood Corn, Fun with Lug Nuts and Skillet Lickers were also names the band members kicked around.

"We all wanted something that sounded kind of goofy, but reflected our agrarian roots," said Henry, graduate student in journalism and mass communications, Collegian staff member and a guitar, banjo and mandolin player.

"A strawboss is a work foreman — the guy who's in charge of the crew that day. The Kaw River Swamis was a crazy thing Ed (Skoog) came up with. Everybody

seems overly concerned with the name stuff. I don't think anybody (in the band) really cares what our name is. We joke around with it more than anything."

Band members spent between 20-40 hours each week working on the Collegian, besides being involved in various campus organizations. This made it difficult to schedule practices.

## MUSICAL NEWS

*Continued from page 70*

"We keep it (practices) low key," Bruce said. "There's never any, 'You practice tonight or you'll be thrown out of the band.'"

Members didn't have to be coerced to play together. Each said they regarded music as a form of stress relief and would play an instrument whether or not they were part of a band.

"I've been playing (guitar) since I was 10," Henry said. "I don't know what I'd do if I didn't play—probably whittle. Everybody has something they do to relieve stress

For Skoog, it was a movie that influenced his decision to play the banjo.

"A couple of weeks after I graduated from high school, I went to work at a welding outfit," Skoog said. "At the same time, I saw 'Deliverance,' which is a great banjo movie. A guy I worked with played the banjo, and we were talking about it. I went down to Capitol City Pawn Shop and bought a banjo for \$100 and learned to play it."

Bruce also taught himself how to play an instrument.

"I got my first guitar at age 16," Bruce said. "I learned two basic chords with my 'Learn to Play Guitar' book accompanied with the audio (tape). I'd go hang out at music stores and ask them how to play it. In high school, I was in the late, great Kruell and the Moosemen — we knew three songs. I was also in a punk band in Lindsborg called Fetal Pig."

Some of the band members also played music that varied from the bluegrass music that characterized the band. However, Henry returned to the bluegrass music his father had introduced him to as a child.

"When I got a guitar for my 10th birthday, my dad showed me a few songs," Henry said. "As I got older, I wanted to play like Eddie Van Halen. Now, I'm back to playing the same three chord songs I learned when I was 10 years old."

"When Dad came down to watch us at The Stump, the neat part for me was the fact that he's the guy who showed me how to play the songs I'm playing now. Bluegrass is a form of music that's passed along. It's different in that way and kind of special."

**Henry, Advanced News and Feature Writing teaching assistant, edits a reporter's story in the Collegian newsroom in Kedzie Hall. Henry began playing the guitar when he was 10. (Photo by Brian W. Kratzer)**

or keep from studying. If we weren't in a band, I'd be sitting in my room playing records."

Frese said he enjoyed hanging out with the band members.

"When you go to college, you expect certain things: plays, people sitting on stoops reciting poetry or sitting on porches playing guitars," he said. "The people I hang out with do those things. It kind of brings all those aspects of college together in one living room."

The group's members had been playing instruments for many years.

# COPS *Cruise* CAMPUS

**A**s the student approached his car, he noticed paper flapping underneath his windshield wiper. On closer inspection, he was angered to find a \$10 parking ticket, one of approximately 10,400 written each year on campus. However, the student shouldn't complain to campus police officers because they didn't write the majority of campus parking tickets.

"Most of the tickets are given out by Parking Services," said Laurie Harrison, dispatcher for the KSU Police Department. "I don't know why students complain to us, except that it's a matter of habit."

Students complaining to the police department about their tickets didn't realize they were frustrated with the wrong organization.

"The biggest gripe we get is over parking tickets, but KSU Parking Services moved last year, and a lot of people still don't know that," Harrison said.

Without the hassle of issuing parking tickets, the police officers had more time to patrol campus.

Charles Beckom, captain of the police department, said police officers' duty was to promote a safe environment on campus. The 17 police officers in the department were assisted by eight cameras posted around campus. The cameras helped police officers keep on top of campus crimes.

"These cameras are interesting. They actually need one person full time," Harrison said. "It should be a position all of its own."

Harrison said the police caught people committing criminal acts with the use of the cameras.

"One night on the graveyard

shift, a car's brake lights were going on and off," he said. "We sent an officer to check it out and caught someone stealing a stereo."

Although the cameras were useful, they were not meant to replace patrolling officers.

"We try to keep up a high profile," Harrison said, "especially at public events."

The police officers worked more hours when campus events took place to ensure safety.

"The officers work at least 40 hours a week, plus overtime, depending on campus functions," Beckom said.

The police officers didn't spend all their time cruising campus in their squad cars. According to the police department's statistics, police officers logged 2,922 walking hours in 1992.

The police department's high profile helped decrease unwanted campus crimes.

"This year seems to be quieter than in the past," Beckom said. "A review of the statistics indicate a smaller percentage of criminal acts than last year."

Beckom said the smaller number of crimes was the result of a team effort with the University.

"Within the campus, there's legislation that has created an awareness for campus safety," he said.

Although the low crime rate made Beckom proud, he said campus organizations deserved some of the credit.

"Our interactions with the student groups concerned about personal safety have helped everyone," he said.

# UNTIL *Daylight* COMES

**C**ollege nightlife.

To some parents, this phrase brought images of their children downing tequila shots at their favorite Aggieville watering hole.

But to students, college nightlife often meant spending long hours on campus catching up with homework and completing projects.

Carolyn Coon, junior in interior architecture, said she spent an average of six hours on campus every night after classes.

"We're in class eight hours a day, from 8:30 (a.m.) to 5:30 (p.m.)," Coon said. "After class, we go home to eat and come back by 7 p.m. Then we stay here until 3 a.m."

Coon was one of many students who opted to spend evenings studying in studios at Seaton Hall, in the stacks at Farrell Library or in one of the 24-hour computer labs located across campus.

Niki Hostetler, sophomore in business administration, worked late-night hours in Dickens Hall's computer lab.

"I'll be spending a lot of time here at night because of my statistics class," she said, "and last semester when I was in Introduction to Personal Computers, I stayed in the labs until one or two in the morning."

During peak times like finals week, labs and studios were often overcrowded by students trying to finish last-minute assignments. Despite the crowd, students were able to use campus areas to their advantage.

"The lab gets pretty crowded, but it's nice because you can get help from other students in the lab," Hostetler said.

Coon agreed.

"Working in the studio at night is beneficial because we can learn from other students," she said.

Getting help from others was just one reason students stayed on campus at night. Joyce Savage, senior in marketing, spent three or four evenings a week studying in Farrell because it was quiet.

"The Union is dark and people are always talking. I usually come here to study because it's quiet," Savage said. "I can study a lot better, and I can keep from falling asleep."

Despite the benefits of working on campus late at night, some students said they experienced problems. Dave Bulte, junior in interior architecture, said sleepiness was the biggest problem he faced.

"To stay awake, I usually do something," he said.

"Sometimes I just get up and wander around and talk to other people."

Besides falling asleep, students were also worried about late-night campus safety. Tangelia Robinson, freshman in industrial engineering, said she often walked alone from Dickens' computer lab to her room in Goodnow Hall.

"I don't work too late — usually until around 10:30 p.m.," she said, "but it's a long way back home and I don't like to walk by myself at night."

Hostetler also disliked walking on campus late at night.

"There's not many people out on campus really late," she said, "but I usually have someone along to walk with me."

BY TODD FLEISCHER

# THE Animal HOUSE

Each workday began with a flip of the cutters.

"We flip the cutters, and the guy who wins has to do all the work," said Corey Krehbiel, herdsman at the Purebred Beef Teaching Research Center and assistant instructor in animal sciences and industry. "It's one of those manly things — you want to be the one who works the whole day while the other guy just drives the truck. When the work is done, you feel satisfied you could do it."

Krehbiel and five student workers took care of the University's cattle at the purebred beef unit, located one-fourth mile north of Parking Lot B3. Beginning at 7 a.m., the workers heaved burlap sacks onto the back of a pick-up truck and distributed feed to the cattle.

"We weigh all the feed," Krehbiel said. "Everything is given in exact measurements. We feed the cattle in the barns twice a day and the cows in the pasture once a day."

Parking the truck next to the barn, Krehbiel and Brad Gray, senior in animal sciences and industry, scrambled up to the barn's loft and tossed hay bales down into the truck. One of the bales Gray threw fell off the truck's bed, causing Krehbiel to laugh.

"Usually, when one of us throws a bale off the truck, we have to do the feeding," Krehbiel said. "But I feel bad because he was

doing all the work."

The beef unit was not only home to Angus, Simmentals, horned Herefords and polled Herefords, but also to Gray, who lived in the barn's apartment to be near the cattle in case of emergencies.

"I heard about the job by word of mouth," Gray said. "I'm here if

purebred industry, and this gives me good experience."

Between February and April, the unit's cattle population boomed.

"We artificially inseminate the cattle. We take semen from the bull and put it in a straw to breed the heifers," Krehbiel said. "That way we know the exact date they will calve."

About 130 heifers gave birth, requiring the workers to be on duty during the night. Every two hours the heifers were checked. Krehbiel said the cattle displayed warning signs before they gave birth.

"An hour before the cows are going to give birth, they stick their tails up," Krehbiel said. "First, we see the water bag, then the feet. If the calf won't come out, we have to help pull."

Krehbiel said the majority of the heifers didn't have problems during delivery.

"We usually let the cows calve on their own," Krehbiel said. "Only one out of 10 need help. If we pull a calf, we hang it upside down to clear out its lungs."

However, on Feb. 5 a heifer had trouble delivering her calf. Krehbiel, Gray and Doug Peine, junior in animal sciences and industry, tried pulling on the calf, but it didn't help.

"The calf was too big for the heifer," Krehbiel said. "She was trying to have it and couldn't. We started pulling

## ANIMAL HOUSE

*Continued from page 78*

the calf, but we could tell it wasn't coming out."

The heifer was taken to the College of Veterinary Medicine, where the calf was delivered through a Caesarean section. After the operation, both the calf and cow returned to the barn and were watched closely.

"It's unusual for a cow to have a Caesarean section," Krehbiel said. "It probably only happens in one out of every 100 cows."

With the births of the calves, the workers had additional duties to perform.

"It takes longer to do chores," Krehbiel said. "We have to make sure we see every calf every day."

The weather was also a factor in determining the amount of time

workers devoted to chores. Krehbiel said both the workers and the animals disliked cold weather.

"When it snows, it takes all day to do the chores. We have to clean the snow out of the banks," Krehbiel said.

"The cows don't like to walk on the frozen ground — it hurts their feet. When it's nice, we can get chores done in half a day."

Although taking care of the cattle was a big responsibility, Krehbiel said he enjoyed his job.

"We have a good time at work — it's not all business," he said. "You get used to getting up early. I like working with cows and being outside. I don't think I'd like to sit behind a desk all day. The job also gives students hands-on experience and prepares them to get a job."

**Brad Gray** coaxes a calving heifer toward the barn from the lower lot. Gray, along with the other herdsman, kept watch over the herd especially close during the spring calving season. (Photo by Brian W. Kratzer)

# THE Expanded WORKOUT

**B**eads of sweat rolled down their foreheads. Their bodies pumped together in rhythm to the music blaring from the stereo. Their hearts pounded feverishly against their chests.

These were students who worked out for a variety of reasons at the Chester E. Peters Recreation Complex. Exercising went beyond lowering cholesterol levels and the Rec Complex served so many students that it was running out of space.

To flatten stomachs, impress new neighbors or relieve stress caused by classes, 3,000 students and faculty used the Rec Complex daily. Although most went to workout, some had ulterior motives when it came to exercising.

"I go to the Rec to look at all the fine guys in the weight room," said Andrea Bono, freshman in arts and sciences. "I like to workout and lift weights every day."

Since so many people attended the Rec Complex, the staff at the check-in counter kept busy. Angie Smith, senior in kinesiology, was the assistant building manager.

"There's never really a slow time of day," Smith said. "There's never a day that goes by that is not extremely busy, even on Friday and Saturday nights."

Since more than 450,000 people took advantage of the Rec Complex yearly, the University planned a major expansion by the Ken Ebert Design Team, a local architectural firm. A student referendum in November 1991 resulted in 81 percent of voters supporting the expansion. Because 78 percent of all students visited the Rec Complex, nearly every rec-goer was in favor of the bill.

The expansion plans included a new weight and fitness room, an

aerobic multipurpose room, a one-eighth-mile indoor touring track with skylights and a video lounge for sports programming. The plans also included renovating the current check-in counter into a resource center.

"This center will be a place for people to find fitness information and current sports literature," said Raydon Robel, director of the Rec Complex. "We haven't figured out how we are going to man it, though."

The \$7.9 million cost was covered with no increase to student fees or tuition. Robel said the University paid off loans with student fees, and instead of lowering the fees after the debts were compensated, the fees were kept at the same amount for the sole purpose of funding the expansion.

"The expansion project was part of the Union/Rec/Football referendum that was passed by the Student Government Association," Robel said.

"There will be no additional fee to the students because we are using money that has simply been redirected."

Although the majority of students used the Rec Complex's services, 22 percent of the student body did not. Bethany Sandercox, sophomore in animal sciences and industry, never attended the Rec Complex.

"I prefer swimming to working out in a hot, sweaty gym," Sandercox said. "But I am not opposed to the expansion because I do use Rec Services. I just go to the Natatorium instead of the Rec Complex."

However, the 3,000 people who attended the Rec Complex daily looked forward to the expansion project's completion in 1994.

# AROUND THE Globe

A Somali aid worker sifts through a pile of wheat at a distribution center for residents of the Bermuda enclave of Mogadishu. Bermuda was the encircled stronghold of the Muyursade clan who held out against General Farah Aidid's forces. Resembling its more famous namesake, Bermuda had people and goods disappear. (Associated Press)

## FEEDING THE MASSES

### UN intervenes to help starving Somalians

**TIME**—Starvation, famine and a brutal civil war prompted the advanced team of the United State's Operation Restore Hope to invade Somalia Dec. 9, 1992.

Spearheading a force of 28,000 troops, the United States sent a three-ship amphibious-assault unit accompanied by 60 Navy warplanes to free the capital city of Mogadishu. Because Somalia did not have any planes or helicopters in flying condition, the mission was unchallenged in the air, as well as on land.

Full-scale civil war broke out in Somalia Nov. 17, 1991. Since then, rivalry between interim President Mohammed Ali Mahdi and General Mohammed Farrah Aidid, members of the same clan, have

caused thousands of civilian casualties.

Besides the deaths caused by untrained armed forces, more lives were lost from malnutrition, disease and starvation. The lack of adequate medical facilities made the death toll even more pronounced. The famine that plagued the country was largely due to the warfare and looting that had ransacked the country since President Siad Barre was overthrown in January 1991.

The conditions in Somalia triggered the United Nation's Security Council's decision to extend humanitarian aid to the struggling country in 1992. In lieu of the dangerous state of Somalia, the Secu-

rity Council suspended rules that limited U.N. peacekeepers from firing the first shot. The United Nations' plan, formed to combat the death toll of 1,000 Somalians per day, required U.S. troops to secure the country for the traditional U.N. peacekeeping force.

The plan was complicated by the anarchic state within Somalia. Many peacekeeping soldiers tried to make their presence less threatening by helping Somalians construct roads and by offering medical assistance. However, this aid was fruitless unless the peacekeeping force stayed long enough to establish an effective governing chain of command.

## UNHAPPILY EVER AFTER

TIME—When Prince Charles married Diana Spencer in July 1981, some outsiders said the marriage was doomed. The Nov. 30, 1992 issue reported the outsiders were right.

News of Diana's fight with bulimia, her alleged suicide attempts and Charles' alleged affair with Camilla Parker-Bowles preceded the announcement that the couple would maintain their marriage in name only. The royal couple would remain married, but live separate lives and share custody of their two sons, Prince William and Prince Harry.

Their differences were evident from the beginning. Diana was 13

years younger than Charles and had the ability to grasp the public's attention. While Diana shone in the limelight, Charles preferred escaping to the country.

As Diana gave speeches about AIDS and sponsored benefits for the elderly, Charles concentrated on founding the Institute for Architecture.

Both had their own interests, so the royal couple's split was no surprise. However, there was still the question of whether Charles and Diana would ascend to the throne. Knowledgeable palace observers said they didn't expect the couple to be coronated since their marriage was such a farce.

Prince Charles and Princess Diana celebrate their fifth wedding anniversary. The couple separated after 12 years together. (Associated Press)

## CLINTON SENDS FOOD PACKS TO BOSNIA

NEWSWEEK—The continuing civil war in the former nation of Yugoslavia caught the attention of the United States in 1992.

President Bill Clinton decided to avoid military intervention. However, he offered the Bosnians pallets of food, medicine and supplies that were mostly dropped at night by U.S. aircraft.

Efforts of the United Nations fell short because of fear of retaliation against French and British peacekeeping troops on Bosnian soil. The U.N. no-fly-zone resolution, passed in October 1992, was not enforced, though Clinton and Bush both promised it would be.

According to the Jan. 4, 1993 issue, a senior administrator for Bush said if the United States sent military ground troops overseas, they would be in danger of destroying American-Russian relations, causing Bush's idea of a "new world order" to vanish.

Two soldiers of the Bosnian Army Civil Defense run across an exposed road on the front line of western Sarajevo in February. The upturned cars provided some protection against snipers. (Associated Press)

## KING VERDICT EVOKES RIOTS IN LOS ANGELES

NEWYORKTIMES—Waves of violence flooded the streets of Los Angeles after the April 29, 1992, acquittal of four white police officers in the beating of Rodney King, a black motorist. King's March 3 beating was videotaped by an amateur cameraman. The 81-second tape, which showed the police officers hitting King 56 times, was submitted as evidence to an all-white jury.

After the jury acquitted the officers, violence erupted in south-central Los Angeles. Stores were looted, motorists were dragged from their cars and beaten, and firefighters were swamped with over 3,500 building fires.

Los Angeles Mayor Frank Jordan declared a state of emergency and imposed a curfew ordering people off the streets from 9 p.m. to 6 a.m. More

than 5,000 federal troops were called in to man roadblocks, provide security for emergency equipment and assist police officers in bringing the area under control.

In a statement outside his attorney's office in Beverly Hills, Calif., King begged for the violence to end.

"People, I just want to say, you know, can we all get along? I mean, we're all stuck here for a while," King said. "Let's try to work it out."

The riots, which ended May 2, caused more than \$500 million in damages. Fifty people died from violence caused by the riots, 2,116 were injured and 9,500 were arrested.

Almost a year after the violence in Los Angeles subsided, the white officers were brought up on federal charges for abusing King's civil rights.

Three young people were arrested after their companions broke the windows of the May Co. Department Store at Wilshire Blvd. and Fairfax Ave. on Thursday, April 30 at about 2 p.m. They had come with about 30 other young people, some of whom were carrying baseball bats, steel rods, axes, beer bottles, soda cans and bottles filled with gasoline. The others fled when police arrived; these three were caught and required to lay on the asphalt while they were handcuffed. Their car was confiscated and they were taken away in a police car. ## FISHER CONVICTED IN SHOOTING

PEOPLEWEEKLY—On Dec. 1, Amy Fisher, a 17-year-old from Long Island, N.Y., was convicted of attempted murder and sentenced in a Mineola, N.Y., courtroom to serve a five- to 15-year sentence for the shooting of Mary Jo Buttafuoco, the wife of her alleged lover.

According to police reports, Fisher approached Mary Jo at the Buttafuoco residence on May 19 to talk about Buttafuoco's 38-year-old husband, Joey. Minutes later, Fisher left Mary Jo bleeding from a gunshot wound on the front porch. According to the June 29 issue, Fisher claimed the gun accidentally fired while she was hitting Mary Jo with the weapon.

"I raised the gun and it went off," Fisher said. "I heard a pop sound and saw blood coming out of her head."

Fisher, a high school senior and alleged prostitute at the time, confessed to firing the gun that wounded Mary Jo. The injuries Mary Jo suffered from the incident included permanent hearing loss, severe nerve damage and double vision.

Fisher allegedly carried on a one-year affair with Joey, who Fisher's attorney claimed was also her pimp. Although the police said Joey confessed he had sexual encounters with Fisher, the Buttafuocos later dismissed allegations of an affair and prostitution ring as ridiculous.

Amy Fisher clasps her hands in a Mineola, N.Y., courtroom Dec. 1 as she listens to Judge Goodman sentence her to serve five to 15 years for the shooting of Mary Jo Buttafuoco, the wife of her alleged lover. (Associated Press)

# AROUND THE *Nation*

Newly elected President Bill Clinton waves to the crowd. At one of Clinton's Inaugural Balls, he surprised guests by supplementing the gala band with a saxophone performance. (Photo by Craig Hacker)

## INAUGURATION CELEBRATION

### Clinton's Speech Focuses on Change

The message of newly inaugurated President Bill Clinton was simple.

"We must make change our friend and not our enemy," he said. "We need a government for tomorrow and not yesterday."

It was a speech well received by the estimated 300,000 people gathered near the west steps of the U.S. Capitol building.

"The speech was impressive," said Amy Sears of Arlington, Va. "I hope he can come through on some of what he has promised. I think the new administration provides a glimmer of hope."

Even political foes conveyed a begrudging respect for Clinton.

"It's a very exciting time," said Sen. Bob Dole, R-Kan. "This is a big celebration and a time for non-partisanship, but we'll have to wait and see what the agenda is. There will be a lot of work to do."

To do that work, Clinton called on young people to serve their community. He reminded the older generation they were borrowing America from the younger generation. Clinton also asked Congress to put aside personal conflicts and work for a better America.

"Let us put aside personal ad-

vantages so we can see the pain and promise of America," Clinton said.

"Let's give this Capitol back to the people to whom it belongs."

An estimated one million jammed the inauguration parade route which followed the inauguration speech. The crowd was treated to a float of Elvis impersonators, as well as traditional parade fare.

Later, Clinton made a mad dash around Washington, D.C., attending six inaugural balls. Those attending the various balls were treated to the music of Fleetwood Mac, Los Lobos and Robert Cray, among others. Clinton himself

added a little saxophone action to a house band.

But to Jim LaRue of Baltimore, Md., the festivities were secondary to the message Clinton gave in his speech's conclusion.

"I thought it was a very good speech," LaRue said. "It was almost Kennedyesque."

As Clinton's voice strained from overuse, he paraphrased JFK's call to action in his 1961 inaugural address.

"We have heard the trumpets. We have heard the call," Clinton said. "Now with God's help, we must answer that call."

The campout was banned indefinitely due to an alleged rape that occurred during the first night of the campout. (Photo by Shane Keyser)

## CAMPOUT CRISIS

### Alleged Rape Prompts New State Law

COLLEGIAN — A K-State campus rape case in which charges against a suspect were dropped because he and the alleged victim had consumed alcohol, sparked action from the Kansas Legislature. On March 3, the Senate and House of Representatives passed two bills prohibiting intoxication to be used as a defense in rape cases.

The bills were written in response to an alleged incident at the September campout for basketball tickets. Mark Mazour, junior in architectural engineering, was arrested and charged with one count each of rape and sodomy. However, Riley County Prosecutor Bill Kennedy didn't prosecute the case because of contradictory evidence.

"What it comes down to is, I didn't think I could make a jury believe beyond a reasonable doubt

that the person who was arrested was guilty of rape," Kennedy said.

However, the new bills could prevent similar cases from being thrown out of court. The Senate bill, which passed 39-0, broadened the definition of rape to include sexual intercourse with persons incapable of giving consent because they were intoxicated or on drugs. It also eliminated marriage as a defense for aggravated indecent liberties with a child less than 16 years of age. The bill was to take effect July 1.

Although Mazour didn't face a court trial, he was disciplined by the University. A four-member committee decided he had violated the University's sexual violence policy.

On Jan. 15, Mazour filed a lawsuit asking the panel's actions to be dropped or modified, and that the

University's sexual violence policy be found unconstitutional. His petition named the University, the Office of the President, the Office of the Dean of Student Life and the panel as defendants.

Mazour raised questions in his petition about bias on the part of Susan Scott, the panel's chairwoman. Mazour also claimed he wasn't allowed to subpoena witnesses and that his attorney wasn't allowed to address the panel or be present during the presentation of testimony and interviews from all witnesses except Mazour.

The University's response denied the accusations and asked the court for monetary compensation from Mazour for costs associated with preparing the transcript and time devoted to the case.

# GOVERNOR APPROVES KANSAS CASINOS

COLLEGIAN — In February, the Kansas House voted 68-57 to pass a bill that would set up procedures for the state to execute gambling compacts with Indian tribes.

The bill would create an 11-member committee to review all Indian gambling compacts. After the committee review, the compacts would be negotiated by a three-member panel, two of the members would be legislators. This would limit the influence of Gov. Joan Finney, who executed the original compacts in a procedure that was overruled by the Kansas Supreme Court.

"The Legislature has to set down the rules for compacts," said Senate Minority Leader Jerry Karr, D-Emporia.

Legislative leaders originally proposed having Finney negotiate compacts on her own, then submit them

to a committee of 10 legislators. Finney had argued the compacts didn't need to be ratified by legislators before the Kansas Supreme Court ruling.

Finney, a strong supporter of Indian gambling, had signed compacts with Kansas tribes

including the Iowa, the Kickapoo, the Prairie Band Potawatomi and the Sac and Fox. A 1988 federal law required states to negotiate with Indian tribes before permitting them to offer casino gambling on reservations. If the state failed to negotiate in good faith, the matter could be taken out of the hands of state lawmakers and to a federal court.

Governor Joan Finney. (Associated Press)

## SOUTHWEST KANSAS COUNTIES THREATEN TO FORM 51ST STATE

COLLEGIAN — In protest to the 32 mill levy initiated by Gov. Joan Finney, nine Kansas school districts in seven counties sued the state.

Taking things a step farther, 20 counties threatened to secede from the state of Kansas in response to inadequate government representation even though they paid higher taxes per capita than their urban counterparts.

"We're paying all the money in taxes, and the money's going to bigger school districts," said Shannon Bozone, senior in

fine arts.

A poll conducted during the presidential primary determined that residents in seven of the counties were highly supportive of the secession movement, so a petition was organized in February 1992.

In September, a constitutional convention was held to approve a constitution for a new independent republic called West Kansas. However, the 150 delegates who attended the convention could not sway the Topeka legislature to listen to their demands.

## ALLEGED DISCRIMINATION

### International Students Charge Jardine With Playing Favorites

COLLEGIAN — Allegations of segregation within housing assignments brought Jardine Terrace Apartments, built for married students and families, to the forefront of campus controversies.

Early in February, segregation accusations were brought to the attention of Charles Walters, junior in pre-law and Jardine mayor, by international student residents. The residents said they had been discriminated against when the apartments were assigned.

One complaint came from Abdellah Laytimi, graduate student

in mechanical engineering. Laytimi said he and his wife had been assigned to a newly renovated apartment, only to discover the apartment was no longer available. However, the Laytimis later noticed students who moved in after them living in the renovated apartments.

"They do give you a choice (of apartments), but when you go in there they say, 'This is all we have, if you look shabby or foreign,'" Laytimi said. "You come to this country to learn different cultures and meet different people, but if you put all the cultures together (in

separate housing arrangements), you don't learn anything."

Susanne Tunstall, family housing coordinator for the Department of Housing, said international students requested to be placed together.

"The way we assign people is mostly by the way they request it," she said. "International students often have friends in a particular building."

After a Jardine Mayor's Council work session on Feb. 24, the five Jardine mayors who were present announced their decision to complete a door-to-door statistical

analysis to determine if segregation existed.

"We're going to try to do some kind of analysis to see what buildings have a segregation problem," said John Askew, senior in education and Jardine mayor. "If it's just two buildings, it may not be as big a problem."

Walters said it was the council's responsibility to complete the analysis.

"All we have to go on now is what we perceive," he said. "We need facts."

The results of the analysis were unavailable at press time.

# NCAA INVESTIGATES CAPRIOTTI'S SCHOLARSHIP FRAUD

A spotless athletic program was scarred by the news of head track and cross country coach John Capriotti's conscious infraction of NCAA rules. Capriotti confessed to altering scholarships for athletes and giving

them additional money from his own paycheck. More than \$10,000 was altered and awarded legally to his team members. Capriotti said he thought it was the only way he could attract

high-caliber athletes to K-State and keep them here.

On Feb. 15, the Wichita Eagle reported the alleged actions of Capriotti.

"There was never money to take care of the athletes the way they should be taken care of. I knew what I was doing was against NCAA rules," Capriotti said. "If we had had enough money in the budget, I wouldn't have been breaking NCAA rules."

Capriotti resigned from K-State and left two nationally ranked cross country teams in November to accept a position with Nike Inc. as a scout. A year before Capriotti's departure, former athletic director Steve Miller also left K-State to accept a job with Nike Inc.

The Kansas State Athletic Department faced

a full investigation of all its programs. The beginning of March brought the conclusion of the internal investigation led by Robert Snell, faculty athletic adviser and professor of civil engineering.

The results were then forwarded to the NCAA for review and their conclusion. Snell would not comment on what he thought the outcome would be before the NCAA conducted their investigation.

"It's in a holding pattern now. I don't know what they'll do," said Jim Epps, senior associate athletic director. "There are violations that go beyond the secondary variety. I would think that they would impose penalties. I don't know what it will be, and I don't want to speculate"

BY JENNI STIVERSON

## RATES INCREASE; SERVICES DECREASE

COLLEGIAN — Due to a February decision by the Department of Housing and Dining Services, students living in the residence halls will no longer receive free use of the laundry facilities beginning the fall of 1993. Dorm residents will pay 75 cents for the washer and 25 cents for the dryer.

"We proposed this change to lower our overall rates. Otherwise, we would have had to increase the installments to more than \$400," said Bob Burgess, assistant director of the Department of Housing.

Besides the proposal to pay for laundry facilities, students will experience an increase in their

monthly payments. Installment payments were \$360 for 1992-93. However, the rates were raised to \$395 for 1993-94.

"The laundry rates concerned me because I didn't want to pay for an increase in monthly payments and laundry services," said Nicole Wagner, junior in dietetics and third-year resident of Moore Hall. "The cost increase goes up about that much each year. I suppose the money is worth it because I'm close to campus, enjoy the prepared food and security, and (K-State) is still cheap compared to other Big Eight universities."

The money gained from the

laundry services was planned to be used to furnish equipment for exercise, computer and study rooms.

"With the money from the laundry services, this will provide us with revenues to do equipment and facility upgrades," Burgess said.

Despite the increased costs and the lack of free laundry facilities, Burgess said incoming students would not be hindered.

"We hope the students will see the advantage of living in residence halls to those students who live off campus. I don't think it (the changes) will affect any new students who will move into residence halls."

## FATAL FALL

COLLEGIAN — Orma Linford, associate professor of political science, died Jan. 28 from injuries sustained after falling at her Manhattan home.

Linford had spent the last 27 of her 57 years at K-State, and former colleagues and students said she would be missed.

"She always had an open door," said Michael Harders, senior in political science and history. "She was compassionate and very witty. I consider this a huge loss to the University. It will be hard to replace her."

Before coming to K-State, Linford received her doctoral degree from the University of Wisconsin. She was promoted to associate professor of political science in 1979. For 10 years she was the director of the pre-law program in the College of Arts and Sciences. She also was a member of the Faculty Senate.

"She built the pre-law program here," said Michael Suleiman, professor of political science. "She was a dedicated teacher, a person of principles and someone who was always ready to help people who were disadvantaged."

### NEW DORM RATES

Single students, per person (per semester)  
Effective July 1, 1993

#### Guaranteed Rate

Guaranteed rate for residents who have maintained continuous occupancy since Spring 1991 and sign a contract by May 1992 — 20 meal plan only.

# CAMPUS CRUSADER

## Bosco works to recruit and retain freshmen

He was identified as the man with purple pride. His office displayed memorabilia, and his actions and words reflected his pride in K-State.

Pat Bosco, vice president for institutional advancement, began his K-State career as a student in 1969. He was involved in leadership, serving as student body president in 1970-71. With a bachelor's degree in elementary education and a master's degree in educational administration, Bosco continued to serve the students.

"I'm a product of the University. It gave me a great deal of self-confidence. The people here 25 years ago were very impactful, and there's nothing I enjoy more than promoting K-State," Bosco said. "I have personal satisfaction in telling people it's a great experience."

Bosco served as a leader of student life, educational and personal development programs and University relations. He was also responsible for providing leadership to the campus through services and programs outside the classroom.

"My position is unique since it is the only one in the Big Eight," he said. "No one else has the opportunity or authority to deal with critical retention issues in specific areas such as housing, recreation, financial aid and leadership opportunities critical to a student remaining at the University until graduation."

Bosco said student retention fueled the success.

"The key to success may not be recruitment, but rather retaining our students until graduation," Bosco said. "They're our success stories. Students feel they're not lost in the crowd. It is a unique niche in a competitive marketplace."

In addition, Bosco played a role in establishing recruitment for K-State through the devel-

opment of admission representatives in 1986.

"President (Jon) Wefald asked me to provide leadership in establishing recent graduates to serve as admission representatives and communicate the programs available to high school students and their families," he said. "Imitation is the greatest form of flattery, and several of our competitors have started similar programs. The admission representatives have been a small effective piece in the complex enrollment process."

Beyond his role of recruitment, Bosco organized three luncheons during the fall, each for 10-12 students.

"Visiting with random freshmen students is a way of getting past the student leaders," he said. "It gives me a chance to hear different perspectives of their initial experiences."

Bosco also initiated the All-University Open House in the mid-'70s.

"It became apparent that although we had good academic programs, we didn't have a University event to promote the college," he said. "The Open House effort needed to be brought together, so I coordinated the programs which have become a model for other universities. We attract 25,000 visitors to this major recruitment effort."

For Bosco, K-State's purple color represented a friendly, caring and responsive university.

"For a big university to have our commitment to students is very special. It's easy for me to show my purple and my pride. I have a position that I can't believe I am paid to do," he said. "I have a chance to help my alma mater, have an impact on students and make a small effort for a better place to learn."

There's times I wake up and reflect that I am a lucky person."

## A PHONE CALL AWAY

---

### peers contact new students

Students who were new to the campus first semester received an unexpected phone call from a complete stranger. What some originally thought was a wrong number turned out to be a fellow K-State student who called them in conjunction with the K-State Cares program.

K-State Cares was the brain child of Pat Bosco, vice president for institutional advancement. Bosco established the student-guardian program because of K-State's concern in recruiting and retaining students.

"There is no other (program) like this in the country," Bosco said, referring to the program where upperclassmen called new students.

The incoming students were contacted between the fourth and sixth week of the semester to make sure they

were adjusting to college life.

"The first six weeks (of college) are the most critical," Bosco said, "and this program has provided us with valuable information in helping students adjust better to the University."

The coordinator of K-State Cares was Pam Barnes, staff assistant for the dean of student life and senior in pre-medicine. Barnes was appointed to her position two years ago. She said the program was beneficial to incoming students.

"New students tend to be really intimidated," Barnes said. "It helps them to have their peers, rather than their designated advisers talk to them."

Between 175-200 student ambassadors spent four evenings over a pe-

riod of two weeks at the 50 telephones located at the Foundation Center. The deans of the various participating colleges were usually present, as was Barnes, in case of a crisis. But the students didn't encounter any crisis situations, Barnes said.

"Their real limitation is whether the students called are at home or not," Barnes said. "We are looking at about 4,500 new students each semester, so even getting half is excellent."

While the calling system was unable to contact all new students, K-State Cares did reach everyone through the mail. The program's goal for future years was to help more than just new students.

"We hope that through this program we will eventually be able to help all students at K-State," Barnes said.

# ALL BUGGED OUT

## entomologists prepare insects for consumption

**W**ith the coming of Parents' Weekend, there were the usual campus tours, trips to Aggieville and the traditional football game, but some students opted for the extraordinary family adventure.

Students and their parents who attended the Department of Entomology's open house were surprised by what they discovered. Along with displays of Madagascar hissing cockroaches, spiders and ticks native to Kansas and green bugs on sorghum, the entomology department prepared their specialty of insects for taste testing.

"We came (to the open house) because my dad wanted to look at the chocolate-covered bugs," said Deanna Tudor, junior in elementary education. "I took an entomology class last spring, and I really enjoyed that. Before I took that class, I never even came over here (to Waters Hall)."

The McGrath family was also drawn to the open house because the insects were unique.

"We came because dad likes to look at bugs. He's a bee keeper, so we thought we'd show him something other than bees," said Ann McGrath, senior in mechanical engineering. "Besides, it's a good thing to know about insects as food in case there is ever a nuclear holocaust."

The featured attraction at the open house was an insect menu that consisted of trail mix with fried mealworms or mealworms dipped in salsa, natural honeycomb, fried grasshoppers and caterpillar tempura. Other

items on display were canned honey bee babies and chocolate-covered ants.

C. Michael Smith, head of the entomology department, was responsible for the insect concoctions. Smith became interested in preparing insects for consumption when he taught the course *Insects and People in Idaho*.

"I got to reading about timely topics, and I discovered that entomophagy, the consumption of insects for food, has been around since John the Baptist in Bible times and much longer," Smith said. "I decided that if we were going to learn about it, let's cook some insects. All the students have survived so far."

Before cooking the insects, Smith put them in the freezer to kill them. Once the bugs were dead, he simply followed the recipe.

"I usually boil them first," said Smith. "It's important that they are washed off thoroughly, and then I just fry them for about five minutes."

Insects were not eaten regularly in the United States, and Smith only used his bug culinary skills on rare occasions.

"I fix insects about once a year," Smith said.

"I fix them for classes at school, and I've done demonstrations for elementary classrooms in the Kansas City area."

When Smith presented his insect specialties, he was often the only one who ate.

"Most people have entomophobia, and they are not interested in touching bugs, let alone eating them," Smith said. "Learning to eat insects is just getting over that fear."

"Most people have entomophobia, and they are not interested in touching bugs, let alone eating them."

C. Michael Smith

## DEAN MARC JOHNSON

### college of agriculture

**Q:** What were your career goals when younger?

**A:** I was interested in being a dentist, but I decided against it because I managed a farm in college and wanted to do something in a larger area than in an oral cavity. I also wanted to be a U.S. Senator because I was interested in public affairs, but since I moved around to different states for my graduate education, I couldn't have a career in politics.

**Q:** What was your first job out of college?

**A:** I was an assistant professor of agricultural economics at Oklahoma State University.

**Q:** Words you live by?

**A:** All men and women are created equal.

**Q:** Where did you attend college?

**A:** I received my bachelor's degree in biology from Emporia State University and my master's degree in international development from North Carolina State University. I received a master's in economics and a doctorate in agricultural economics from Michigan State University.

**Q:** Describe yourself in three words.

**A:** Confident, diligent, thoughtful.

Dumping mealworms into hot baking oil and spices, Mike Smith, professor of entomology, demonstrates that insects can be acceptable food. Smith, who taught at the University of Idaho before coming to K-State two years ago, said he originally became interested in insects as food while teaching the course *Insects and People*. (Photo by Darren Whitley)

A dish of mealworms, which Smith fried in spices, is ready to eat. Prior to cooking them, Smith froze and boiled the worms. Caterpillars and grasshoppers were fried insect favorites. (Photo by Darren Whitley)

# MAKING A HOME

## architecture grads choose to stay in Manhattan

**A**fter graduation, some architecture students stayed in Manhattan to build their own lives while designing other people's homes.

Bruce McMillan, 1973 graduate in architecture, owned and operated two architectural firms in Manhattan and Junction City.

After completing his undergraduate degree, McMillan continued his graduate studies in New Orleans, and Atlanta. Four years later he returned to Manhattan and completed his master's degree.

McMillan, originally from the area surrounding St. Louis said he enjoyed living in Manhattan.

"I've been blessed to spend a good portion of my life here," McMillan said. "The organizational involvement and social and economic understanding of the town makes it attractive to me."

Although Aggieville was a popular place for college students, McMillan said he did not go there often.

"I visit Aggieville infrequently, but I do enjoy eating at some of the Aggieville restaurants once in awhile for a meal," McMillan said.

Another graduate in architecture who re-

sided in Manhattan was Brent Bowman, owner of Brent Bowman and Associates Architects.

Bowman graduated in 1972 and left to pursue careers in the greater Kansas City area and Phoenix but moved back to Manhattan so his two children could grow up in a smaller city.

"I came back to Manhattan because it is a good place to raise my family," Bowman said. "It's a nice community and a university community."

Bowman and his employees worked on and designed many local and University development projects.

Two of his employees, Tracy Reynolds and Pat Schaub, were also K-State graduates in architecture.

"We are currently working on Farrell Library," Bowman said. "We also did Holton Hall and some downtown redevelopments."

Migette Koup, graduate student in architecture, received her bachelor's degree from K-State in 1990. Koup worked for more than a year in Wichita before returning to Manhattan.

"I like the size of Manhattan," Koup said. "There is a hometown feeling (to it)."

*Continued on page 101*

"I've been blessed to spend a good portion of my life here. The organizational involvement and social and economic understanding of the town makes it attractive to me."

### college of architecture and design

**Q:** What were your career goals when younger?

**A:** *To be as good as I could be at whatever I chose to do. That goal hasn't changed.*

**Q:** How many times did you change your major in college?

**A:** *I changed from journalism to architecture to landscape architecture. I liked journalism but in my first journalism class — Journalism 101 — I got an F on my first paper. I've written four books, so I've managed to hang on to my writing skills.*

**Q:** What was your first job out of college?

**A:** *Working for a landscape architect in Fort Lauderdale, Fla.*

**Q:** What advice would you offer to college students?

**A:** *Never skip being a student. Many young people today presume that getting degree is the end of the line. I have found this is definitely not the case. The students need to understand it's just the beginning — learning is a life-long process.*

Architect, Patrick Schaub, 1989 graduated, prepares to trace a portion of a blueprint at a drafting table. (Photo by Darren Whitley)

Graduate student in architecture, Migette Koup tries to find a good carpet match for an upholstery sample while working for Ken Ebert Design Group. Although her original schooling was focused on architecture, she did some interior designing to help finish off the interiors of buildings. "Between the codes and client's tastes, the job was challenging," Koup said. (Photo by Darren Whitley)

*Continued from page 98*

Koup said she and her husband enjoyed living in a small town.

"I was excited to come back to Manhattan," Koup said. "There are lots of educational opportunities with the campus, and the area is culturally diverse and active."

The local scenery and continual community activities, which Manhattan offered, were another benefit to living in the area, Koup said.

"The location of Manhattan in the Flint Hills makes it one of the most beautiful parts of the country," Koup said. "My husband and I enjoy the beauty in the area."

Koup also said the campus offered programs for the community. These activities included theater productions, operas, musical performances and lectures by guest speakers.

"There is a lot of outreach due to the campus," Koup said.

She and her husband did not visit the students' night spots, but sometimes went to Rusty's Last Chance to eat Sunday lunch or meet friends.

"We definitely don't care for the bar scene when the younger crowd comes out," Koup said.

Former students who chose to begin families remained in Manhattan for a small town atmosphere with urban conveniences. Those who wanted to continue in the students' frame of mind could return to Aggieville. Those who preferred to stay away from Aggieville could attend local events offered by the students and faculty of K-State.

**K**-State graduates Ron Frey, Ken Ebert, Mike Mayo and Rob Westberg look over a model of their firm's design which should complete the Chester E. Peters Recreational Complex. The four, along with Migette Koup, work for Ken Ebert Design Group as architects. (Photo by Darren Whitley)

# WITHIN THE LAW

## attorney gives free legal advice

All students paid an activity fee, but most were unaware of services the fee provided.

One fee service, limited legal aid, provided students legal counseling, limited representation, legal document preparation and appropriate referrals through Legal Services.

Because the office didn't advertise its services, Dianne Urban, an attorney for Legal Services since 1983, said students learned of the organization through word of mouth.

Legal Services, controlled by the Student Governing Association, began in 1971 to help students understand their legal rights and responsibilities. Urbansaid she counseled students on nearly every type of legal matter including University-related problems such as cheating accusations, unfair grading and breaking the student conduct code.

"I probably see a lot more consumer, landlord/tenant and University problems than a local attorney in private practice," she said. "I am the first attorney students should approach if they have no funds."

Urban also gave advice on traffic offenses, crime, divorce, health insurance and immigration. She wrote wills, powers of attorney and contracts for students.

Urban said if a student were accused of a crime, she would advise him or her of the right to remain silent. But with University problems, she helped students help themselves.

"Regarding disputes with the University," she said, "I advise. I help students write letters,

but I do not make direct contact with University personnel. I help students serve as their own advocates."

She also provided them copies of procedures and rules.

"Anything my clients tell me is confidential, and no one tells me how to advise them," she said. "Ethical rules require that I be independent."

Although she advised students, Urban did not have the power to sue.

"The only time we have the power to sue is if the case is in the general interest of the student body as a whole," she said.

Before Urban represented a student in litigation, approval of the case was made by a board composed of the University attorney, a faculty member who was also an attorney, two students appointed by the student body president and the Legal Services' attorney.

During the 1990-91 fiscal year, Urban advised 924 students. But this number did not reflect phone calls, walk-ins, general information inquiries and repeated visits by the same

client.

Before joining Legal Services, Urban served as an assistant Riley County attorney and had her own legal practice. She said she was satisfied with her University job and enjoyed working with students.

"I've met some fascinating people, and the university setting is great," Urban said. "I see many types of people, and I enjoy working with the students. The University campus is a nice place to be."

"Anything my clients tell me is confidential, and no one tells me how to advise them."

# CAREERS FOR CREDIT

## internships spark employment opportunities

**W**hile working toward a degree, some students often felt their college education was nothing more than a blur of tests, projects and expensive books. However, a number of majors encouraged students to experience first-hand what their chosen career entailed.

Through internships both in Manhattan and around the world, students worked to gain a better idea about their area of study.

Not all students were required to participate in internships, but many wanted to broaden their education and decide if they were happy in their chosen field of study.

Shawn Potts, senior in animal sciences and industry, had an internship at Ward Feed Yard near Larned, Kan., during the summer.

"Being from the grasslands of the Flint Hills, my only experience is with a cow/calf operation," Potts said. "I wanted to know more about the industry, so I chose to work in a feedlot."

He said the internship was beneficial, because he gained knowledge through the experience.

"I learned about the other aspects of the feed yard, but I spent most of my time in the processing shed," he said. "My job was to give the cattle coming in all the required vaccinations and ear tag them."

Potts said he quickly learned what pleased his employer. On his first day, Potts helped move cattle past the office into nearby pens. Not realizing how proud his employer was of the lawn in front of the office, he allowed some of the cattle to eat the grass. He was quickly informed of his mistake.

Students in animal sciences and industry received college credit for summer jobs that allowed them to work in every aspect of the business, said Calvin Drake, professor of animal sciences and industry.

"There are no set requirements. As soon as I set some, it will keep someone from getting to do something they wanted to do," he said.

Students in the department had internships with Iowa Beef Processors, Upjohn and American Breeding Services.

But students didn't have to travel far for internships — some departments offered internships on campus.

Speech pathology students worked in a laboratory on campus, and biology students worked at the Center for Basic Cancer Research in Ackert Hall. The biology student interns worked in the laboratory with a lab team in return for a scholarship, said William Feyerharm,

associate dean of the College of Arts and Sciences.

Heideh Fattaey, research assistant in the Center for Basic Cancer Research, received a scholarship to work in the lab in 1984 and decided to stay after graduation. She studied the effect of cell growth inhibitor on DNA synthesis of cells.

"Working in the lab gave me a good appreciation of what I learned as an undergraduate," Fattaey said.

She said her research didn't feel like a job once she became involved in the lab.

"Undergraduate opinions change about research once they do it," she said. "After you work in the lab, you don't feel as though you have to work a set number of hours — you actually want to come in and work."

Fattaey's internship helped her decide she was happy in her chosen field.

"Working in the lab gave me the incentive to continue in cancer research," she said. "It opens your eyes up to what you can do."

Fattaey said working in the research labs was excellent hands-on experience because students could attend classes, receive up to four hours of credit and stay on campus.

Students in the College of Arts and Sciences also participated in internship opportunities that varied from working in museums and police departments to design firms and newspapers.

But other colleges also offered internships. Interior architecture students were given the option of completing a 30-week internship during the spring and summer of their fourth year.

"Students go out and test their capabilities in a regular office situation under the guidance of professionals," said Gene McGraw, professor of interior architecture. "After the intense nine-month experience, they look at their education themselves to see in their last year where they may do some fine-tuning or make adjustments."

Interior architecture students have worked with firms such as the Disney Development Company and Union Pacific Railroad.

"It gives them a marked advantage in applying for a job when they graduate, in that they have almost a year of experience," McGraw said. "They also get the chance to do a lot of networking with other firms."

Drake agreed internships were beneficial to students.

"Internships are an experience everyone should have," Drake said. "Even if the experience is bad, it is a learning experience that will help the student when they get a job after graduation."

# THE DOG TRACKERS

## scientists search for dna fingerprints

**T**f the 254,000 greyhounds registered with the National Greyhound Association were stolen, the only methods available for recovering them would be physical descriptions and registration numbers.

Three K-State professors in the College of Veterinary Medicine worked to change that.

Since April 1992 they have researched a method to identify greyhounds through blood tests.

A \$38,000 grant from the Kansas Racing Commission was used by Deryl Troyer, associate professor of anatomy and physiology, Joseph Smith, professor of pathology and microbiology, and Nathan Gabbert, associate professor of clinical sciences, to search for genetic signatures that would identify a greyhound by using one of its relatives. Once they succeeded, a simple blood test could be used to reveal a positive identification.

Greyhound racing was big business, and the standard method for identifying the dogs was inadequate. Dogs were tattooed on the ear, but this was unsuccessful in stopping dog thieves. Greyhounds were often found with the marked ear missing or decomposed so the tattoo was unreadable. The new method was designed to reveal the dogs' parentage.

"Breeders want to know the true parentage of the dogs they purchase," said Gary

Guccione, secretary and treasurer of the National Greyhound Association.

Troyer said finding the DNA signature was not an easy task. "We have worked with parentage by taking samples from litter mates, the dam and possible sires, and are trying to match them together," Troyer said. "It's been difficult because of the lack of diversity."

"We have worked with parentage by taking samples from litter mates, the dam and possible sires, and are trying to match them together. It's been difficult because of the lack of diversity."

Deryl Troyer

Finding the "DNA fingerprint" was difficult because racing greyhounds were selected and bred for their speed, causing genetic variability to be low.

"The process we use requires that we collect blood or tissue and extract the DNA to purify it," Troyer said. "We then use PCR (polymers chain reaction) to amplify a small segment then separate the sizes. They are transferred to a membrane, and the probes are labeled. The probes are then allowed to hybridize so we can visualize the fragments."

They tried six different PCR markers, but only one was effective. Markers were used to avoid genetic disorders because these disorders were linked to disease-causing genes.

If successful, veterinarians could use blood samples to identify dogs, but these screenings would be expensive.

"A cost-efficient way must be developed if owners are going to be able to use this method effectively," Troyer said.

## DEAN MICHAEL LORENZ

### college of veterinary medicine

**Q:** What were your career goals when younger?

**A:** I wanted to be a college basketball player and veterinarian.

**Q:** Where did you attend college?

**A:** I attended Oklahoma State University where I received my bachelor's degree in agriculture and my doctor of veterinary medicine. I am a native of Oklahoma, but came to K-State after I had done some cooperative work with the University and thought it was a good move to come here.

**Q:** What were your favorite classes?

**A:** I liked biology, zoology, pathology, clinical medicine and physiology because I had an interest in biological and medical sciences. I like to try to understand how the body works.

**Q:** What was your first job out of college?

**A:** My internship in small animal medicine at the College of Veterinary Medicine at Cornell University was a good experience. My emphasis has always been small animal species.

**Q:** Words you live by?

**A:** Above all else, do no harm.

DNA is injected into a gel cast by Margarita Camarra, senior in animal science. The DNA was dyed so it could be compared to samples from other dogs. (Photo by Mike Welchans)

Tom Swafford, junior in pre-veterinary medicine, cleans plates used in casting gels. Undergraduates assisted the faculty in the lab as they searched for a "DNA fingerprint." (Photo by Mike Welchans)

The process of loading the DNA to be put in a gel cast is begun by Carlos Ruiz, senior in animal science. Researchers did not expect the search to be easy. (Photo by Mike Welchans)

# HELP FROM HOLTZ

## interviews and resume workshops offered

On-campus interviews offered by the Career Planning and Placement Center in Holtz Hall were popular and benefited both students and employers.

"We bring employers on campus and expose them to topnotch candidates," said James Akin, Career Planning and Placement Center director. "We have about 325-500 on-campus interviews per school year."

The Marketing Club worked with the center to coordinate Career Day and plan mock interviews. Over 56 companies sent representatives so students of all majors could learn more about specific companies.

"Career Day is an excellent way for the students to get in contact with the recruiter before an interview to find out if that is the company they are interested in," said Cristal Janovec, senior in marketing and Marketing Club assistant vice president of special products.

After Career Day, mock interviews were available for juniors and seniors majoring in business. Thirteen companies interviewed and critiqued students with constructive criticism.

"I gained experience for future interviews," said Barbie Strege, senior in marketing. "It was a great way to learn questions they ask and the format which interviews follow."

The center was a gateway of career options for students who took time to see what the center offered. Dan Sommers, senior in chemical engineering, took advantage of several programs the center offered while searching for an internship opportunity.

"I had someone at Holtz Hall look over my resume, and I've also interviewed there with companies such as Dow Chemical," Sommers said. "I was really impressed. I didn't think that the University would offer services like the Career Planning and Placement Center does."

For many students, job searches started at Holtz.

"It (the center) offers a larger exposure to the companies you want to interview with," said Dan Wicker, senior in accounting. "It was a benefit having companies come to K-State and look for students, rather than going out and looking for the companies."

However, interviews were not the sole purpose of the center. The center also published job vacancies in bulletins and maintained a career and employer resource area consisting of over 5,000 file folders, 200 video tapes and binders providing students information about various organizations.

The goal of the center was training and assisting students in conducting a successful job search and helping them use potential resources.

"We provide training for the job search and help develop skills needed to market one's self," said Tracey Fraser, assistant director of the center.

Akin found personal satisfaction in helping students at the center.

"The best reward is when a student comes in frustrated, and after we help them, they leave with a spring in their step and a better feeling about their future and themselves," Akin said.

"We develop skills needed to market one's self."

Tracey Fraser

# COUPLE OF DOLLARS

## professors make most of time together

She was married to money. She devoted her life to one dollar — John Dollar, to be exact. For 38 years, John and Diane Dollar had spent their lives together, but each had a different story about how they first met. John said he was introduced to Diane through a friend of her mother's. Diane said she met John at Varney's Book Store in Aggieville while working as a salesclerk.

"I often watched the side door or the front door," she said. "Whenever I saw someone good-looking come through the doors, I would hunch over and run behind the counter and pop up in front of them."

Diane said John resembled Rock Hudson and was the best-looking man to walk into Varney's.

That same evening, John called Diane to ask her out on a date. He said the rest of the story was history as they married in 1955.

Both pursued teaching careers at the University. John served as the College of Engineering's assistant dean and was also a professor of electrical engineering. He said he took the job to earn money.

"Teaching at K-State was a matter of eating at that particular point in time," he said, "but after 32 years, I can say I enjoy it here."

Diane, an art professor, became a teacher to keep active.

"I was playing bridge one day with a group of friends when I decided I didn't want to do this the rest of my life," she said. "When I visited the campus the next day, I was told if I enrolled as a graduate student, they

would pay me to go to school and be a GTA (graduate teaching assistant) at the same time."

Since teaching consumed the majority of their time, personal time was important to both John and Diane.

"We try to see each other on weekends. We're not sociable with other people because we spend a lot of time together," she said. "The secret to our marriage is seeing each other evenings and weekends. Spending time together doesn't require the presence of other people, so when we're alone we're particularly quiet."

Their schedules as teachers often caused conflicts.

"Sometimes our schedules don't mesh with one another's," John said. "However, we both enjoy what we are doing, so we work through the problems that come up."

Both Dollars said they enjoyed their individual careers.

John, who retired Jan. 17, 1993, said the increase from 950 students to almost 2,900 students in the College of Engineering from 1974 to 1982 was the highlight of his career.

"Just being involved with the growth of the University as a student and faculty member is a highlight," John said.

Diane said she also received personal rewards throughout her career.

"Seeing my illustrations get published in children's books, and the fact that I enjoy what I do has been a personal achievement," she said. "I think everybody should major in their hobby because then they are always having fun."

"The secret to our marriage is seeing each other evenings and weekends."

Diane Dollar

## DEAN DONALD RATHBONE

### college of engineering

Q: What were your career goals when younger?

A: I either wanted to be an outstanding engineer in industry or an outstanding professor in higher education and a competitive golfer.

Q: Where did you attend college?

A: I received my bachelor's degree in electrical engineering from Purdue University, my master's degree in electrical engineering from Northwestern University and my doctorate from the University of Pittsburgh.

Q: Describe yourself in three words.

A: Hard-working, diplomatic, visionary.

Q: Words you live by?

A: No man is an island unto himself. Also, commitment and integrity.

Q: What was your first job out of college?

A: I was an engineer for the Westinghouse Electric Corporation.

Q: What advice would you offer college students?

A: Be organized. Work hard at your studies but find time to have fun and participate in extracurricular activities. Also, support your university.

During the fall semester, the representatives spend three or four days a week visiting high schools. (Photo by Craig Hacker)

# PROMOTING PURPLE

## representatives recruit prospective students

**S**preading the purple pride. This was the mission of K-State admissions representatives.

The representatives were K-State graduates who shared their enthusiasm and experiences with high school seniors. They also helped with alumni events and prospective students' on-campus visits.

"The program works because K-State is an easy product to sell," said Jan Puls, 1992 graduate in journalism and mass communications. "We're enthusiastic about the school, and we believe in it."

Todd Huck, 1991 graduate in history, agreed.

"My parents and siblings grew up at K-State, and I wanted to give something back," he said. "The representatives have the spirit to share with others."

The admissions representatives' program was initiated in 1986 by Pat Bosco, vice president for institutional advancement. Huck said representatives learned about the position through newspaper ads. Those interested had an application process to complete, followed by an interview for a chosen few. The representatives were chosen after the interviews and received three weeks of training in July.

"The basic purpose is to believe in K-State and believe in purple," Puls said.

Seven admissions representatives visited Kansas high schools as well as designated regions in Missouri, Nebraska, Colorado and Chicago.

"We push the opportunity of a large university with a small campus atmosphere," Huck said. "It's a Big Eight school with many majors to choose from,

supportive services and a friendly attitude of students, faculty and administrators. We want the students to know about K-State and emphasize the quality of academics."

Creating a comfort zone was nearly as important as emphasizing academic quality.

"We draw on our own experiences and share them with students. I emphasize that it is a comfortable campus, and it's an easy transition from high school," Puls said. "We've got the best of both worlds here, and a student won't get lost in the crowd."

During the fall semester, the representatives spent three

or four days a week visiting high schools. They also presented programs in different areas and offered regional visits to the University for seniors. Students who visited K-State received a tour, met with Greek Affairs representatives and talked with advisers from their desired curriculum.

"We stress visiting the campus to check out the atmosphere," Huck said. "We like to encourage them to find out about their major. After the visit, a follow-up with the students is also very important. We don't want to give wrong information, so if we don't know, we find the right answer and call the student back."

For prospective students who visited the campus, the recruiter was often the only personal tie they had to K-State.

"We're supposed to be the familiar face for the new student. We offer direction to the students," Puls said. "It's never the same thing — never a day just like the day before.

I meet a lot of people and I feel like we help them a lot. I really like what I do."

"The representatives have the spirit to share with others."

# DOWN TO DETAILS

## Coleman makes facts his business

Sept. 9, 1969, wasn't a memorable day for most students, but for Richard P. Coleman, professor of marketing, it was a day of discovery. On that day, he decided to start using orange juice concentrate. In June 1981, he chose Minute Maid as his preferred brand. The man who remembered such detailed facts prided himself on remembering students' names.

"I couldn't teach a class full of faceless and nameless people," Coleman said. "I decided to learn the names of my students and something about them as individuals."

Each student who took one of Coleman's classes was required to write a personal paper about themselves and their most recent purchasing decisions. After reading their papers, Coleman pulled out his Royal Purple yearbook, looked the student up and began memorizing their identities. The information was reinforced by a follow-up interview with Coleman because interaction with students was crucial for him to successfully teach his courses.

Coleman was known to schedule meetings and engagements for precise times of the day — times like 12:08 for a lunch date or 11:34 for the starting time of a meeting.

"I am more precise than the average person," Coleman said. "It makes life more interesting."

Coleman also conducted meetings for his students in his meticulously decorated house. He went to great lengths to make sure every detail was attended to, including keeping the furniture looking like new.

Doug Drotz, senior in business administration, went to Coleman's house for a meeting and

was impressed by the exact order he found.

"His (Coleman's) house was spotless. Everything had its own place." Drotz said, "It's as though every plant had just the right amount of leaves for the room it was in."

Coleman paid careful attention to details when he bought his house.

"I wanted to find a place close to campus so my students would have easy access, that way they would be able to have meetings and turn in assignments to me without having to drive all the way out of town," Coleman said. "Plus, I wanted to be close to campus to stay involved."

Coleman was known for his detailed studies of social classes and social living areas around the country. Social class maps hung on the walls of his house. The maps had intricate color blocks highlighting the different social areas.

"He has tremendous knowledge of social classes. This was apparent with the maps and his in-depth discussions on the topic," Drotz said.

Coleman was close to his students. He found out about their previous school records and test results. He was the professor who wanted to know everything about everybody.

"I have been a judge for eight of the last 12 homecomings," Coleman said. "It shows people think I am a good judge of character and that I judge people well. It might even be that I am a bit of a gossip and know what the people are like."

Details were an important part of Coleman's life. They provided him with vivid images to remember things by. From orange juice to student names, he remembered them all.

"I couldn't teach a class full of faceless and nameless people."

Richard P. Coleman

## DEAN DAN SHORT

### college of business

**Q:** What were your career goals when younger?

**A:** I paid for my college expenses by working as a radio announcer. My dream was to have a program on WNEW, which at the time was a top-rated station in New York City.

**Q:** Where did you attend college?

**A:** I did my undergraduate work at Boston University and received my graduate degrees at the University of Michigan.

**Q:** Words you live by?

**A:** If you're not having fun, it's time to start worrying.

**Q:** What was your first job out of college?

**A:** I graduated during the height of the Vietnam War and decided to enter the Air Force. The first job they assigned me was teaching accounting. I wound up in my current job as the result of being forced to try a new challenge 25 years ago.

**Q:** What advice would you offer to college students?

**A:** Constantly seek ways to expand your options in life. In a world of rapid change, you must be prepared to follow alternative paths.

# OVER THE AIRWAVES

## KSDB features news and music for listeners

The compact disc player counted down the remaining seconds of the song. To avoid dead air time, the disc jockeys flipped switches on while turning others off. At the same time, they adjusted the volume control levers. This process of switching songs and identifying the artists was repeated constantly at KSDB-FM 91.9.

Located on the third floor of McCain Auditorium, DB92, the campus radio station, was operated by students from different academic areas.

Doug Kohlhasse, junior in journalism and mass communications, and Kevin O'Connor, senior in architectural engineering, were on the air with "Porthole to Your Weekend," on Friday afternoons from 3 to 6 p.m. Kohlhasse and O'Connor played music from both the play list and listeners' requests.

Kohlhasse said personal tastes did not influence the play list because polling procedures monitored the music.

"We have a lot of requests that we play," Kohlhasse said. "That is how we can deviate from the play list."

Requesting songs was easy, but finding them was more difficult. Sometimes the music was not on hand for the announcers to play because the station switched music.

"We were always willing to play requests, but sometimes we couldn't find them or they were not here to be played," O'Connor said.

DB92 was divided into six different areas,

each run by students. All of the areas had student directors and assistant directors who organized the department.

Jim Johnson, senior in journalism and mass communications and music director, wrote the play lists for the announcers to follow. He received 15-20 new albums daily as promotional materials. Johnson and his assistants listened to suggested tracts and entire albums to determine what to play.

Angie Fenstermacher, senior in journalism and mass communications, and Kerri Ryan, junior in fine arts, co-directed the promotions department. They organized remote broadcasts, prepared advertisements for upcoming concerts, put together promotional giveaway packages and secured underwriters to sponsor public events.

"It was really a good experience for me," Fenstermacher said. "It gave me the chance to use some of what I learned in my public relations classes. I got to see how things were really done."

The Black Student Union had the program "Jam the Box" during the lunch hour. This was a combination of hip-hop, rhythm and blues and rap music. "Jam the Box" began as a night show, but was rescheduled as a two-hour lunch segment after attracting a large audience.

"We had to promote and publicize 'Jam the Box' for BSU," Fenstermacher said. "It was fun working on plans for informing the students of the new change in programming."

Amy Lietz, sophomore in journalism and mass communications and news director, headed a 25-member

"We were always willing to play requests, but sometimes we couldn't find them or they were not here to be played."

news anchor staff. She said the biggest task she faced was making sure her anchors read the news on time.

"If they weren't there, I would have to read it myself," Lietz said. "It was really hectic at the beginning of the year before I had the spots filled. That was when I had to anchor a lot."

Working at DB92 provided students a chance to anchor radio news.

"It's a tremendous opportunity for students to get experience in radio," Lietz said. "Students don't realize how good it looks for them to have worked at the station. It looks especially good on their resumes."

The sports director also had to make sure a trained student was available to work the equipment at various sporting events. He handled the scheduling of play-by-play broadcasting teams to high school games as well as collegiate competitions.

Students in various journalism and radio/television classes assisted the news and sports directors as they read on-air sports and newscasts. This allowed for more student participation in the station.

Joe Montgomery, station manager for DB92, kept an eye on the station. Montgomery said he made sure all the students stayed within the legal boundaries of the station and the Federal Communications Commission.

"There are certain regulations and requirements that have to be enforced," Montgomery said. "If it meant taking serious action to get the students to learn, then it had to be done."

Regulations required students to give legal identification of the station in the first five minutes of each hour, before the CNN report. Students also had to follow the song lists and obey rules established by the Federal Communications Commission and station rules established by Montgomery.

"The main rule everybody has to follow is the station ID at the top of the hour and the obscenity laws," said Gary "the Weedman" Weed, senior in journalism and mass communi-

cations and announcer. "These regulations are read by everyone and a copy is kept in the studio for people to use."

Montgomery monitored the students who worked at the station, and was the only full-time, paid employee. He was also the only non-student the station employed.

"We would like to be able to compensate all of the students for their work, but it just

isn't possible," Montgomery said. "Instead, we try to give them promotional materials and music for their time and effort."

The station invested in a new automated control board for the studio. This helped to simplify the announcers' routines. The control board put all of the knobs, switches and levers on one easy-to-reach board.

"Having the new control board will help out a lot," Weed said. "We won't have to reach over each other anymore."

Running a station took time and effort, Montgomery said. The station remained open year around.

"Finding people to work the intercessions and throughout the summer was tough because we just didn't have the amount of interested students available," Montgomery said. "This was when I would have to find people myself or fill in for the positions that were not filled."

### college of arts and sciences

**Q:** What were your career goals when younger?

**A:** I wanted to make a real difference to society, preferably evidenced by a Nobel Peace Prize but certainly not to be an administrator.

**Q:** Where did you attend college?

**A:** I received my bachelor's degree from Imperial College, the University of London and doctorate from Cambridge University.

**Q:** What is your favorite stress-relieving food?

**A:** I especially like a large Kansas steak and a distilled malt beverage from Scotland—not necessarily in that order.

**Q:** How many times did you change your major in college?

**A:** No, this was not an option in the British system. When I went to college, I chose mathematics and specialized in that subject with our general education requirements. It only took three years which meant I knew a lot more about mathematics but a lot less about life.

**Q:** Describe yourself in three words.

**A:** If you won't let me say tall, dark and handsome, then either quiet, reserved Englishman or cool, calm, collected.

Keeping one ear glued to the headphones, Matt Walters, senior in journalism and mass communications, waits for the go-ahead from the station before interviewing Bob Pudden on election night at the Republican headquarters. Pudden was a candidate for Riley County commissioner. (Photo by Margaret Clarkin)

Jamie Oswald, freshman in journalism and mass communications, raises her eyebrows to Walters' response on the presidential election results at the Republican headquarters. It was Oswald's first reporting assignment out of the studio. Before taping, Walters told her to relax. "Just pretend we're chatting," he said. "It's just you and me talking." # PROBING THE MIND

## psychology experiments uncover thoughts

**A**nxious students stood in a row outside the testing room. They cringed as muffled shrieks erupted from behind the heavy black door. Peering through the keyhole, one student with a quavering voice reported subjects were shocked if they gave false answers. Backing away from the door, he told the terrified crowd the experiment was conducted by a scientist with an Einstein hairdo and a Jeckel-and-Hyde demeanor. A faint, "Get out while you still can!" echoed through the hallway as the student raced past the shocked crowd.

Scenarios such as this were the product of fanciful horror stories — not real K-State psychology experiments. The most dangerous object used in experiments was a pencil. Surveys, questionnaires and forms composed a good portion of the studies in which general psychology students were required to participate.

"It didn't even take me 20 minutes to answer all the questions. I picked a time to do the experiment when I didn't have class, so it wasn't an inconvenience," said Shari Olson, freshman in secondary education. "Twenty minutes of your time twice a semester is a lot better than writing a report."

The experiment designers spent far more than 20 minutes when they created a study. The designers were upper-level psychology majors who suffered disappointments when their endeavors did not go well.

"My experiment on serial recall took a long time to complete. I came up with the idea in October 1991 and finished it in September 1992. It shouldn't have

taken that long," said Jeff Gibbons, graduate student in psychology. "The first time I ran it, I screwed up. I showed the subjects nine letters and then I said, 'Go.' This caused a suffix effect (a memory block). The subjects couldn't remember the last one or two letters, so I had to run the whole thing again. That time I tapped them on the shoulder to tell them to start."

Appearance was also a major contributor to an experiment's success. Sophie Urban-Breeskin, graduate student in psychology, found her first experiment more complicated than she originally anticipated. Not only did she have to perform preliminary studies, but she also had to prepare mentally.

"Subjects shouldn't know you've never done experimentation before. You should appear like a psychologist — under control. When it's your first time, that's hard to do," Urban-Breeskin said. "Dr. Shanteau (professor of psychology) told me what to wear. I had to look professional — I couldn't wear what I normally would wear to class. I even wrote out my instructions ahead of time so I'd know what to say."

Once the data was collected, it was not always used for a specific purpose. Experiments such as the study on attitudes of the homeless conducted by Steve Quackenbush, graduate student in psychology, had a different goal.

"In a study like this, we're acting in much the same way as a pollster. A pollster is interested in gathering information about political preferences. They're not concerned directly with practical applications of the data," Quackenbush said.

"We're also interested in gathering data. What people use it for is up to other people."

"Subjects shouldn't know you've never done experimentation before."

# FUTURE FRAMEWORK

## Wefald leads drive for art museum funding

**W**hen Jon and Ruth Ann Wefald joined K-State in 1986, the University not only gained a new president, but a crusader for a campus art museum.

As an art lover, Ruth Ann was concerned with K-State's standing as the only Big Eight school without an art museum.

"When we came to K-State, I said to Jon that the art museum is something I wanted to work on," she said. "I immediately started to investigate the potential for an art museum. I've been interested in art all my life."

In 1928, the K-State Art Collection began with the single donation of two Birger Sandzen paintings. Through the years, the collection had grown to contain 1,500 pieces of art, including works by Henri Matisse, Pablo Picasso, Salvador Dali and Gordon Parks.

"The strength of the art collection is 20th century American art, with an emphasis on Midwest regionalists," said Nelson Britt, museum director. "It includes work by Thomas Hart Benton, John Steuart Curry and Grant Wood."

However, the University lacked a place to display the art. Some hung in administrators'

offices, but over 40 percent was placed in storage at the Foundation Center.

"K-State has an art collection, but where do you go to see it? It's literally being kept in the closet," Wefald said. "Many works are in storage, but some are at home and some are in campus offices. The number one benefit from an art museum will be the fact it (the art collection) will be seen."

Since many people were unaware of the collection, Wefald's first goal was to promote to surrounding communities.

"I can't take credit for the whole idea (of an art museum), but I helped heighten awareness," Wefald said. "I guess you could call me a cheerleader for art. We (the art committee) took a slide show, called 'Celebrate Art at K-State,' to alumni and tooted our own horn about our collection. Then we told them about our unmet need and the lack of a museum."

The art committee recruited people to host events in their communities to gain support for a campus art museum. The campaign received a boost when it was included in the Essential Edge Campaign, a KSU Foundation fundraiser with a goal of \$100 million.

FRAMEWORK

---

*Continued from page 123*

"A feasibility process identified areas people were interested in donating money toward," said Gary Hellebust, director of Corporate and Foundation Relations. "The art museum surfaced as a priority."

Hellebust said a goal of \$5 million was set, with construction scheduled to begin once the goal was reached. Ross Beach helped the campaign with his \$2 million contribution made in honor of his wife, Marianna. The Beaches were K-State alumni, and the museum would be named the Marianna Kistler Beach Art Museum.

Another K-State graduate, R.M. Seaton, chairman of the art museum committee, contributed \$500,000 in memory of his wife, Mary Holton Seaton. A gallery would be built in her name.

"We have received major gifts, with the Beaches' contribution and Seaton's gift of half a million," Hellebust said. "In the next 12 months, we hope to have all the fund raising

completed."

Jessica Reichman, art curator, said the art museum site was approved, and a committee was in the process of selecting the architects.

"We have designated the whole southeast campus as a zone," Reichman said. "It will be strictly up to the architects as to where the exact place will be. The decision will not be made until spring 1993, with completion of the museum in the summer of 1995."

Britt said the art museum would benefit both students and the community.

"We will have lectures and demonstrations," Britt said. "There will be an art classroom that children can visit, and four exhibition galleries will display the permanent collection. With a museum, an audience will finally be able to appreciate the collection."

Wefald said the art museum would also focus attention on the University.

"Our art will give us the potential to bring a wider audience to campus," she said. "The art museum will be a magnet bringing people to K-State."

# ATTITUDES IN LAB

## hands-on experiments influence opinions

Opinions about the laboratory were as varied as Madonna's sex partners. While some students welcomed the challenges labs afforded them, others participants had a workout sweating over some of the experiments forced on them.

Principles of Biology was an introductory course required for a variety of degree programs. The four-hour lab class had every type of student enrolled from first-year to non-traditional. As an essential part of the learning process, each student was required to attend two hours of lab every week in addition to a recitation class.

The laboratory was set up in a large open area on the second floor of Ackert Hall. Rows of cubicles containing audio cassette players and headphones at each students' space uniformly filled the room. Although the lab did not have an instructor, there were several student lab assistants who were there to help out and answer questions.

Pamela Jackson, sophomore in human development and family studies, enrolled in Principles of Biology as part of her degree program.

While she enjoyed the flexibility of the audio cassette arrangement, she also appreciated the availability of a script for the tape.

"I found that the tapes worked well for me because it provided both audio and visual learning," Jackson said.

The laboratory also provided Jackson the hands-on experience she felt was necessary to learn the test material.

"The lab experience definitely helped my comprehension of the material discussed in recitation," Jackson said. "For a science credit, it is the best way to learn because you are on your own and do the work yourself, yet the assistants help you learn the testable material if you need it."

Not all students liked the lab arrangement as much as Jackson. Amy Hartis, sophomore in elementary education, was also enrolled in the course.

"I hated the tape format. They made it so boring and impersonal," Hartis said. "I would rather have a huge lecture class than listen to those tapes."

*Continued on page 128*

anuals every week for  
valuation. (Photo by  
hane Keyser)

## ATTITUDES

*Continued from page 126*

Even though Hartis did not enjoy every aspect of the biology lab, it did provide her the chance to learn what she could not receive from the text, such as the viewing of real animal internal organs.

"Dissecting the pig fetus was a lot of fun. Seeing the internal organs for myself made a lot of difference," she said. "You can only learn so much from a diagram in the book."

Every course had a different laboratory arrangement due to differences in teaching styles. Hartis was also required to take General Chemistry.

The setup was more structured than the biology lab and did not allow her to work at her own pace.

"I felt that the lab didn't help me at all, so I was only wasting my time. I just wanted to finish the experiments and leave," Hartis said. "I relied completely on the lecture to comprehend the material for the tests. Even though the experiments didn't help me learn anything new, they did require me to review and memorize the information for the tests."

It wasn't just science classes that required laboratory exercises. Several foreign language courses also demanded regular attendance in a weekly lab.

Roberta Weil, freshman in English, was enrolled in French I, which required work in the laboratory located in Eisenhower Hall.

Similar to the biology arrangement, the foreign language lab had cubicles with headphones. However, students were not only listening, but also repeating words along with the cassettes. Weil said these lessons helped her learn the fundamentals of French, her third language.

"The lab helps reiterate what I have learned in class through listening and speaking and putting what you learn into practice," she said.

Weil also said the assistance offered to students in the laboratory was helpful.

"There is a student lab monitor who is almost always willing to help the students if problems arise," Weil said. "I think that having to go in twice a week encourages me to learn more as we go instead of waiting until test time to study."

After completing a lab, biology students record and answer questions about the experiment. Those enrolled in the class were allowed to choose the time most convenient for them to attend. Some students felt that this made the lab experience tolerable. (Photo by Shane Keyser)

# MILES OF MEMORIES

## professor has knack with names

**T**om Parish, professor in counseling and educational psychology, committed to memory the names and faces of his 300 plus students each semester.

His interest in learning students' names began 16 years ago when he first came to K-State and was introduced to large classes.

That interest intensified seven years ago when his daughter entered kindergarten.

"As we drove by the elementary school she was about to attend and saw the students playing outside at recess, she said, 'Daddy, those are my friends. I just don't know their names yet,'" Parish said.

Parish said his daughter's philosophy could be applied to teaching.

"It's important teachers understand they might only teach students for a semester, but that their students could be their friends for a lifetime," Parish said. "A friend, of course, is someone who helps you like yourself, and a good teacher is a friend who will listen to a student's concerns and take action accordingly."

Parish said some people questioned the need to learn students' names, suggesting it was a waste of time, but for Parish it was a benefit to know his students so he could teach them better.

Teaching gave Parish an opportunity to have a positive affect on more than 700 students annually.

To become familiar with his students before the first day of classes, Parish looked through the

Royal Purple yearbook to learn their names, majors and other information such as sorority/fraternity association and sports involvement.

"To me, it is a matter of doing my homework," Parish said. "It is going beyond the material to learn my students' names and something about them."

Since 1980, Parish has taken class pictures of his students and put them in albums. He also saved any related newspaper clippings, wedding announcements and other mementos from students.

Besides teaching from the textbook, Parish discussed real-life experiences with his students in order to share some of the personal lessons he had learned.

"Both approaches are forms of teaching," he said, "though the latter is often enjoyed more by almost everyone."

Parish said teaching was the best job he could have.

"There is nothing I love more than teaching, not even breathing. It has always been such a joy to be around students, and there is no other place I would rather be than in the classroom," he said. "If I could give anyone a gift, I would give them the great love of teaching."

Parish's only regret was the short time he had to develop a camaraderie with his students, but the benefits outweighed the disadvantages. Parish said he was glad he was a teacher.

"If I died and all I had ever done was teach, I would still be quite happy since I believe there is no greater call than teaching," he said.

"If I could give anyone a gift, I would give them the great love of teaching."

Tom Parish

## DEAN MICHAEL HOLEN

### college of education

**Q:** What were your career goals when younger?

**A:** I intended to become a lawyer, possibly a public defender, but I decided I had an interest in education and I would be more valuable to students and to people in the social system.

**Q:** Where did you attend college?

**A:** I received my bachelor's degree from Stanford University and my master's and doctoral degrees from University of Oregon.

**Q:** What was your first job out of college?

**A:** I was an assistant professor of educational psychology at K-State in 1971.

**Q:** What were your favorite classes?

**A:** In undergraduate school, I loved Russian literature. However, in graduate school, I particularly enjoyed measurement theory and learning theory classes.

**Q:** What advice would you offer to college students?

**A:** Work hard and play hard. Care for others. Love yourself and push yourself. Appreciate the majesty of nature and enjoy the wonders of humanity.

In Parish's 10 binders, he stores 700 buttons, 90 of which are from students. Each button contained a motivational message. (Photo by Shane Keyser)

## EDUCATIONAL ADMINISTRATION

FRONT ROW: Alfred Wilson, Trudy Campbell. BACK ROW: Kent Stewart, David Thompson, Gerald Bailey.

As an aid for memorizing the names and faces of his students, Tom Parish, professor in education and counseling psychology, takes photographs of each of his classes. He began taking the group shots in 1980 in an effort to make his class more personal to each student. He has memorized more than 10,000 students' names. (Photo by Shane Keyser)

# HELPING HANDS

## education mentors guide prospective students

Switching to the other side of the desk, education majors gained teaching experience before entering the world of education.

The Junction City High School collaboration program combined theory and practice as students worked with public school teachers to promote multicultural understanding and diversity in education.

"The general goal of the collaboration is to strengthen American high school education by synthesizing the strengths of high school teachers, administrators and programs with the strengths of the K-State teacher education program," said Rosemarie Deering, assistant professor of secondary education. "We are drawing upon the expertise of teachers because we respect their contribution to education."

Throughout the semester, students observed and tutored students, designed lesson plans, conducted meetings and organized classroom interaction. Deering said students were assessed on a summarized evaluation from the teacher.

The students also completed journals reflecting their observations of classroom management, student behavior, student characteristics, discipline and teacher preparation.

"I especially enjoy the interaction in the classroom to gain important experience before I actually student teach," said Jina Morgan-Kugler, junior in secondary education. "It's (the program) enhanced my outlook as a future educator."

Deering hoped to eventually expand the two-year-old collaboration.

"My vision is to establish a mentoring triad — an added dimension to the existing program," she said.

Deering envisioned a triad with a high school

teacher, K-State student and JCHS student with an emphasis in minority recruitment. She also wanted students to serve as mentors for high school students interested in a teaching career.

"The K-State secondary education population is very homogenous, with little diversity among students and faculty," she said. "It seemed important students have the opportunity to be involved in cultures that differ from their own. Our particular collaboration owes its uniqueness to the disparate environment between K-State and Junction City High School."

Deering said effective teachers needed to have an understanding of their students.

"We need to become acquainted with diverse populations to observe their learning styles and cultures, and realize their differences are differences rather than faults," Deering said. "In addition to providing for pre-service teachers and bridging the communication between the University and high school, we are encouraging minority students to develop an interest in teacher."

The collaboration was judged a success by the National Council for Accreditation of Teacher Education, the program's participants and Deering.

"The students love the collaboration because it's a vital part of their class. By combining our talents and resources, we believe we can offer both high school and University pre-service teachers a more multi-dimensional experience," Deering said. "Since the whole is greater than the sum of its parts, we envision a partnership that will promote qualitative

improvements and creative, new dimensions in both school settings."

"It's (the program) enhanced my outlook as a future educator."

# PUBLISHED PROFS

## instructors find strength in the written word

Some professors went beyond the walls of the classroom and into the world of publishing as they not only taught, but also wrote textbooks, study guides and plays for publication.

David Seamon, professor of architecture, wrote scholarly works focusing on architecture and engineering design. In his early childhood, Seamon realized the career he wanted to pursue.

"I knew I was going to be a writer when I was five," Seamon said. "I was swinging, and I had a vision I would be a professor and a writer. I could just picture it."

Judith Zivanovic, professor of speech and associate dean of the College of Arts and Sciences, wrote her first play in the sixth grade, but said she had no related vision of her future.

"When I was a kid, my friends and I would go to films and then act it out the rest of the week," Zivanovic said. "I always thought of myself as an actress instead of a writer because acting is what I was doing as I played."

Regardless of what their childhood predicted, each decided writing would enhance their teaching. They also said teaching complemented their writing.

"At one point in my career they asked me to teach a playwright class," Zivanovic said. "I thought I had to do that (write a play) to fully understand it."

Seamon also found his classroom work helped him refine the ideas for his books.

"I can use a course to work through an outline

of a book," Seamon said. "If I have a chapter I want to write, I can talk it through during a lecture."

Even though Seamon's lectures often focused on his textbook ideas, he didn't depend on his books to teach class.

"Sometimes I use my books in upper-level seminar classes," he said. "I don't use them regularly because I try to change my lecture or else it will become stale."

Zivanovic said she did most of her writing during the summer. She traveled to Taos, N.M., to take part in an art colony, where she finished the first draft of a novel and prepared four short plays for publication.

Because preparing tests and structuring lectures was a time-consuming process, early mornings, weekends, holidays and most of the summer were times Seamon used for writing.

Seamon was writing a book series entitled "Morning Side Additions," which he said was valued as a supplementary textbook.

"State University of New York and Albany liked it so much that they asked me to become editor of the book series," Seamon said. "I am currently editing books from other authors and I hope to finish the series this summer."

Seamon proved his writing ability when he had a book published in 1985, and in 1989 Columbia University Press wanted to reprint the textbook.

"It's hard to get books reprinted, so it was quite a coup for me to have Columbia University reprint 'Dwelling Place and Environment,'" he said.

"I knew I was going to be a writer when I was five. I was swinging, and I had a vision I would be a professor and a writer."

# MENTAL MASTERS

## graduate school offers advanced training

**M**oney, money, knowledge and more money. For graduate students, increases in both salary and knowledge were reasons to obtain a graduate degree.

"My main reason to get a master's degree was for the pay," said Angie Conway, graduate student in psychology. "It's difficult to get a job with just an undergraduate degree in psychology, so I decided to obtain my master's degree."

Leland Warren, associate dean of Graduate School, said reasons students applied to Graduate School were to delay entering their profession or to gain more experience.

"If these students are deeply committed to their field and spend a portion of their lives in that field, then I would encourage them to go on to get a graduate degree," Warren said. "A student must go into the graduate program with a serious attitude. He or she is entering professional work and is expected to work at it. I want them to try it out to discover their interest and talent."

The application process was similar to the undergraduate program's selection.

"The process of applying to Graduate School is simple," he said. "Anyone can apply to a

department to obtain a graduate degree. The department can deny or recommend the student be accepted into graduate study. Of course, the Graduate School has final say on whether the student meets the basic requirements to be accepted."

"If these students are deeply committed to their field and spend a portion of their lives in that field, then I would encourage them to go on to get a graduate degree."

Leland Warren

Conway said the GRE was difficult and confusing, but important.

"I left the test thinking I knew nothing, but it tapped into the knowledge I had gained in the undergradu-

## DEAN TIMOTHY DONOGHUE

### the graduate school

Q: What were your career goals when younger?

A: *This depends when in life one takes the snapshot. When I sorted it out, I wanted to be a researcher in physics and explore basic questions in nuclear physics.*

Q: Where did you attend college?

A: *I received my bachelor of science in physics from Boston College and did my graduate work at Notre Dame.*

Q: What were your favorite classes?

A: *I enjoyed philosophy, Latin, history and physics.*

Q: How many times did you change your major in college?

A: *I started out in math, but I changed to physics at the end of the first year with no regrets. High school physics had been dull and poorly taught.*

Q: What advice would you offer to college students?

A: *Make certain that you seek out a truly broad education as this is a rare opportunity in life to develop a deep appreciation of the arts and humanities. Take the time now as it may not be so readily accessible later on.*

# MASTERS

Continued from page 136

ate program," she said.

In graduate study, the school offered 60 master's and 42 doctoral programs. The diverse areas of study included atomic physics, cancer biology, creative writing, industrial and organizational psychology and statistics.

Warren said the graduate program developed students' knowledge through advanced course work and through original research under the guidance of faculty members who were experts in their fields.

"A graduate education allows for more specialization of a person's field or closely related discipline," he said. "It doesn't mean someone doesn't aspire to be educated in all disciplines. It just means they have become more specialized in their field."

The estimated tuition cost per semester for a Kansas resident was \$61 per credit hour, compared to \$49 for an undergraduate degree. The Office of the Registrar reported that there were 3,277 students enrolled in Graduate School in the fall of 1992.

The difference in a master's degree and doctoral degree was the number of required hours.

"The doctoral program has higher expectations for a graduate degree and is more competitive," Warren said. "The master's degree is virtually less important in some fields, yet is more adequate because

certain fields don't offer doctorates."

To obtain a master's degree, a student needed 30 credit hours beyond the bachelor's degree. For a doctorate, 90 hours more than the bachelor's degree was required.

A crucial part of the process involved preparing and publishing a research study in the form of a thesis or dissertation. The study then had to be defended before faculty members.

Conway was required to complete a practicum for every 12 credit hours she earned and write a journal about her experience. In addition, she took several core psychology courses and was quizzed on her knowledge by four advisers in an oral comprehensive test.

Warren said the dissertation was often the size of a book that reflected the student's time and efforts by its length.

"The student also takes a qualifying exam to determine if he or she is qualified in the field to continue the dissertation. In any case, the student will locate a specific topic for investigation," Warren said. "Once completed, the committee approves the form of the dissertation, signs it and sets a date for defense of the dissertation."

During the presentation, the student gave a brief synopsis that lasted 10-30 minutes and could be questioned by the committee, who voted to approve or reject it.

"People more often than not pass the defense," Warren said, "but on occasion, if the student's defense is weak, he or she may have to do more work."

"A graduate education allows for more specialization of a person's field or closely related discipline. It doesn't mean someone doesn't aspire to be educated in all disciplines. It just means they have become more specialized in their field."

# LET'S TALK ABOUT SEX

## class stresses importance of relationships

She talked about sex. She talked about relationships, sexually transmitted diseases and gender roles. Her focus was not on the sexual act, but rather on the importance of sexuality as being basic to human life.

Betsy Bergen, associate professor of human development and family studies, developed and taught *You and Your Sexuality* since 1972 to help students understand different aspects of sex.

"I did my doctorate research on the sexuality and human behavior of college students," Bergen said. "Nationally, most universities were beginning to teach sexuality. We got the course approved through the University level and eventually offered a graduate level class on this campus."

Bergen said the first time the class was offered only 35 students enrolled.

"The climate of the University was apprehensive to teach this on the college level," she said, "so the class was offered at 8:30 a.m. to not attract too many students."

However, Bergen continued to teach the class each semester, and the enrollment average grew to about 200 students per semester.

"The class tends to have students from across the University," she said. "The fall semester had 26 percent males and 74 percent females. The proportion of males is increasing, which is a positive statement. Men and women should have equal sex education."

Bergen, who shared anecdotal stories during her lectures, never felt embarrassed.

"There is no embarrassment for me teaching the class, and I don't purposely try to embarrass anyone," she said. "Each student has his or her own sexuality level and deals with sexuality differently."

She said her stories helped students understand and remember the material which she said was important.

"I certainly see it as a valuable course to be taught. You have to be comfortable with your own sexuality, and I have to be knowledgeable to teach the class," Bergen said. "My concern is the sexual stereotype. We focus on the sociological, psychological, physical, personal and interpersonal aspects of sex."

Bergen's lectures covered variations of dating, development of sexuality, anatomy, pregnancy, sexual assault and violence, Kansas' sex laws and relationships.

"I really enjoyed the class because Dr. Bergen discussed a lot of good issues — not just sex issues but relationships, homosexuality and communication," said Meg Pfannestiel, senior in business administration. "She (Bergen) said that at the end of the semester the males would have a better understanding of females and females would have a better understanding of males."

Teaching students to understand each other was a challenge for Bergen.

"Sexuality is an emotional topic because there's a little nervousness. I try to create a climate that is positive. I include humor in good taste," Bergen said. "Besides, sex is funny. Sexuality can be both a fun and a serious part of our lives and we should act responsibly because there can be severe consequences if we don't."

"My concern is the sexual stereotype — the focus is not on the sex act."

# LAST ON THE LIST

## protesters respond to possible program cuts

Students in the speech pathology and audiology program and the public administration graduate program were angry about the proposed eliminations of their programs.

A proposal issued Nov. 20 recommended eliminating the speech pathology and audiology degree program, reducing the number of social work faculty and eliminating the public administration graduate program.

Peter Nicholls, dean of the College of Arts and Sciences, said the Kansas Board of Regents required state institutions to evaluate programs.

"All material was submitted to a faculty committee, which had student representation," Nicholls said. "They came up with some criteria to figure out what was going to happen to some of the programs."

The proposal was not made hastily. The Arts and Sciences College Core committee spent more than 100 hours meeting before completing its recommendations. The proposal was then sent to the provost committee. Provost James Coffman made recommendations to President Jon Wefald, who sent the final recommendations to the Board of Regents.

The proposal upset students enrolled in the programs. "This kind of process is not unusual these days," said Ann Smit, director of speech pathology and audiology. "You use it to cut weak programs, but they are cutting a healthy one. It is generally acknowledged we have a high-quality program. Student demand has doubled."

Nicholls said the University had to use its resources to benefit the greatest number of students.

"In terms of where we need to meet our resources and get our highest priorities defined, we don't find speech pathology and audiology on that list," he said. "When you phase out a program, there are going to be effects on a range of people."

Many students said the elimination of the speech pathology and audiology program and the cut in the social work program would effect a large number of female students.

"They are targeting helping professions. Predominantly, women work in those fields," said Melissa Schmidt, senior in speech pathology and audiology. "Therefore, they are targeting women."

Some students questioned why the social work program was not eliminated.

"The proposal never was to eliminate social work. There were differences seen as we looked at these two programs," Nicholls said. "One of the differences was the cost. They are both expensive programs. However, we have a strong social work program that has been well integrated into other programs. There would be effects clear across the campus if we did away with it."

Nicholls said the Board of Regents had the final decision for adopting the proposal.

"This has been a difficult process," Nicholls said. "I think it's a process we have to go through. We went through it with good faith and a great deal of effort. I believe in the outcome of that process."

"In terms of where we need to meet our resources and get our highest priorities defined, we don't find speech pathology and audiology on that list."

### college of technology

**Q:** What were your career goals when younger?

**A:** I wanted to become an electrical engineer and work in industry. Instead, I served in the Air Force and was an electrical engineer. While in the Air Force, I taught at the United States Air Force Academy and that's when I found out that I enjoyed the education system.

**Q:** What were your favorite classes?

**A:** I especially liked all math and physics classes because they were fun to do since I liked solving puzzles. I also had a natural affinity for these

*classes because I like problem solving.*

**Q:** What advice would you offer college students?

**A:** Work and study hard, but take time to play and spend time with people who are important to you.

**Q:** Words you live by?

**A:** Treat people like I want to be treated.

**Q:** Describe yourself in three words.

**A:** Enthusiastic, committed, honest.

# FUNDED FACE-LIFT

## K-State-Salina campus grows with grant

Since the Kansas College of Technology became part of the K-State family, the Salina campus has grown in both enrollment and square footage. A year after the two campuses merged, K-State-Salina rapidly moved to improve the services offered.

Salina enrollment figures sagged at 674 before K-State merged with the small technical school. The fall 1992 semester saw numbers jump by nearly 15 percent to 773 students.

A \$7.7 million federal grant was given to the school for campus improvements and aircraft and equipment purchases.

The money was appropriated to the Aviation Training Center as part of a \$270 billion defense bill proposed by Sen. Robert Dole, R-Kan. Due to the efforts of Congressman Pat Roberts, R-Kan., the grant was included in the bill. After a debate among members of the Defense Department, the bill was approved.

Dole said the grant would put K-State and the

Salina campus at the forefront of technical training and flight instruction. The grant enabled the school to purchase 29 Beech aircrafts, develop new laboratories and buy more flight simulators.

"Essentially, we are redoing the entire campus."

Tom Rawson

one-half cent to improve the campus and attract more students.

In addition to the new technical equipment, a \$700,000 expansion was made to the Technology Center. The library was increased by about 3,000 square feet and the mechanical lab grew by 2,500 square feet. Construction on the project began in October 1992 and will be completed

With the newly acquired federal aid, K-State-Salina provided transitional assistance to people who left the military to help train active personnel in conjunction with the Kansas National Guard.

The new development on the campus was supported by students and Salina citizens. Local voters passed a two-year sales tax increase of

*Continued from page 145*  
by the summer of 1993.

The new Aeronautical Technology Center addition was completed in the summer of 1992. This project was funded by the Salina Airport Authority through building revenue bonds. The aeronautical technology department had also signed a contract with McDonnell-Douglas to train international students in aircraft maintenance.

Jack Henry, dean of the Salina campus, said these new improvements were essential to attract more students, and to reach their goal of doubling the student body in five years.

"We are trying to focus more on the traditional student and improve the looks of the school so it feels like a traditional campus," Henry said.

Michelle Garrett, freshman in the College of Technology, chose K-State-Salina because it was close to home. She

---

"We are trying to focus more on the traditional student and improve the looks of the school so it feels like a traditional campus."

Jack Henry

---

liked the idea of a newly renovated campus and hoped that it would draw more traditional students.

"Updating the buildings on campus will really help to attract students right out of high school," she said. "I also think that adding a new dorm would make it feel more like a big school's campus."

These physical changes were also accompanied by several internal modifications.

"Essentially, we are redoing the entire campus," said Tom Rawson, vice president for administration and finance. "We plan to expand enrollment to 1,000 students as we transfer some of our four-year technical programs from the Manhattan campus to Salina."

In addition to transferring programs, Rawson said the expansion of the Salina faculty was inevitable.

"As the student population increases, we will continue to add the necessary faculty members," Rawson said.

Administration plans to see enrollment and faculty numbers continue to climb throughout the next three years.

Various technical instruments are stored in the crowded electronic engineering lab. K-State-Salina administration planned to double the number of electronic engineering students as well as students in other departments in the College of Technology. (Photo by Craig Hacker)

## T TAKES 10 TO TANGO

BY JENNI STIVERSON

**I**F YOU WEREN'T A DANCE MAJOR, IT DIDN'T MATTER. The 10 members of the Repertory Dance Company ranged from education to business majors, from 16 years of dancing experience to two years, but the one thing they had in common was a love of the dancing profession.

Tryouts were open to all students. The company had winter and spring performances, with the choreography arranged by teachers and students.

The Spring Dance involved not only company members, but all of the dancers who auditioned. The company had three noon performances that consisted of excerpts from their concerts, and performed at more than 10 schools.

"The demonstrations we do are an educational outreach," said Achmed Valk, assistant professor of speech and director of the dance company. "We show them what dance is and what it can be for them. It is also a cultural lesson."

Most of the schools in the area were receptive to letting the company perform for the children.

"Wamego schools are excellent to work with. At other schools, once we get there and start working with the kids, the staff is more receptive," said Suzanne Koucheravy, junior in theater and the company's assistant director. "In Manhattan, it's just a matter of getting in."

*Continued on page 152*

## TANGO

---

*Continued from page 151*

Not only did the elementary students learn from the demonstrations, but so did the dancers themselves.

"It (performing at schools) provides experience in different settings. The dancers learn all other aspects (of performing) that dancers need to know," Valk said. "Dancing is a legitimate career and profession. Things need to be taken care of, like promotions, costumes, scheduling and finances. Everybody has a specific task they are responsible for getting done."

Stacey Taylor, junior in business administration and the company's general manager, danced in the company and also managed the business details.

"I think the company is good for business majors to get involved in. Working here gives me good experience to put on a resume," Taylor said. "It also opens up opportunities to find jobs."

The three males and seven females in the company met throughout the week for two hours to practice different dances and styles. They also had meetings on Wednesday nights in the Union Station, where they demonstrated dances for onlookers.

"We wanted to get students involved," Taylor said. "Dancing at our meetings gave us a chance to show people who we are and what we do."

After every performance, student volunteers sort sheets of music by title. Music students helped move chairs and clean practice rooms. (Photo by Mike Welchhans)

## STRING FLING

BY LISA STAAB

FOR TWO DAYS IN JANUARY, KANSAS ELEMENTARY AND MIDDLE SCHOOL students visited campus and filled the air with music.

KSU Symphony Orchestra sponsored String Fling Jan. 16-17 with the help of Golden Key National Society. The event was attended by 53 teachers and 975 fifth through ninth grade students.

"The students got together with their similar grade levels to learn from each other as they practiced," said David Littrell, associate professor of music, orchestra conductor and String Fling coordinator. "It (String Fling) has educational value since most of the students come from small schools and need to get involved."

The goal of the event was to give young string players an opportunity to develop their musical talents away from private lessons and school orchestra practices. Initially, String Fling was established for junior high string students, but grew to include elementary students.

"String Fling provides good experience to young players with hope and expectations. (It helps them) develop and continue with a life in music," said Willard Nelson, Golden Key and secondary education adviser.

Littrell said students practiced all day Saturday and for 2-1/2 hours on Sunday before performing for their parents and the public at 12 noon and 1:30 p.m.

Although student involvement was limited, it was essential for the event to be a success.

"We set up chairs, which wasn't a big deal, but there were over 900 chairs to set up for students," said Alice Hall, junior in psychology and orchestra member. "We also tuned their instruments and answered questions. It was quite an event. We've received a lot of positive feedback."

Hall said she also guided lost children and parents, as well as distributed music sheets.

## FLING

*Continued from page 155*

"The students were familiar with their music, so the orchestra students help only if there is a problem," Hall said. "We don't have a lot of interaction with the students, but I believe every child should have this experience to see there are other children who play instruments."

Celebrating its 20th anniversary this year, the event was Golden Key's first and oldest service project.

"String Fling began in the early 1970s," Nelson said. "It started as a cooperative effort to help private local music teachers, as well as the K-State music department."

Golden Key became involved with String Fling in 1982.

"That year our vice president was a cellist. She believed it would be good to have a service project with the music department," Nelson said. "Although students only moved chairs and registered students, these tasks developed their involvement in the student organization."

"We look at it as an honor to work with the music department. Golden Key is an honor society for all disciplines, so it is essential that we support the humanities and arts," he said.

Although Golden Key and the music department co-sponsored the event, neither group funded the project. The money received from the children's tuition paid for the conductors and scholarships for K-State music majors.

"Without String Fling, we'd be in more need of financial support," Littrell said, "but String Fling provides support to our students."

Littrell said he enjoyed participating in String Fling.

"When I took the job in 1987, my predecessor had the responsibility of String Fling, so I just continued with the involvement," Littrell said. "I enjoy it because it is good public relations for the music department."

## BRAVING THE ELEMENTS

BY LISA STAAB

**D**ESPITE RAIN OR SHINE, MUD OR SNOW, 210 MEMBERS OF THE K-STATE Marching Band marched on.

"Marching in bad weather is inconvenient, and there is no way to deny it," said Karla Hommertzheim, senior in secondary education, "but those who are dedicated to the marching band accept it and go on."

Bob Kimbrough, senior in secondary education, said the benefits of marching in the band were worth suffering adverse weather conditions.

"Unless it was raining ferociously, we were out marching, learning the drill," Kimbrough said. "Other activities find shelter from the weather. Both the football and baseball teams practice inside when the weather is bad — the band does not."

Besides trudging through mud, band members also endured cold temperatures.

"The tuba section likes to show everyone how tough we are by wearing shorts to every rehearsal," Kimbrough said. "Two years ago, there was a foot of snow on the practice field and 10 guys wore shorts. It's our way to lighten the mood of our practice and it shows our spirit. Everyone notices our bare legs. We show people it is never too cold or too wet to march."

Kimbrough said the tuba players were a source of inspiration for the band.

"We yell and scream. Our job is to be goofy," Kimbrough said. "Some people think it is because we have a lack of oxygen to our brain from playing the big tubas. Maybe it is just the way we are. After all, what kind of person wants to carry a 20-pound instrument on his shoulder for two hours a day?"

The band practiced Tuesday through Friday for two hours a day, and all day Saturday. In addition, staff had one-hour meetings three days a week.

Besides playing at home games, the band also traveled to the University of Kansas and the University of Colorado.

"It's exciting to perform in front of another band. While they can be critical, they can also appreciate, more than most, the things our group does well," Hommertzheim said.

Hommertzheim said her involvement in the band allowed her to devote time and energy to an activity other than academics.

With the athletic fee increase approval, the marching band will receive an annual budget of \$70,000 during 1994-95. Although this was a \$50,000 increase, the budget was still the lowest among Big Eight universities.

"I think students and administrators should envision life without us. Life without a band at football games and pep rallies (would be) bleak," Hommertzheim said. "It is expensive to run a marching band, but we affect many K-State students both in and out of the group."

# PAYING TO PARTICIPATE

BY JANET SATTERLEE

FROM RIDING BULLS TO JUMPING OUT OF AIRPLANES, STUDENTS PARTICIPATED in clubs despite high costs.

To pay for the various events the Rodeo Club sponsored throughout the year, club members had fundraisers and paid dues of \$10 per semester or \$15 per year. Carrie Sharp, senior in animal sciences and industry and Rodeo Club president, said members who competed also bought National Intercollegiate Rodeo Association cards and paid individual fees for each rodeo.

"The club provided the facilities to practice for rodeos, and it provided the bucking and riding stock for them," Sharp said. "Members provided their own equipment."

In the fall, the club sponsored a rodeo in conjunction with the Kansas Neurological Institute's festival and parade in Topeka. The club also sponsored a rodeo in Manhattan.

"Fall activities include an alumni rodeo that matches students and alumni from Fort Scott Community College against students and alumni from K-State," Sharp said.

Members of the Flint Hills Water Ski Club enjoyed competing with other club members, but Erica Milligan, junior in arts and sciences, said the club's costs added up. She said the club had a \$35 annual fee. To compete in intercollegiate competitions,

members had to purchase a \$35 American Water Ski Association card annually. Milligan also said members paid \$3 per boat pull at practices to cover gas costs.

"Members usually have their own equipment," Milligan said, "but the team has purchased its own skis and equipment. Team members also provide the boats."

The ski equipment was expensive. A professional slalom ski cost as much as \$200-350. Life jackets cost \$45-75, while gloves cost \$15-30.

Although Mortar Board Senior Honorary Society members didn't participate in competitions, the club also had high membership fees. Carolyn Farris, senior in agricultural economics and the club's president, said Mortar Board members paid \$41 national dues to cover administrative costs, a membership pin and regional meeting expenses. Members also had to buy their own suits.

"Each year, members choose a different suit to wear to public and formal events that Mortar Board participates in, so the cost varies," Farris said.

The Parachute Club was also an expensive organization to join. Gil Hopson, graduate student in journalism and mass communications, said the club had \$10 semester dues and a \$15 rental fee for the club's equipment. Members also paid \$100 for eight hours of instruction and the first jump.

He said the club's 75 members jumped at Wamego's airport on weekends if the weather was suitable. The jumping began at 10,000 feet for experienced jumpers and at 3,500 feet for student jumpers. Hopson said parachuters had a free fall of 45 seconds. They opened their parachutes at no lower than 2,500 feet and were under a canopy for approximately three minutes.

"There are risks involved, but we are a safety-conscious lot," Hopson said. "Everything in life is a risk — the goal is to minimize the risk."

Despite the high costs of jumping, Hopson said the thrill made up for the expenses.

"We do it (jump) for excitement, fulfillment and self-actualization," Hopson said. "It exceeded all my expectations. It's an exhilaration — a reaffirmation of life."

---

"EVERYTHING IN LIFE IS A RISK — THE GOAL IS TO MINIMIZE THE RISK."

After receiving instruction on the gauges and dials, Jeremy Wertz, sophomore in biology, prepares to dive in a Natatorium pool. (Photo by Mike Welchhans)

# UNDER THE SURFACE

BY NICOLLE FOLSOM

"SCUBA DIVING IS LIKE STEPPING INTO A WHOLE DIFFERENT WORLD," said Tracy Bollig, senior in marketing and secretary/treasurer of the Kaw Valley Diving Club.

To give local divers the chance to experience the thrill of diving, Brent Vopat, junior in electrical engineering, founded the diving club in 1991.

"It (the club) is a way to meet and get acquainted with other divers," said Vopat, the club's vice president. "It's a way to expose people (to diving)."

Divers often dived with partners, and Vopat said it was best to dive with friends.

"The best way to get to know people who dive and go on trips is through the club," said Keith Slyter, junior in mechanical engineering.

Darren Stross, senior in architecture and club member, also gave a demonstration to students who were interested in diving. An informational meeting was held at Putnam Hall which was followed by diving demonstrations at the Natatorium.

"Aside from being a good source of diving information, the club is primarily recreational," Bollig said. "We do it (dive) for fun."

The club had 25 members who traveled to different diving areas including Lawrence,

Missouri and Arkansas. The club members also traveled to the Sea of Cortez, near Mexico, in late March.

"Most of the members had never dived in saltwater, so the trip was beneficial to them," Vopat said.

Before scuba diving, a variety of steps had to be taken to ensure the divers' safety. Potential divers needed certification before they could rent or purchase equipment and have their tanks filled with oxygen.

Manhattan had two programs that offered certification. The University for Man offered a course through the YMCA, and the Aggie Dive Shop offered courses through the Professional Association of Underwater Diving Instructors.

"Diving is adventurous," Bollig said. "It has some danger to it."

Vopat agreed divers needed to be aware of possible hazards.

"The main thing divers need to be aware of is fishing lines," Vopat said.

"Other hazards are bad visibility, hypothermia and being struck by a boat when coming up from the water."

Residents of Putnam Hall strap on diving gear supplied by the Aggie Dive Shop. The students were participating in a demonstration given by Darren Stross, senior in architecture and Kaw Valley Diving Club member. (Photo by Mike Welchhans)

Willie the Wildcat leads fans in a cheer at the Temple football game. (Photo by Mike Welchhans)

## T STOPPING TRAFFIC

BY RHONDA WILSON

It's all smiles for Angie Smith, junior in elementary education, and the rest of the K-State Cheerleaders as they perform a routine before the K-State-Oklahoma basketball game. The game was played at Bramlage Coliseum, Feb. 3. (Photo by Cary Conover)

Kansas State cheerleaders cheer alongside children at the Iowa State football game, Nov. 5, which was televised by ESPN. The children were members of the Willie Club which was a group of local children who were taught cheers for four weeks before they were allowed to perform. (Photo by Mike Welchhans)

ALTHOUGH IT WAS THE CHEERLEADING SQUAD'S RESPONSIBILITY TO LEAD cheers on the football field, it was their performance in an outside courtyard that literally stopped traffic.

In December, the squad accompanied the football team to Tokyo, Japan, for the Coca-Cola Tokyo Bowl. During a sightseeing trip, some cheerleaders wanted to take pictures of a marketplace. Because the streets were packed with people, the yell leaders lifted their partners above the crowd so they could see, unaware of the enthusiastic response the Japanese onlookers would have for the simple stunt.

To further please the crowd, squad members performed parts of their routine. After the first few stunts were completed, squad members realized they had attracted a crowd of thousands.

Greg Winn, senior in management, said the Japanese people enjoyed the squad's routines.

"It was as close to being a celebrity as I will ever get," Winn said. "There were people cheering, applauding and taking pictures."

He said a Japanese police officer eventually told the squad to stop performing because the crowd that had gathered to watch extended into a nearby intersection, halting traffic.

Theresa Russell, sophomore in secondary education, said the Japanese citizens were excited to see the cheerleading squad show off their skills.

"The Japanese were not familiar with American football," Russell said, "but they were eager to participate in the game."

Since they were unfamiliar with football rules, Gretchen Schmoekel, freshmen in elementary education, said the Japanese fans depended on the squad for guidance in cheering.

"They liked to watch us do pyramids and basket tosses," Schmoekel said. "The wave was also exciting for them."

The squad members didn't change their routines for the Japanese performance.

"We tried to keep everything as American as possible," Russell said. "The fans followed enthusiastically."

## LIFTING SPIRITS

BY SHEDERA BAUSCH AND PRUDENCE SIEBERT

RELIGION DIDN'T HAVE TO BE BORING. Members of Icthus Christian Fellowship clapped their hands to songs, laughed at humorous skits and erupted with cheers of enthusiasm when the organization's announcements were made.

John Hart, sophomore in journalism and mass communications and Icthus president, said Icthus helped people find truth and meaning in their lives.

"People will not reach their full potential from Icthus," Hart said. "Personal change or transformation of someone's soul or heart only takes place between that individual and God. We try to make Icthus a vehicle for that kind of change. It is basically to reach campus for Christ."

Icthus didn't lobby for members. Instead, anyone was welcome to attend meetings. The organization's membership mainly grew by word of mouth. Attendance at the weekly meetings varied between 100-250 students and community members.

"Those who go to meetings are encouraged to bring their friends," Hart said.

John Swartz, freshman in mechanical engineering and former Icthus president, said the religious organization was non-denominational.

"We don't try to force our views on anyone," Swartz said. "It (Icthus) is a place for people to come and investigate Christianity and learn about spiritual things."

The group investigated Christ's teachings and formed new friendships in the process.

"Icthus is a great social activity," said Swartz, who met his roommates through the meetings. "You are around people who encourage you."

## SPIRITS

---

*Continued from page 167*

Because the group was led by different students each week, Hart said the meetings and activities varied.

"Some of the meetings are structured; others are more laid back," Hart said. "The main focus is the speakers. They talk about Christianity in ways relative to the typical college student. They communicate about the hope of Christ and the basics of what Christ really means."

Some Icthus members attended a conference in Kansas City, Mo., where a group from PROBE Ministries provided seminars and training. Swartz said the speakers were motivating.

"There are several speakers who speak to the level of a college student. There are different seminars you can attend," Swartz said. "The seminars are not stiff, and the keynote speaker is usually under 30 years old, so he or she speaks to a college student's generation and level."

Besides the weekly meetings and annual conference, Icthus members also participated in various student activities. An annual barbecue took place at the beginning of the fall semester, with approximately 400 people attending the event. The group members also sponsored a car wash, went Christmas caroling at a local nursing home and had a bonfire with an Icthus group from the University of Kansas.

Kail Katzenmeier, sophomore in human development and family studies, said Icthus was an outreach for students who weren't Christian oriented.

"The Thursday night meetings are geared for the typical college student who may or may not have ever been to church," Katzenmeier said. "Icthus' goal is to provide a non-threatening understanding of our need for God in our everyday lives."

Katzenmeier recognized the difference between Icthus and other Christian organizations that focused on students who went to church frequently. Icthus was also geared for those who weren't strict Christians.

"Icthus is a place where anyone is welcome," said Becky Porter, freshman in speech. "It is for Christians, but it is also for non-Christians."

Announcements projected onto a screen are described by Greg Kice, junior in art. He discussed upcoming events and T-shirt prices. In addition, students were involved with a barbecue and car wash. (Photo by Mike Welchhans)

# ROCK BAND EXTRAVAGANZA

BY JUSTIN STAHLMAN

LOUD MUSIC REVERBERATED OFF THE OUTSIDE WALLS OF the K-State Union as band after band took the stage vying for the top spot at the Opus band competition. Although it was originally planned as a one-time spring event, Opus turned into an annual fall tradition.

The sixth-annual Opus band competition, sponsored by Union Program Council's Eclectic Entertainment committee, took place Aug. 31 from 5 to 11 p.m. The event had 26 entries, making it larger than previous years. However, due to time limitations, only seven bands were selected to compete.

The chosen bands performed in random order. Playing early in the show was considered a disadvantage because crowds arrived late. Despite being the first band to play, Truck Stop Love, a Manhattan band, placed second.

"The only problem is that part of the judging is based on crowd response. The bands that play early don't have much of a crowd," said Rich Yarges, Truck Stop Love's guitarist. "This year ran the best, and we played really well."

Although the band competition was successful, Charla Bailey, program adviser for Eclectic Entertainment, said it could be improved.

"Next year, I'd like to have it on Saturday and make it an all day thing," Bailey said. "This year's entries were all good enough to play. I'd like to make that possible, but it will be up to next year's committee."

Planning for OPUS 6 began early in June as co-sponsors KMKF-FM 101.5 and Impulse Sound were secured. The Union Plaza was reserved in the first week of June. Letters were sent to local businesses, music stores and radio stations to promote and encourage a diverse group of bands to apply.

To enter, the bands paid a \$35 entry fee and submitted a demonstration tape with two songs, one of which had to be an original. The non-refundable entry fee was used for prize money and other promotional expenses. Although \$900 was collected from entry fees, the total event cost UPC nearly \$2,000.

The judges were chosen based upon their involvement in music and their ability to determine originality among the bands. At least one K-State student was included every year to maintain student involvement. The 10 judges listened to audition tapes and selected bands for the live performance.

"The ballots are weighed heavily on originality," said Brian Harris, a judge and a member of the Moving Van Goghs. "Categories concentrate on instrumental and vocal ability more than stage presence and audience appeal."

Hey Ruth, a Lawrence band that was formed at the beginning of the school year, competed in the OPUS 6 band contest. Truck Stop Love, a Manhattan group, placed second in spite of playing first. (Photo by J. Matthew Rhea)

Members of the local band Bosom, wow the mob of listeners by using a variety of unusual instruments such as accordions and harmonicas. Greg Kice, junior in human development, played the lap dulcimer. Bosom presented a demonstration tape with an original song to be selected and paid a \$35 entry fee to help cover the event's costs of \$2,000. (Photo by J. Matthew Rhea)

# SEASONAL SERENADE

BY SHEDRA BAUSCH AND PRUDENCE SIEBERT

**T**HE K-STATE CHOIR STRAYED FROM THE NORM DURING THE HOLIDAYS. Instead of mailing out traditional Christmas cards, choir members took a more personal approach and became singing Christmas cards.

"We used to do singing Valentines," said Rod Walker, professor of music and choir director, "but so many other groups were doing the same project we decided to change."

The Christmas card singers, divided into groups of four and eight, were on call during the Christmas season. Money raised from the performances funded the choir's fall and spring tours.

Haley Minton, senior in speech pathology and audiology, said the group performed at homes and businesses. "We also had a request to perform at a wedding reception once," she said. "We didn't perform for it though because the wedding took place during finals week, so a lot of our group couldn't participate."

They also performed for a group of teachers at a breakfast sponsored by a school principal and President Jon Wefald's Christmas party. Wherever they went, Minton said the group was well received, with elementary school students among their biggest fans.

"Some of the kids would stop and sing," said Anne Walker, freshman in journalism and mass communications. "The kindergarten class did hand actions and joined in as we sang 'Up On the Housetop.'"

Students in the choir said the singing Christmas cards put them in the holiday spirit.

"I like doing the parties because sometimes they (the partiers) will invite you to stay and enjoy the party with them," said Jennifer Donovan, junior in music education.

Walker said choir members enjoyed delivering the singing cards.

"Sometimes it (performing) means more to the kids than to the people they are singing to," Walker said. "It means a lot to them to be able to provide music. They are good about sharing their talent."

Dennis Jensen, sophomore in pre-medicine, said the Meadowlark Retirement Community was one of the favorite places his quartet visited.

"The people were receptive," he said. "They were glad to hear us sing."

The choir has taken their show out of the country. Their most recent trip took them to Amsterdam and Maastricht, Netherlands and to Cologne, Germany last year.

"We take a vote on whether or not the choir wants to go," said Walker. "If there is enough interest to merit taking the trip, we go."

The choir also visited high schools in Kansas and performed for teenagers in Garden City, Dodge City and Great Bend.

"These concerts are not only beneficial to the choir," Minton said, "but it's great publicity for K-State. You don't even have to say anything. They just hear the choir and are impressed."

Three concerts were performed each semester on campus.

"Kansas State is very fortunate to have a choir of this quality," Walker said. "The credit goes directly to the students. The willingness and work ethic of students has to be at a high level. The kids are a delight to work with. I'm really sold on them."

"IT'S GREAT PUBLICITY FOR  
K-STATE...THEY JUST HEAR  
THE CHOIR AND ARE IM-  
PRESSED."

Approximately 10-20 people usually attend the Just Guys meetings to discuss topics that males face in society. (Photo by Mike Welchhans)

# QUESTIONING MANHOOD

BY TED KADAU JR.

Some men never questioned their manhood, but a growing number believed they should. Just Guys, a club founded in October 1991, was established to provide a forum for men to talk openly about men's issues. Taylor Mali, graduate student in English and founder of Just Guys, said a need for the club existed.

"I was 25 years old and I couldn't say I was a man," Mali said. "I had an aversion to the title of man. I had no role models, and I didn't feel I deserved the title. There was no rite of passage."

Issues the group members discussed ranged from the general competition that existed between men to the difficulty many men had in expressing their feelings. Mali said the group's purpose was not to focus on male and female relationships, but the discussions often centered on this topic.

He said people who stereotyped the group's members as male chauvinists or homosexuals were wrong.

"The men who come to the meetings are concerned about other men and the necessity of relinquishing some economic and sexual power," Mali said. "However, in giving up some of this power, they do not want to give up their personal, intrinsically masculine power. Some may say this is the power we need to relinquish the most. I disagree. If we had fully understood, honored and celebrated that power, we would have distributed it equally between the sexes."

However, the club members dealt with the problems of equality firsthand when they decided after the third meeting to exclude women. Jan Lewis, freshman in human development and family studies, had participated in the meetings before women were banned.

"When I first attended a meeting, I was concerned that women were not welcome. I didn't expect outright hostility, but I worried about an underlying attitude of rejection," Lewis said. "After the first meeting, I sensed a lot of openness and honesty. The members were comfortable with addressing issues and exploring relationships."

The men in the club decided to exclude women because some men said they were not honest when women were present. Lewis said she didn't resent the decision.

"I will miss the group, but I feel good about the decision. It makes a lot of sense to me," she said. "The women who were there for the first three meetings shared the vision of personal growth and were willing to accept this (club) for the personal growth of the men."

"I WAS 25 YEARS OLD AND I  
COULDN'T SAY I WAS A  
MAN,"  
TAYLOR MALI

Just Guys met Monday nights two to three times a month and had a retreat to discuss issues of the male movement. (Photo by Mike Welchhans)

For each racquetball player, the necessary equipment includes a glove, safety glasses, headband, ball and racquet. These items allow players to compete to their full potential. (Photo by Shane Keyser)

# WHAT'S ALL THE RACQUET?

BY LORI SCHREIBER

MEMBERS OF THE RACQUETBALL CLUB SAID THEY HAD FOUND THE IDEAL sport.

"It (racquetball) can be played any time of the year," said Kurt Pyle, senior in secondary education. "It is competitive and a great aerobic workout. Plus, you only need two people to play."

Pyle was one of 10 active members in the Racquetball Club. Originally formed in 1983, club membership dwindled over the years until its revival in 1991. The club members met Tuesday and Thursday nights at the Chester E. Peters Recreation Complex to play against each other.

Frank Westhoff, fifth-year undergraduate in architectural engineering and club president, helped revive the club. He said participating in the Racquetball Club had benefits.

"Going to the Rec, you never know who you will play," Westhoff said. "With the club, you can play people at your own skill level."

Club members participated in 10 tournaments during the 1993 spring season. Three of the tournaments were sponsored by universities, including Wichita State University, the University of Kansas and Southwest Missouri State University. The remaining seven were sponsored by sports clubs.

At the college tournaments, each of the schools entered six players who were ranked from one to six. The numbered team members played the corresponding members from the opposing teams.

Sports club tournaments were similar to the college tournaments, except they were open to anyone who wanted to play. The sports club tournaments had six divisions ranging from open to novice.

Although the club was an official University organization, they did not receive financial support. Westhoff said club members strung racquets for the Rec Complex, earning \$3 per racquet, to offset tournament entry fees. The cost of the tournaments ranged from \$25-35 per person.

Club members agreed racquetball was a good form of exercise and said the tournaments provided them a sense of satisfaction.

"You get a great thrill when you win a tournament. You know it is

## RACQUET?

*Continued from page 176*

something you did all on your own," said Mark Stenberg, graduate student in mechanical engineering.

A veteran racquetball player, Jan Wilson, graduate student in curriculum and instruction, said she liked playing in a club because of the camaraderie between the members. She said the club allowed her to meet new people and get a good workout.

"Competing in tournaments is fun and exciting," Wilson said. "I spend the weekend getting worn out and then I am ready to face my week."

Club members spent an average of five hours a week playing racquetball. Some members also stayed in shape by running and training with weights.

"The team as a whole is playing a lot better than last year," Stenberg said. "I think we all have moved up a skill level."

Although the club's membership had increased from the previous year, the group wanted to attract even more participants.

"Unfortunately, a lot of people who are interested in the club don't think we are interested in anyone except really good players," Pyle said. "That is too bad because if we get more people, then everyone improves."

Wilson used to be the only woman in the club, but she said more women had joined.

"One of the most exciting things about this year is that more people are getting involved, especially women," she said.

"COMPETING IN TOURNAMENTS IS FUN AND EXCITING. I SPEND THE WEEKEND GETTING WORN OUT AND THEN I AM READY TO FACE MY WEEK."

## DOWN TO BUSINESS

BY NICK MAZZA

FROM HELPING COMMUNITY RESIDENTS WITH THEIR TAX FORMS TO ASSISTING young adults earning their Graduation Equivalency Diplomas, Beta Alpha Psi accounting honorary members shared their skills with others.

Beta Alpha Psi was an honorary fraternity for students with an overall grade point average above 3.0. Members also needed to earn a 3.0 in an upper-level accounting class.

Eric Rook, senior in accounting and the club's vice president, said the organization had more than 100 members divided into 20 committees. The members served as volunteer tutors.

"We offer tutoring to accounting majors on Tuesday nights in Calvin Hall, as well as work with the Flint Hills Job Corps Center helping 16 to 22 year olds obtain their GEDs," Rook said. "We also help students study for their ACTs."

Rook said tutoring was a positive experience for club members.

"I enjoyed the chance of helping people who haven't had the same opportunities to learn things," he said.

Besides tutoring students, club members also assisted people with their taxes through the Volunteer Income Tax Assistance committee. The 80 volunteers were composed of 75 students, with 60 majoring in accounting.

Scott Walker, senior in accounting and VITA chairperson, said the committee helped more than 3,000 people during the past two years.

To assist small businesses with accounting needs, club members organized the Small Business Development Center. This gave students the opportunity to volunteer their time in an actual business application.

"I think the community involvement helps the students of Beta Alpha Psi, as well as the people needing help," said Johanna Lyle, Beta Alpha Psi adviser and accounting instructor.

"I ENJOYED THE CHANCE OF HELPING PEOPLE WHO HAVEN'T HAD THE SAME OPPORTUNITIES TO LEARN THINGS."

# ORGANIZATION RESUSCITATION

BY JENNI STIVERSON

**S**TUDENT FOUNDATION WAS DYING. Student membership and involvement in the organization were slowly sliding away. Members said the group's only hope for survival was reconstruction.

Student Foundation, a public relations and fund-raising organization, served the University through various projects and activities. Members wanted to generate a stronger sense of University pride and loyalty among students, but keeping spirit alive was a job that required involvement.

"We needed a change because membership was dropping. We needed to attract more people," said Kara Belew, senior in secondary education and Student Foundation president.

A change was made in the organization's structure. No longer was it solely a volunteer group; students who led Student Foundation had to prove they could be a leader before getting the job.

"We still have our volunteer group, but then we have a group appointed by the administration, like the deans and athletic director," Belew said. "Then we have an executive group to guide (the organization)."

The group's new constitution had a three-tiered ladder of leadership consisting of a group of advisers appointed by KSU Foundation, and a group of ambassadors appointed by the different colleges' deans. The executive council, which was the decision-making body of the group, made up the third tier.

Not only did the organization have a new structure, but all of the activities it sponsored were also new. The organization's members took a different approach to activities to get more students involved.

One of the new activities the reorganized Student Foundation sponsored was allowing alumni who made donations to the University shadow a student for a day. This gave the alumni an opportunity to experience college life in the '90s.

"They (alumni) can get more of a perspective that students today are still like they were when they were here," Belew said.

Another new project the group became involved with was the baseball series against the University of Kansas. The series was promoted through tailgate parties and a scholarship giveaway.

"We did it (the project) to promote baseball. Even though the games are free, they don't get a lot of support," said Dari Ashworth, senior in elementary education. "It's our job to find things at the University that need support."

Another change in Student Foundation was the involvement of students from a variety of groups.

"Involvement used to rotate between greek houses," Belew said. "One year it would be one house involved, the next year it would be another. Now there are more 'global' types. It's much more effective."

## ACADEMIC ENDURANCE

BY SHEDERA BAUSCH

From organizing the homecoming parade to helping with Jell-O-Rama, members of Mortar Board Senior Honorary Society were involved with campus activities.

Carolyn Farris, senior in agricultural economics and Mortar Board president, said the organization was open to juniors with a minimum 3.3 grade point average who demonstrated leadership qualities and were willing to perform volunteer work.

Mortar Board members assisted with several projects on and off campus. Several members ushered at the Landon Lectures Series and for ticket holders of the President's Box at football games. The club also presented two students with scholarships funded by alumni donations and Mortar Board fundraisers.

Despite members' involvement in these various activities, the group's main responsibility was organizing the homecoming parade. Jim Persinger, senior in marketing, directed the parade. He said his involvement with Mortar Board was rewarding.

"I find it refreshing to be in a group that provides service for so many people," Persinger said. "I have the opportunity to organize several activities, including the homecoming parade."

Persinger said the Mortar Board members needed to be dedicated because many of the club's activities were time consuming.

"Most of the members are so active that it is hard to find time to do the activities we have planned," Persinger said. "Most things are pulled off from the commitment of the members."

*Continued on page 186*

## ENDURANCE

---

*Continued from page 185*

Besides helping with the University activities, Mortar Board members reached out to people beyond campus.

At Christmas time, Mortar Board members collected items for children. They also sponsored a Christmas party with children in Manhattan's Big Brothers/Big Sisters program. Farris said these projects were enjoyed by the entire group.

"It (helping children) makes you feel like you're doing something good and worthwhile," Farris said.

In the spring, the club sponsored a Mortar Board Week on campus. They had speakers and activities to promote leadership within the student body. Farris said the club's activities provided members the opportunity to develop friendships.

"It's fun to be in a group with so many motivated people," she said. "Whether it's attending meetings or helping with projects, everyone has a special role."

## WALK OF DIVERSITY

BY SHANNON YUST

THOUSANDS OF PEOPLE MARCHED TO THE LINCOLN MEMORIAL IN WASHINGTON, D.C., to hear Martin Luther King Jr. speak in 1963. Thirty years later, 130 K-State students walked through campus during the Martin Luther King Jr. Observance Week, Jan. 18-22, in recognition of the slain civil rights movement leader.

The walk, sponsored by Alpha Phi Alpha fraternity, began at Waters Hall. The students marched through campus to All Faiths Chapel, where they participated in a candlelight vigil and a religious service.

Jayson Strickland, senior in elementary education and Alpha Phi Alpha president, said the walk was a symbolic tradition that the fraternity has sponsored since 1986.

"The walk from Waters Hall to All Faiths Chapel symbolizes the marches and demonstrations they (protesters) did to overcome racist institutions of the times," Strickland said. "King was an Alpha, and it (the walk) was like honoring a brother."

Veryl Switzer, associate director of intercollegiate athletics and co-chairman of Observance Week, said the event served as a reminder that King's dream has not been realized.

"We celebrate Martin Luther King Jr. — the passing of a star — to reflect on the many contributions Dr. King made for mankind," Switzer said. "We want to make sure his message continues."

Strickland said the service was a learning experience for students, community members and children.

"A lot of times students haven't had any kind of experience with black history, and they don't know the affect Martin Luther King Jr. has had on society," Strickland said. "The Observance Week gives people a chance to celebrate the dream and rededicate themselves to the dream."

"THE OBSERVANCE WEEK  
GIVES PEOPLE A CHANCE TO  
CELEBRATE THE DREAM AND  
REDEDICATE THEMSELVES TO  
THE DREAM."

## PUSHING POLITICS

BY BELINDA POTTER

ALTHOUGH THE CLUB MEMBERS DIFFERED ON POLITICAL ISSUES, THE YOUNG Democrats and College Republicans had similar goals for the national and local elections. Both organizations tried to involve students in the political process by promoting candidates and informing students about voter registration.

"Right after school began, we started having information tables set up in the Union," said Ray Kowalczewski, senior in economics and president of Young Democrats. "We had a table there 35 or 40 days out of the semester."

At the information table, club members answered questions, passed out campaign literature for national and local candidates and sold material that promoted the Bill Clinton-Al Gore ticket. Club members sold approximately 50 T-shirts, 200 buttons, 30 yard signs and 100 bumper stickers. The money was used to pay for campaign paraphernalia and to cover printing costs of literature that club members distributed.

However, the Young Democrats weren't the only political organization to have information tables in the Union. Republican and Libertarian groups each had a campaign table beside the Young Democrats.

"We had a few little jabs with the students at the other tables," said Mark Sheldon, senior in secondary education and Young Democrats member. "There were lots of people who stopped by the table and were genuinely interested."

Besides passing out information about the candidates, Kowalczewski said he tried to get students interested in voting.

"Regardless of how the students voted, we (Young Democrats) wanted them to go out and cast their ballots," he said. "Eighteen-to 24-year-olds usually don't vote, so politicians don't have to pay attention to young people."

Even though the group was unable to get a club member deputized to register students, Kowalczewski said they passed out more than 100 voter registration information cards.

The College Republicans also wanted students to exercise their right to vote. The group worked more than 100 hours in the Union handing out candidate information, sending students to the Student Governing Association office for voter registration, and discussing current issues with students.

"I met 10 to 15 people a day while working at the table," said Gregory Hill, junior in political science. "It really kept me up on the issues."

The Republicans kept students informed on the Republican platform by referring to a 100-page document distributed to all party organizations.

During the Nov. 3 election, people at the Manhattan Democratic headquarters anxiously watch the television for election results. The headquarters served as a welcome place where many Democrats gathered to watch the election and participate in the other activities of the week. (Photo by Cary Conover)

## POLITICS

*Continued from page 191*

"All of Bush's positions were listed in this catalog," said Neil Neaderhiser, senior in engineering technology and College Republicans president. "It was helpful when people had questions at the table."

The College Republicans made their presence on campus known during the elections. Club members passed out more than 4,000 fliers, 150 yard signs, 400 buttons and 400 bumper stickers. They also made an effort to call all students registered with the Republican party on the night before the election.

"I think calling the registered Republicans made a big difference on the local elections," said Stephanie Steebeck, freshman in journalism and mass communications. "People were more likely to vote if someone called to remind them."

# TOUGH COMPETITION

BY TODD JOHNSON AND HEATHER RILEY

*Each fall, students had the opportunity to become ambassadors for the University. Sponsored by the KSU Alumni Association, the ambassadors were chosen to represent and promote K-State.*

*The selection process had several stages. After completing an application, 19 people were interviewed by a group of students chosen by the Homecoming committee. Fourteen students were granted a second interview with a faculty committee. The committees chose four men and four women finalists, who were voted upon by the student body. During halftime at the Nov. 21 Homecoming football game, Todd Johnson, junior in agribusiness, and Heather Riley, senior in English, were announced the winners. Below is an account of their experiences.*

## MONDAY, OCT. 5

**Johnson:** Applications for ambassadors were made available. I picked mine up the first day — the first step in a long and competitive process. I decided this was a once-in-a-lifetime chance I couldn't pass up.

**Riley:** I picked up an application for ambassador, and I'm really excited. One of my biggest goals was to get involved in sharing my enthusiasm about K-State with others. Being an ambassador would attack that goal head-on.

## FRIDAY, OCT. 23

**Johnson:** Applications were due. After turning mine in and signing up for the initial interview, I realized how many qualified applicants there were. It would not be an easy process. I set my goal to make the ballot.

**Riley:** I turned in my application today. It was more difficult than I expected. It wasn't that I struggled to find anything to say, but condensing my ideas was a challenge. I bought a purple cap and stayed up all night with a friend, scribbling, laughing and counting words. My enthusiasm about being an ambassador ran rampant. I couldn't wait for the interviews.

*Continued on page 197*

---

## COMPETITION

---

*Continued from page 195*

MONDAY, NOV. 2

**Johnson:** First interview. I had lost my voice over the weekend while cheering for my high school at a state volleyball tournament. I didn't sound like myself during the interview, but I felt good about how it went. Camille Rohleder (senior in elementary education and Homecoming committee member) called with the news that I had made the second interview. I was ecstatic. Now I had to prepare for the next step.

**Riley:** I was incredibly nervous before the first interview, but once I got there, I loved it. I enjoyed talking about my favorite memories of K-State and sharing with others (the reasons) why choosing to study here has been the best decision of my life.

WEDNESDAY, NOV. 4

**Johnson:** Second interview. My heart was pounding and my hands were sweating as I entered the room, plus my voice was still raspy. I was required to give a two-to three-minute presentation on my knowledge of K-State and the Homecoming theme.

Later that evening, I received a phone call during dinner. My heart dropped. It was Camille (Rohleder). She tried to beat around the bush by asking what I was doing. I finally asked her if I had made it, and she said I was on the ballot. I was so happy, my legs started to shake. I thought I was going to fall over. I had achieved my goal.

**Riley:** The faculty interview was hard. Most of the people on the panel were teachers I respect, and that added to the anxiety. It was a challenge to explain how much I would love to commit myself to this position.

DAYS NOV. 18-20

**Johnson:** Student voting started and our articles were printed in the Collegian. Those three days were great. All of my friends were supportive. It was a wonderful feeling — like being a celebrity.

SATURDAY, NOV. 21

**Johnson:** At the parade, all the candidates and last year's ambassadors were driven in convertibles. The parade was so much fun I decided it didn't matter if I won or not; the experience had been enough.

I have never experienced a longer first half of a football game in my life. I tried to keep the thought of going out on the field from my mind. Lining up for the presentation was an awesome feeling—the stands were full, the Cats were winning, the weather was cold, my heart was pounding and oh my God, "the new KSU ambassador is Todd Johnson." I didn't even hear Heather's name announced, I was in such shock. I would never forget "The Cats and U in '92."

**Riley:** The parade was incredibly cold, but it was wonderful to see people from the Manhattan community. My parents were at the parade, too. They had their video camera at every corner. Mom even filmed halftime, while Dad followed me down to the field to take pictures.

Standing on the field, I wasn't sure if my trembling was from nerves or the cold weather. I was sure no matter who won, I would always remember the ambassador process as the highlight of my senior year.

**A**s the Homecoming parade makes its way down Moro Street in Aggieville, K-State ambassador candidates Chris Hupe, senior in finance, and Becky Keller, sophomore in human ecology, wave to friends along the sidewalks. Cold temperatures made it difficult for the candidates to ride in the convertibles during the parade. (Photo by Cary Conover)

## MAKING MADNESS

BY JANET SATTERLEE

WHETHER THEY WERE HANDING OUT POMPONS, COORDINATING Midnight Madness or sitting in the best seats at football or basketball games, ICAT (I Contributed A Twenty) members had the opportunity to meet new people while being involved in athletic events.

"The students have a lot of fun at football games," said Angie Johnson, ICAT adviser. "They make their presence known."

Club members helped the athletic department with various activities, including handing out pompoms at the Iowa State football game.

"When we need some manpower, they're there to help," Johnson said. "The money they raise goes to the Mike Ahearn Scholarship Fund, which is a general fund for all student athletes."

Membership in the club grew from 230 students in 1991 to 532 students in 1992. Members planned a spring fundraiser for the baseball team, organized the basketball ticket campout and helped with Midnight Madness, a basketball scrimmage which took place Oct. 31.

Jeff Chapman, Midnight Madness coordinator and former ICAT president said donations and promotions by Larry "Bud" Melman contributed to the event's success.

"My roommate and I were watching TV after Midnight Madness last year. We talked about how pitiful it was. Then we saw David Letterman on TV and Larry "Bud" Melman was on. I said, 'We need to get that guy.'"

Chapman said different activities including costume contests, performances by former Wildcat basketball players and a three point shooting contest in which Jon Wefald, president, beat Milt Richards, athletic director, were planned every 10 minutes to keep the crowd's interest.

Chapman said the final highlight of the event was when Brian Henson, sophomore in arts and sciences, proposed to his girlfriend, Theresa Russell, sophomore in secondary education. She accepted his offer.

"The production was one of the best," Johnson said.

# ROLLING IN THE DOUGH

By DAVID GROSKO

**B**AKERY SCIENCE AND MANAGEMENT CLUB MEMBERS ROLLED UP THEIR sleeves and made some dough.

Gaining hands-on experience in baking, students in the club made a variety of baked goods to sell at weekly bake sales in Shellenberger Hall.

Joe Ponte, professor of grain science and industry and club adviser, said the bake sales allowed club members to gain valuable experience.

"Club members learn the importance of working together, mixing the various ingredients and using certain formulas for baking," Ponte said. "They also do marketing on what to sell and how much to charge."

Although they did not get paid, students earned credit hours depending on the number of hours they worked. Club members had meetings every Tuesday evening and prepared food for the next day's bake sale.

Thu Dao, senior in bakery science and management and club president, said bake sales took place from 3 to 5 p.m. or until all items were sold.

"The club usually makes about \$300-500 at a bake sale," Dao said. "The money raised goes toward professional conventions."

Dao said the first convention the club attended was the American Society of Bakery Engineers in Chicago.

"Members who work 50 hours get their trips paid for to Chicago," Dao said. "About 15 people a year get to go."

Ponte said the baking convention provided an opportunity for students to meet representatives from major baking companies. They also received up-to-date literature and information in the industry.

The top five members who worked the most hours were also selected to attend the Retail Baker's Association in Atlanta.

Besides attending conventions, club members also varied their activities by having special bake sales during holidays and University events. Stephanie Donker, senior in bakery science and management and the club's vice president, said the Open House bake sale in April kept club members busy.

"We give away free samples," Donker said. "It (the Open House bake sale) is a lot of work. It gets hectic baking for thousands of people."

Dao said she learned more from the club than from her classes.

"Club members get to do things like working on the cookie depositor, deciding on packaging needs and keeping everything clean to meet new sanitation laws," Dao said.

"THE CLUB USUALLY MAKES \$300-500 AT A BAKE SALE. THE MONEY RAISED GOES TOWARD PROFESSIONAL CONVENTIONS."

# TEACHERS OF TOMORROW

By BELINDA POTTER

IN NOVEMBER, A GROUP OF STUDENTS CONTRIBUTED 30 POUNDS OF FOOD TO the Manhattan area's needy. The next month they warmed elderly people's hearts when they sang Christmas carols at two local nursing homes. In February, these same students volunteered their services to the Flint Hills Breadbasket. Besides being community-minded individuals, the students shared another common bond — they were all education majors involved in Teachers of Tomorrow.

The club, open to students in the College of Education, was virtually inactive until Rosemarie Deering, assistant professor of secondary education, came to K-State six years ago. Deering was asked to advise the group of 20 in January 1988. Since then, the club's membership has grown to include more than 200 students.

"We worked hard at the education symposium, Open House and Activities Carnival to get people to recognize our club," said Jennifer Sothers, senior in elementary education and TOT president, "but I was really surprised to see so many people at the first meeting."

The club's officers quickly involved new members in projects. The future teachers went caroling at Stoneybrook Health Care Center and St. Joseph Senior Community before winter break. Deering encouraged the students to reach out to the residents.

"I told them how important it was to touch (them), to pat their hands, to make eye contact and to try to reach out to each person," Deering said. "I was so proud. When we came out, there were lumps in all of our throats."

The club members' spirit of giving continued into February as they volunteered their time to the Flint Hills Breadbasket. Six club members helped transfer crates of food from a warehouse to the Breadbasket's headquarters.

From working with the charity, club members learned about the area needy.

"They feed over 180 families a week," Sothers said. "They're even building a kitchen in their headquarters to teach some of the recipients how to cook the food they receive."

Deering said one of the club's goals was to bring secondary and elementary majors together. She also wanted the future teachers to be sensitive to community needs.

"We wanted to think bigger than any particular focus. We need to make connections with people, especially with the needy and the hungry," Deering said. "We (teachers) must touch hearts as well as minds."

Teachers of Tomorrow members transfer boxes of food from a pallet to the Flint Hills Breadbasket van at the Parker-Hannifin plant. Extra food was stored at the plant because the breadbasket didn't have room to store all of the food donated by Quaker Foods. The breadbasket, which had existed for 11 years, distributed food to 41 food distribution agencies within Riley County. (Photo by Darren Whitley)

Senior in elementary education, Becki Price, tosses a box of food to the back of the truck to be stored in the Flint Hills Breadbasket's facility. "Teachers of Tomorrow members volunteered their help following the Christmas holiday because food banks tend to be forgotten," said Teachers of Tomorrow president Jennifer Sothers, senior in elementary education. # UP AND CLIMBING

BY TRINA HOLMES

Loose pebbles trickled over the climber's face as he worked the hex into the rock's crack. Once it was securely wedged in the rock, he continued to move up the face of the mountain and safely anchored himself with webbing. Signaling to the climber below, he began to take up the slack in the rope connecting the two climbers. His partner followed his lead up the rock face, where they made their way in leapfrog fashion over the craggy surface, buffeted by wind.

Scaling imposing mountain terrain was a common activity for experienced members of the Rock Climbing Club. Turning their initial reservations of climbing into strengths, club members said they enjoyed the challenging aspects of the sport.

"The thing I enjoy about climbing is its mental and physical challenges," said Ryan Fast, senior in park resources management. "It's very mental — you have to overcome your fears in a big way. I was scared of heights; I still am. It's usually the people who aren't afraid of heights who make mistakes. They get rambunctious. The fear factor plays an important role in climbing."

Fast said common places to climb included sites in Colorado, Missouri and Oklahoma. He said club members traveled to different locations to climb.

"We could be gone in a half hour," Fast said. "We try to coordinate food, throw all of our equipment in the car and organize it when we get there."

Rick Hunt, senior in management, said a typical trip didn't require a lot of planning time.

"We decide where we're going and when we're going a week or two before the trip," Hunt said. "We split into cars and find a campsite. We'll either climb that day or wait until the next morning. We try to climb as much as we can since we've driven all that way. Usually we go during the times of year when there's a lot of daylight. By the end of the day, we're tired, so we just sit around the campfire at night."

Each member of the club had the opportunity to perfect his or her skills on the Memorial Stadium's wall. To ensure the climbers' safety, training sessions and seminars were offered to novice members.

"Right at the first, they showed us safety techniques," said Tia Swanson, freshman in food and nutrition-exercise science. "They taught us to tie knots and the dialogue we should use with people on the ground and on the wall. We also had to pass a test before we could climb."

A new safety officer position was added to the club for the members' safety. Fast said emphasis on protection was important.

"Your life is in their (the person you're climbing with) hands and theirs is in yours. If people get careless, it could turn into disaster. That's why the club stresses safety."

*Continued on page 206*

---

## CLIMBING

---

*Continued from page 205*

The amount of time spent climbing varied with each member. Hunt said club officers wanted to turn idle novice members into experienced participants.

"New people are usually reluctant to call someone and ask them to climb with them," Hunt said. "There are a lot (of new members) who are too shy. We want them to get more involved, so we hold training sessions and publicize specific times to climb. People think the club's imposing, but it's not."

Emily Brink, freshman in kinesiology, said she had several misconceptions about the club before she joined.

"I thought most members would be big, strong, muscular guys," Brink said. "It wasn't like that. There were a lot of different people there. I was also surprised that there were quite a few girls. I was scared the first time I went to a meeting, but after I met them (club members), I felt like I fit in."

**Ryan Fast**, senior in parks and recreation administration, secures a foothold while climbing the west wall of Memorial Stadium. As Fast inched up the wall, another member of the K-State Rock Climbing Club took up slack to keep him from falling. (Photo by Cary Conover)

# RAISING AWARENESS

BY STEPHANIE HOELZEL

**D**URING THE FALL SEMESTER, A GROUP OF STUDENTS BANDED TOGETHER TO promote rape prevention. Known as peer educators, the students gave presentations to raise awareness of the issue.

"Our group tries to teach students to be responsible without sounding like we are preaching," said Rebecca Carney, graduate student in student counseling/personal services and assistant director of the Women's Resource Center.

Carney said peer educators attended seminars and workshops to learn about rape and methods for preventing it from occurring. The peer educators learned ways to refer victims to proper counseling and gave several presentations to various living groups.

"We spoke to the Sigma Kappa sorority and also to the staff members of the residence halls," said Elizabeth Haynes, junior in social sciences and women's studies. "Giving a presentation to the RAs helped us a lot because they were already trained in the area of rape. They were able to provide us with good feedback on how to improve our presentation."

The peer educators tried to capture the students' attention through their presentations.

"We introduce ourselves, show a video and then break into groups to discuss issues. We try to emphasize not getting too drunk, watching out for friends and clear communication," Carney said.

The presentations also stressed the danger of alcohol.

"Alcohol is involved in 84 percent of all rape cases reported," she said. "We want people to know where they are and who they are with when they are drinking."

Peer educators wanted to spread their message to both genders.

"Our message is really directed toward both men and women," Haynes said. "We want women to protect one another and look out for each other, but we also want men to be educated on rape as well."

The program included several male peer educators, which showed men were also concerned with the issue.

"I think it is important to have men involved because it shows we understand there is a problem and that we would like to help combat it," said Andy Price, junior in pre-nursing.

**D**uring a Sigma Kappa house meeting, Rebecca Carney, graduate student in student counseling/personal services and assistant director of the Women's Resource Center, introduces a video concerning date rape. # BUILDING FENCES

BY LISA STAAB AND JENNIFER SWANSON

**B**UDGET CONSTRAINTS MADE IT IMPOSSIBLE FOR THE UNIVERSITY TO PUT money toward fixing a fence at the Horse Teaching and Research Center. However, it didn't take long for members of the Horseman's Association to step in and help.

"We always wanted to do something," said Chad Brown, senior in animal sciences and industry and club president, "but there's never been anything this big that would take a large group of people."

The 30-plus members of the Horseman's Association broke out their chain saws and work gloves and began clearing a section of fence, trees and shrubs so a new fence could be built for the unit, which was used by students for research and to sharpen their horse management skills.

"Since most of the members of Horseman's Association used the unit, the group volunteered to repair the fence," said Karen Moorman, freshman in animal sciences and industry. "The horse science class used the labs in the unit for breeding and training their horses."

By mid-February, most of the trees had been cleared. The club members waited for warmer weather before building the new section of fence.

Randy Raub, assistant professor of animal sciences and industry and club adviser, said he was glad the Horseman's Association decided to take on the project.

"They saw the need for the new fence and that it was going to be hard for the horse unit to get it done," Raub said. "Out of the goodness of their hearts, they decided to put something back into something they could get some good out of."

Chain saws, gas, oil and manual labor for the project were donated by club members, who raised almost \$500 for fence-building supplies by sponsoring a dance at TW Longhorn's.

The organization met twice a month and included students interested in horses and horse owners.

"The group wasn't just for members who had horses. Instead, it was an organization that allowed students to get together to discuss horses and listen to speakers," Moorman said. "For example, one speaker focused on animal welfare."

Moorman said the association also sponsored horse competitions.

"The main thing we do is a barrel racing and team roping competition," Moorman said. "Anyone could compete, but our group handled the money. The competitors paid entry fees, and then we provided prize money to the winners."

The other event was a cutting competition in which the horse showcased

*Continued on page 212*

Steadying a tree, Betsy Greene, graduate in animal sciences, and Chad Brown, senior in animal sciences and industry and Horseman's Association's president, keep the trunk from rolling as Brent Hilgenfeld, senior in pre-veterinary medicine, saws through it with a chainsaw. Club members cleared trees and brush to make room for a new fence at the Horse Teaching and Research Center. (Photo by Brian W. Kratzer)

## FENCES

---

*Continued from page 211*

its capabilities. After a calf was selected, the horse was directed by its rider to the chosen calf. At this point, the horse was trained to keep the calf away from the group.

"The horses are trained to do this and actually they're very smart," Moorman said. "The rider only directs the reins."

---

"THE GROUP WASN'T JUST  
FOR MEMBERS WHO HAD  
HORSES."

KAREN MOORMAN

---

Brown said the club used to be oriented mainly toward the show industry, but because the club members' interests broadened, they participated in more community service projects. In the past, the Horseman's Association's activities included riding sessions for handicapped children, as well as sponsoring team roping and penning competitions for the community.

However, community members were not the only ones who benefited from the Horseman's Association. Raub said

*Continued on page 214*

## FENCES

*Continued from page 212*

club members gained valuable experience, learned responsibility and received a social education while interacting with others.

"I have met a lot of people. Helping with the team roping competition was a great experience," Moorman said. "It (team roping) was extremely fun because we had to get the ropes off the steers. Even though I live on a farm, I have never worked with steers. It (team roping) was a difficult but good experience to help me in my career."

Brown said he learned at one of his first Horseman's Association meetings that if people were interested in the horse industry, they had to make others aware of it. He said being a member was one of the best ways people could express interest in a horse industry career.

"Many students gain exposure to things they don't know a whole lot about. It also allows them to keep in touch with the horse industry," Brown said. "Not to mention, it's a lot of fun."

Coffelt and Brown pull a tree down a slope to get it out of the way. The 30 club members volunteered their time to the building project because they used the unit for research and to sharpen their horse management skills. (Photo by Brian W. Kratzer)

Making his way through the thick brush surrounding the unit, Hilgenfeld clears away the foliage. Members donated chain saws, gas, oil and manual labor to keep repair costs to a minimum. (Photo by Brian W. Kratzer)

A bucket of flowers awaits retail floriculture students' attention. (Photo by David Mayes)

## FLOWERS FOR THE HOLIDAYS

BY RENE MARTIN AND JENNIFER SWANSON

Surrounded by more than 200 vases, members of the Retail Floriculture Club didn't have time to stop and smell the flowers.

On Feb. 11, club members spent three hours preparing rose and carnation arrangements for their Feb. 12 sale. Each year, the club sold flowers for Valentine's Day, which served as the group's largest fundraiser.

"The faculty really like it," said Mary Reed, senior in horticulture and club president. "The students also like to have an affordable gift."

The arrangements sold for \$5, and the club earned more than \$250. Besides raising money, the fundraiser served as an educational experience for the members, most of whom were retail floriculture and horticulture majors.

"The sale teaches the students how to make arrangements on a mass production level," said club adviser Kent Kimmins, professor of horticulture. "It allows them to get a feel for the floral industry, while at the same time raising money."

The club used the sale's earnings to attract guest speakers to campus. The speakers were involved in the floral industry and made presentations to club and community members.

"We have designers come and give demonstrations," Reed said. "These presentations usually attract people from the community as well as students."

Kimmins said the professionals provided the students an insight into the floral industry. Besides the lectures, he said club members also learned through tours. A small group traveled to Topeka and visited Stuppy's Greenhouses.

"We visited the wholesale part of Stuppy's," Reed said. "We wanted to learn more about the wholesale part of the industry."

The club, which had monthly meetings, also planned to travel to Wamego for a March meeting.

"We were invited to the Carriage House (Antiques and Collectibles) because the person we wanted to give a presentation on campus was unable

## HOLIDAYS

---

*Continued from page 217*

to come," Kimmins said. "It will be good for the students to visit the store and learn the various techniques used (to make pot-pourri)."

Because the club offered educational events, Kimmins encouraged students interested in the floral industry to attend the monthly meetings.

"Students who join get to know other people in their field," he said. "The club lets them interact socially."

The club didn't require a huge time commitment from its members, Kimmins said. However, he said the energy members devoted to the club was worthwhile.

"The time that they do spend (on club activities) is well spent in getting to know their industry," Kimmins said.

During their lab class, Deborah Reyes, senior in sociology and retail floriculture and Cindy Gilliland, sophomore in retail floriculture, select flowers to make an arrangement. Members of the Retail Floriculture Club also learned how to make table arrangements for Christmas using greenery sprigs. (Photo by David Mayes)

# KEY TO SUCCESS

BY LISA STAAB

INSTEAD OF PLANNING HOMECOMING ACTIVITIES, BLUE KEY, A NATIONAL leadership honorary fraternity, adopted a new mission that emphasized providing leadership development programs for students.

"We teach an emerging leadership lab class for freshmen leadership scholars along with Pat (Bosco), Bernard (Franklin) and Susan (Scott)," said Roger Denning, senior in electrical engineering and president of Blue Key. "It is a two-hour class — one hour focuses on lectures and one hour is to teach or coordinate leadership topics. The class basically gives freshmen leadership skills."

Dawn Spivey, senior in social sciences and director of the leadership laboratory class, said the course focused on helping freshmen develop their own leadership styles.

"We help students who are targeted as leadership scholars to expand their leadership to the collegiate level," Spivey said. "It is easy to target their problems and help with their college transition. It's rewarding for Blue Key members and the student leaders."

Blue Key also sponsored Leadership Week, in which K-State alumni returned to K-State to address the topic of leadership.

Chris Hupe, senior in finance, and Blake Kaus, senior in marketing, served as co-directors for Leadership Week.

"We (Hupe and Kaus) were responsible for getting names of prospective speakers from deans. Getting prominent alumni to speak was our main goal," Kaus said. "I also spent a lot of time talking to people and coordinating schedules, and generating our theme — Leadership 2000. We chose that theme because it is exciting and enticing (enough) to lead us into the next century."

Kaus said his role increased his confidence in leadership, and oral and written communication skills.

"The preparation was challenging, but when that week arrived, everything fell into place and ran smoothly," Kaus said.

Another program Blue Key sponsored was Peer Leadership Consulting. The group spoke to campus organizations about various topics including motivation, leadership, communication, goal setting, time and goal management, diversity and involvement on campus.

"We adapt to every group and have resources available that we tap into. We don't make it (presentations) up," Denning said. "Instead, we do research and make sure we are knowledgeable about the topic."

Student leaders also served the University through their Leadership Resource Center located in the K-State Union. Leadership information from books, journals and video tapes were available for students to check out.

Confronting the issue of diversity, Blue Key members assisted Multicultural Student Council with the Multicultural Leadership Conference. The group also co-sponsored a high school leadership conference with the Student Government Association.

Blue Key raised \$7,000 for student scholarships which were awarded based on students' leadership, service and involvement.

Although Denning spent an average of 15 hours per week working on Blue Key projects, he said he enjoyed investing his time in the club.

"It's fun work, and it's not grueling. A lot of other members can do three to five hours a week depending on their position," Denning said. "I feel good because I've developed a lot of my own leadership skills, but at the same time I've helped others develop theirs. It was a win-win situation. I got a lot out of Blue Key and contributed a lot to others, especially working with all the people I have been able to work with."

---

"IT'S EASY TO TARGET THEIR PROBLEMS AND HELP WITH THEIR COLLEGE TRANSITION."

Listeners enjoy the music of different jazz bands at the third annual New Currents Jazz Festival held Feb. 27 in Union Station. (Photo by J. Kyle Wyatt)

# JAZZY FESTIVAL

By PRUDENCE SIEBERT

**I**N AN EFFORT TO DISCOVER AND UNDERSTAND DIVERSE MUSIC, MEMBERS OF New Currents listened to jazz.

The organization, which was composed of avid jazz listeners, tried to create a greater appreciation for jazz music through the Jazz Festival, co-sponsored Feb. 27 by the Union Programming Council's Eclectic Entertainment committee and Union Station. Approximately 70-75 people attended the festival, down from last year's attendance of 100.

Bands participating included Unplugged, Mr. Direction, KSU Jazz Combo, Heavy Wood, Soup of the Day, Creative Minds and Hypertension. The bands didn't have an entry fee, but the public paid a \$4 admission cost. The \$289 earned went toward next year's festival.

Henry Ashwood, senior in music education and Hypertension's coordinator, called Eric Brunt, senior in electrical engineering and president of New Currents to ask to participate in the festival, but all the bands had already been selected. However, his band was asked to perform after others withdrew.

"Eric called me a few weeks before the festival and told me of a couple of drop-outs," Ashwood said. "When he asked me if we would like to be a replacement band, I was like, 'Yes, let me get a band together.'"

---

"MOST PEOPLE WOULD HAVE  
TO TRAVEL TO EXPERIENCE  
THIS KIND OF MUSIC."  
ERIC BRUNT

---

Although he enjoyed the festival, Ashwood said it could be improved by having more people participate.

"The intent behind it was good," Ashwood said. "But the outcome was not as good as it could have been. More people need to get involved."

However, Ashwood said the festival provided listeners an opportunity to enjoy jazz music.

"There is a need for jazz and fusion listening. Most people around here (Manhattan) just listen to rock or country," he said. "It (the festival) should boost student interest."

The purpose of the Jazz Festival was to expose listeners to different kinds of music.

"Most people would have to travel to experience this kind of music," Brunt said. "We don't do the festival for any other reason than for people to appreciate the music."

## FESTIVAL

---

*Continued from page 222*

The club emphasized broadening people's musical interests, but it didn't restrict its goal to students — Manhattan and Junction City residents also were encouraged to join.

Gene Donovan, a retired Army and Civil Service worker, heard about the organization on a radio show and decided to attend a club meeting.

"I'm crazy about jazz," Donovan said. "So, I gave it a shot (joined the club) and here I am."

For Donovan, the benefits of music went beyond quality.

"I'm 66 (years old). I feel like I'm 30," Donovan said. "Some people my age may be in rocking chairs, or the only trip they make is to the convenience store for a cup of coffee, but not me. I'm listening to jazz."

Eric Brunt, senior in electrical engineering and New Currents president, said the club's meetings and events helped members develop a broader musical knowledge.

"We've tried to get people to join by raising awareness of the club," Brunt said. "I encourage people to join because we are always open to new ideas."

During Heavy Wood's performance, Mike Wooley plays a muted trumpet. Wooley also played a flugal horn during other parts of the set. The New Currents Jazz Club had informal meetings which included attending concerts and listening parties. (Photo by J. Kyle Wyatt)

## PRESERVING CULTURE

BY PRUDENCE SIEBERT

**I**N RECOGNITION OF NATIVE AMERICAN HERITAGE MONTH, NATIVE American Student Body members sponsored documentary films, speakers and feature events throughout March.

The events included a pipe ceremony by a medicine man from Montana, Navajo sand painters, a Navajo drumming group with traditional drumming and chanting and the Thunderbird Dancers.

Working to support Native American ethnicity, the Native American Student Body was open to anyone interested in Native American culture.

Harald Prins, NASB adviser and associate professor of social anthropology and social work, said the club was beneficial for its members, most of whom were Native Americans.

"It's a small but dedicated group taking charge," Prins said. "Native American students are being groomed for leadership positions. The University helps them achieve goals in their lives."

Marilyn Hetzel, junior in secondary education and club president, said the group tried to schedule at least two talking circles. After purifying themselves with sage and cedar smoke, people said what was on their minds, and the discussion stayed in the room.

"You get to know other people in the group," Hetzel said. "You become empathetic toward them."

NASB sponsored speakers during April including Karren Baird-Olson, instructor in the department of sociology, anthropology and social work, and Russell Means, who was a leader in the American Indian Movement and a movie actor. He appeared in "The Last of the Mohicans."

Education was the club's main emphasis. Prins said education fostered greater understanding and appreciation for the Native American culture and helped combat racism and discrimination.

In an effort to attract high school students and potential transfers from Haskell Indian Junior College to K-State, NASB had Wildcat Recruitment and Weasel Day. They wanted Native American students to realize the University had students with diverse backgrounds.

"We have announcements about multi-cultural issues such as Black History Month," Hetzel said. "We show respect for their ethnic backgrounds and they for ours."

Members said they enjoyed participating in the club because it linked them with students of similar backgrounds. Chris Hall, sophomore in pre-veterinary medicine, said the NASB functioned as a support group.

"It is a way to keep up with your culture," Hall said. "They know what you're talking about. You don't have to explain."

---

"IT'S A SMALL BUT DEDICATED GROUP TAKING CHARGE."  
 HARALD PRINS

---

A calculator helps Luckey figure the correct mix of aggregates and liquids in order to form a floatable concrete. Concrete, coupled with buoyant materials, allowed the canoe to float. The Concrete Canoe Club members also had to design the canoe so that it would not develop stress fractures during the competition. (Photo by Brian W. Kratzer)

# THE RIGHT COMBINATION

BY LORI CAGLE

SEARCHING FOR THE PERFECT COMBINATION OF CONCRETE ALLOWED CIVIL Engineering technology students and the Salina Concrete Canoe Club the chance to mix ideas.

Using concrete to construct a canoe for the mid-America Conference Concrete Canoe race turned their ideas into reality. The race, sponsored by the American Concrete Institute, took place at the University of Nebraska in April. The race's purpose was to find the best formula for a concrete canoe.

Lynn Engle, senior in surveying technology and Concrete Canoe Club president, had been associated with the team for the past three years. He said the club's participation had improved through the years.

"We have 11 really active members and eight or nine who help on and off," Engle said.

Trying to find a usable formula, club members experimented with different base mixes. Instead of the normal gravel or sand, they used expanded shale, hollow beads and zonolite, which was a Styrofoam bead that achieved the needed light weight.

"We are looking for a recipe that combines strength and lightness," Engle said. "You need a strong concrete with the right ingredients and materials."

The canoe was expected to weigh under 150 pounds. Club members formulated and tested different mixtures throughout the year. The final testing began in February.

"Testing consists of pouring five cylinders with the final formula, then breaking each one under hydraulic pressure," Engle said. "The cylinders are broken every seven days. The amount of pressure it takes to break the cylinder is the strength of the mixture."

Club members said the process was time consuming and expensive.

"One-quarter to one-third of our funds come from SGA (Student Governing Association)," said Dennis Shreves, associate professor of civil engineering technology and the club's adviser. "The rest we get mostly from alums who have raced in the past."

After the final testing was completed, the mixture was poured into molds.

"In past years we have tried segmented pours. Molds for the sides and the bottom are poured and then tied together," Engle said. "It's like doing fender work on a car."

However, club members chose to make the mold one piece instead of in segments. They entered their final product in the April competition, and the

## COMBINATION

*Continued from page 228*

winner advanced to the national summer competition.

In each category, teams were allowed to enter two canoes. The K-State and Salina teams had two canoes in four categories: men, women, co-ed and faculty. There were two female teams, six male teams and four co-ed teams. Two faculty members participated, but the faculty races were not part of the official competition.

Although the team received a design award in 1991, Engle said the Concrete Canoe Club had never won first place in the all-around competition, design, construction and oral presentation.

Shreves said the American Concrete Institute expected most of the competition's mixes to be useless, but students learned by participating.

"They (American Concrete Institute members) are just happy to promote the students' involvement and the idea there may someday be a winning formula," he said.

Lynn Engle, senior in surveying technology, and Neil Schneider, junior in civil survey, tie metal wire mesh to form the bottom of the canoe. The Concrete Canoe Club members planned to enter two canoes, in four categories, in the contest. (Photo by Brian W. Kratzer)

# MAGICAL EXPLOSIONS

BY LISA STAAB

**E**XPLOSIONS, SMOKE BOMBS AND BLENDED RED CABBAGE. These items were important to students interested in magic shows that utilized chemical reactions.

Alpha Chi Sigma, a professional chemistry fraternity, promoted the study of science and chemistry by presenting demonstrations and magic shows at area elementary and middle schools. Students who had completed 10 credit hours of college chemistry courses were eligible to participate. Potential members had to pass a series of examinations to be initiated.

Mike Riblett, junior in chemistry, said the group presented demonstrations and magic shows displaying chemical reactions at local and area elementary and middle schools. The group also helped Girl Scouts and Boy Scouts earn a science badge by completing work in the chemistry laboratory.

"We don't do it (demonstrations) for pay or credit," Riblett said. "We do the demonstrations to change public perception and increase science interest and knowledge for students."

The club's experiments raised the interest of potential members.

"We're attracting new members with magic shows because they appeal to a lot of young members," said Keith Purcell, professor of chemistry and Alpha Chi Sigma adviser. "It (the club) is a plus for our own people at K-State because they entertain and communicate with the children."

Purcell said the number of shows performed depended on the availability of club members. Riblett said he spent an average of four hours a week giving one-hour presentations.

"We blend red cabbage and strain the red dye from it. Then we use a chemical reaction to determine whether it is an acid or base," Riblett said. "We also do an explosion with balloons by putting hydrogen in them and determine how a smoke bomb works."

Although most experiments were tested repeatedly, unexpected accidents still occurred.

"We put a drop of methanol into a bottle to perform an explosion. When the cannon fired, it shot out enough flames to start the table on fire," Riblett said. "Another example (of an accident) was when a student tried to tear an aluminum can that was treated with chemicals in half. The teacher cannot rip it in half without the same treatment. The child's can should've ripped, but it didn't. I felt bad for the child."

Riblett said he enjoyed interacting with students and teachers.

"I really enjoy the grade school children," Riblett said. "They get interested and ask questions. It (the magic show) definitely peaks their interest. They're not worried about being cool or embarrassed."

Purcell said the club provided its members with good experience in dealing with people.

"This (performing) is good training for our people," Purcell said. "They deserve the credit for interacting with teachers and students."

## HOME FIELD DISADVANTAGE

BY STEPHANIE HOELZEL

THE HOCKEY TEAM NEVER PLAYED A HOME GAME — THEY NEVER EVEN HAD a home. Because they lacked an arena, team members had to sponsor tournaments in other cities.

"We have no home games, but we're still a solid club. Everybody goes to every game," said Jake Kisel, senior in secondary education and team president. "We've even been written up in some hockey magazines. Right now, we're a team without a home."

The University gained a hockey team after the Manhattan Hockey Club affiliated with the University in 1992.

"The team started at K-State last year. It is officially recognized as a University club by Student Governing Association," Kisel said.

Although the team officially joined K-State, it still faced a lack of training space. The hockey team practiced twice a week in CiCo Park's indoor ice skating rink, but team members said the facilities were inadequate.

"The rink really hurts us. We can't work on strategy because there isn't enough space," Kisel said. "It is good for us because it at least gets our skates under us."

Team members said poor practice conditions affected their playing performances.

"I think it hurts us because we don't have a good rink to practice on. We lack the opportunity to practice on full ice," said Scott Thorne, sophomore in business administration and the club's vice president.

The hockey team also had to provide a majority of their own equipment due to a lack of funding.

"We have a couple of sponsors, but that doesn't give us enough money. We have to supply our own equipment, but most of us have had it since high school," Kisel said. "This lack of funding puts us way behind other schools' teams."

Although the team was unable to practice daily, Kisel said he was pleased

---

"WE HAVE A COUPLE OF SPONSORS, BUT THAT DOESN'T GIVE US ENOUGH MONEY."  
JAKE KISEL

---

## DISADVANTAGE

*Continued from page 235*

with the team's season performance.

"For not having one full ice practice, a 4-6 record is not bad," Kisel said. "Our best win was against Wichita All-Stars. We were tied 9-9 with 34 seconds left, and Scott Thorne made the winning goal."

"IF THEY PUT A BIGGER RINK  
IN TOWN, WE WOULD BE  
ABLE TO PRACTICE BETTER  
AND PLAY BETTER"  
SCOTT THORNE

He said the team's schedule included tough competition.

"There are some teams that have players who have tried out for the pros. There is no amateur status and that makes for some stiff competition," Kisel said. "Many of the other teams just have more experience than we do."

Despite never having the home-game advantage, Kisel said the team members enjoyed playing on the road.

"We really have a great time when we travel to other schools. Sometimes we rent buses or we drive ourselves," he said. "Traveling is definitely a lot of fun."

Although the team members enjoyed the road trips, Thorne said the club would improve if Manhattan had a better ice skating rink.

"If they put a bigger rink in town, we would be able to practice better and play better," Thorne said. "I think that would help to improve and strengthen the club."

# CURVE BALL

A HIGH TEAM BATTING AVERAGE AND THE RETURN OF KEY PLAYERS HELP TO BALANCE OUT A .500 SEASON LACKING PITCHING DEPTH AND CONSISTENCY ON THE PLAYING FIELD

BY DARI ASHWORTH

On any given night, virtually any team could beat any team. For the Wildcat baseball team, this saying held true.

The season's highlights included victories over Wichita State and Arkansas, winning three of four games against KU and becoming the fifth team in school history to have a batting average over .300.

Despite these successes, the team also suffered disappointments. Several players were injured, which left the pitching staff thin and forced Coach Mike Clark to use inexperienced players as substitutes for veterans. Inconsistent play plagued the Cats during Big Eight games. By the end of the season, the highs and lows had balanced out to 28 wins and 28 losses, and the Cats had their sixth consecutive .500 season under Clark.

Going into the season, the team had several new players. The Cats sustained losses due to graduation and the major league draft.

"We lost a lot of kids from the year before. We had a lot of untested players who had to step up and perform," Clark said. "We had trouble with consistency with the exception of Craig (Wilson) and Dan (Driskill)."

After playing with Team USA and being drafted in the 23rd round by the San Francisco Giants, senior shortstop Craig Wilson returned to

K-State.

Junior center fielder Brian Culp also returned after playing summer baseball in Alaska, finishing the season as a member of the National Baseball Congress Tournament's winning team.

"I thought we had the ingredi-

eren't able to make the playoffs. We were able to compete, but we weren't able to be consistent."

The Cats' inconsistent play was brought about because the players were worn down.

"After our spring trip, we were on the verge of exhaustion. We had played 12 games in 10 days and spent 25-30 hours on a bus," Culp said. "We were really tired and lost a certain amount of sharpness."

Returning from the spring trip, the Cats had compiled a 15-8 first half season record. They opened Big Eight play with a four-game series against KU.

Junior Brett Bock received his first win in game one as the Cats managed to hold the Jayhawks off for an 8-7 win. Sophomore Dan Driskill pitched the Cats to a 7-1 win with Wilson collecting four RBI's and a home run in the second game.

The Cats fell to KU by one run in game three, but came back to defeat them 10-6. Bock received his fifth save, placing him third on the season saves list for K-State.

"After we did so well against KU, everybody was really excited," senior pitcher Blair Hanneman said. "The next three weekends at home we lost three out of four."

After going three for four against KU and improving their record to 19-9, the Cats' season took a turn for the worse as they went 3-9 dur-

*Continued on page 243*

ents to go to regionals. I got a taste of what it was like to compete on a national level," Culp said. "We got close during some of our games. I still don't think Kansas State has earned the respect it can and will."

Expectations for the new season were high.

"We wanted to be competitive every game, and we wanted to make the Big Eight playoffs," Clark said. "We were picked fifth and finished sixth. It was the first time K-State wasn't picked last. For the most part we were competitive, but we

## BEYOND THE DIAMOND

Baseball players' superstitions weren't limited to just broken mirrors, black cats and ladders — gloves also brought bad luck.

"You don't touch someone else's glove. A glove is a personal thing. It becomes molded to your hand. If someone else wears it, they can stretch it out," said Kirk Franz, freshman infielder. "If another person put it (my glove) on, then I took it and played and made an error — that person cursed it. I'd have to burn it or get a new glove."

Players believed success on the field was helped by motivational sayings written on the undersides of their baseball caps. Pat Ralston, freshman pitcher, said he improved using the quote, "No Fear. Throw fast. More strike outs."

Spirit was also promoted by using nicknames on the playing field.

"Nobody uses their real names. We call James Matson 'Johnny Ballgame' because he looks like the guy on 'Johnny Be Good.' Jeff Ryan is 'Chubber' because his mom says he's putting on weight," Ralston said. "We also call Coach Clark 'Sparky' because he's the ultimate optimist. He always thinks we're going to win."

Oklahoma center fielder Britt Bonneau escapes the tag of Wildcat catcher Jeff Ryan during the third inning of the first game of a double header at Frank Myers Field. Bonneau reached first base on a walk. The Cats lost both games 11-2 and 7-2. (Photo by J. Kyle Wyatt)

Wildcat shortstop Craig Wilson takes a swing at the ball during a game against the Iowa State Cyclones. Wilson holds the K-State records for career hits with 282, career doubles with 58, and career RBIs with 176. Wilson earned the right to play on the 1992 Olympic baseball team. (Photo by J. Kyle Wyatt)

## CURVE BALL

*Continued from page 240*

ing three four-game series against Oklahoma, Missouri and Iowa State.

"We turned around the next series. We just started giving away ball games," Clark said. "We had trouble when we had the four-game series. Having four games in a three-day weekend, we couldn't put them away. There was always something that broke down.

"The first half of the season we did a good job of platooning — switching around positions, but we were not consistent pitching-wise. We probably had some players who weren't quite ready," Clark said.

Injuries also contributed to the inconsistent play. As the season progressed, the pitching rotation became thinner. The pitching staff lost Sean Pedersen, Tim Churchman and Kevin Sander to injuries, forcing Clark to use freshman Pat Ralston and reliever Bock in the starting rotation.

"Brett was phenomenal in short relief. It would have been better to have him in a back-up spot, rather than thrown into the fire," Clark said. "We didn't have (Jason) Spalitto during the stretch. Jeff Ryan played hurt most of the year. All of those things kind of mounted up."

While Clark struggled to find a solid line-up, the infield saw many changes. Left-handed outfielder Hanneman was converted to a

pitcher early in the season.

"I've always thought that if you have the right nine you should stick with them. He (Clark) had to experiment with them to find the right chemistry," senior Jason Spalitto said. "He had to shake up our team and try and get us back on track. But it didn't work out quite right."

While the Cats had difficulties during the second half of the season, they improved their record against nationally ranked Wichita State to 1-2 and took three out of five games from Nebraska.

"It was really surprising to beat them (Wichita State)," Driskill said. "We weren't playing very well."

Although they finished sixth in the league, the Cats showed they could play well against top teams.

"Against WSU, even though we only won one out of three close games, we showed we could play with the number one team in the nation," Culp said. "I think we played Florida when they were number three, and we gave them a good game. Even though we had some bad games in the Big Eight, we could compete with anybody when we played our best."

Culp said the most frustrating part of the season was the knowledge they could play competitively with the best in the nation, but then lose to lesser teams.

Other players agreed the season

was full of several disappointments.

"It (our problem) was hard luck, and I thought a lot of teams played well. It started to snowball, and we got ourselves in a big hole and couldn't get out," Bock said. "I don't know if you can pinpoint anything. We just had bad luck at the wrong times."

Clark agreed luck wasn't always on his team's side, but he said there were a few highlights to the season.

"We had some tough luck. We didn't create our own breaks and win ball games," Clark said. "We didn't have anybody step up and make the difference. We had some high spots on individual games. Craig's (Wilson) season was great. He had the type of season kids dream about for college ball."

Wilson was named Big Eight Player of the Year and first-team, all-Big Eight shortstop for the second straight season. He achieved his goal of hitting over .400, posting a .416 batting average and hit .405 in the Big Eight, placing him first in the conference. He ended his career at K-State by becoming the first K-State player on the United State's Olympic baseball team.

"I was disappointed right in the end when we lost," Wilson said. "I don't know how to explain it. If we would have played the way we played against WSU, there's no telling how far we would have gone."

# BOYS OF SUMMER

THE GAMES DIDN'T STOP WHEN THE SEASON ENDED. FROM SUMMER LEAGUES TO THE OLYMPICS, THEY PLAYED ON.

**F**rom Kansas to Missouri to Barcelona, Spain, K-State baseball players gained experience through summer leagues and the Olympic Games.

"For me, baseball is an extracurricular activity because I meet a

lot of people, have fun and it is definitely worth all the extra effort," said junior pitcher Brett Bock. "My view of the summer league is that I had the opportunity to learn because it was a growing-up experience. We made the best of those two months because it developed a person's character. We grew up just as much as we got better playing baseball."

Bock and junior pitcher Dan Driskill, who played for the Wichita Broncos, played games six days a week against teams from Texas, Missouri and Iowa.

Driskill and teammate Scott Dreiling, junior pitcher, qualified for the NBC World Series. Both were chosen all-American. Driskill was given the Most Outstanding Pitcher award with a record of 9-2 and an earned-run average of 1.46.

While Driskill and Bock competed regionally, Craig Wilson, 1991 graduate and former Wildcat baseball player, traveled to the other side of the world for the Summer Olympics.

Wilson competed in the Olympic trials in Millington, Tenn., and was chosen as one of the top 20 players. He played against teams from Japan, Korea and Cuba.

The United States team placed fourth with a 6-4 record.

"The Olympics was something different," Wilson said.

**D**an Driskill, star pitcher for K-State, delivers a fastball against Missouri Western. Driskill spent the summer playing for the Wichita Broncos, who qualified for the NBC World Series. He was selected all-American and received the Most Outstanding Pitcher award. (Photo by Mike Welchans)

"During the Olympic competition we weren't just playing to win. We were going out to do it for the whole country. I was proud to be there because everyone at home was watching, and everyone in the United

States was on our side."

Bock may not have had everyone in the country on his side, but the summer experience improved his ability.

"During the summer, we played with different people, but with the same caliber of players. The competitive level was equal," Bock said. "I played the same level as during school, but I received exposure and continued to improve."

Wilson said his success was related to mental and physical motivation.

"Coachessay if you have the talent, it's 90 percent mental, but I believe it's 60 percent mental and 40 percent physical. Baseball is a mind game because sometimes I start to question my ability," he said. "Baseball to me is confidence. If you have confidence when things go bad, then you'll do okay. If you lose confidence, then you'll sink and fall apart."

Wilson, who was recruited by the Chicago White Sox and reported to spring training in March, said he was glad he had the chance to play in Olympic summer games.

"Overall, the Olympics was something I would do over and over again," Wilson said. "It's unfortunate that only 20 guys can go every year and it's only every four years."

During batting practice at Lawrence Dumont Stadium in Wichita, Craig Wilson waits for his turn in the cage. Wilson was on the 1992 Olympic team, which played an exhibition game against Japan in Wichita. (Photo by Shane Keyser)

# WEDGING UP

ALTHOUGH STILL NOT AT PAR, THE LADY CATS' FIFTH PLACE FINISH BREAKS THEIR 12TH SEASON AT THE BOTTOM, GIVING ONE GOLFER THE CHANCE TO GO TO THE NCAA REGIONALS

BY STEPHEN MCKEE

If recent accomplishments laid the foundation for successful programs, the K-State women's golf program looked at a bright future.

After finishing last in the Big Eight for 12 straight seasons, the team took fifth in the Big Eight Championships.

"The fifth-place finish was a big accomplishment for us," said senior Valerie Hahn, the team's second leader in averages. "It's something we've been shooting for since I have been here. We finally got the monkey off our backs."

The Lady Cats set new team records, including a record for a three-round tournament (962 at the Big Eight Championships) and a record for a single round (316 at New Mexico State).

After these accomplishments, Coach Mark Elliott was named the 1992 Big Eight Coach of the Year.

"Here really deserved it. He brought new ideas and has done a lot for this team," Hahn said. "He's positive and believes in us, and that's important."

Although the squad lost three of the top five players, the fall team returned with a talented group. The 12-member team, which was the largest ever, was led by Hahn, the lone senior.

"This team had a lot of talent, but it didn't have much experience. It was a young team with only two upperclassmen," Hahn said.

"This team hits the ball a lot better than any other team that K-State has had. I think they are going to be the best team K-State has had."

Not only was the squad larger than past Lady Cat teams, but the talent level was deeper.

"The scores that would have

competition."

The season started at New Mexico, where the team made a strong showing and finished seventh in a field of 15 schools. Top performers for the team were sophomore Jacque Wright, who tied for 12th place, and Hahn, who tied for 17th.

"That was probably one of our best tournaments of the year," Elliott said. "We finished strong against good competition."

The team also had a good tournament at Iowa State. In a field of 11 schools, the team placed second. The team was led by second-place finishes of Wright and Hahn.

Hahn led the squad with an 81.5 average in the fall. Elliott said she had a chance to qualify for the NCAA regional tournament. This was the first year a K-State woman had that opportunity.

"I was a little disappointed with how I played. I had a lot of good rounds, but in a few rounds I would put myself out of a tournament," Hahn said. "I would have a few bad holes."

Big Eight Coach of the Year Elliott didn't take the credit for the team's turnaround. He gave all the credit to the players.

"Obviously, it's an honor that I really appreciate," Elliott said. "But the real honor should go to the girls who worked hard in getting the golf program turned around. Winning this award is a tribute to them."

Shading her eyes from the sun, Valerie Hahn, senior, mentally lines her ball up with the pin. She left the Terradyne course in seventh place after shooting a 246 in the three rounds of the Shocker Fall Classic. (Photo by Craig Hacker)

been good enough to be the No. 3 player last year won't be good enough to make the five-player traveling squad this year," Elliott said.

The fall was a learning season for the inexperienced golfers.

"This group is fairly young," Elliott said. "The fall was important because we got those girls some

## BEYOND THE GAME

When the women's golf team went to Iowa, they thought they were embarking on an ordinary road trip. They were wrong.

"We were going to Iowa City for a tournament," said Sarah Morehead, junior. "All of a sudden we saw a sign saying, 'We Buckle Up in Minnesota.'"

The team's driver had received the wrong directions and drove five hours out of the way into the wrong state.

"It was a long day," Morehead said. "We spent a total of 13 hours in the van, and we missed our practice round."

# AIMING AT PAR

WILDCATS IMPROVE TEAM AND PERSONAL STANDINGS AS THEY SEND THE SECOND GOLFER IN THE HISTORY OF K-STATE TO NATIONALS AND POST RECORD-BREAKING SCORES

BY PAULA HERBEL

The men's golf team met their goal for the spring 1992 season — for the first time in at least 15 years they did not finish last in the Big Eight. Rather, they finished in sixth place.

"It was a successful spring season," said Coach Mark Elliott. "Some players didn't play as well as they could have, but others stepped up and played well."

K-State finished sixth in the Big Eight tournament in Hutchinson. Junior Richard Laing placed seventh out of 40 players and Jim Brenneman placed 28th.

"We had a lot of the success we were expecting (to have), but still surprised a lot of people," Jim Brenneman, junior, said.

The team won their first tournament of the season at Southwest Missouri State in Springfield, Mo.

"K-State hasn't won a tournament since 1989," Brenneman said.

The team placed first out of 12 teams. Sophomore Chad Judd took second, Brenneman finished sixth and Laing finished eighth.

"We had five tournaments, and the team played well in three," Elliott said.

The second tournament was at Wichita State. The team placed seventh out of 15 teams. Laing finished 12th out of 75 players, and Brenneman finished 24th.

Birmingham, Ala., was the site of the third tournament, and the team placed fourth out of 10 teams. Team members also did well individually, as Laing finished third and Judd placed 13th.

In Nashville, Tenn., the team placed ninth out of 18 teams, and Laing finished 20th out of 98 players. Brenneman and sophomore Sean Robertson tied for 26th.

A highlight of the season was

Richard Laing, senior, chips his ball onto the green during the KU Invitational. Laing placed fifth with a cumulative score of 223 after three rounds. (Photo by Craig Hacker)

Laing's qualifying for the NCAA regionals, becoming the first K-State player in 30 years to accomplish the feat, Elliott said.

"I set goals at the beginning of the year to make Big Eight, NCAA regionals and to win a tournament," Laing said.

His season favorite was the re-

gional tournament held in Dallas.

"It was a gorgeous course, and it was tough," Laing said. "I came through and did what it took (to qualify)."

In order to qualify for the NCAA regionals, Laing had to finish in the top two out of 61 players. To qualify for nationals, Laing needed to place in the top six out of 111 players. At nationals, a par or one under was needed for him to succeed, but he wasn't able to get the score.

"Laing did great at regionals, but he didn't play so well at nationals," Elliott said.

Laing said he had several opportunities to be an all-America selection, but fell short every time.

"I was hoping to make all-American and win a tournament," Laing said, "but I just couldn't seem to pull it off."

A downfall for the team was not making NCAA regionals.

"If we would have played consistently well all year, we would have gone to NCAA regionals," Brenneman said. "We did good this season, but we wanted to do better."

Although they wanted to improve more, the team felt they had accomplished a lot.

"It was a stepping-stone season," Laing said. "It was a season of improvement and left a lot of hope for next year."

Improvement was evident in the fall season. The Cats put together the best season at K-State as they posted some of the highest placings in school history. They placed second at KU and first at Iowa State.

**BEYOND THE GREEN**

At their tournament in Augusta, Ga., the men's golf team was challenged not only by other universities, but by a commuter airliner.

The team flew on a commercial airplane from Kansas City, Mo., to Atlanta, Ga., where they switched to a small commuter airplane.

However, their 20-pound golf

clubbags weighted the plane down, and it couldn't leave the runway. Forced to leave the clubs behind, the team missed their practice round.

"We got them (the clubs) a day and a half later," said Sean Robertson, junior. "We couldn't do anything but sit in the hotel and watch TV. It's funny now, but we were so frustrated then."

*Richard Laing's continuing goal to be the best has made him only the third golfer in the history of K-State to go to regionals and the second to Nationals*

---

Richard Laing's golf swing wasn't the only thing he had to perfect. He started his senior year at K-State learning to be a husband and a father.

Laing and his wife Kristi learned at the beginning of the academic year that they were expecting their first child.

Laing, a senior in marketing, planned on continuing golf after graduation. With the support of Kristi, he decided to dedicate five years in his pursuit of turning professional.

"That's the basic rule for golfers. If you haven't made it by then, it's time to find something else," Laing said. "We've talked about it, and she is all for it."

Both agreed he should further his golf career. They shared the philosophy that people had to go after what they wanted.

"You can't look back on life and say, 'I wish I had done it. I had the chance but I never tried,'" Laing said. "I don't want to spend my life wondering if I could have made it."

Many people told Laing that he wouldn't succeed in golf because he was married, but he disagreed.

"I think it will be easier to make it. I'll always have someone there for support, Laing said. "Otherwise, I would spend my life living from hotel to hotel room alone."

Kristi knew life with Laing's golfing career would be hard, but she was excited for him.

"It was his dream, but now it's my dream, too," Kristi said. "It means a lot to me because it means a lot to him."

Laing, a native of Bonner Springs, faced many road blocks during his golfing career. The frustrations started after a full-ride to Cal-State Fullerton was dropped. A month before he was to attend the school, the golf program was dropped.

"No one knows why they dropped it," Laing said. "My coach started trying to find a place for me to go. Arizona State, UCLA and Santa Barbara showed interest. Santa Barbara showed the most (interest), so I decided to go there."

He spent two months there before family tragedy brought him home. On the same day, Laing's grandmother died and his sister's fiancée was killed in a motorcycle accident.

"I decided that I needed to stay around here," Laing said. "Being around family was more important."

Laing then came to K-State and set out on his path to become one of the University's best golfers.

During his first year, Laing made it to regionals, becoming the third person in K-State history to be invited. He said although his sophomore year was a let-down, he came back strong his junior year.

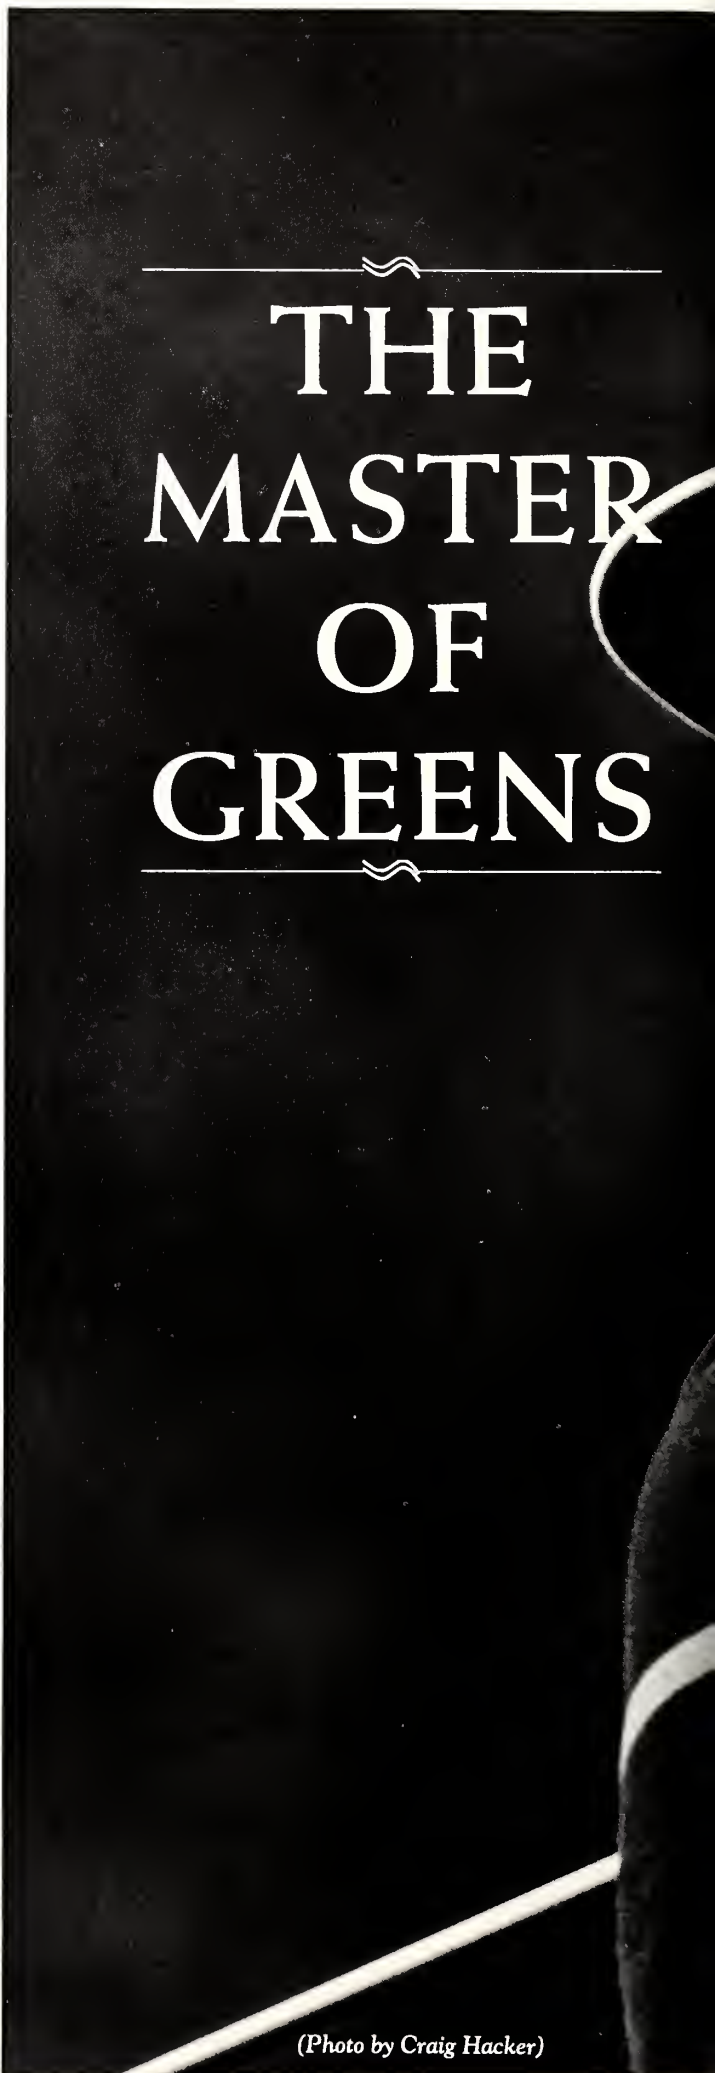

"I set three goals for myself — to win a tournament, make all Big Eight and make it to regionals," Laing said.

He reached all of the goals, except winning a tournament. He was picked seventh for all-Big Eight and placed sixth at regionals. This sent him to nationals which made him the second person from K-State to go.

Laing was picked in Golf Week Magazine as a pre-season all-American before the fall season.

"Every year I try to do something I haven't done yet to keep me going. Now I want the whole team to go to nationals," Laing said. "I want the team to make it before I want just myself to make it."

# KEEPING PACE

THE WILDCATS' AND LADY CATS' HIGH FINISHES AT THE BIG EIGHT CHAMPIONSHIPS ARE TOPPED BY FIVE GOING TO THE NCAA MEET AND THREE ARE SELECTED ALL-AMERICA ATHLETES

BY STEPHANIE HOELZEL AND TRINA HOLMES

The outdoor track team finished high on the charts at the 1992 Big Eight Championships in Norman, Okla., where the Lady Cats cruised to a second-place berth.

However, not all of the players were happy with their finish. Deborah Schmidt, senior, was dissatisfied with second place.

"I was disappointed because I never won the Big Eight Championships. It was something I really wanted," Schmidt said. "I should have been able to do it my senior year, but I didn't."

Although the team did not finish first, one team member almost set a school record.

"The biggest performance for us was Kathy Janicke in the conference meet," said Cliff Rovelto, assistant track and field coach.

"She jumped 19-5 in the long jump and 41-1/4 in the triple jump. There are only two other girls in the history of K-State to jump farther than 41-1/4."

Both of Janicke's marks were personal records.

"They were personal bests, but there's room for improvement," said Janicke, junior. "The distances weren't good, comparatively speaking. Other universities have better distances, but everybody was performing well at this meet."

Despite battling against injuries, the men's team pulled off a fourth place finish at the champi-

onships. Rovelto said his team performed as well as possible.

"The kids did all they could," Rovelto said. "We had several good performances from them. They scored just about every chance they could."

Throughout the season, 13 team members were redshirted.

**"I was disappointed because I never won the Big Eight Championships. It was something I really wanted. I should have been able to do it my senior year, but I didn't."**

*Deborah Schmidt*

"They were redshirted to give them a rest between the indoor and outdoor seasons because track is hard on their bodies," Schmidt said. "Sometimes it was done to extend their eligibility. It varied with the individual."

Schmidt said some players would have made a difference at meets had they not been redshirted.

"Their being redshirted hurt the team because there were people who could have scored points for the team. That would have helped us out," Schmidt said. "But it was usually a mutual decision between the coach and the athlete."

The Wildcats' conference performance was highlighted with first-place finishes by Robert Cogswell, senior high jumper, and Clifton Etheridge, senior triple jumper.

Some unexpected finishes also gave the team a boost. Senior Todd Trask placed fourth in both the 10,000-meter run and the 3,000-meter steeplechase.

"It's tough to place in both of those events," Rovelto said. "It was a great eight points for us because it was not something we expected."

Etheridge was the only Cat to reach the NCAA meet in Austin, Texas. Once there, he placed 11th in the triple jump. He was the only all-American chosen from the men's outdoor team.

Four members of the Lady Cats also qualified for the NCAA meet. At the meet, senior Connie Teaberry placed fifth in the high jump, senior Christy Ward placed 10th in shotput and Schmidt placed 11th in the javelin. Teaberry, Ward and Schmidt were chosen to be all-Americans. Gwendolyn Wentland, sophomore, was the fourth participant, but didn't place.

Although Schmidt was happy with winning her event at the KU Relays and her all-American selection, she still pushed herself.

"As an athlete, you should never be satisfied or you'll never reach your potential," she said.

## BEYOND THE TRACK

Members of the women's track team sharpened their detective skills during long practice runs.

They assumed the identities of Sabrina, Kelly and Jill from "Charlie's Angels."

The runners pretended they were different characters from the show. The crime fighters invented plots and found clues as they ran.

"It sounds really stupid," said Paulette Staats, junior. "It sometimes gets boring during the longer practice runs, and it's just fun to act silly."

HE  
SAID  
HE  
COULD

(Photo by Shane Keyser )

*They said he wouldn't be able to make it, but through his hard work and determination he proved them wrong.*

WITH THE HELP OF K-STATE'S mechanical engineering department, Kevin Saunders, a 1978 graduate in agricultural economics, brought home the bronze from Barcelona, Spain, in the Paralympics, a division of the Olympics for disabled individuals.

Saunders competed in the pentathlon, which included the shot put, javelin, discus, 1,500-meter and 200-meter events. The wheelchair he used for field events, called a field chair, was designed by K-State engineering students. Saunders' field chair was custom-made to fit his particular needs.

In the summer of 1992, Brad Eisenbarth, senior in mechanical engineering, Brad Norman, junior in mechanical engineering, and Paul Snider and Maury Wilmoth, graduates of mechanical engineering, worked with Prakash Krishnaswami to design two chairs. One was a standard chair with sturdy hand grips. The other used swivels in the chair's seat to create momentum in the shot put event, Swenson said. The swivels compensated for the lower body strength Saunders lost when he was injured.

In 1981, Saunders was thrown 300 feet from a grain elevator when it exploded in southern Texas. The explosion threw him onto a concrete parking lot, resulting in a broken back, collapsed lungs and massive internal bleeding.

"I heard a doctor say I wouldn't live," Saunders said.

He spent almost a year in the hospital and said the hardest part was discovering he would never walk again.

"Pretty soon you have to play the cards you are dealt," Saunders said.

That was exactly what he did.

He entered his first road race in 1983 and used an old hospital wheelchair for the competition. During the race, an official asked him to withdraw from the competition.

"I said, 'No way, lady,'" Saunders said.

He went on to finish the race.

"That was the day I set my goal," he said. "Through mental drive, determination and commitment, you can be the best at anything. You can combat life, no matter what obstacles you are faced with."

After he graduated, Saunders excelled in the pentathlon, breaking records and earning world champion medals. In 1988 at Seoul, Korea, he earned a bronze in the pentathlon in the Paralympics.

In July 1991 at the Victory Games in Long Island, New York, Saunders was awarded gold medals in the javelin and pentathlon, a silver in the discus and a bronze in the shot put. The meet ranked Saunders as the best in the nation. That same month, Saunders received a silver medal at the Stoke Mandville Wheelchair Games in England and received the highest points for a paraplegic.

Saunders' other accomplishments included acting in the Oliver Stone film, "Born on the Fourth of July," and being the first disabled person in history appointed to the President's Council on Physical Fitness.

Saunders said his greatest accomplishment was being a motivational speaker. He spoke to different types of groups to help others overcome their limitations.

"That means more to me than winning medals," he said.

## BEYOND THE COURT

The tennis team was five minutes away from Omaha, Neb., site of the Rolex Regional Tournament, when their driver made a wrong turn.

"We ended up in Iowa," said Angie Gover, junior.

The directional error wasn't discovered until the team had traveled two hours in the wrong direction.

"It was frustrating," Gover said, "but there wasn't too much we could do about it."

# NETTERS TRIUMPH

BY TAKING SECOND IN THE BIG EIGHT CONFERENCE, RECEIVING TOP 25 VOTES, AND PRODUCING K-STATE'S FIRST NATIONALLY RANKED PLAYERS, THE LADY CATS BYPASSED EXPECTATIONS

BY TRINA HOLMES

**B**attling the wind as well as Oklahoma State, the No. 3 doubles tennis team showed their endurance as the semifinal match of the Big Eight Conference stretched over six hours. The Lady Cats triumphed over the Cowgirls in a 5-4 finish. This upset ended Oklahoma's 11-year reign as league champion.

"Team-wise, that (semifinal match) was the best win by far in the three years I've been here — the biggest upset. Individually, it was the best match Neili (Wilcox) and I ever played together," junior Suzanne Sim said.

Although their battle for the title was stunted by KU, the netters' second-place victory in the Big Eight Conference was the highest league finish in K-State history. Another first for the team was receiving votes for the nationwide Top 25 poll.

International students, including freshmen Michele Riniker, Switzerland, and Karin Lusnic, Yugoslavia, were assets. The strong skills of Riniker and Lusnic enabled them to become the first nationally ranked K-State netters. Riniker ended the season ranked 66th, and Lusnic was ranked 76th. Riniker also broke her own record for singles play. Her 6-1 finish was the best league record in K-State history for a No. 1 singles player.

Besides contributing to the tennis team, international students also contributed to the community.

"The perception in good Ameri-

can tennis players is that Florida or California are the places to be. Unless they have a reason, Kansas isn't top on their list," said Steve Bietau, head coach. "A number of international players play at a higher level than some Americans who are attracted here, which helps elevate the program. International

cause of all the time they devoted to tennis. Practices, games and road trips left little time for studying.

Sim learned to maintain the balance between tennis and school.

"I guess you have to be organized to balance the two. I can't sit still for 20 minutes — I have to study," Sim said.

Lady Cat netter Suzanne Sim, senior, listens to head coach Steve Bietau as he gives pointers on the upcoming match during a fall practice. Sim tied Michele Riniker for the team's best conference singles record at 6-1. (Photo by J. Kyle Wyatt)

students also play an educational role. They bring different cultures, languages, political systems and ways of living. Their backgrounds are something they contribute to the team and community."

Off the court, team members excelled in the classroom. Sim won a spot on the Big Eight all-Academic team for the second straight season, and Riniker was awarded a spot for the first time. Wilcox, a graduate assistant, showed her success in the classroom by being included on the Big Eight Academic Honor Roll. The players saw these honors as major achievements be-

Lack of support on road trips was more difficult than getting used to foreign courts.

"It wasn't really that difficult to get used to other courts. You know you have to do it. I mean, everyone has to go through it sooner or later," Wilcox said. "The part that gives the other team an advantage is they have more fans. For instance, KU had a big booster club at the Big Eight Conference game. Fans can get pretty crazy and obnoxious, which makes a big difference."

Another problem was few members. This was compounded when players sustained injuries that prevented them from participating in matches.

"We had injury problems. Michele Riniker had a foot problem, Martine Shrubsole and Neili Wilcox had back problems and Mareke Plocher was hit by a car when she was on her bike," Bietau said. "Our lack of depth was our weakness, but we overcame it. We had the best year anyone has had in the history of the program. Getting there, though, was like pushing a ball uphill. It was hard because we were going against tradition."

Getting set to deliver her forehand, Martine Shrubsole, freshman from Sidney, Australia, works to come back against her KU opponent, Laura Hagemann, at the KSU Invitational. Shrubsole lost her match one set to two. Shrubsole won one match at the Invitational. (Photo by Craig Hacker)

# QUEEN OF THE COURTS

(Photo by Craig Hacker)

*Suzanne Sim's hard work and confidence in her ability to be the best helped her become one of K-State's top tennis players.*

AT AGE 10, Suzanne Sim picked up a tennis racket for the first time. At age 12, she began playing competitively. Modeling her skills after Chris Evert Lloyd, Sim was the only player from her high school team to go to state.

"Chris Evert Lloyd is my role model. She's always been a solid player and a classy person," Sim said. "She's been consistently great her whole career. I also like how she plays her ground stroke game because that's mainly what I do."

Just as Evert Lloyd was her role model, Sim inspired her younger sisters to take up the game.

"My family is always there for me. I'm from Kansas City, and my parents have come to every match in Manhattan, Lawrence and Arkansas. They've also come to almost every tournament I've played in since I was 12. Both of my sisters play, so they come and watch also," Sim said. "My youngest sister got into tennis because I started playing, and now she could probably beat me."

The admiration Sim received from others reflected the confidence she had in herself. While competing in high school, Sim learned to control the mental aspect of tennis.

"My biggest weakness has been a weakness I had during my high school career. I got mad at myself a lot and didn't know how to deal with it. That was bad because one of the most important aspects of tennis is the mental game," Sim said. "Now I don't get mad. I know how to handle my anger, and I look more natural on the court."

Her mental control paid off, and Sim was voted the most improved player at K-State two years in a row.

"I got the award my sophomore and junior years," Sim said. "I thought it was an honor that everyone recognized I had improved."

Off the court, Sim was known for her aversion of pop.

"I haven't had any pop since I was 16 years old. It's what I'm known for," Sim said. "Everywhere we go on road trips, people on the team ask me if I want a pop as a joke. They even gave me the 'I Put Pepsi Out of Business' award."

But Sim also earned a more serious honor by setting the K-State flexibility record.

"Four times a year we perform strength tests at the weight center. I've won the most flexible award every year, and I hold the tennis record for flexibility," Sim said. "I used to do gymnastics, and I think that helped my flexibility. I've never had a major injury since I've been at K-State. That's really rare in a college athlete."

Her physical fitness, a pasta dinner and a good night's rest before a match helped Sim become a strong player.

Sim said one of the major highlights of her career was taking second in No. 5 singles and competing in the Riviera All-American tournament in California where only the top 200 players in the nation competed.

Sim attributed her tennis success to hard work.

"If I want to be the best at something, I must work very hard at it. I know I want to be the best, so I work hard," Sim said. "If you set high goals for yourself and work hard, you can be anything."

By Trina Holmes

# OFF-SEASON

SPORTS FANS LIVE FROM ONE SEASON TO THE NEXT, BUT FOR ATHLETES THE SEASON LASTS ALL YEAR LONG.

Almost immediately after the last ball was served and the final runner crossed the finish line, it was time to start training again.

For athletes, there was an end to their games, but not to their

training. Football players worked out four days a week for two hours during the off-season. One hour and 15 minutes were spent lifting, while the other 45 minutes were spent running.

"If you don't keep working out, you'll get out of shape. That means you will end up spending the first part of the season trying to get back in shape, while other teams are starting to work on their game plans," said Chuck Culver, sophomore cornerback. "If a person really wants to win, they'll work out."

Volleyball team members were required to practice four times a week in their off-season.

"We're lifting by 7:30 a.m.. We have practice and then lift for an hour to an hour and a half," said Stephanie Liester, sophomore. "It's important to stay in shape. If you're not in shape, you don't play."

Summers were no exception. Many of the coaches put their athletes on a daily workout schedule, and players were required to train on their own. Baseball players were encouraged to play competitive summer ball.

Javlin thrower Bobbi Jo Casebeer works out with a weighted ball during practice. Casebeer finished fifth in the Big Eight last season in javlin competition. (Photo by Mike Welchans)

"The more baseball you play, the better off you'll be," said Brian Culp, senior. "If you want to be the best, you have to give up the summer."

Many athletes helped coach at sum-

mer camps. Sophomore guard Brian Henson said he spent half of his summer helping at children's basketball camps.

"It (camp) was a good opportunity to stay around basketball. It was fun to work with kids," Henson said. "When I was teaching the kids, I taught myself. As I told them things to do and look for, I found myself doing the same things."

Although Henson enjoyed his job, he didn't like training in the summer.

"Preseason stuff gets old," Henson said. "You get burned out before the season starts."

Training in the off-season required the athletes to sacrifice their spare time. However, Culp said he didn't regret dedicating his time to training and workouts.

"The main point of fall ball is to keep in shape. It's important to be at your best because coaches decide who gets what job," Culp said. "A lot of my RTV (radio and television) peers take internships in the summer, but I can't because of baseball. If I did it again, I would still give it up for the sake of baseball."

Head interim track coach Cliff Rovelto gives advice to during an afternoon practice in Allen Fieldhouse. The track team lifts weights and practices indoors in the off-season. (Photo by Mike Welchans)

# NEW ATTITUDE

WITH A SQUAD CONSISTING OF SIX FRESHMEN AND ONE SENIOR, AN INEXPERIENCED LADY CAT TEAM BROUGHT A NEW PERSONALITY AND A NEW STYLE TO K-STATE VOLLEYBALL

BY JULIE WHITE

**I**t was a foundation on which to build.

The volleyball team started building a foundation by gaining experience throughout the season.

Despite posting a 7-22 record and ending 0-12 in Big Eight play, Coach Patti Hagemeyer said the season was successful.

"The level of play we're at now is so much higher than it has been in the past," Hagemeyer said. "We're playing a whole different kind of volleyball."

The six freshmen team members faced new challenges.

"This year I learned a lot about what's involved with playing at this level, physically as well as mentally," said Chi Dau, freshman setter.

The freshmen players weren't the only ones who made adjustments. Old members had to adjust to a new team attitude.

"Having that many new players gave a new personality to the team. There were new ideas, new creativity and new desires to deal with," Hagemeyer said. "There was a lot of unpredictability that led to a whole lot of fun."

Because the freshmen composed the main body of the team, they had to learn immediately how to play on a collegiate level.

"The freshmen stepped in and immediately had to play. We

learned what to expect," Dau said. "In practice, we were put in so many game situations, we knew what we were supposed to do—not that we always did it, but we knew what to do."

The team's attitude remained positive despite the losing record.

**A** win against KU in a game causes Coach Patti Hagemeyer to jump up in excitement. The Lady Cats lost the match to KU 15-7, 7-15, 3-15, 14-16. This season was Hagemeyer's second season as head coach at K-State. She led the team to a 7-22 record. (Photo by J. Kyle Wyatt)

"The players went through a phase where they were disappointed, but they bounced back fast," Hagemeyer said.

The discouraging record put added pressure on the players.

"I thought about my performance and the team's performance, as opposed to looking at it as wins and losses," Dau said. "You go out to win, but that's not what it's all based on. We're a very physically sound team. We're in good shape, and we have good work ethics."

Senior Kathy Saxton closed her

career by claiming one Big Eight and six school records. Saxton set the Big Eight record for attacks in a four-game match (77) against Toledo. She topped the single-season charts in kills (505), attacks (1,232), kills in a three-game match (25), attacks in a three-game match (51), kills in a four-game match (35) and attacks in a four-game match (77).

Throughout her K-State career, she also ranked fourth in kills (1,023), fourth in attacks (2,551) and fourth in aces (120).

"The records are nice, but I try not to get too caught up in that," Saxton said. "Volleyball is a team sport. I'd trade in the records for a trip to the Big Eight Tournament."

Saxton also received all-Big Eight honorable mention.

"Volleyball is something I'll always look back on fondly," Saxton said. "I had a lot of fun (playing)."

Dau and freshman Jill Dugan also etched their names into the K-State and Big Eight record books.

Dau had 1,089 assists this season, placing her second on the single-season charts. She tied two school records with 43 assists against Oklahoma in a three-game match and 74 assists in a four-game match against DePaul.

## NEW ATTITUDE

*continued from page 262*

Dugan tied the Big Eight record and set the K-State record with six solo blocks in a four-game match at Regis.

Saxton, senior Angie McKee and sophomore Kathy Wylie represented K-State on the Phillips 66 Academic all-Big Eight Honor Roll. Saxton was also named an Academic all-American.

With all the personal victories,

Hagemeyer said the team had new expectations.

"The team's attitude changed so they expect to win when they play a match," Hagemeyer said. "I think that's the first step."

Hagemeyer and Dau both said the highlight of the season was when they took a game from 14th-ranked Colorado.

"They showed a glimmer of what is yet to come during the Colorado

game," Hagemeyer said.

Although the team didn't have a winning season, a foundation of improved play was established.

"The team learned and recognized our potential," Dau said. "We've got a good base to build on."

## BEYOND THE COURT

For the volleyball team, eating on the run was an unusual occurrence.

"The strangest thing we ever did after a game on the road was walk through a drive-thru," said Wendy Garrett, junior.

Garrett said the team wanted to eat at a Wendy's fast food restaurant but it was closed. Fortunately, the drive-thru was open, but there was a problem since the team was in two vans.

"Instead of giving one big order, we just got out of the van," she said. "Each person made their order and walked through the drive-thru."

# LEADER OF THE PACK

---

(Photo by Craig Hacker)

*Kathy Saxton walked on her freshman year as a redshirt. By her senior year, Saxton had served up a list of record-breaking successes.*

---

## HER TEAMMATES CALLED HER "GRANDMA."

Beginning her fifth and final year on the volleyball team, Kathy Saxton was the lone senior on a team with six freshmen.

"I tried to lead by example," Saxton said. "I never thought of myself as a leader."

Although the team didn't obtain many victories, Saxton had a record-breaking season. She set six University records including the most kills and attacks in a season. She also stole the Big Eight record for the most kills in a four-game match.

"I didn't even know I had broken the Big Eight record. After the game they asked me about it, and that's when I found out," Saxton said. "It was exciting, but I try not to think about the records I broke. I would have traded them in for a Big Eight Tournament trip. To break so many records shows the team was doing something right."

Saxton started playing volleyball in eighth grade to get in shape for the basketball season. Although she excelled in both sports at Mulvane High School, basketball was first on her mind.

"I had always intended on playing basketball," Saxton said. "I was brought up playing basketball."

A Wichita State volleyball camp during her sophomore year made her realize she was skilled in volleyball. Coaches at the camp discovered her ability.

"The coaches really worked with me at camp, and I got to play with good players," Saxton said. "After that camp, I started going to other volleyball camps as much as I could."

After high school graduation, Saxton received offers to play volleyball at various schools. However, she decided to be a walk-on at K-State.

"I had met a lot of the team already and I liked them," Saxton said. "Plus, the accounting program was strong."

Saxton's first year at K-State was difficult. She was red-shirted her freshman year so she could improve her skills.

"I was so far behind everyone. I needed to catch up and figure out what college ball was all about, so I was a ball shagger," Saxton said. "It was hard after being a star in high school, but I made it through (that time)."

Saxton's record-breaking career at K-State didn't cause her academics to suffer. She was named to the all-District Seven Team and included on the ballot for Academic all-American.

Saxton said she considered going overseas to continue playing volleyball, but didn't want to put her education on hold.

"I've decided to go to graduate school instead of getting a job. It's going to be weird being here without playing," Saxton said. "Now I'm going to have a year as a normal student."

Saxton said her mother was more upset with the end of her volleyball career than she was.

"It hasn't quite hit me yet that I'm through," Saxton said. "Right now, it just seems like the end of another season. I'm not quite ready to turn in my knee pads."

# LET DOWN

DREAMS OF A BOWL APPEARANCE RAN THROUGH THE HEADS OF THE WILDCAT FOOTBALL TEAM AND FANS, BUT THE CATS PUT TOGETHER A 5-6 RECORD AND WENT 2-5 IN THE BIG EIGHT

BY MARCIE FREDERIKSON AND JENNI STIVERSON

The season's outlook was bright as 16 starters returned to a team that finished 7-4 and challenged for a Big Eight title in 1991.

Fans' expectations for the program were high after the '91 team had one of the biggest turnarounds in college football history. The team was close to winning a trip to the Orange Bowl. Even Sports Illustrated, in an Aug. 31 feature about the team, was looking forward to K-State's season.

But the new year brought changes to the team. Although the defense had eight starters returning, the offense began the season with many new starters in important positions. Big Eight passing leader Paul Watson had graduated, as well as three top receivers. Andre Coleman and Gerald Benton remained to lead the team. Benton had 603 yards on 38 receptions, which was the ninth best total in K-State's single-season history. Coleman followed with 336 yards on 25 receptions.

The return of star running back Eric Gallon was questionable after he was injured in preseason. Gallon suffered a knee injury, which almost forced him to miss part of the non-conference season.

A record-breaking 32,712 fans were on hand to watch the Wildcats win their third-consecutive season opener with a 27-12 victory over Montana and Gallon rush for 87 yards. After they took a 3-0 lead

on a 34-yard field goal from junior kicker Tate Wright, the Cats never trailed in the game.

Another dilemma facing the team was deciding who would fill the starting position of quarterback. Jason Smargiasso won the role and started in nine out of the 11 games.

Quarterback Jason Smargiasso, junior, gets offensive advice from head coach Bill Snyder during a time out against Temple. Smargiasso set a new K-State single-season record for rushing TDs by a quarterback with eight. (Photo by Craig Hacker)

He passed a total of 990 yards with 72 completions on 149 attempts. A new K-State single-season record for rushing touchdowns by a quarterback was also set by Smargiosso with eight. Matt Garber also contributed 524 passing yards and two touchdowns.

After winning the opener against Montana, K-State came out of the locker room to defeat Temple 35-14. Junior free safety Jaime Mendez had the highlight of the game with four interceptions, which set the Big Eight interception mark and a K-State single-game interception mark. Former Iowa all-

American and K-State defensive coordinator Bob Stoops said he was amazed by Mendez's performance.

"That's hard to do in practice, but I wasn't shocked because I know what Jaime is capable of doing. That's as high as we've had anyone grade out since I've been here,"

Stoops said. "To think they (Temple) caught only two of their passes and Jaime caught three in the first half is just incredible."

K-State defeated New Mexico State in the third game 13-0, which extended their winning streak to six games. The winning streak was the longest in the Big Eight at the time and the longest at K-State since 1934-35. With three games and three wins under their belts, the Cats were ready to take on KU in Lawrence.

"We were practicing and playing hard and went to KU with

lots of confidence. After our three wins, we felt we were ready to play," said Eric Wolford, offensive guard. "It wasn't on our minds that KU was a nationally-ranked team. We went to win."

The outcome of the KU game was not what the team or fans had anticipated. The Cats were slaughtered 7-31 in front of 52,000 people. The offense was held to negative yardage in the first half. The only score of the game was an interception run back 80 yards late in the second quarter for a touchdown by senior strong safety C.J. Masters.

*continued on page 271*

## LET DOWN

*continued from page 269*

Although the offense struggled throughout the season, the defense proved to be successful. Masters and Mendez were first and second in the Big Eight in interceptions. Masters also finished second in the NCAA with seven interceptions, while Mendez finished 10th. The Cats' defense was ranked second in the Big Eight in yards per rush, pass efficiency defense and yards per play. The Cats also led the Big Eight in interceptions with 21.

After the loss to KU, the team spent three more games on the road, making it the longest road trip in 46 years. They were defeated by Utah, Colorado and Oklahoma before returning to Wagner Field to appear for their third nationally televised game in history on ESPN.

Followers of the Cats were prepared to "Stuff the Stadium" to cheer on the team. "Stuff the Stadium" yard signs were distributed throughout the Manhattan community. As fans entered the stadium, 20,000 pompons were passed out. A fireworks display during half-time entertained the crowd. A crowd of 23,815 people was on hand

to witness the 22-13 victory over the Iowa State Cyclones. Fans showed their excitement about winning by tearing down the goal post at the north end of the field.

After the win at home, the Cats were on the road to Missouri to face the Tigers. Although the Cats were picked to win, they didn't break their losing streak for road games. After Mizzou opened with a 27-7 lead in the third quarter, the Cats put together a scoring drive that moved the ball 98 yards in 10 plays for a Smargiasso one-yard touchdown. But the play was the end of the Cats' scoring as the team lost 14-27, extending their overall record to 4-5.

Back in Manhattan for the Homecoming game, the Cats prepared to face Oklahoma State. The team wanted to extend their five-game winning streak at home and its first perfect home season (5-0) since 1934.

Four interceptions, two fumble recoveries and a blocked field goal boosted the Cats to a 10-0 victory over the Cowboys. Defense won the game for K-State as the Cats had their second shutout.

## LET DOWN

*continued from page 271*

"Our defense played great. We give all the credit to our defense," Benton said.

Coach Bill Snyder also agreed the defense was responsible for the game's outcome.

"That was the finest defensive effort we had," Snyder said. "One, we played so well defensively and two, that was an Oklahoma State team that put some numbers up in the last couple of weeks."

As the end of the season approached, the team and fans realized a bid for a postseason bowl game was lost. But the Cats didn't finish the season without a bowl appearance—they appeared in the Coca Cola Bowl in Tokyo, Japan, Dec. 5. The Cats squared off overseas against Nebraska in the Tokyo Dome. K-State was paid \$400,000 for playing in the bowl, plus air fare, hotel rooms and meals for 150 people.

Nebraska was expected to walk all over the Wildcats because their offense ranked 10th in the nation while K-State ranked 106th. Garber

won the starting quarterback position in the last game of his career at K-State. He led the Cats to a 24-38 loss to the Big Eight Champions. Although the Cats lost, Garber threw 19 completions on 29 attempts for 246 yards. He also threw a pair of touchdowns and ran in a third one. Athletic Director Milt Richards said Garber "played the best game of his life."

The Cats ended the season 5-6. Despite the team's losing season, many individuals were winners. Senior punter Sean Snyder was named first team All-American by the Associated Press and Kodak after averaging a school record of 44.7 yards per punt. Snyder was the first player in K-State history to earn first team All-American from the AP. Snyder and Mendez were named first team all-Big Eight. Second team all-Big Eight included Quentin Neujahr, Gallon, Masters and Brooks Barta. Barta also became the first player in K-State history to lead the Cats in tackles for four consecutive seasons, finishing the season with a career-best 142 tackles.

Wide receiver Gerald Benton is tripped up by a Missouri defender. Benton set a single-season record for punt return yardage with a total of 272 yards on 32 returns. (Photo by Craig Hacker)

## BEYOND THE FIELD

When Sports Illustrated visited the Wildcat football team to shoot the feature they did on the team in the Aug. 31 issue, everyone was eager to get themselves into the magazine. As the photographers shot, the players would push their way to the front of the pack.

Running back Leon Edwards won a solo shot in the magazine for messing up. He was late to practice and ended up running extra after practice. When he was cooling himself off with a splash of water, the photographers caught him.

"Everyone had already left the field and he was washing himself off when the photographers told him they needed one more picture. Everyone wished they would have been late," said Kitt Rawlings, junior cornerback. "I wish I would have been late."

Kansas cornerback Gerald McBurrows pursues K-State wide receiver Gerald Benton as he makes a diving attempt for a low pass in Lawrence. Benton led K-State with 38 receptions for 603 yards, ranking him ninth on the record list for single-season receptions. (Photo by Craig Hacker)

# TOUGH DEFENSE

BREAKING RECORDS THROUGHOUT  
THE SEASON, THE  
FOOTBALL'S DEFENSE FINISHED  
HIGH ON THE CHARTS.

Senior linebacker Brooks Barta tries to drag down a New Mexico State tight end after shedding a block. Barta finished the season with a career-best 142 tackles. He finished his career with 436 tackles. (Photo by Shane Keyser)

The Kansas Jayhawks were holding the Wildcats scoreless the first half and had held the offense to negative yardage. A possible shut-out haunted the minds of K-State fans.

Late in the second quarter, senior strong safety C.J. Masters ended the nightmare. He picked off a pass from KU quarterback Chip Hilleary and ran it back 80 yards for a touchdown, the Cats' only scoring in their loss.

"I knew we had to have a big play to get momentum back. We weren't playing the way we could," Masters said. "We had a blitz on. They threw to the running back, and I stepped around him and picked it off."

Ranked third in the nation during the season, the defense had six players return for their fourth-consecutive season under head coach Bill Snyder. In the games against KU and Utah State, the defense outscored the offense 16-14.

"We always tried to keep working hard," said Kirby Hocutt, sophomore linebacker. "We played our best and believed the offense would pull through."

Defensive record breakers were the backbone of the team. Masters broke the record for season interceptions with seven, ranking him second in the nation. He was also second in the nation for return yardage on interceptions with 152. Junior free safety Jaime Mendez set a K-State record and a modern-day Big Eight record with four interceptions against Temple. He also set a career record for interceptions with 13. The

team set a record for season interceptions with 21.

Besides breaking records, the defense ended high on the charts in the Big Eight conference. They led the conference with 21 receptions and finished second in yards per rush (3.1), yards per play (4.4), and pass-efficiency defense (105.5). The

team's interceptions ranked fourth in the nation.

"You always try to be at the top. The standings and records show individual effort, as well as team effort," Hocutt said. "With all our hard work Monday through Friday, Saturday's the icing on the cake."

Another impressive player was senior punter Sean Snyder. His average of 44.7 yards per punt earned him first-team, all-America honors from the Associated Press and Kodak.

Despite being exhausted, members of the defense said they were determined to keep their opponents from scoring. The defense shut out New Mexico State (19-0) and Oklahoma State (10-0).

"There were games we would be out for 100 plays and the offense would be out for 20," said Kenny McEntyre, senior cornerback. "We were tired, but we came to the game to win. It was a pride thing."

Hocutt said he enjoyed being a defensive team member. "We had great senior leadership," Hocutt said. "When you have people like Brent Venables, Brooks Barta and Chris Patterson, they keep you together."

A New Mexico State tight end is stopped by strong safety C.J. Masters and cornerback Thomas Randolph. K-State won their first shut out of the season against New Mexico State 19-0. (Photo by David Mayes)

Schultz construction members work on placing a beam on the new indoor football practice field. The field measured 130 yards long and 75 yards wide. The new field was bigger than the indoor field of the Kansas City Chiefs. (Photo by Darren Whitley)

# REBUILDING

ATHLETIC DEPARTMENT BEGINS  
\$5.3 MILLION DOLLAR PROJECT  
TO IMPROVE KANSAS STATE  
FOOTBALL PROGRAM.

A member of Schultz construction overlooks the demolition of the 25-year-old press box. The old box was replaced with a five-level press box that contained 22 sky suites and 124 club seats. The suites and seats were sold in less than two months. (Photo by Darren Whitley)

In December, the old press box came down. The box that was built as a temporary facility housed fans and the press for 25 years. In 1993, construction began on the new \$3.3 million press box.

"We never had the money to make the new one," said Jack Key, associate athletic director. "It (the old one) was functional, but it wasn't very nice."

Along with the new press box construction, a \$2 million indoor practice field for football was added south of Bramlage Coliseum. The projects were tied together, and the \$5.3 million needed to complete phase one, the practice field, and phase two, the press box, was raised through donations.

For several years, phase one, which was completed in April, was only an idea. Key said Coach Bill Snyder wanted the new practice field because it would aid in the team's recruiting and practicing.

"The field will help with recruiting and give us the ability to practice the whole team," Key said. "Before, they would have to practice defense and offense separately."

Brandeberry Indoor Complex was only 60 yards in length, with a low ceiling that didn't allow for kicking. The new complex was 130 yards long and 75 yards wide. The ceiling soared seven stories high.

"I think the new practice field will help (the team) tremendously," said Brad Seib, junior tight end. "In the past,

we had to play outdoors in restrictive clothing."

The press box was expected to be done the middle of August and contain 22 suites and 124 club seats.

"It has to be done

by Sept. 4," Key said. "Otherwise, we won't have any place for the press and the people who have purchased the suites."

The cost of reserving a sky suite required a \$50,000 one-time access fee, plus \$10,000 a year. On top of that, buyers had to purchase 12 season tickets. The price of a club seat was a \$500 one-time access charge, plus \$500 a year. Buyers of the sky suites and club seats made donations of at least \$1,000. Despite the costs, the new press box sold out in less than two months after the plans were announced.

"I was surprised how fast everything went," Key said. "I was skeptical that we would get them sold by the first game."

The plans included five levels resting on stilts, with the first level containing two elevators. On the second level were eight suites, with 62 club seats on either side. The third level housed the rest of the 14 suites. The press would watch the games from the 100 seats in the fourth level, which also had room for coaches and visiting athletic directors. The top level was for radio announcers and television crews.

"We're just now catching up with other universities in our league," Seib said. "We're spending some money now, and it's starting to show."

The Kansas State women, Lesley Wells (53), Jeanene Rugan (50), Martha Pinto (49), Jennifer Hillier (45), and Janet Magner (46), along with Paulette Staats, Cari Warden, Irma Betancourt, and Amy Marx lead the pack at the start of the Big Eight Championships in Boulder, Colo. The women tied with Colorado for 1st. The women went to the NCAA Championships where they raced away with 21st. (Photo by Margaret Clarkin)

# TOP FINISHES

EMOTIONS RAN HIGH FOR THE TOP 20 RANKED MEN'S AND WOMEN'S CROSS COUNTRY TEAMS AS BOTH TRAVELED TO THE NCAA CROSS COUNTRY CHAMPIONSHIPS IN AMES, IOWA

BY LIANA RIESINGER

Despite head coach John Capriotti's resignation, the women's and men's cross country teams made it to nationals.

One week after the teams qualified for the NCAA Cross Country Championships, Capriotti signed a contract with Nike Inc. Accompanied by head coach Cliff Rovelto and Todd Trask, previous all-American and team assistant, the teams headed to Bloomington, Ind., Nov. 23.

At nationals, the women finished 21st in the 5,000-meter event with 489 points. Runners Paulette Staats, junior, and Jeanene Rugan, sophomore, finished in the top two spots for K-State. The men's team finished 15th in the 10,000 meters with 344 points. Junior Francis O'Neill and senior Mike Becker were the two front runners.

This season marked the fourth-consecutive trip to the NCAA Cross Country Championships for the women. The team had qualified for the championships eight times in 10 years.

Capriotti's recruiting brought three successful runners to the men's team, including O'Neill, who gained the top spot on the squad. Chris Unthank, freshman and

Australian native, finished his first Wildcat season in the number three position at nationals. Another new team member was Ryan Clive-Smith, freshman and a South-African native. Throughout the season, Clive-Smith was consistently ranked as one of K-State's top five

nationals.

"We (the men's team) finished 15th at Nationals, but as a team we felt we were capable of finishing in the top 10. We could have finished sixth or seventh if we would have run like we did at district," Rovelto said. "The men have a young, inexperienced team, but next year is very hopeful. We just need more depth and maybe another two top runners."

Rovelto said the women's team lacked someone able to finish in the top 30 at Nationals.

"We could be a top 10 team next year, even if we have only one person finish in the top 50," Rovelto said.

He said he hoped Staats or a new recruit would take the team to a top 10 position next season.

Individuals with outstanding season results were freshman Cari Warden for the women's team and O'Neill for the men's team.

"For a freshman, Warden did an excellent job. She saved the team," Rovelto said. "O'Neill is also extremely talented. He had a tremendous range in the 1,000 meters. He has a bright future, especially if he begins training at a higher level."

*continued on page 282*

**Wildcat runner Jeanene Rugan, sophomore, strains to get ahead on the last stretch towards the finish line in Boulder, Colo. Rugan finished 11th at the race with a time of 18:59 on the 5,000 meter course. (Photo by Margaret Clarkin)**

runners.

"Both teams had very successful years," Rovelto said. "The women tied for the conference win with Colorado and did all they could."

Disappointment was expressed by Rovelto and other team members about the men's results at

## TOP FINISHES

*continued from page 281*

O'Neill said his performances surprised himself.

"I came here not planning to be number one," O'Neill said. "I didn't know what to expect running at the Division I level."

Members of the men's team said they were satisfied with the season, excluding national results.

"Overall, I think it (the season) went really well," Becker said. "Nationals didn't come together as we wanted. None of the runners had even been to a national meet; therefore, we had little experience. If just one guy runs a little better, it can take the team to a completely different level. This is what we need."

Becker said emotions were high at nationals because of Capriotti's resignation. To make the transi-

tion smoother for the teams, Todd Trask accompanied the runners to the competition.

"We have a lot of confidence in Todd," Becker said. "He's a branch of Capriotti. He made the adjustment easier for the team."

The women's team finished first at the Wichita State Gold Classic with 15 points and at the Oklahoma State Cowboy Jamboree with 25 points. The team captured second place at the Cal-Poly Invitational with 90 points.

Front runners in the two-mile event at Wichita included Staats with a time of 11:12, Rugan in 11:17 and Hillier in 11:24.

The women tied for first with Colorado at the Big Eight Cross Country Championships, while the men finished second. But it was the

NCAA Region Five Cross Country Championships that determined the teams' fate for qualifying for Nationals.

In the 5,000 meters, the top three women were Rugan (18:27), Staats (18:35), and Warden (18:44). The men who led the team to a first-place finish in the 10,000 meters were O'Neill (31:21), Unthank (31:44), and Clive-Smith (31:51).

At the start of the race, Francis O'Neill (51), Mike Becker (45), Chris Unthank (52) and Anthony Williams (53) push to get ahead of the pack at the Big Eight Championships. O'Neill stayed with the front pack throughout the race and led until the end when he fell back to a fourth-place finish. (Photo by Margaret Clarkin)

Concentration and a quick pace of Yared Berhane (46) and Ryan Clive-Smith (47) help the team finish second at the Big Eight Championships. Berhane finished 14th in 25:50 and Clive-Smith finished 25th in 26:12. (Photo by J. Kyle Wyatt)

Advice is given to Francis O'Neill by Coach John Capriotti before his race in Boulder. O'Neill finished the race in 25:10 which put him in fourth place. The men went on to take 15th at the NCAA Cross Country Championships. (Photo by Margaret Clarkin)

## BEYOND THE COURSE

The men running naked through the streets of Aggieville Aug. 19 weren't drunken streakers, but members of the men's cross country team.

"It has been a tradition at K-State that the guys strip everything except their running flats and go running up and down Aggieville," said Mike Becker, junior in secondary education. "We feel like if a bunch of us guys can get together and do something this crazy, then there is no reason why we

can't accomplish our goals at cross country meets."

Besides making themselves mentally tough, Becker said their nude run was fun and generated lots of reactions from the surprised onlookers who screamed and snapped photos of the buck-naked runners.

"We tried to disguise ourselves by wearing rubber gloves and glasses, but we didn't fool anyone," Becker said. "We ran nude a second time before the Big Eight Tournament."

# A CHANGE OF PACE

---

(Photo by David Mayes)

*After six years as head track and cross country coach at K-State, John Capriotti leaves two nationally ranked teams for a job with Nike Inc.*

---

WHEN JOHN CAPRIOTTI came to K-State to serve as head coach for the track and cross country teams, only 17 all-American awards had been won in five years.

After his departure from K-State six years later, the teams had racked up 41 all-Americans, the women's cross country team had won the Big Eight Conference and both the men's and women's teams ranked in the nation's Top 20.

"He (Capriotti) is a guy who keeps me up all night because his teams are so good," said Gary Pepin, head track and field coach at the University of Nebraska.

Capriotti resigned as K-State's head coach Nov. 1, 1992, to become a track and field promotional representative for Nike Inc.

"This came along and I just couldn't pass it up," Capriotti said. "When I used to see Nike reps, I'd think, 'How did they get that job? I wish I could do that.'"

Capriotti started his new job knowing he had left behind a successful program.

"A lot of coaches leave when the program is down," Capriotti said. "I promised myself I'd never do that. I don't think I could have left K-State if the program wasn't so great."

As a Nike representative, Capriotti scouted talent at track meets all over the world.

"One of my biggest jobs will be to try to figure out the top people who will go to the Olympics to represent Nike," he said. "It's a high-pressure job to try to pick the winners."

Capriotti said travel would make up 50 percent of his job.

"I'm a pretty high-energy person. I'm kind of a pain in the butt, so people like it when I go away and travel sometimes," he said. "It's like a breather to everyone. Ask the kids (team members) — I think they'll tell you I'm demanding, but fair."

Marcus Wright, middle-distance runner, agreed.

"He pushes us hard, but that's a positive instead of a negative," Wright said. "I think he's a reasonable coach. He just sees the potential in an individual and pushes for it."

Senior middle-distance runner Paulette Staats said Capriotti was a good coach.

"He expects a lot out of us. I don't think he pushes too hard, though. He knows what we need and helps us get there," Staats said.

Capriotti said it wasn't easy for him to leave behind the nationally ranked program.

"The kids we have on the team are great. I'm going to miss them a lot," Capriotti said. "If it wasn't for this job offer, I would have stayed here a long time. I love K-State, and I've worked hard to make this program strong. It (leaving) was a hard decision."

Capriotti's departure was also difficult for the team.

"Honestly, it (Capriotti's resignation) hurt me," Wright said. "I respect his decision — I don't like it, but I respect it."

Cliff Rovelto, former track and field assistant coach, took over Capriotti's position as head coach.

"I feel very confident and comfortable about that," Capriotti said. "Cliff Rovelto will carry it (the winning tradition) on, and we've got a lot of great athletes to help him."

# CLUB SPORTS

STUDENTS SPEND EXTRA TIME  
AND OWN MONEY IN ORDER TO  
EXPERIENCE THE THRILL OF  
VICTORY AS A WILDCAT

Students in club sports promoted K-State as they traveled across the country to participate in tournaments. Because club athletes lacked staff member coaches and a university-funded budget, the students organized the teams themselves and paid for club expenses out of their own wallets.

Although the 60 Lacrosse Club members paid only \$10 dues each semester, the members' main expenses came from buying equipment.

"They (team members) had to spend at least \$150 for the basics," said Curt Thurman, the lacrosse team's coach. "The club was able to provide helmets."

The athletes also sacrificed personal time to practice each day for 2½ hours.

"As far as I'm concerned, we are one of the most dedicated clubs in the University," Thurman said.

Their dedication and sacrifice paid off last spring when they made it to the Final Four Tournament for the Great Plains Lacrosse League. Although they didn't win the tournament, Thurman said the experience the players gained was beneficial.

"Every time we play, we become better lacrosse players," he said.

The women's soccer team was also able to overlook the

A member of the men's volleyball receives a serve and passes it up during a game at Ahearn Field House. The team set up their own games with surrounding schools. (Photo by Shane Keyser)

hardships caused by the lack of University funding. The team placed first in an October tournament in Missouri.

"It was so exciting," said Lori Smith, senior in animal sciences and industry and the team's co-captain. "We even won with no substitute (players)."

Athletes on the team paid \$20 membership dues each semester, which was used to pay for tournament and lodging fees.

"We pay for our own food and transportation," said Lyndsay Hafermehl, freshman in history.

"Usually, someone volunteers to drive, so we just chip in on the gas money."

Unlike the women's soccer team, the men's club received a small amount of University funding. The money was used to cover traveling expenses to a Louisiana tournament.

"We had to go in front of the Finance Committee and then the Senate to receive the money," said Brent Carpani, junior in mechanical engineering.

The team made the trip worthwhile as they placed second out of 16 teams in the Mardi Gras Classic. The team captured their wins after practicing only five times.

"We played division one teams," said Carpani. "Lamer

University and Baylor are even better than some of the Big Eight teams."

The K-State soccer team was also better than all others in the Big Eight. In spring 1992, they won the Big Eight Championship.

The team's successes continued into the next fall as they finished the semester with 12 wins and only three losses. With such a good record, Carpani said it was frustrating not to be considered a varsity athlete.

"I would love to be able to be in a varsity sport before I leave the University," he said. "Even if I'm already gone by the time it happens, I still want it to happen."

The coach for the women's rugby team said the sport wouldn't be recognized by the University for several years. Despite this lack of recognition, Coach LaDonna Grenz, graduate student in laboratory medicine, said her team still practiced hard and had amazing tournament results.

In the spring of 1992, the women's rugby team hosted the Tiny Tumbleweed Tournament, and the team captured first place. Later in the semester, the team also won a tournament in St. Louis, Mo.

The team members' hard work paid off again the next fall. At both the Heart of America and Ozark tournaments, the team finished second out of 12 teams.

## CLUB SPORTS

*continued from page 289*

"We were really happy with our wins," Grenz said. "I hope we do as well this spring."

To pay for the numerous tournaments, the 25 members paid \$25 dues each semester and had fundraisers throughout the season.

"We spent about \$4,000 a season," Grenz said. "We need the money to pay for travel expenses, jerseys and referees at our own tournaments. We also pay for our own food and gas when we travel."

The men's volleyball team also paid for their own food and gas when traveling to meets, but they were lucky enough to receive some support from Newman Distributors, a local company.

"They helped us out quite a bit by paying for some of the traveling expenses," said Kenny Martin, fifth-year architecture student and team president. "We also received money from the

members. The dues were \$50 a year."

Because the 1992 season was the first year of the club's existence, the meets weren't as organized as Martin wanted. The club joined the United State's Volleyball Association during the spring semester, but the next fall they decided to be independent.

"We set up our own games with other schools that had teams," Martin said. "Almost all the schools in the Big Eight have teams, so it (men's volleyball) is getting more popular all the time."

Popularity wasn't a concern for members of the K-State Rowing Association. The club's main concern was money.

"Our equipment is expensive," said Janelle Esau, senior in journalism and mass communications. "A shell that holds eight people costs \$18,000. Upkeep and maintenance are also expensive."

To pay the expenses, rowers on the varsity

team paid \$50 semester dues, while novice and junior members paid \$40 dues. Team members also paid a \$10 monthly coaching fee.

"We're trying to build up our coaching funds so we are able to pay our coaches a salary," Esau said.

The team also needed funds to replace a roof on their boat house. The club leased the boat house and surrounding lands from the Army Corps of Engineers. To keep their lease, team members were required to put a \$12,000 roof on the boat house before 1995.

Because their dues were used for such large expenses, rowers had to pay for their own transportation, lodging and food on trips.

Although being involved with a club sport meant sacrificing personal time and money, team members found the thrill of competition worthwhile.

# STUDY TIME

STUDENT ATHLETES FIND IT DIFFICULT TO KEEP UP WITH STUDIES AND JUGGLE TIME BETWEEN SPORTS AND CLASSWORK

One night they were out on the field, court, track, or course, displaying their athletic skills as fans cheered them on to victory. The next night student athletes sat at home buried under piles of homework, far from the limelight of college athletics.

"When I was a freshman, I had the same problems a lot of freshmen do," said senior quarterback Matt Garber. "I was shocked at how much time it took to keep up with my homework and practice."

Freshman Cari Warden, cross country and track team member agreed.

"It (cross country and track) is much more intense and serious at the college level," she said. "It is a lot more work, but being an athlete and knowing I have to get my assignments in motivates me."

Keeping up with classes was important to the athletes because of the NCAA requirements that had to be met. Student athletes needed a minimum 2.0 grade point average to remain eligible. They also had to complete 12 hours of classes each semester and remain unemployed during the academic year.

"They (the football staff) watch us pretty closely," Garber said. "The University sends out grade checks, and we have people who check attendance to make sure you are going to class."

The athletes juggled homework and tests with road trips that took them away from campus for days at a time.

"The teachers are usually cooperative with my schedule," Warden said. "We have to have everything done and turned in before we leave. It's hard to get everything done, especially

when we leave on a Thursday and don't get back until Tuesday of the following week."

Some athletes took their homework with them on road trips, but others said they didn't have time to study while traveling.

"They (the coaches) tell us to take along our books, but it's a waste of time to take them with you," said Brian Rees, sophomore tight end. "A lot of instructors were bothered by us going to Tokyo, since we were gone for an extended period of time."

The athletes said managing their time was crucial to achieving in both academics and athletics.

"School is hard when you're playing basketball," said Vincent Jackson, senior guard. "You spend two hours in practice giving everything you've got. It wears you out mentally and physically, so you're too tired for homework."

Since the athletes spent up to five hours a night practicing, their grades weren't always as good as they wanted. However, Warden said the "dumb jock" stereotype was unfair.

"I think it is negative when people think athletes are dumb; a lot of them have a 4.0," Warden said. "We probably study more than a lot of students do."

Although participating in college athletics was time consuming, Garber said he enjoyed the experience.

"If I wouldn't have been in football, I would have graduated sooner," he said. "However, football has helped me with discipline and time management. You learn a lot about other people and yourself."

# CARDIAC CATS

SQUEAKING PAST THE COMPETITION, THE MEN'S BASKETBALL TEAM ESCAPED THEIR SEVENTH PLACE PRE-SEASON PICK AND GAINED THEIR FIRST NATIONAL RANKING IN FIVE YEARS

By MIKE MARTIN

**W**ith tough defense and a knack for winning close games, the Wildcat squad took its fans and the Big Eight Conference by surprise.

Led by the late-game heroics of junior college transfer Anthony Beane, the men's basketball team won four games in overtime and four more by a combined total of six points.

The team opened the season by winning their first five games, including an overtime win against Ohio and a two-point win over UMKC.

As 1992 came to an end, the Cats embarked on their worst road trip of the season, dropping games at Wichita State and Nevada-Reno.

But when Beane buried a 19-foot jumper with nine seconds left in the game against Cal-Santa Barbara, it gave the Cats a 60-59 victory and ended their losing streak.

A win at home over LaSalle helped the Cats ring in the new year before they traveled to Stillwater to begin conference play. In a pre-season poll of league coaches, the Cats were picked to finish seventh.

But it wasn't long before head coach Dana Altman's squad had league coaches reconsidering their votes. With four minutes left against Oklahoma State, the Cats were down by 11. They went on a 14-3 run that was capped by Beane's long three-pointer to tie the game

with eight seconds left. In overtime, the Cats dominated the Cowboys, giving head coach Eddie Sutton only his second home loss in three years. Returning to Bramlage Coliseum, the Cats got two more wins as they knocked off non-conference foe Northeastern

82 season at 10-2.

Both Collier and Cunningham gained a reputation for their aggressive rebounding, earning them the nickname of AC/DC for their electric performances.

Cat fans soon discovered how good the team was when Kansas

came to Manhattan holding the nation's top ranking. ESPN featured the game on "Big Monday" as the fifth-largest crowd in the history of Bramlage Coliseum witnessed the game.

Early in the game, the Cats didn't disappoint the fans. Henson hit two three-pointers to give the Cats the lead at halftime, 32-24. Then the Hawks showed why they were the best team in the nation as they beat the Cats 71-66.

Putting the loss behind them, the Cats traveled to Lincoln, Neb., where they won a nail-biting game over Nebraska. The Cats closed out their non-conference schedule with wins over Central Connecticut State and Temple.

Turning their full attention to the Big Eight Conference, the second-place Cats welcomed Oklahoma to Bramlage. The Sooners had the league's top offense and ranked 16th in the nation, while the Cats countered with the league's best defense.

With the Cats down by one and only 3.6 seconds remaining, Beane

*continued on page 297*

Illinois and downed Colorado in overtime.

The Cats were led on offense by junior guard Askia Jones, senior forward Vincent Jackson, sophomore guard Brian Henson, senior center Aaron Collier and junior forward Deryl Cunningham, all of whom averaged double figures in scoring. The Cats had their best start since the 1981-

Excitement rages through Bramlage Coliseum after the Cats beat Oklahoma on last second free throws by Anthony Beane in front of almost 10,000 fans. Junior college transfer Ron Lucas defends Oklahoma's Bryan Sallier. Sallier had 11 points against the Wildcats. Lucas came off the bench to score 7 points and pull in four rebounds. (Photo by Shane Keyser)

Going up against Oklahoma State standout Bryant Reeves, senior Vincent Jackson powers inside for 2 points. He scored a team high 21 points against the Cowboys and ran away with four steals in the Cats' 61-78 loss at Bramlage. Jackson, known as one of the conference's most versatile players, led the team in scoring and in steals. "I knew that being a senior I was going to have to be a leader," Jackson said. "I wanted this to be my best season ever." He was named honorable mention all-Big Eight. Jackson ended Big Eight play at the conference tournament by scoring 25 points in the Cats victory over KU and 16 in their loss to Missouri in the finals. He was named to the all-tournament team along with Anthony Beane and Askia Jones. (Photo by Mike Welchans)

## CARDIAC CATS

*continued from page 294*

was fouled by Angelo Hamilton. Calmly stepping to the line, Beane made both shots to give the Cats a thrilling one-point victory over the Sooners, much to Oklahoma head coach Billy Tubbs' disliking.

"I don't give a shit how good they are, we're going to beat the hell out of them in Norman. Mark that down," Tubbs said.

Many people did mark it down, as well as the fact that the Cats were now 14-3 overall and 4-1 in the conference. The Associated Press voters recognized the Cats as the 23rd best team in the nation, the first time the Cats had been ranked in the weekly AP poll since the 1987-88 season.

But the Cats had no time to enjoy their new ranking as they were put to the test in front of another ESPN "Big Monday" audience. In Missouri, the Cats suffered their worst defeat of the season, losing the game 51-67. With the defeat, the Cats lost their ranking.

Back home, the Cats rebounded with another close game, edging

Drawing the charge, Anthony Beane keeps his position as Missouri guard Jed Frost tries to shoot over him. The Cats avenged their 67-51 loss to the Tigers in Columbia with a 78-67 victory in Bramlage. (Photo by Mike Welchans)

Iowa State in overtime. Beane hit the winning shot from inside the lane as time expired.

"He's got a lot of courage and a lot of confidence to take that big shot," Altman said. "I have not had the opportunity to be around too many guys like that. Mitch Richmond and Steve Henson, they made some awfully big plays for us, but probably not as many as Anthony has made in such a short period of time."

Beane wasn't able to save the team as the Cats lost three straight games, including one on the road against Kansas, the conference leaders. The team also lost to Colorado, giving the Buffaloes their first conference victory of the season.

Trying to snap their losing streak, the Cats then traveled to Oklahoma where Tubbs was waiting to fulfill his promise of the Sooners beating the Cats. Unfortunately for Tubbs, his team was unable to stop Collier, who scored a career-high 20 points to lead the Cats to a season sweep of the Sooners for the second time in three years.

Returning to Manhattan, the Cats tried to do the same to Oklahoma State, but this time the brooms stayed in the closet. The Cowboys prevented the season sweep with a 78-61 defeat.

*continued on page 298*

## CARDIAC CATS

*continued from page 297*

With the chance of an appearance at the NCAA on the line, the Cats faced their last home game of the season against Missouri. The Tigers hadn't won a game since their defeat over K-State.

The Cats led by as many as 20 points during the game and pulled away with a 78-67 victory.

The game also marked the last game in Bramlage for seniors Jackson and Collier.

"I wanted to go out with a win," Jackson said. "I wanted my last game at Bramlage to be special, and knowing we had to win to help our chances of going to the NCAA tournament made it even better."

Jackson ended his career at Bramlage with 17 points.

A victory in the last game of the season against Iowa State would virtually assure the Cats of a NCAA tournament spot. Though the Cats came back from a 10-point deficit to lead by two at half time, it was not meant to be as the Cats were taken by the Cyclones 79-61.

The Cats ended conference play at 7-7 and an overall record of 19-9. The chances for a tournament appearance laid on the Cats performance at the Big Eight tournament.

The opening game of the Big Eight tournament was characteristic of the "Cardiac Cats", who were 17-1 in games decided by 5 points or less. Seeded number five, they faced num-

ber four seed Nebraska.

Jones came out with 19 points and the winning basket with less than a second left on the clock to beat the Huskers 47-45.

The Cats assured an NCAA appearance and moved on to face the number one seeded and conference champion Jayhawks, a team the Cats hadn't beaten in their last eight meetings.

The biggest upset of the tournament came with a 74-67 victory over KU. The Hawks led by as many as 11 during the second half, but with the help of Jackson's 25 points the Cats moved on to face Missouri in the finals.

A hard fought game was lost to the Tigers 56-68.

## BEYOND THE COURT

Most athletes have pre-game rituals they go through, and the men's basketball team was no exception. From serious to funny, the team knew what they had to do to get ready.

Vincent Jackson and Kenny McEntyre hugged before every game.

"We hug cause we're close like that," Jackson said. "It gets us ready for the game."

Aaron Collier also liked to focus on those close to him.

"I think about my friends who couldn't be there, and my mama," Collier said. "It gives me something to play for."

Collier and Ron Lucas helped get the team pumped up before the game by playing comedians.

"We do a little thing about someone trying to steal something from me. We get the team rolling," Lucas said. "The team loves us."

---

Oklahoma center Bryan Sallier goes up against senior forward Aaron Collier and junior guard Askia Jones. Jones and Collier each pulled down five rebounds to help the Cats sneak by the No. 16 Sooners, 62-61. Junior guard Anthony Beane captures the win by sinking two last-second free throws — his only two of the night. (Photo by Craig Hacker)

# 'GOOD THINGS WILL HAPPEN'

(Photo by Mike W.)

*No one could elicit as much excitement from the crowd or pump the team up like junior newcomer Anthony Beane.*

IMAGINE YOURSELF THE STAR point guard for a rebounding Big Eight basketball team. Imagine being so admired by your teammates that they turned to you for guidance, even though you were a rookie on the squad. Imagine having a dedicated following of media members and fans.

Imagine being Anthony Beane.

Beane, a junior transfer student from Three Rivers Community College, exhibited leadership qualities on the court. Newspaper articles touted his positive attitude and athletic ability, qualities Head Coach Dana Altman wanted to instill in his players. Altman was the main reason Beane decided to play for K-State.

"Coach Altman made a good impression on me and my parents," Beane said. "He said, 'Books first, then basketball.' I'm here to get an education first, but at the same time, basketball is important to me."

Coaches and reporters credited Beane with inspiring the team's improved performances. In a January press conference, Altman praised Beane for his affect on the other players.

"Very honestly, he's the difference in this program from last year to this year," Altman said.

Wildcat fans enjoyed watching Beane handle the ball, taunting and frustrating opponents with his sharp pivots and endless chatter on the floor. Tim Bullington, senior in animal sciences and industry, said he enjoyed the games more since Beane joined the lineup.

"I think he is the one player who is changing the Cats for the better," Bullington said. "I'm glad he came to K-State."

Beane said the feeling was mutual.

"K-State has great fans, especially in the student section," he said. "They're always right up front (from) beginning to end."

Team members admitted they relied on Beane. In the Jan. 25 edition of the Wichita Eagle, Deryl Cunningham, senior forward, said Beane was a leader.

"Anyone can step up and lead. But we all look to Anthony," Cunningham said. "He just shoots us one of those looks and we go for it."

Beane said his glances were ones of encouragement.

"We all make mistakes. When someone makes a mistake, they need a little encouragement," Beane said. "I might nudge them a little and give them a look, but it's really more than that. It's encouragement."

His reassuring looks were only one of the ways Beane displayed his leadership.

"You can't be a leader by telling people what to do and not do it yourself," Beane said. "When they see me giving 110 percent in practice, then they will. You've got to lead by example."

Being a successful player in the Big Eight Conference was a big task, and Beane set his priorities at the beginning of the season. For him, hard work was its own reward.

"While winning is important at this level, at the same time you've got to play your hardest and have fun," Beane said. "I've always been told if you play hard, good things will happen."

# SEEKING HELP

WITH A NEW OFFENSE FROM THE 'WIZARD' THE LADY CATS IMPROVE ON LAST SEASON'S RECORD BUT END WITH THE WORST WOMEN'S CONFERENCE RECORD IN K-STATE HISTORY

By MIKE MARTIN

**F**ollowing in the footsteps left by Dorothy's ruby-red slippers, Lady Cat head coach Susan Yow went in search of the "wizard" to help her team. Looking to improve on last season's 5-23 record, she sought the advice of former UCLA head coach John Wooden.

Known as the "Wizard of Westwood" for leading the Bruins to 10 NCAA national titles, Wooden gave Yow advice on the high-post offense, which was the new offense the Lady Cats adopted to change their fortunes.

To go along with their new offense, the Lady Cats added new uniforms, new players and a new attitude to improve on last year's five wins.

"I think as we open our season, it is important for this team to get some wins under its belt," Coach Yow said.

After five games, the Lady Cats broke the belt as they won all five, matching last season's total wins.

Led by seniors Kelly Moylan, Leah Honeycutt and sophomore Shanele Stires, a junior college transfer, the Lady Cats had impressive wins over teams including Northern Iowa, Lafayette and Oral Roberts. Not since the 1983-84 season had the Lady Cats gotten off to such a good start.

The Lady Cats' winning streak was brought to a halt when Illinois-

Chicago edged the Lady Cats by one point for a 61-60 victory. Then the team suffered their second straight defeat as Minnesota left Bramlage Coliseum with a 58-44 win.

The Lady Cats then embarked on their first road trip of the season as they traveled to Wilmington,

Valuable Player and was joined on the all-tournament team by Moylan and Honeycutt.

Picked to finish last in the Big Eight in a preseason poll by league coaches, the Lady Cats began conference play against the nationally ranked Colorado Buffaloes. The

Lady Cats fell to the Buffaloes 33-61. They then were beaten in Missouri by the Tigers.

Returning home, the Lady Cats had to deal with the loss of two key bench players, sophomore forwards Pam Stoltz and Joey Ward.

On Jan. 12, Stoltz announced she was leaving the team and returning to her home in Minnesota because she hadn't adjusted to the demands placed on a collegiate basketball player.

"It is extremely hard when a player leaves your program, especially one that has contributed early in a big way," Yow said.

Stoltz left the team averaging 2.2 points and 3.4 rebounds per game. The next day, Ward tore the anterior cruciate ligament in her left knee and was sidelined for the season.

Despite the loss of two players, the Lady Cats were still confident they would beat Iowa State, who came into the game with only one season win. Although Moylan had 18 points on six three pointers, it wasn't

## BEYOND THE COURT

The Lady Cat basketball team recruited experienced players through an ad in the Collegian. However, the gender of the practice players they were looking for was male.

The need for recruits came about when one player quit and one was injured, leaving the team nine strong — not enough women to scrimmage against one another.

Players recognized the benefits of practicing against men who were sometimes quicker and played more roughly.

"They're (males) more aggressive," Kelly Moylan said. "The type of defensive pressure they put on us helps when we go up against our opponents — it helps our offense."

Leah Honeycutt agreed.

"It (playing against the men) works real well," Honeycutt said. "Because the guys are quicker and jump higher, it causes us to step up our own playing."

## SEEKING HELP

*continued from page 305*

enough as the Cyclones upset the Lady Cats 67-61 for their third straight loss.

The Lady Cats then lost four more games, including a non-conference loss to Wichita State. The Shockers were led by sophomore Ann Hollingsworth, who dumped in 20 points and grabbed 11 rebounds.

With the absence of Stoltz and Ward, the Lady Cats were down to nine players. Through an advertisement in the Collegian, the team's coaching staff recruited male players for scrimmaging.

The Lady Cats finally broke their seven-game losing streak when they hosted Quincy. Led by Honeycutt's 17 points and Stires' 15 points, they improved to an 8-10 record.

When KU's players came to town, the team was still in search of their first conference win since Jan. 23, 1992. After trailing by 10 at intermission, Stires contributed 11 points and the Lady Cats took the lead, 39-38. But they were unable to hold on and fell 58-51.

The Lady Cats suffered a disappointing 67-51 defeat to Missouri.

"We're very, very disappointed, extremely disappointed — it's the most disappointed the team's been all season," Yow said.

Colorado was next in line as they came to Bramlage ranked fourth in the nation, but they almost didn't leave that way. Colorado called timeout with 2:09 left and the score tied at 51. The Lady Cats turned the ball over three straight times as they failed to score the rest of the game, losing 61-51.

After a loss to Nebraska, the Lady Cats' fortune finally changed when they traveled to Iowa State. The Lady Cats snapped a 21-game Big Eight losing streak as Stires and Moylan both contributed 17 points.

The Lady Cats lost the next two games, as seniors Moylan and Honeycutt finished out their college basketball careers at Bramlage. Moylan went out blazing as she hit six three-pointers in a losing effort against Oklahoma.

In the last non-conference game of the season, the team traveled to Chicago where they defeated Loyola, 63-52. They closed out the regular season with a 75-43 loss to KU.

**H**ustling on defense, K-State sophomore forward Shanele Stites moves to cover her player. The Lady Cats lost 51-67 to Missouri. (Photo by Darren Whitley)

**FRONT ROW:** Dana Pollock, Kelly Moylan, JoMoree Grattan, Joey Ward, Pam Stoltz, Andrea O'Neal. **BACK ROW:** Susan Yow, Sue Doran, Tim Kolling, Susan Anderson, Gretchen Bertrand, Lynn Holzman, Shanele Stires, Leah Honeycutt, Stacy Neal, Liz Harvey, Ann Dovenmuehler, Cindy Williams, Joeleen Bieber, Jan Chance.

# INTRAMURALS

FROM PING PONG TO FLAG  
FOOTBALL STUDENTS PARTICIPATED  
IN SPORTS AT A COMPETITIVE OR  
NONCOMPETITIVE LEVEL

Students didn't have to be all-stars to participate in intramural sports — all that was needed was the desire to compete.

"It (competitiveness) is an important part of students' lives at K-State," said Steve Martini, associate director of Recreational Services. "Everyone, to some degree, has a level of competitiveness in them."

Students displayed their competitiveness by participating in intramural sports sponsored by Recreational Services. More than 45 sports were offered ranging from softball to water polo, and a survey by the Office of Planning and Evaluation Services revealed strong student support for the intramural program.

"In the area of intramurals, we found 49-50 percent of students participated," said Raydon Robel, director of Recreational Services. "From this standpoint, we feel like we do reach large numbers of students. This high amount of participation led to the building of the Rec Complex and has now led to its expansion."

Although some students participated in unusual individual sports including wrist wrestling and bench pressing, Robel said traditional team sports had the greatest amount of participation.

Delta Sigma Phi wrestler Jeff Stock, sophomore in industrial engineering, tries to keep his shoulders off the mat during his first round match in the K-State Intramural Wrestling Tournament against the Pi Kappa Phis. Mike Springs, senior in mechanical engineering, won the match by pinning Stock.

"The highest degree of participation is in basketball, followed by softball and volleyball," Robel said. "If you look at high school athletics, both men's and women's basketball is usually the number one activity. This tradition is carried on at college."

Teams were composed of students in different living groups, and a point system was set up to determine overall winners.

"The point system is for everybody," Robel said. "It is good because it adds competition, which brings out the best in people. Unfortunately, competition can sometimes bring out the worst in people as well."

Jay Carpenter, junior in physical sciences and intramural participant, said a fine line existed between competitiveness and sportsmanship.

"During a game, you want to do anything you can to win, but you have to realize it is more important to remain a good sport," he said.

A member of the Marlatt Five team, Bill Smeed, senior in computer engineering, said although his team liked winning, they remained good sports when they lost.

*Continued on page 313*

# INTRAMURALS

*Continued from page 311*

"We wanted to have fun. We were not so wrapped up with winning) that we went crazy," Smeed said. "It was always tough to accept a loss, but we tried to remember why we were out there."

Practicing regularly, other teams played to win.

"Our house took the intramural sports pretty seriously," said Kingston Koser, junior in statistics and Sigma Chi's intramural chairman. "We practiced at least a couple of times a week before games."

Tau Kappa Epsilon, winners of 11 of the last 13 all-University Intramural Championships, practiced daily.

"We got real competitive and believed practicing was the key," Carpenter said. "It (winning) was something we were proud of and something our house was known for."

Students also officiated the competitions.

"We hire students to supervise and run the programs, as well as actually go onto the courts or fields and officiate,"

Robel said. "A lot of students enjoy this and many go on to be officials for the city's recreational program."

Working as officials provided the officiating students a deeper understanding of the games, Martini said.

"Officiating was a humbling experience for everybody," he said. "It had a direct effect on the level of competitiveness of play. The more competitive a program, the more important the officials are."

Students were competitive so officials held important roles.

"I believe the students at K-State expect quality officiated contests. We try to provide that," he said. "I don't think anybody can ever be satisfied completely with the officiating, regardless what level of play it is."

Even students who played just to have fun benefited.

"I would definitely encourage everyone to get involved in intramurals," Robel said. "It is a great way to stay active in sports, as well as have the opportunity to meet others. Intramural competitions provide students the opportunity to interact socially while carrying on their athletic skills."

# EXPECTATIONS

THE WILDCAT TRACK TEAMS ENTERED THE INDOOR SEASON PICKED TO FINISH SECOND AND THIRD IN THE BIG EIGHT, WHICH THEY ACCOMPLISHED BY SENDING FIVE TO NATIONALS

BY BREN WORKMAN

The men's and women's indoor track teams lived up to high pre-season expectations, despite an NCAA investigation sparked by former track coach John Capriotti's admission to paying student athletes.

"During the season, we pretty much dealt (with) it as a non-issue," interim coach Cliff Rovelto said. "We didn't have any control over the situation, but we did control the season's performances."

The performances were strong as men's and women's teams finished the season third and second at one of the season's highlights, the Big Eight Indoor Track and Field Championships. A Big Eight League coaches'

poll predicted the teams would finish in those exact places.

"I was very pleased with the team effort, as well as some great individual performances," Rovelto said.

Senior Thomas Randolph won the 55-meter dash in a time of 6.17 seconds. It was the country's second fastest time for the season.

"I wanted to do well for the team," Randolph said. "It was my senior year and I wanted to provide the leadership for the rest of the squad."

Randolph said the coaching staff drew good performances from the athletes.

"We had excellent trainers," Randolph said. "Coach Rovelto seemed to be over-loaded with work, but he always had time to assist the

athletes."

Randolph was one of four Wildcats to win events. Senior Anthony Williams set a new Big Eight record in winning the 1,000-meter run, sophomore Percell Gaskins won the high jump and freshman Travis Livingston won the 55-meter

Itai Margalit lets out a yell as he sails over the bar in the high jump. Margalit consistently jumped over 7 feet. He qualified for the NCAA meet and set records at K-State and at home in Israel. (Photo by Shane Keyser)

hurdles.

Junior Francis O'Neill finished third in the mile event and qualified for the NCAA Indoor Track and Field Meet. He said the professional atmosphere of the team was a factor for running successfully.

"I was happy with my performances," O'Neill said. "The energy of the team and the serious training helped me to achieve some of my best performances."

O'Neill said he enjoyed the 800-meter run because the event was over before the pain started. He ran the mile because he was a national contender in the event.

Other winning performances at the Big Eight Meet came from senior Gwen Wentland, who finished second in the high jump, fourth in the pentathlon and eighth in the

long jump.

"Gwen achieved quite a feat by returning from the pentathlon to finish second in the high jump," Rovelto said. "She set the American pentathlon high jump record, then came back the next day to high jump 6 feet. There's only about

13 women in the country who can jump 6 feet."

In other women's events, freshman Rahma Mateen finished second and senior Kathy Janicke third in the long jump. Sophomore Irma Betancourt finished third in the 800-meter run and senior Paulette Staats placed second in the 1,000-meter run. Also, senior Jennifer Hillier placed third in the 3,000-

meter run and the mile run, junior Nicole Green placed second in the 400-meter dash and freshman Linda Shea was second in the 600.

One notable name absent from the Big Eight Meet's rankings was freshman Itai Margalit, who high jumped 7'5" at the Husker Invitational in Lincoln, Neb. He had set and reset the record for four consecutive weekends.

On his final attempt in Lincoln, Margalit twisted his ankle. His 7'4" jump earlier in the season was an Ahearn Field House record, a K-State record and automatically qualified him for the NCAA Meet.

Margalit also broke his own Israeli national record, which he had set earlier in the season by jumping 7'5."

## BEYOND THE TRACK

Although indoor and outdoor track competitions had similarities, they also had differences.

"The difference is that outdoor track is more competitive because athletes have to run faster, be in better shape and are very serious," said Jared Storm, senior. "Outdoor track is also more prestigious."

However, Storm said the indoor track season prepared the runners for spring competition.

"I like indoor track better because I do better. But, outdoor track is just as great since we travel further and run against more competitive athletes," he said.

Storm liked it better because weather conditions weren't a concern and the competition was easier. However, he also enjoyed outdoor competition because of the motivation.

"The competition is a lot harder for outdoor track but travel is good. Indoor running is more physical because the track is smaller so the runners are closer physically," he said. "Personally, I have a better record for indoor track, but as a team, we run equally well in both indoor and outdoor track," he said.

Freshman Ed Broxterman knocks down a hurdle in the 55-meter hurdle preliminaries during the KSU/KU/MU triangular track meet. K-State won the meet for the fourth year in a row. Broxterman also placed third in the high jump. (Photo by Cary Conover)

## EXPECTATIONS

*continued from page 314*

"I had never competed in the U.S. before this season," Margalit said. "Now, to compete on this scale is great."

In addition to improving personally, Margalit said the whole team had the potential to be better.

"We have got mostly young guys right now, but we're going to be better in the next couple of years," he said.

Although his ankle injury kept him from achieving even greater heights, Margalit was one of only three K-State high jumpers who did well throughout the season. Gaskins and freshman Ed Broxterman also jumped more than 7 feet in the season.

The indoor track team sent five competitors to the NCAA meet in Indianapolis. Wentland represented the women's team in the high jump, while the men's team sent Margalit. Other competitors included Randolph in the 55-meter dash, O'Neill in the mile and Gaskins in the high jump.

Regardless of their placements, the students who qualified for the NCAA meet had already earned an honor.

"Only the best in the country get to that point," Rovelto said. "I'm very proud of our showing at that prestigious event."

*Providing energetic and indepth reports of the K-State Wildcats has become the life and the love of sports announcer Mitch Holthaus.*

---

**BIG. BIG. BIG. BIG. BIG. BIG.**

The voice of Mitch Holthaus rated K-State athletics with the term "big." With this one word, Holthaus also built his career as the Voice of the Wildcats.

Holthaus' repetition of the word "big" showed the success of the Wildcats' performance. When the team made a good play, Holthaus repeated "big" six times. On outstanding plays, the word was said 10 times for maximum emphasis.

Holthaus worked for the Wildcat network for 10 years and served as the Voice of the Wildcats for nine. Committed to K-State as an alumnus, Holthaus' love for the University began when he was young.

"I had a love affair with K-State since third grade when I attended my first game in Memorial Stadium," Holthaus said. "My dream was to be the Voice of the Wildcats."

Holthaus decided to chase this dream because his two other goals — to be the president of the United States or a K-State football player — made him realize his limitations. Although he was accepted by three law schools, Holthaus chose to pursue his career with K-State.

Holthaus, who has a degree in radio-television, stressed the importance of being prepared for radio broadcasts.

"My friends and foes would agree I am well prepared. I keep files on opponents in learning their trends and statistics," he said. "It (broadcasting) challenges me to be prepared in finding one thing that no one else knows to make my broadcast interesting and entertaining."

However, he emphasized the journalistic responsibility he had to remain objective.

"Although my voice gets excited when K-State does something good, I remain objective and even compliment the opponent," Holthaus said.

As Voice of the Wildcats, Holthaus established his radio persona and was a familiar voice to the Manhattan area.

"It's a responsibility to be well-known. I'm fortunate to have the opportunity. I'll approach it with the proper attitude of humility and gratefulness," Holthaus said. "Sure, I get a buzz from being well-known, but there is a conduct of responsibility I maintain because I represent K-State."

Since joining K-State, Holthaus had announced more than 700 games and never missed one because of an illness. He missed a football game in 1984, but only because he was announcing basketball in Hawaii. He also missed a 1992 basketball game because he was in Tokyo broadcasting football.

Holthaus' popularity was similar to the fame of Dev Nelson, former Voice of the Wildcats who died Jan. 16, 1993.

"Dev Nelson was the Voice of Wildcats emeritus, and he will hold that as long as K-State is an institution," Holthaus said. "He will be the standard to what all of us will be compared."

Although Holthaus received offers from the Chicago Cubs and Kansas City Royals, he remained at K-State.

"If there's an opportunity at a higher level, I would look at it. But, if this is all I do, I'll be satisfied," Holthaus said. "My ideal situation would be (to announce) at a national level but still broadcast for K-State."

# Reading, Writing and Rolling Dough

By Kim Mosier

Maintaining good grades, completing house duties and participating in extracurricular activities kept residents of scholarship houses busy.

Each of the scholarship houses stressed academics. To live in the houses, residents needed to maintain a certain grade point average. The minimum grade point averages were 2.7 for Smith Scholarship House, 2.5 for Alpha of Clovia and 3.0 for Smurthwaite House.

Residents of scholarship houses were also required to do housework. This included kitchen duty every other weekend and phone duty for 10 hours each semester. Through working together, residents formed friendships.

"Living here is more like a family than a dorm would be. I like the security of this environment," said Suzanne Edson, fresh-

man in business administration and Smurthwaite resident. "You really get to know everyone and their friends. This begins a chain, so you meet people of all interests."

Incoming freshmen at Smurthwaite were paired up with upperclassmen who became "big sisters."

"Similar to sororities having moms, we have big sisters," Edson said. "I get along well with my big sis. She was very helpful, especially the first few weeks of school."

The scholarship houses also sponsored social events.

"We have two dances each year: the barn dance in October and the Crystal Ball in the spring," said Grace Kriley, sophomore in dietetics. "There are events for holidays, and we try to do one activity a month."

## Dialing for Dinner

**M**aking its 100th jaunt to the dorm, the pizza delivery truck stopped in front of the residence hall. Unzipping the plastic shield that kept the pizza warm, the driver delivered the food to a hungry student. This scene was a common occurrence at residence halls.

Chris (not his real name), a Pizza Shuttle driver, said 35 percent of the restaurant's pizza deliveries went to residence halls. He said the eight delivery drivers each made about 14 stops to the halls every night.

Reasons for ordering out varied. Bobby Prichard, freshman in pre-veterinary medicine, said the amount of food offered in the dining centers wasn't enough to curb his appetite. He said the hours the food lines were open made a difference in his eating habits.

"I order out about three times a week and spend an extra \$15," Prichard said. "It seems like Derby

(Food Center) isn't open long enough, so I order food in the evenings."

However, some students said they spent too much money on meals that were delivered and had to face some angry parents.

"I order out three or four times a week and spend \$20-30," said Nancy Knostman, freshman in business administration. "My parents get mad, but I have a job and there's not much they can do about it."

Not all students spent money on fast food. Some ate the dining center meals and only ordered out when they could not get to the centers and when the food lines were closed.

"I order out once a week on Sunday nights because food is not served in the dining centers," said Brian Welch, freshman in engineering. "I eat there the rest of the time because I paid for it, and I don't want to spend the extra money."

Students leery about walking alone on campus late at night used the Haymaker Hall and Ford Hall escort service. In October, residents of the two halls worked together to provide the new campus service.

"We combined the two buildings in an effort to make the women feel more comfortable about using the service," said Jennifer Graves, freshman in pre-law and Ford Hall escort service chairperson. "Having two people escorting alleviates any questions or problems that may arise."

Ming Kirkpatrick, freshman in interior design, served as an escort from Ford. She said combining the service made women more likely to use it.

"There were some problems with guys hitting on the girls they were escorting," Kirkpatrick said. "Now there are two escorts for the students — one guy and one girl. This takes some of the uneasiness off the woman who is using the service."

Kirkpatrick said the escorts walked with students to campus or the parking lots.

"Students used it (the service) to go to late night classes or to the library. We walk them to and from their destination if they need it," Kirkpatrick said. "Sometimes we took them to their cars in the (parking) lots."

The service also made sure the escorts returned safely from their trips.

"Escorts were required to check in and out at their front desks. It was an added safety feature to make sure they returned OK," Graves said. "We also have escorts available for people who like to jog at night."

The service was available 24 hours a day.

"We get calls at any time of the day or night. When a Ford escort gets a call, she then calls one of the guys from Haymaker to meet in the lobby," Graves said. "He then accompanies us to the person's destination."

Residence halls offer

# DORM LIFE

more than room and board

By KIM MOSIER

Residence halls not only gave students a place to live, but also provided them a chance to meet others through social activities.

"The planning process usually begins with myself," said Sara Kearns, junior in English and Putnam Hall social chairperson. "I bring the idea up in our HGB (Hall Governing Board) meetings, and it's a group process from there. Often the ideas and themes come from a nearby holiday."

Themes for parties were often kept the same each year.

"Pimp and Prostitute is an annual party for us," said Michele Adams, sophomore in leisure studies and Moore Hall social chairperson. "This year it was not nearly as successful. There was a big controversy about the name in an HGB meeting. I feel this whole controversy took a toll on attendance."

Many of the events served to welcome students back to school.

"At the beginning of the semes-

ter we had Wacky Olympics and a picnic," said Angie Kimminau, sophomore in pre-veterinary medicine and Goodnow Hall social chairperson. "They were fun and everyone could act crazy."

Other social activities sponsored by the residence halls included skating, informative programs, semifinals and holiday celebrations.

"The social activities were planned to give people something to do," said Brenda Tipton, sophomore in social work and Ford Hall social chairperson. "You learn the dorms are a place to meet people and have fun."

Barn parties were the most popular.

"The barn party we had was great," Tipton said. "Even though it was a 15-mile drive, many people were there. I enjoyed seeing everyone have a good time, meeting people and coupling up."

Lower party attendance did not discourage social committees.

"Not too many of the parties or dances this year have been success-

ful," Adams said. "I feel like our semi-formal should be a success because we are trying to make it a big deal."

Some residence halls planned activities to relieve students' stress.

"An idea from a residence hall convention was the finals release," Kearns said. "It would include play dough and finger painting."

Besides being fun, some activities raised money for charity.

"For the Flint Hills Breadbasket food drive, we had people put in jail for 50 cents or a can of food," said Donna Duryee, sophomore in apparel and textile marketing and West Hall social chairperson.

The money and food items collected benefited the community.

"We're not just here to serve and help the college, but to serve the community of Manhattan as well," said Holly Pomeroy, sophomore in elementary education and Goodnow Hall activities chairperson. "We've done this through the food drive."

*"Pimp and Prostitute is an annual party for us.*

*This year it was not nearly as successful.*

*There was a big controversy about the name in an HGB meeting. I feel this whole controversy took a toll on attendance."*

Michele Adams

As Marc McCall, freshman in business administration, watches, Craig Allison, freshman in business administration, looks through a list of names. Once students' names were found, they were highlighted to indicate attendance at the Ford/Haymaker Barn Party. (Photo by Cary Conover)

## Getting Down and Dirty

By Shannon Yust

Muddybodies were everywhere as people slipped and fell in the pool of muck at the first Marlatt Hall Mud Volleyball Tournament Sept. 26. The fundraiser was sponsored by Marlatt Hall Governing Board.

"We didn't come up with the idea until we came back to school at the beginning of the semester," said Bruce Zook, junior in chemical engineering and tournament organizer. "Since greeks have their philanthropies, we wanted to donate money to an organization. We ended up donating \$75 to the Flint Hills Breadbasket."

Zook said organizing the tournament turned out to be more work than he expected. Since it was mud volleyball, a pit needed to be dug. However, dirt from the pit didn't turn into mud that could be used in the tournament.

"We ended up buying dirt. The dirt in the pit was clay, and it didn't make for good mud," Zook said. "It was virtually a swimming

pool. We spent a day and a half looking for dirt to fill the hole."

The tournament, open to the community, had a \$20 entry fee for each of the 29 participating teams. Cash prizes were given for first through fourth place, with \$50 as the grand prize.

Although organizers advertised the event, it lacked the amount of teams needed to play.

"We had 16 teams with less than a week to go," Zook said. "We had to extend the entry deadline, and we got 13 more teams the next week."

Although a lot of his time was spent organizing the tournament, Zook said the outcome made it worthwhile.

"We invited West Hall HGB (Hall Governing Board) to play before the tournament, and it ended up being a mud fight," Zook said. "I wouldn't organize it (the tournament) again, but I would love to help. It was a great time."

# Working All Night Long

By Stephanie Hoelzel

Hired to help keep the residence halls running smoothly, front desk workers gave out information, advice and phone numbers to hall members and non-members.

Jenny Watson, sophomore in business administration and Goodnow Hall desk worker, said students came to the front desk for many reasons.

"They can call and get phone numbers from us. We also check out cooking and sporting-equipment, tools and study rooms," Watson said.

Desk workers also performed various odd jobs for the residence halls.

"Sometimes we entered hall rosters into the log book," she said. "We also took calls from people wanting to know more about the hall."

Angie Baker, sophomore in pre-nursing, worked at the Strong Complex's front desk.

"I've seen many people come

in after a night in Aggieville," she said. "Sometimes they are so drunk, they have trouble getting through the door. They're loud, but not rude or belligerent."

The workers could fit their jobs around their schedules.

"The longer you have worked, the better your hours will be," Watson said. "Students who have been here the longest get seniority over the others."

Access to the residence halls was closely monitored, since most halls had the valadine system. The system was turned on at night and kept out people who didn't have an access card.

"We didn't have too many problems with people sneaking in who didn't belong," said Kristel Jackson, senior in interior design and Moore front desk worker. "Sometimes people would come in with groups of residents. I could usually tell if they didn't belong."

Workers essential for smooth

# SERVING IT UP

operation of dining service

BY SHANNON YUST

**S**ome students didn't just eat at campus dining centers. Over 400 students were employed by Housing and Dining Services to work as line servers, dishwashers, cooks and supervisors.

"It (my job) is a big commitment, but worth it," said Christine Bagby, freshman in secondary education and Derby Food Center worker. "It's my only source of income."

Bagby enjoyed working in Derby's A-line, which only served student athletes.

"I have worked on other lines, but I would much rather work on A-line. They (the athletes) respect me more than the average person because I know them personally," Bagby said. "I now have 99 personal bodyguards around campus."

Other workers may not have had bodyguards, but they did spend 20-30 hours per week watching over

other student employees.

"We work with student employees and make sure positions are filled for breakfast, lunch and dinner. We also deal with customer complaints," said Gary Manly, senior in sociology and student supervisor at Kramer Food Center. "We are the go between for the civil service workers and our boss."

Leigh Ann Cunningham, junior in family life and human development, said her job at Derby was convenient.

"I live at Ford, and I don't have to drive or walk anywhere," Cunningham said. "I like my hours. They work with me. My boss has even been known to fill in for me if I cannot find a substitute."

But a job as a cafeteria worker was not always easy. Manly said his job was more difficult than working as a waiter at a restaurant because the cafeteria served more people.

"As a waiter, you provide services for a few people at a time, whereas you deal with 1,500 people at Derby," Manly said. "We are busting our butts for these people. Sometimes we do not fix the food as we intended, but I want people to appreciate what we do."

Student supervisors prepared line workers for students' complaints about the food.

"We try to make recommendations. If our employees don't know what something tastes like, then we have them try it," Cunningham said. "If they stand there and recommend Burger King, then they are pulled aside and asked not to criticize the food."

Despite the complaints, Cunningham enjoyed his job.

"The money's good, and the people are friendly," Cunningham said. "Why would I want to go anywhere else?"

*"We are busting our butts for these people. Sometimes we do not fix the food as we intended, but I want people to appreciate what we do."*

# Here for the Holidays

By Shannon Yust

Suitcases were dragged from underneath beds, clothes were packed, windows were closed and refrigerated food was thrown away as students prepared to leave the residence halls for the holidays. But not all students headed home.

"I was asked by several people to go home with them," said Catherine Joyce, freshman in environmental design and Ford Hall resident. "Well, if you don't have anywhere to go, come home with me," they would say. I decided to go home with a friend who lives in Kansas City, so I didn't have to stay in Manhattan."

Because her hometown was in Queenstown, Md., Joyce was unable to travel home for Thanksgiving due to the distance. She said her parents took a vacation without her.

"I called home to tell my parents where I was going to be. They went to New York City over the holidays," Joyce said. "They were going sightseeing and to the Macy's parade. I've been bugging my parents for years to go to New York City,

and since I wasn't home, I felt left out. They said, 'Well, look for us on TV if you can.'"

Rob Tope, freshmen in pre-veterinary medicine and Haymaker Hall resident, worked in Manhattan during Thanksgiving break. Besides missing out on a Thanksgiving celebration, he also had his birthday during break.

"When everyone left, it felt weird," Tope said. "It was quiet because I was the last one to leave."

Since the residence halls closed over the holidays, Tope moved out of his dorm room and into a friend's apartment.

"I didn't like having to move out of the dorm. The dorm felt like home," Tope said. "It had meaning, and moving out felt like I was moving away."

Sharmeen Irani, freshman in food science and industry, was unable to return to her home in Bombay, India. She said she didn't mind staying in Manhattan during the holidays.

"It (staying in Manhattan) wasn't so bad. America is a new

place for me — a totally different culture," Irani said. "There are so many exciting things that we didn't have back home."

With her home more than 8,000 miles away, Irani said there was no way she had enough time to get there.

"By the time I would have gotten there, I'd say, 'Hi, mom.' Then, I'd have to get back on the plane for school," she said.

But Irani didn't spend her break alone. She was invited to her roommate's house in Overland Park, where she participated in the American holiday for the first time.

Although she was occasionally homesick, Irani traveled to Dallas, Texas, to stay with her relatives during winter break.

"I wouldn't mind staying here (the United States) again over the holidays as long as I am going around visiting America," Irani said. "My parents wanted me to come home for Christmas, but no way am I going back. I'm having too much fun."

# Twenty-Four Hour Job

By Staci Cranwell

Staff assistant. Although it didn't sound like a tough job, students who filled the position faced numerous challenges. They had more to do than simply locking the doors to the residence halls at night and keeping the residents on their floor under control.

Wendy Vincent, senior in speech, was a staff member in Ford Hall for three semesters. She became interested in the job after living in Ford.

"I wanted to be in a leadership position," Vincent said. "By being a staff assistant, I felt I could help freshmen adjust to college life and to K-State."

Matt Baker, senior in psychology and staff assistant in Haymaker Hall, also liked his job because it brought him in contact with people.

"It's a good job because you get to work with people," Baker said. "The benefits of having your room and board paid is also nice, but the main emphasis is on people."

The staff assistants within the

residence halls fulfilled many roles such as counselor, mediator, disciplinarian, campus reference, maintenance person and friend. Despite the job training they received, staff assistants faced situations they hadn't anticipated.

"It seems funny now, but at the time it really wasn't," Baker said, referring to an unexpected crisis. "We had a toilet that wouldn't quit running, so I turned the knob to shut off the pipe. Instead of the water shutting off, suddenly I had 30 pounds of water pressure coming out of the toilet. Before we finally got the water shut off, the toilet had flooded five rooms and leaked through to the laundry room. Other than that, I haven't had any major crises."

Besides maintenance problems, staff assistants often dealt with crises involving their residents, including the death of family or friends, rape, depression and suicide.

"I didn't ever expect to have to deal with two suicide attempts.

It's something you hear about, but it's not something you think you'll end up handling," Vincent said. "Working with these individuals afterwards is a touchy situation because you never know how they are going to react to everything that has happened. On top of that, I have to keep the floor (members) together and in harmony."

All students who applied to become a staff assistant had to take the Guidance for the Paraprofessional class, have lived in the residence hall for at least two semesters and have a minimum grade point average of 2.25.

"They prepare you for so much that you think there isn't anything they could have missed in the class," said Carey Moss, senior in fisheries and wildlife biology and Moore staff assistant. "However, they don't teach you about feelings. They teach you how to confront people, but they don't tell you how that person will react."

# Rain Doesn't Dampen Spirits

The rain didn't keep the Flint Hills Breadbasket from soaking up \$1,000 worth of donations from the men of Acacia.

Although the second day of Acacia's Kickball Classic was called off due to a late September shower, the final games were played a month later.

Ten men's teams and 12 women's teams participated in the double elimination tournament at the Chester E. Peters Recreation Complex. The Alpha Tau Omegas and the Delta Delta Deltas won the third annual event with the Phi Gamma Deltas and Kappa Alpha Thetas placing second.

Manhattan's homeless benefited from the tournament. Money raised from T-shirt sales and donations helped fund the Flint Hills Breadbasket's Thanksgiving and Christmas food drives.

Brian Day, junior in accounting and Acacia philanthropy chairman, said members of Acacia enjoyed sponsoring the kickball tournament

because it was a unique event.

The fraternity didn't have their own team in the tournament, but they participated by coaching and officiating other teams.

"Everyone really got into coaching the teams," said Jason Haremza, freshman in chemical science. "We were all competitive — but it was all in fun. It was a very worthwhile cause."

Three men were in charge of coaching each sorority, and one member coached each men's team. Matthew Ohm, freshmen in elementary education, organized a practice for the Gamma Phi team he coached.

"We kicked balls around during the practice," said Ohm. "Surprisingly, the women were a lot more competitive than the men."

The Acacias also tried to have at least two officials at each game.

"We had a great time," Haremza said. "We joked around a lot over the calls and yelled in each other's faces."

Edna Rush became a member of Alpha Chi Omega without ever going through rush. She was initiated into the sorority 11 years after she took the position of housemom.

"The national president of Alpha Chi visited the K-State chapter last November," said Barb Shideler, senior in psychology. "She thought Rush should be initiated because of her hard work."

Despite everything Rush contributed to Alpha Chi, she never expected to become a member.

"It was a shock when I received a letter from the Alpha Chi nationals announcing my initiation. I had no more than read it when the chapter adviser called and asked if I had gotten any mail," Rush said. "It was a proud day."

Alpha Chi members were glad Rush was initiated.

"Initiating her is our way of saying thank you for all she has done for us," said Carrie McVay,

junior in pre-law.

As a full member, Rush was allowed to wear an active pin, attend chapter meetings and share all of the rights and privileges of an active member. Rush did not attend chapter meetings regularly because she didn't want to interfere.

"I don't sit in on them because I want to keep the relationship the same," Rush said. "I'm afraid the girls may not express some of their opinions if I was there. I do want to sit in a night or two during rush to see how it works."

Despite her involvement with the sorority, Rush also managed to be involved in the community. She was active in the senior citizens' center and was recognized as one of the top 10 citizens of Manhattan in 1991. She was also on the house corporation board, made up of Alpha Chi alumnae who handle house maintenance.

"I feel more a part of things now," Rush said. "It's as if two halves were made a whole."

# Playboys Benefit Cystic Fibrosis

By Kimberly Wishart

Playboys, a soccer tournament and Twister games helped the Alpha Chi Omega sorority raise money for their philanthropies.

They started off the year by selling T-shirts with the Delta Upsilon fraternity at the Ed Chartrand Memorial Soccer Tournament Oct. 24-25.

"The tournament is held as a forum of competition for the Big Eight soccer teams and has been played since 1980," said Angela Schwerdtfeger, junior in journalism and mass communications.

"1992 was the first year for the partnership of the tournament and the Heart of America chapter of Cystic Fibrosis," Schwerdtfeger said.

The tournament was brought back to Manhattan after it took place for several years in Kansas City, Mo.

"We're looking forward to making the soccer tournament an annual tournament with the DUs," Schwerdtfeger said.

The Alpha Chis also helped the Theta Xis develop their new philanthropy, Twister Mania. The event took place March 7. The proceeds were donated to Big Brothers/Big Sisters of Manhattan.

Another Alpha Chi philanthropy was Greek Playboy. In the fall of 1990, the sorority raised \$6,354 for Cystic Fibrosis, making it the largest fundraiser among K-State sororities.

"We were unable to do it last year, but we're very excited to bring it back," Schwerdtfeger said. "We plan on having it every year now."

The event included fraternity men modeling two outfits, having an interview and posing for a poster. The fundraiser took place April 16 at the Wareham Hotel.

"I think it's so successful because it involves everybody. The fraternities participated by modeling, and the sorority members were judges," said Jen Arnold, senior in early childhood education.

# Hit, Run, Score for Charity

By Trina Holmes

Alpha Delta Pi sorority members used water guns, posters, donuts and orange juice to get teams fired up to participate in their philanthropy, Softball Classic, on Sept. 13.

The games started at 8 a.m. and lasted until the final match was completed at 9 p.m. The Kites team triumphed over Mental Errors, but the Ronald McDonald House in Topeka was the real winner.

More than \$3,400 was given to the charity, which relied on donations to help families with terminally ill children pay for their stay at the house.

"The Softball Classic was a neat way to get women involved and a fun way for all to participate," said Jennifer Smith, junior in English. "It was a good way for the players to participate in one of their favorite past times and raise money in the process."

Besides money, the women also donated their time to make

repairs on the Topeka house.

"Our philanthropy is especially good for a sorority because a couple of times each year we go to the Ronald McDonald House in Topeka to paint and clean it," said Mindy Rawdon, sophomore in elementary education. "We also donate toys, silverware and appliances. It's a great opportunity to do more than something here. We got to see what goes on and help out."

The ADPis agreed their philanthropy was worthwhile. One member who was supportive of the philanthropy also understood the need for Ronald McDonald Houses.

"It was really great knowing our philanthropy helped the Ronald McDonald House," said Renelle Everett, freshman in business administration. "When my cousin broke his neck, my aunt and uncle and their family stayed there. They talked highly about it."

Alpha Gamma Rho and Pi Kappa Alpha welcomed students back to school with a Beach Bash. However, the event that took place at Tuttle Creek Reservoir was not a party, but the AGR philanthropy.

Beach Bash was an event allowing students to let off steam before school started. Participants competed in a variety of events, including tug of war, an inner tube race, a bucket brigade and volleyball tournament. New events included an obstacle course, canoe relay and horseshoe games. Also, a Beauty and the Beast program took place at Snookie's Bar in the evening. A member from each participating sorority modeled swimsuits and evening wear and danced for 30 seconds.

Todd Johnson, junior in agrribusiness and president of AGR, said the fraternities wanted to use Tuttle Creek before the weather turned cold.

Kurt Harrison, senior in

marketing and philanthropy chairman, said officials at Tuttle Creek were glad the event brought people to the lake. He said nearly 1,000 people attended the non-alcoholic event.

The AGRs also helped build the sand volleyball courts, an item Tuttle Creek officials had wanted built in the lake area.

Joe Miller, senior in agricultural journalism, said he appreciated the participation of the other greek houses. The large turnout raised about \$1,700 for Manhattan's Big Brothers/Big Sisters program.

Johnson said the event was worthwhile because it helped the community. A past president had the idea to have the philanthropy at the lake because it hadn't been done before. The Pikes had a similar idea at the same time, so the fraternities teamed up.

Miller said the joint effort was profitable.

"We're glad to see that it has been such a success," Miller said.

Alpha Kappa Lambda and Sigma Sigma Sigma paired up to present Greek Gladiators, a spin-off from the "American Gladiators" television show.

The AKLs decided to join the Tri Sigmas because they wanted to participate in a philanthropy.

"They (the Tri Sigmas) offered us the opportunity to join them in their philanthropy," said Dan Rice, senior in journalism and mass communications. "We've been wanting to get involved in one for some time, so when they offered it to us, we accepted."

AKL members said it was difficult to find an interesting philanthropy to participate in.

"We wanted something that would be different than all of the others. We'd been brainstorming for a while when the Tri Sigmas approached us," said Dan Brungardt, senior in journalism and mass communications and AKL president. "It's hard to find a

niche when there are so many other philanthropies out there."

Participating in a philanthropy gave the AKLs a chance to give something back to the community.

"Greek Gladiators gave us the opportunity to contribute to the nationally chosen philanthropy," Brungardt said. "We are glad that the Tri Sigs gave us the chance to work with them."

The AKLs were also involved in other service projects.

"Before the children are assigned to their big brother or big sister, we have an activity day," Brungardt said. "We play games, barbecue and have a good time with them."

Greek Affairs helped the AKLs become active in the Big Brothers/Big Sisters activity day.

"We talked to people in Greek Affairs. They gave us information on Big Brothers/Big Sisters, and we wrote to them and got put on their mailing list," Brungardt said. "Then we decided to have the activity day for the children."

Striving for awareness

# BLACK GREEKS

and acceptance in the community

BY SCOTT OBERKROM

**B**lack greeks concentrated on serving the community.

"Black greeks strive to uplift the entire human race," said Carlotte Moore, senior in social work and Zeta Phi Beta sorority member. "But black greeks are serving their own race as well."

A member of Alpha Phi Alpha, Jayson Strickland, junior in elementary education, said his fraternity conducted many events to benefit the community.

"You realize it (serving the community) is a lifelong commitment," Strickland said. "We have more of a community service base. We do a lot more than just Step (Neak Frasty Step Show)."

The Alpha Phi Alphas were involved with continuing education programs, such as tutoring 10-12 middle school students and taking them to campus activities.

"We take them to the vet school (College of Veterinary Medicine) and to the radio station to see what goes on," Strickland said. "We have a brother who works there (the radio station)."

The Alpha Phi Alphas also worked with the Boy Scouts of America and Project Alpha, an effort to educate males about their

role in preventing teenage pregnancy.

Moore said when the black greek system first formed, emphasis was on the fraternities and sororities serving as support systems.

"When racism was high, black students needed a community for support," Moore said. "Black fraternities and sororities could provide that support."

Some members joined to help with the philanthropic endeavors.

"It was a way for me to get involved with community service and meet people," said Vanda Morrow, senior in marketing and Delta Sigma Theta sorority member.

Some aspects of the black greek system varied from the other campus greek system. The black greeks had an affiliation process, known as an "intake process," which was different than other greek houses that participated in "rush."

"We (black greeks) send letters and put up posters to notify others of our informational meetings," Moore said.

Although requirements varied with each fraternity and sorority, applicants generally needed a minimum grade point average of 2.5. They also needed to receive a recommendation

from a member of the fraternity or sorority and have participated in an interview.

The size of a black greek fraternity or sorority was between three to 15 members. The small size was the main reason they did not live together in their own fraternity or sorority house.

"We generally live with other brothers, but we never know how many members we will have next year," Strickland said.

Since they lacked a house, Moore said black greeks had their meetings at a member's house or at the K-State Union. Strickland said a house would be beneficial for the organizations because it would provide a place for meetings and social functions.

Despite not living with members of her sorority, Moore said the members remained close. She also said her sorority maintained strong ties with their regional and national offices.

"There is a member at-large. She is an undergraduate student who acts as a liaison between national and local chapters," Moore said. "We have state, regional and national meetings regularly. We get together to discuss business and meet other members."

*"Black greeks strive to uplift the entire human race. But black greeks are serving their own race as well."*

# Sounds of Thunder

Voices and footsteps echoed through Ahearn Field House as groups performed their step routines in the Neak Frasty Step Show Nov. 13. Groups traveled from Missouri and Kansas to participate in Alpha Phi Alpha fraternity's fundraiser.

"We had more groups participate this year," said Jayson Strickland, junior in elementary education and step show coordinator. "We like to invite all black greeks from the surrounding states to step. It's up to them whether they come or not."

The step show brought fraternity and sorority members together.

"The show gave members a chance to travel and visit each other," Strickland said. "Sometimes they need an excuse to get together. The step show is that excuse, plus it allows them to show their fraternity or sorority's spirit."

Over 1,000 spectators watched Neak Frasty, which raised more than \$4,000. The money will be used to fund scholarships for high

school and college students.

"We will award three \$250 scholarships to high school students and one \$250 scholarship to a college student," Strickland said. "We will award the scholarships to the recipients during the candlelight ceremony."

Kappa Alpha Theta and Delta Upsilon also participated in the step show.

"It was our first year. We wanted to experience something new, so we decided to try the step show," said Jeff Peebler, senior in pre-physical therapy and DU member.

In the men's competition, Kappa Alpha Psi members from Central Missouri State University won the first place trophy and a \$400 prize.

K-State's Delta Sigma Theta sorority won first place in the women's competition by edging out last year's winners, Alpha Kappa Alpha. They also received \$400 and a trophy.

"The step show has definitely gained in popularity," Strickland said. "We hope to have another one next year."

Using a hot branding iron, members of Omega Psi Phi burned willing members with the symbol of their fraternity.

"I had it done about a year ago," said Reggie Blackwell, junior in journalism and mass communications. "It stung a little, but it didn't hurt too bad."

Branding members wasn't an Omega Psi Phi tradition, but after being initiated, many of the new members wanted brands.

"I had it done shortly after I was initiated last year," said Michael Graham, junior in secondary education. "I wanted something that showed how serious I was

about being a member."

Members chose to brand themselves out of respect for their fraternity.

"I did it (branding) because it has a symbolic meaning to me," Blackwell said. "Each individual derives his own meaning out of it."

Although the branding was not required, members had it done to show pride.

"I wanted a brand because it was a symbol of my pride in the fraternity," Graham said. "No one made me do it. It was my choice alone. It's not a question of tradition, but choice."

# ATOs Help Combat Cancer

Camouflage-clad combatants fired at one another with paintballs in a local field.

The shooting took place Sept. 26-27 in the Alpha Tau Omega Paintball Tournament at Crazy Kris's Paintball Supplies, where 24 six-member teams participated in the philanthropy.

Dave Ratzlaff, senior in interior design, said it took about four months to plan and prepare for the event.

"We had 24 teams participate in the tournament. We had to make sure there were enough guns and paintballs for everyone," he said. "We also had to make sure we were released from liabilities."

Team members were required to read and sign liability release forms for both Crazy Kris's and ATO.

"We drafted our own liability form off the one that Crazy Kris's supplied," Ratzlaff said. "Then we had a lawyer look it over to

make sure everything was in order and legal."

Teams participated in rounds until they won and advanced to the next round in their division.

To win a round, a team had to capture the other team's flag and carry it safely into their opponents' backfield.

"The Tri-Delts easily won the women's division," said Jamie Buster, junior in journalism and mass communications. "They beat their opponents in less than two minutes in each of their games."

Ratzlaff said organizing a paintball tournament was not easy.

"It was a lot of work. Our philanthropy was pretty complex," he said. "We organized everything including food and paintball sales and the awards ceremony."

The tournament raised more than \$500, which was donated in memory of Stanley L. Winter to the Center for Basic Cancer Research.

Gathering together for a week of competition, fraternities competed in the Alpha Xi Delta Greek Games, a philanthropy benefiting the American Lung Association. This year, the Alpha Xis wanted their proceeds to specifically go toward children's research.

"Our national fraternity decided that children were going to be our focus. We'll keep giving to the American Lung Association, but we'll ask that it goes to help children," said Jennifer Butner, junior in apparel and textile marketing. "The focus on children makes it a lot easier to find other things to give to."

Eighteen fraternities participated in the event. The week started with a showcasing of chests. One member from each of the competing fraternities was chosen by his house to have a picture of his chest taken. The photos were displayed in the K-State

Union, and people voted on the chests by donating money. The pictures raised more than \$1,800 for charity.

"I think we get a lot of positive response from the contest. The fraternities have started looking forward to it," said Carla Van Nostran, senior in radio television. "They have stopped looking for the best chests, and we have been getting a lot of beer guts. It gets a lot of laughs in the Union."

The members of Alpha Xi also had the chance to try their hand at coaching games including volleyball, tug of war, horseshoes and tricycle races.

"At first I thought it would be a lot harder than it really was. It also turned out to be a lot more fun," said Kristine Lincon, junior in English. "We had a good time teaching them the dance steps for the lip syncing contest and helping them with costumes. It was just a lot of fun."

Like father, like son. Chad Jackson, senior in elementary education, and his father, David, a 1968 graduate in horticulture, both served as presidents — one of the Beta Sigma Psi fraternity and the other of the national chapter.

While his son served as the K-State chapter's president, David was elected national president in October after serving as vice president for two years.

Chad said his father donated money and became actively involved in the house after Chad joined three years ago.

"He became involved by showing support and coming to more events since I was here," Chadsaid. "In addition, he comes to Homecoming and alumni meetings a couple times a semester."

Chad said his father's national position was beneficial for the K-State chapter.

"Him serving as national president is a benefit to the house because we have a direct line to

him in the Warrensburg, Mo., national headquarters," Chadsaid.

Besides leading national executive council meetings, David set goals to increase membership in the fraternity.

"Since national fraternities are on a decline, especially a decline in membership the last 10 years, I hope to turn that around and grow by 12 chapters in the next six years by colonizing or starting new chapters," he said.

While Chad was proud of his father, he said being the son of the national president had one disadvantage.

"It puts a lot of pressure on me to succeed because things have changed in the fraternity and the greek system since he has been here," Chad said. "I know some of the old ways of doing things through him, so I draw on his knowledge to use the best of both worlds."

"Because he's national president, I'm expected to do things right without question. Sometimes it's

difficult in the house because my father's expectations are different from the guys' expectations in the fraternity. I was raised to believe certain things by my father, but it is difficult since I know and hear what the guys want."

Despite the problem of trying to please both his father and fraternity brothers, Chad said serving as president was worthwhile.

"As fraternity president, the job entails showing a bit more maturity and more responsibility than any other office I've held. Above all, (the position requires) enthusiasm for school and the fraternity," Chad said. "It's been a challenging experience keeping on top of my classes and other activities. Twenty-four hours a day, every day, the ultimate responsibility is with the president."

David agreed.

"I sacrifice my time and a lot of money comes out of my pocket," he said, "but I'm committed to serving as president because it makes a difference."

The Beta Theta Pis blew up an inflatable Budweiser beer can to mark the beginning of their philanthropic volleyball tournament, Spiketacular, Sept. 11-12. Although the wind caused their sponsor's balloon to become unanchored, fraternity members said the money raised for charity made the hassles worthwhile.

"We raised over \$4,000 for the Manhattan Youth Center," said Rob Ames, junior in animal sciences and industry. "We wish we could have raised more, but we were happy we could do some good."

The Betas provided support by coaching teams and purchasing donuts for them on the first day of the tournament. The Betas also took the winning teams out to celebrate.

Alpha Tau Omega took first place in the men's division, and

Alpha Chi Omega captured first place in the women's division. Organizers said the tournament was not just a competition between greek houses, but a bonding experience.

"The best part of Spiketacular was the way it brought everyone together at the beginning of the year," said Brian Ward, sophomore in pre-optometry.

However, the Betas spent a lot of time preparing for it. Last spring, the Betas found sponsors and sold T-shirts. Coordination between the teams, coaches and referees also went into the tournament's planning.

"In the past, we had problems with some of the calls referees made," Ward said. "This year, we were able to get more professional ones. The tournament ran smoothly."

The Chi Omegas and the Sigma Nus sponsored the 1992 Pledge Olympics on Sept. 27, with 22 fraternities and all but one sorority participating. All proceeds were donated to the American Red Cross.

Mandy Hanson, junior in journalism and mass communications and philanthropy chairperson, said the 1992 Pledge Olympics raised an estimated \$3,000 through entry fees. The proceeds were used by the Red Cross to help disaster victims and others needing help.

"The American Red Cross helps so many people — whoever is in need, they try to help," said Shanna Robben, senior in secondary education. "The proceeds went to Hurricane Andrew victims."

Pledges from the houses competed in contests including running events, tug of war, a softball throw, a broomstick toss and Simon Says.

Members from Chi Omega began working with Sigma Nu

members during the spring to set a date for the event, order T-shirts and contact a radio station to cover the event. Members divided into committees so everyone could contribute ideas.

Gamma Phi Beta pledges took first place in the sorority division and Delta Upsilon won in the fraternity division. Both houses received trophies, and individual event winners received compact discs, gift certificates and T-shirts.

The Chi O's didn't compete because they had to make sure the competitions ran smoothly.

"It was a cool fundraiser because we worked with other people instead of just doing something by ourselves," said Kristen Laughlin, freshman in elementary education.

Chi O members said their philanthropy also served as a bonding experience for the pledges who participated.

"Everyone seemed to have good time. It was a spirited day," said Shannon Voelker, freshman in pre-physical therapy.

“ The best part about being in a new fraternity is being able to start from ground zero and build up. The things we do now will be traditions for the fraternity for its life on this campus. ”

— Jason Winfield  
freshman in business administration

At the Delta Chi-Kappa Delta bowling night, Trice Alford, sophomore in journalism and mass communications, receives praise from his teammates after bowling a strike at the K-State Union. The fraternity re-entered the greek system after 14 years of absence on the campus. Although 150 men expressed interest in joining Delta Chi, only 87 became members. (Photo by Mike Welchans)

Delta Chi members dance the night away with their dates at their first winter formal at the Wareham Opera House. Since the chapter did not have a house, the members held their regular meetings in Union 211, they found it hard to get to know everyone. (Photo by Mike Welchans)

## Delta Chi fraternity returns

# THEY'RE BACK

to campus after 14 years absence

BY TRINA HOLMES

**F**liers, newspaper ads, telephone calls, meetings and footwork marked Delta Chi fraternity's re-entrance into the greek system after 14 years of absence.

The fraternity chapter was disbanded in 1978 due to low membership and financial instability. Delta Chi members said negative portrayal of fraternity life in the media was also detrimental to the house's survival.

"The '60s and '70s weren't kind to fraternities," said Scott Leigh, senior leadership consultant from Delta Chi headquarters. "For instance, 'Animal House' was a hilarious movie, but it did nothing for us — we didn't drive motorcycles through houses or destroy the campus. People got turned off of fraternities from that movie."

Delta Chi placed emphasis on the traditional aspects of the order, rather than the social aspects, and 150 men expressed interest in joining the fraternity. Out of these men, 87 were asked to become associate members.

"When a Delta Chi chapter starts out, we have a four-fold obligation to meet when looking for members: to promote friendship, develop character, advance justice and assist in the acquisition of a sound education," Leigh said. "We

send out mass mailings and invite people to come and see what we're doing. We don't start by talking about all the parties we can have or the sorority women we can date. We talk about responsibilities first and privileges second. We want to establish something that we can be proud of — not an Animal House."

Associate members also felt the need to change the stigma attached to greek life.

"I had been through parts of rush, but I didn't like a lot of what I saw," said Jeff Schutzler, sophomore in environmental design. "I wanted to be a founding father and try to change things."

However, Schutzler said starting a fraternity was not all fun and games.

"It's a lot of hard work. We all have to take up the slack," he said. "When one of us doesn't do his job, the whole group is affected. We are still trying to establish ourselves and present a positive image."

One member of Delta Chi had been initiated at Southwest Missouri State, but said he was hesitant to suggest policy changes that would make K-State's chapter similar to Southwest's.

"I don't want to make this another Southwest Missouri State chapter," said Brian Foxworthy, senior in architecture and Delta

Chi sergeant-at-arms. "I try to let the guys make their own decisions so they make it their own chapter."

On top of administrative problems, the fraternity faced a housing problem — they had no house. However they were hoping to have a house built within two years.

"We meet in room 211 in the Union. It's an informal atmosphere, so it's just not the same as holding a chapter meeting under the coat of arms in a fraternity house environment," said Mark Page, sophomore in business administration and Delta Chi charter president. "It's also hard to get to know everyone because we don't live together. It's especially hard for me because I'm the president. I feel bad when guys say 'Hi' and I don't know their names."

However, Page said the opportunities derived from being a founding father made the work worthwhile.

"Founding fathers are viewed differently than ordinary associate members. The rules are different because they have most of the rights of actives," Page said. "It's (being a founding father) a great opportunity. We're able to create a fraternity rather than join one that's already in existence. We don't have to go with the flow; we get to have our own input and create bylaws."

*"We don't start by talking about all the parties we can have or the sorority women we can date. We talk about responsibilities first and privileges second. We want to establish something that we can be proud of — not an Animal House."*

Scott Leigh

Reaching to make the high notes, Delta Chi members Greg Vossenkemper, junior in agricultural engineering, and Pat Titsworth, junior in agricultural economics, practice the Christmas carols they were going to sing for the sororities. All of the men who were initiated were considered founding fathers rather than pledges, so they had most of the rights of active members. (Photo by Mike Welchhans)

Locking members of 26 fraternities and sororities in the Last Chance Restaurant and Saloon helped the Delta Delta Delta sorority raise money for children's cancer research at Saint Jude's Hospital. On Sept. 25, the annual Tri-Delt philanthropy, Jail-n-Bail, raised more than \$3,000.

The participating greek houses each chose a member to be locked up. During the day, entertainment was provided through games, a dunking booth and a karyoke machine.

"I think our philanthropy went well this year," said Jenni Smith, junior in chemical engineering. "More houses participated. Therefore, more people came down to see their members. With the increased support, more money was raised. Also, this year our house seemed more involved and enthusiastic."

The event's planning and organizing started before the semester began.

"In June or July, plans for T-shirt designs were started," said Jaime Jacobs, junior in elementary education. "The remainder of the plans were completed at the first of the semester."

Money was raised through a \$55 entry fee and a \$1 donation at the door.

"We had a great turnout this year, and everyone had a good time," said Laura Howard, sophomore in secondary education. "We made a lot of money just off the donations at the door. It seemed like people really cared because they were willing to come and give to a good cause."

The women in the house also helped children in other ways besides Jail-n-Bail.

"Around Easter time, we send coloring books and crayons to the children at Saint Jude's Hospital," Jacobs said. "Also, any of the donations that we receive from the alumnae are sent for research as well."

By sending letters to Delta Sigma Phi fraternity chapters across the nation, Brian Artzer, sophomore in electrical engineering, organized the Delta Sig's annual softball tournament.

The philanthropy, benefiting the March of Dimes, involved 15-20 chapter teams from states as far as Pennsylvania, Louisiana and Michigan, as well as alumni teams. The state-wide trek was too far for some alumni, but the tournament had regular participants.

"Our house team participates and so does our alumni team," Artzer said. "Also, chapter and alumni teams from the University of Missouri and the University of Colorado always come."

Local fraternity members said the interaction they had with other chapters across the nation was an educational experience.

"Our philanthropy is beneficial for our fraternity because we get to know other Delta Sigs," said

Corey Long, senior in physical education. "We get to meet people with common interests from across the United States. We share stories and experiences; it's a real brotherhood-building experience."

The Delta Sigs also adopted an additional philanthropy. During the Children's Festival at the Manhattan Town Center, the fraternity had an Ident-a-Kid booth. In conjunction with the Riley County Police Department, children were fingerprinted and videotaped during the first weekend of February. The children's parents were given a videotape and a card containing their child's fingerprints.

"We videotape the child's characteristics like how they walk, what they look like, their traits and any birthmarks," Artzer said. "Parents should bring their children back every two to three years. This should help identify the children if they ever get lost or kidnapped."

People didn't have to open their pocketbooks to support the Delta Tau Delta philanthropy. All that was needed was their blood.

For the past four years, Delts collected blood for the American Red Cross. A blood drive was held each semester in rooms K, S and U at the K-State Union.

"We supply 75 percent of the blood supply for Kansas and Oklahoma each year for the American Red Cross," said David Ridder, junior in finance. "The best part of the philanthropy is the knowledge we are helping others throughout the area in such a positive manner."

The Delts sponsored the blood drive with help from Lafene Health Center and the American Red Cross. Besides donating blood, students also served as volunteers. Their duties included taking blood pressures, checking and assisting donors and handing out

food and drinks to donors.

"I got involved because I saw this great looking nurse and thought I'd spend my week trying to pick up on her," said Jason Jenn, freshman in psychology.

The Delts publicized the event with banners on campus and sign-up tables at the Union, food services and the Chester E. Peters Recreation Complex.

The Delts also visited greek houses to encourage students to participate. They offered to sponsor a function for the fraternity and sorority who donated the most blood and time. The winners were Chi Omega and Phi Gamma Delta.

Raising blood instead of money had benefits.

"We know where our proceeds are going," said Jeff Balthrop, sophomore in political science. "Money can be used for countless things, but it's rarely revealed how its spent. We know our blood is saving lives."

# Calendar Sales Aid Needy Children

Hundreds of women applied to be chosen as one of the 12 women featured in the Delta Upsilon calendar.

The contest helped raise money for The Villages, an area in Topeka with homes for abused and abandoned children.

On the night of the competition, spectators crowded into Snookie's Bar to cheer the contestants on. Faculty members also made an appearance at "teacher night," where they served as guest judges.

"I think this is the most fun and exciting event," said Jeff De Volder, sophomore in business administration. "Everyone has fun, yet we still make money for an excellent cause."

The DUs were serious about the fund-raising event. Each year, two members were chosen to be in charge of organizing the contest.

Doug Mulanax, sophomore in speech pathology and audiology, and Mike Chance, freshman in business administration, headed the event. They organized work days when DU members drove to Topeka and volunteered their time for various tasks, including building fences and picking up trash.

"The guys who planned this put in a lot of time and effort," said Todd Chyba, senior in accounting.

The amount of money the DUs donated depended upon the success of the calendar. Last spring, the DUs raised \$3,000 for The Villages.

"This is one of the few philanthropies that has a good turnout and gets a lot of people involved," Mulanax said. "People really enjoy going to it."

# Dribbling for Dollars

Dribbling, passing and shooting, players competed in the Shootout in the Ville, a three-on-three basketball tournament co-sponsored by FarmHouse and the Arnold Air Society.

The event raised \$500 for Big Lakes Developmental Center and an additional \$300 for the KSU Vietnam Veterans Memorial.

Doug Loyd, senior in marketing and president of FarmHouse, said the tournament gained the support of many area businesses.

Radio station KQLA-FM 103.9 helped with the business decisions, including finding sponsors for the tournament. Pizza Hut paid for the T-shirts that were given to tournament entrants.

The tournament took place April 25-26. Ted Glasco, sophomore in computer science and philanthropy chairman, said a lot of work was necessary to pull the event off.

"We had to reserve a parking lot in Aggieville for the day," he

said. "Portable goals were needed, and fliers had to be given out. In addition, commercial spots were used on the radio."

Glasco said 40 teams participated, as opposed to about 20 in 1990. Winners of the tournament received \$150 cash and a prize from the sponsors. The winning teams also had their \$28 entry fee reimbursed.

In the past, women competed against the men on co-ed teams, but a women's division was added this year.

Larry Whipple, junior in agricultural economics, said the philanthropy was beneficial to all who participated.

"We're always looking to improve, and we're hoping to improve the tournament next year," Whipple said. "We want to fine tune (the event), promote more and get more teams involved. We also need to get a few more courts so things would run more efficiently."

Each year, Gamma Phi Beta raised money for Camp Sechelt, a Canadian summer camp for underprivileged females, by putting on Spiketacular, a volleyball tournament. The Gamma Phis co-sponsored the event with the Beta Theta Pi fraternity.

Spiketacular raised a total of \$4,200. Each house received \$2,100 for their charities.

"Pairing with the Betas for Spiketacular is a strong point," said Beth Baranczuk, sophomore in elementary education. "It allows both fraternities and sororities to compete. The guys show up to watch the girls' games and vice versa. Overall, support is great."

Each member of the Gamma Phi house had an active role.

"Within the house, the women are divided into different coaching teams for each of the fraternities," Baranczuk said. "Usually, the women will do funny skits to inspire the fraternity teams. They support that team all the way through the competition. The

women who coached a team will often be invited over for dinner in appreciation for their enthusiasm."

While the philanthropy relied on the participation of greeks, it also had the support of local businesses who served as sponsors.

"The sponsorship from the community allows the whole philanthropy to take place," said Jennifer Little, senior in elementary education. "That (their donations) is what we use to pay the referees and for other expenses. Without their support, we would not be successful in making any money to benefit Camp Sechelt."

Besides the money raised at Spiketacular, Camp Sechelt received additional support from the Gamma Phis.

"During the all-house retreat, we decorated bags and bought toiletries to send the children so the camp wouldn't have to buy them," Baranczuk said. "We try to do one project like this a semester."

Houseboys sweat it out in

# HIRED HANDS

the kitchen for extra cash

By LISA STAAB AND KRISTI STEPHENSON

**C**leaning up kitchens, washing dishes, mopping floors and serving food weren't jobs most people enjoyed, but houseboys who performed these tasks in sorority houses while surrounded by women saw otherwise.

Jason Hodgdon, sophomore in business administration and Pi Beta Phi houseboy, enjoyed his job.

"I meet new people and broaden my social circle," Hodgdon said.

Jeff Fowler, junior in parks and recreation administration liked being an Alpha Delta Pi houseboy for more practical reasons.

"I enjoy it since it's just a part-time job that helps out with expenses and doesn't require a lot of time," Fowler said.

Houseboys said one of the job's benefits was the money.

"It's a practical way to earn extra money at school," said Aaron Brammer, sophomore in business administration and Delta Delta Delta houseboy.

Martha Reynard, the Pi Phi housemother, said houseboys performed a variety of chores.

"They empty trash, put away groceries and supplies, scrub and mop the floors every night and wash dishes, as well as odd jobs like changing light bulbs for me," she said.

Reynard said eight houseboys were needed to fill the schedule. The houseboy who had been working the longest became head houseboy and earned more money than the others, she said.

Cynthia Mitchell, the Tri-Delt's cook, said houseboys were a big help.

"I prepare the food for the weekend and they come in, put it in the

oven and then serve it for me," Mitchell said. "They are very dependable."

Charles Anderson, senior in fisheries and wildlife biology, was a houseboy at Kappa Alpha Theta for four years, during which time he enjoyed hearing the women gossip.

"I mostly hear gossip about men," Anderson said. "Sometimes they'll

over there."

Most of the houseboys said they learned of the jobs through girlfriends, sisters and other friends.

"I had some friends in the dorms who worked as houseboys," Anderson said, "so when a guy quit, I went in to help and the housemom asked if I wanted to continue working."

The houseboys agreed the most embarrassing part of the job was their introduction at formal dinner.

"The first time I worked, they had a houseboy initiation," Anderson said. "The women doused their candles with water and asked me to light it. The wick was wet, so I couldn't light it. The women tried not to laugh but ended up in hysterics."

Fowler also had embarrassing moments while working.

"I got as red as a beet when I attempted to sing 'Friends in Low Places,'" he said. "I was definitely embarrassing to me because I couldn't remember all the words. Another time I was picking up a knife and it spun around and got in

member's hair. One other embarrassing moment was when my boxer shorts were hung in the kitchen."

Despite the embarrassing moments, the houseboys said they enjoyed their jobs. Scott Cooper, senior in agronomy, said the best part of his job was the opportunity he had to make new friends.

"I look at the houseboy position not as a job, but as a chance to get paid for socializing," Cooper said. "It has given me the chance to meet so many people, and gives me the feeling that I have been a part of something besides a daily routine

*"The first time I worked, they (the sorority women) had a houseboy initiation. The women doused their candles with water and asked me to light it. The wick was wet, so I couldn't light it. The women tried not to laugh but ended up in hysterics."*

Charles Anderson

even ask me for my advice."

Although he listened to their problems, Anderson said their relationship did not go beyond friendship.

"I've never wanted to date anyone serious because I see the girls every day, and it wouldn't be good for the job," Anderson said. "Otherwise, I have developed some good friendships."

Fowler agreed it was best to not become romantically involved.

"I'm just friends with the women," he said. "It would be hard to date any of them because if something goes wrong, I'd still have to go

Sigma Sigma Sigma houseboys Cooper and Bruce Latta, sophomore in animal sciences and industry, prepare dinner for the sorority. The two worked in the kitchen and the dining room making salads, preparing beverages and cleaning up after dinner. (Photo by Cary Conover)

After all the women have eaten, Cooper and Latta take time out to sit down and eat. Sunday nights were slow for the houseboys, but Wednesday night formal dinners were busy. (Photo by Cary Conover)

Kappa Alpha Theta members sold Christmas cards and hosted a soccer tournament to raise money for the Court Appointed Special Advocates (CASA).

Seven men's soccer teams and one women's team were scheduled to compete during the fall semester, but the tournament was cancelled due to rain.

"Since the tournament was cancelled, entry fees were returned and we only raised about \$200," said Tisha Schmelzle, junior in foods and nutrition-exercise science. "We are planning to reschedule during the spring semester."

The local CASA organization asked for a Theta member to serve on the board of directors, so Schmelzle joined.

"The purpose of me being on the board of directors at CASA is so they can know more of what we, as a chapter, are doing. I can learn what's going on in

the organization," Schmelzle said. "Being more informed in this way helps us to know how we can help them."

CASA volunteers performed research and informed the judge on the best course of action for the 430,000 abused, abandoned or neglected children that had been removed from their homes.

"It's good we can do something for CASA. I hope the tournament will be rescheduled and the enthusiasm will be high," said Shannon Mueller, senior in marketing. "The services we are supporting can influence a child's life, so support we can offer is helpful."

Kitchel Stephenson, junior in psychology, said if more sorority members understood CASA, support for it would be stronger.

"The house is already increasing its support. They are becoming more aware and understanding its purpose," Stephenson said. "We have a lot to give these kids who can't give much in return.

“ Training (to become a  
 CASA volunteer) was a learn-  
 ing process. The general im-  
 portance of a volunteer is as a  
 mediator. You are an objective  
 person who has studied the  
 case and child and looks out  
 for his best interests.”

— Kitchel Stephenson  
 junior in psychology

KAΘ

“ One of the benefits of CASA  
 as our philanthropy is that the  
 word about abuse gets out not  
 only through the soccer tourna-  
 ment, but also through the  
 information booth at the Activi-  
 ties Fair in the Union and by  
 raffle tickets we have sold.”

— Caryn McCobb  
 sophomore in English

It was tee-off time as the Kappa Delta sorority sponsored their third annual Golf Classic. The philanthropy, open to the K-State and University of Kansas greek systems, was located at Custer Hill in Fort Riley.

"We have about 50 two-man scramble teams participate," said Tracey Reyna, junior in journalism and mass communications. "We feel this is a good response."

For the first time, the KDs opened the tournament up to the Manhattan and Lawrence communities.

"We wanted to involve others besides just the greeks in the golf tournament," Reyna said. "We thought it would be a new and different twist and found it a big success."

The golf tournament provided the opportunity for members to work together and sponsor a fund-raising event for people in need.

"We are very honored to

contribute to the Manhattan community and bring the greek system together for one purpose," Reyna said.

The money raised from the weekend golfing event was donated to the National Prevention of Child Abuse and Manhattan's Big Lakes Developmental Center Inc., which provided aid for mentally disabled people.

The center sponsored workshop programs consisting of job training, independent living and craft work. The workshops were geared toward each mentally disabled person's ability level.

"The KDs played an instrumental role in funding the quality programs," said Ilene Adams, public relations supervisor for the Developmental Center.

"We have a budget of \$2.5 million, and the KDs have brought in about \$26,000 over the last eight years, which helps out." Adams said.

When it came to community service, the Kappa Kappa Gamma sorority was active in several programs.

Although the Kappas did not have a specific fundraiser for their philanthropy, the Rose McGill Fund, they did work to raise money through various community service projects.

"We don't have a big project to raise money for our philanthropy like a lot of the other houses do," said Rebecca Mitchell, junior in pre-occupational therapy and philanthropy chairperson. "We do several small projects throughout the year to raise money for the Rose McGill Fund instead."

Mitchell said the fund provided money for Kappa alumnae who were in need. The money raised helped women whose husbands had died or those whose homes were destroyed in natural disasters. The Rose McGill Fund was supported exclusively through Kappa chapters across the nation.

"Our nationals like to stress community service as opposed to large fundraisers," Mitchell said. "We raised \$160 this semester, and hope we will be able to raise at least that much next semester."

The Kappas worked together to raise the money by babysitting at Lee Elementary School's Parent-Teacher Organization meetings.

"I liked the variety of children that we babysat for," said Krista Skahan, sophomore in pre-occupational therapy.

"They were different ages, and they made for a very interesting afternoon. The room we were in also was nice because we had a lot of things we could do with the kids such as movies and toys. We also had a chalkboard available to us," she said.

Other community service projects the Kappas participated in were hosting skating parties with the Big Brothers/Big Sisters of Manhattan and raising money for the Flint Hills Breadbasket.

"We usually pair up with a fraternity and do a roller skating party with the kids," Mitchell said. "We take the kids who don't have matches yet and have a lot of fun with them."

Although the Kappas did not have one large fundraiser, Mitchell said members liked doing several projects throughout the year.

"I think they enjoy it (community service projects)," she said. "I think they like being able to choose what they want to do. We have projects that can adjust to their schedules."

Becca Sherer, sophomore in apparel and textile marketing, agreed.

"I think the difference between us and the rest of the greek houses is that we don't have a big fundraiser," she said. "We raise money on our own and don't depend on other fraternities and sororities to help us make money."

The coming of spring brought outdoor activities and Kappa Sigma's 14th annual softball tournament. The philanthropy took place at Twin Oaks Softball Complex in late April and early May. The Kappa Sigs extended the tournament to two weekends to allow more teams to participate. The first weekend consisted of the Greek State Tournament, open to any fraternity in the state of Kansas, and the Kappa Sigma Tournament, open to any Kappa Sig chapter. The next weekend, United States Slow Pitch Softball Association teams played. "We estimate that we'll have over 100 teams this year," said Chris Bahl, senior in political science. "This will also help out Manhattan because about 80 percent of the teams come from out of town." With the increased size of the tournament, Bahl said the philanthropy had the potential to raise about \$10,000, which

they donated to the Manhattan City and Recreation Commission. "Our philanthropy raises money to buy new uniforms for Manhattan kids," said Lance Miller, sophomore in arts and sciences. With help from the Kappa Sigs, each team was allowed to have complete sets of uniforms. "They have a problem finding sponsors for all of the teams," Bahl said. "This way, they won't have to worry about it because we will sponsor them." The Kappa Sigs were sponsored by Coors Brewing Company, and had additional help from the Nike Corporation. "Steve Miller was the athletic director at K-State before he went to work for Nike," Bahl said. "Hisson is a Kappa Sig in Chicago, so I called him up to see if they would sponsor us." As the officer in charge of the philanthropy, Bahl said he enjoyed getting sponsors and encouraging new teams to participate.

# Chariot Races Running Strong

By Jenni Stiverson

The chariot races of ancient Greek days came alive at K-State during the March Lambda Chi Alpha Greek Chariot races.

With old metal carts, members of over 24 greek houses raced around the track at Memorial Stadium, competing to win a traveling trophy.

The event was K-State's longest running philanthropy. It began 30 years ago to benefit the Special Olympics. Last year, \$1,700 was donated to the charity.

"It's a good theme for the greeks to get involved with," said Todd Stedry, junior in marketing. "It (the races) brings the houses together for a good cause. It has a lot of tradition."

The chariot races involved two men pulling a woman around the 400-meter track, or two women pulling a man. At times, the women were not heavy enough to hold on during the turns.

"They (the drivers) get going so fast. When they go into the

turn, the momentum is too much and the girl falls off," said Jeb Clement, sophomore in business administration.

Riding in the cart was dangerous, but race workers also discovered the danger of standing alongside the track.

"Jarrod Fish was working at the finish line where he would stop the racers. One time, they kept running and ran over him," Clement said. "He wasn't hurt; it was just pretty funny."

The race participants were not the only ones who had the chance of winning — fans won prizes also. Sponsors donated prizes including tanning sessions, car speakers and dinners at Giorgio's Italian Restaurant that were given away in a raffle.

"We usually find 13 or 14 sponsors," Stedry said. "They donate prizes and buy spots on the shirts for \$100. It's cheap advertisement for them, and it cuts down on our costs."

Cool October temperatures did not stop the Phi Delta Theta fraternity from raising more than \$2,500 in a flag football tournament. The event, open to the Manhattan community, took 80-100 hours of preparation.

“Even though the weather was bad, we raised enough money to donate to the cause and make our house stand out,” said Shane Hollander, sophomore in environmental design.

Despite the poor weather, the event attracted out of town participants.

“We seemed to have a good turnout,” said Matt Somers, senior in accounting. “We had teams from out of town participate, and alumni came back to play in the tournament.”

The Phi Delt's donated the proceeds to the Lou Gehrig Disease Center. The center used the money

to fund bone disease research. Somers was in charge of the tournament's referees. He said flag football was a good event to have for their philanthropy.

“Football is fun and a good sporting event for college students,” Somers said.

The Phi Delt's had their own team in the tournament and placed in the top four.

“It was great competition,” said Chris Tierney, freshman in sociology. “It is great that the greeks raise money for various charities through different activities.”

Kevin Buehler, senior in marketing, played on the Phi Delt team and was glad he participated.

“The tournament was more for the fun of it,” Buehler said. “To play a part in a philanthropy for a good cause was a good feeling.”

# Fijis Bypass Rivalry for a Cause

By Stephanie Hoelzel

For 19 years, the Phi Gamma Delta fraternities from K-State and the University of Kansas have carried the game ball to the site of the KU vs. K-State football game.

"We start from the Fiji house in either town and run the ball to the other house," said Rob Gillespie, junior in marketing and philanthropy chairman. "We either drive to the Fiji house in Lawrence or they drive out here the night before we run."

Both Fiji chapters prepared for the run at the beginning of the fall semester.

"We work closely with the Leukemia Society of America in Wichita," Gillespie said. "We're the second largest money raiser for them."

Fiji members solicited local homes and businesses for donations.

"Manhattan has been a great community to work in. People know what we are about and they respond well with their

donations," Gillespie said. "We get to the door, say three words and they donate."

Along with door-to-door solicitations, cans and jars were put in convenience stores and other businesses to collect change from people.

The Fijis started raising money for the Leukemia Society of America in 1973, after the death of Fiji member Rod Morgan.

"Brother Morgan died in 1972 from leukemia and ever since then the society has been our philanthropy," Gillespie said. "This was our 19th year running for this charity. We reached the \$200,000 mark this year."

At the pre-game ceremony, the game ball was presented to Morgan's parents, and a check for more than \$12,000 was presented to the Leukemia Society of America.

"Brother Morgan's parents are great. They come to the games each year and are supportive of our efforts," Gillespie said.

# Every Boom Helps a Heart Beat

By Lisa Staab

To help the beating of a child's heart was the goal of the Phi Kappa Tau's philanthropy. Phi Tau fraternity helped with the insurance costs of children's heart transplants for the Children's Heart Foundation in Lincoln, Neb.

"Basically, we fired off the cannon during football games and received money for each shot fired," said Larry Snodgrass, senior in marketing.

The funds were donated by local businesses and community members from Manhattan and surrounding cities including Wamego, Topeka, Frankfort, Marysville and Riley.

"Each time the cannon was fired, we received \$10 from each sponsor," he said.

Snodgrass said the foundation started in 1985 by Dick Kahle, a Phi Tau alumnus from Lincoln, Neb. Kahle's efforts resulted from a family tragedy. His daughter needed a transplant, but died waiting for one.

"Kahle started raising money, and the national headquarters got involved," Snodgrass said. "The Phi Tau fraternities in the Midwest region raised more than \$80,000 in the last two years."

Due to the first year efforts of the cannon crew, the Phi Taus were able to donate \$5,000 to the Children's Heart Foundation.

"Everyone participated because it was a huge undertaking," Snodgrass said. "In addition to the cannon crew, there was a tremendous effort to get promotional sponsors for the football season."

In addition, the Phi Taus sold T-shirts, distributed door-to-door fliers and presented educational seminars for local high schools and area organizations.

"Since it was our first year, I set some goals," Snodgrass said. "First, I decided we needed a philanthropy, second, we needed to make it successful and third, we should earn at least \$500."

# Phi Kaps Run to Get Involved

By Todd Fleischer

To some people, the idea of running around the block sounded ludicrous, but members of the Phi Kappa Theta fraternity thought otherwise. The Phi Kaps hosted the Phi Kappa Fun Run to raise money for the American Heart Association.

John Lorimor, junior in chemical science and Phi Kapp philanthropy chairman, said the Phi Kaps chose to have the running event for the American Heart Association because it was a good way to get involved in the community.

"We're pretty concerned with community involvement, and I think this projects a positive image to the community," Lorimor said. "It's good community relations because when we are trying to help a local charity, they see we're not just here to party."

The Fun Run, which took place April 10, consisted of 10-kilometer and two-kilometer courses around the campus. In 1992, the fraternity raised \$750 from the event, but

Lorimor said the fraternity increased its goal.

"In the past, we have raised about \$750 each year, but this year our goal is to raise over \$1,000," Lorimor said. "This year we started the planning process earlier and have been notifying clubs of the date, gathering sponsors, designing a T-shirt and publicizing the event to greeks. We are hoping runners will come from all over the state."

Lorimor said that in previous years, around 80 people participated in the event. However, if the fraternity was to meet its goal, the event needed to attract more competitors.

Rob Gillespie, sophomore in psychology and assistant philanthropy chairman, agreed.

"If we get enough people, we will be able to meet our goal. It's a worthy cause, and we are hoping to get as many involved as possible through the radio and word of mouth," he said.

Dancing in water and diving in cowboy boots were events the Pi Beta Phi sorority used to raise money for charity.

The Pi Phi Plunge took place from 9 a.m.-1 p.m. Oct. 18 in the Natatorium. It was a swim meet for fraternities and sororities that included diving competitions, serious events, synchronized swimming and the Mr. Plunge competition.

The Pi Phis donated the money to the Arrowmont School of Arts and Crafts for Underprivileged People and Links to Literacy.

Tammy Lough, junior in elementary education and philanthropy chairperson, said the event raised \$1,500.

"I feel it is important for us to help Arrowmont because the organization deals with education," said Dana Hutchison, senior in nutritional sciences and Pi Phi president. "We give them money from our event and also buy their crafts.

"Every year we're surprised by our changes. This year we added a disc jockey and displayed sponsors on the back of the shirts. During 1991-92, our house was second in the nation for earning money for Arrowmont."

Lough said the money came from sponsors and other businesses who contributed \$50 to have their emblem on the back of the T-shirts.

"Synchronized swimming is definitely the favorite," Lough said. "Ten to 20 males get together to do a water ballet to music."

The judges were alumni of the house and housemothers from participating fraternities. Seventeen out of 25 fraternities were involved.

"I worked on the activity as far back as March in reserving the facility, sending letters to fraternities, and getting sponsors and alumni judges," Lough said. "By the time school started, I had all the sponsors and paper work done."

The Pi Kappa Alpha fraternity started the fall semester by co-sponsoring Beach Bash with Alpha Gamma Rho.

The event at Tuttle Creek wasn't a wild party, but a day of organized events that raised money for Big Brothers/Big Sisters of Manhattan.

Dax Hayden, senior in horticulture, said the Pikes started planning for the event in spring.

"We have an obstacle course, canoe races, sand volleyball and tug-of-war competitions," Hayden said. "Everyone enjoys it."

The fraternity men worked behind the scenes to make sure everything went as planned.

"I had to go out to Tuttle early, set up events and make sure things ran smoothly when everyone got out there," said David Welte, sophomore in business administration.

"I also ran supplies out like the tug-of-war rope, shovels to dig the tug-of-war pit, inner tubes,

pop, a tent and canoes," he said.

Nine sororities and seven fraternities paid the \$75 entry fee and participated in the event. The men raised about \$2,000 for Big Brothers/Big Sisters of Manhattan.

"It is a real social activity," said Greg Wright, senior in political science. "It's kind of like a beach party all day long."

Lance Gutsch, sophomore in mechanical engineering, said more than 90 percent of the Pikes participated. He said the men were intensely competitive in the volleyball games.

"It is a success," Gutsch said. "Everyone has a fun time."

The men also had personal contact with the children they sponsored.

"Every spring we have the little guys over on a Saturday afternoon," said Doug Neuschafer, senior in hotel and restaurant management. "We go to the zoo and then eat dinner."

Spending extended hours atop a 15-foot pole outside the K-State Union, Pi Kappa Phi fraternity members raised money for the nation's disabled.

The money benefited People Understanding Severely Handicapped, also known as PUSH America.

PUSH America was started by the Pi Kappas national chapter in 1977 and was brought to the Kansas chapter a year later.

"We (Pi Kappa Phi chapter) started PUSH," said Aaron Green, sophomore in landscape architecture. "It is exciting to know we started it and have continued it for all these years."

The 14th annual philanthropy was in early October. Pi Kappas members took two-hour shifts to total more than 100 hours sitting on the pole.

The members sat on a square platform on top of a pole and did homework or talked with friends throughout the week.

"We raised around \$600, and it was great for community awareness," Green said. "Having people ask about the event was a good feeling."

Chris Burris, junior in animal sciences and industry, spent six hours on the platform and said it was a good feeling helping others out.

"When I was sitting up there, it was good to see people asking what we were doing and donating to the cause," Burris said.

A wheelchair was located at the bottom of the pole for donations to service groups in Manhattan for handicapped people.

The Pi Kaps also raised money for PUSH America through a Window Wash at Wal-Mart's parking lot. Members washed car windshields for donations.

"We hold this event once a semester and usually raise \$300," Green said. "It was a fun afternoon and a great way to get to know other brothers better."

The Sigma Alpha Epsilon fraternity provided three days of basketball with Hoop Fest, a philanthropy benefiting the Flint Hills Breadbasket. The SAE members chose the charity with the community in mind.

"We decided instead of donating money to other causes, we would donate it to a local cause. This way someone from Manhattan can get help," said Jason Shamburg, sophomore in agribusiness. "It also helps us get sponsors."

Hoop Fest was a double elimination tournament that included more than 25 fraternity teams from K-State and other colleges, including the University of Kansas and Emporia State University.

The SAEs also allowed independent teams to compete in the February tournament.

"It (Hoop Fest) is really competitive," said Pat Davie, sophomore in journalism and mass communications. "The fraternities

usually send their intramural team because it's right before intramural competition begins. This kind of shows them how they are going to do, so they take it seriously."

The SAEs used to co-sponsor Hoop Fest with a sorority, raising more than \$1,000. However, this year the fraternity decided to organize the event on their own in order to raise more money.

"They (sororities) can't use a lot of the sponsors we have. They're not allowed to wear it (sponsor's logo) on their shirts," Davie said. "We can get more money doing it on our own because of the sponsors we can get without them."

Besides raising money for the Flint Hills Breadbasket, Hoop Fest provided a weekend of basketball for anyone who wanted to participate.

"One of the good things about the tournament is that it doesn't exclude anyone on or off campus," said Brian Scott, junior in secondary education.

Members of Sigma Chi turned fundraising into fun while offering pre-finals stress relief in the form of Derby Days. The event, which spanned several days and involved competitions ranging from a volleyball tournament to a wide variety of games, raised money for the Children's Miracle Network.

Matt Aupperle, freshman in construction science, said the Sigma Chis switched charities. For the past 25 years, they had donated to the Cleo Wallace Center. However, they changed their focus and shifted their efforts to raise money for the Children's Miracle Network.

"After 25 years with the Cleo Wallace Center, we've fulfilled our goals and got them off to a pretty good start," he said. "The national fraternity voted for the change, and now we have aspired

new goals in the direction of contribution to the Children's Miracle Network."

The annual event raised an average of \$4,000 and involved sorority members from 10 to 12 different houses, said Tyler Olson, sophomore in business administration and philanthropy chairman. The competition started April 14 with a party, followed by a volleyball tournament beginning April 15 and games on April 17. The games included tricycle relays, mattress races and tug-of-war contests. There was also a dance contest at Snookie's Bar.

"One of the main things about Derby Days is that you get to help a good cause, meet a lot of people and have a good time," he said. "It also brings the guys together because it involves the whole house."

With the motto, "Help Sigma Kappa Lick Alzheimer's Disease," Sigma Kappas increased student awareness and concern about the neurological disorder. The Sigma Kappas sold lollipops in the K-State Union during their chapter's Week of Giving, Nov. 9-13.

"The selling of suckers is a national event every Sigma Kappa chapter does," said Dari Basore, senior in management and Sigma Kappa president. "We have a lot of girls in the chapter with grandparents who have died from Alzheimer's disease, so we really like doing it. It's something we believe in."

Although raising funds for Alzheimer's disease research was the chapter's main cause, they also supported the Maine Sea Coast Mission, Inherit the Earth and gerontology.

"We brainstorm all the time, trying to come up with ideas that are feasible," Basore said.

"We try to do things with all four philanthropies. For the Maine Sea Coast Mission, we collected dried food, clothes and bath goods to help families who worked on the East Coast."

As part of their Inherit the Earth and gerontology philanthropies, Sigma Kappas planted trees with a kindergarten class and the class' adopted senior citizen.

"I think it's cool when kids can spend time with older people," said Kristine Jantz, freshman in early childhood education. "They have wisdom, knowledge and stories to tell. Spending time with them basically shows you have an interest in them and enjoy their company."

Jantz said participating in community service was important to Sigma Kappas.

"It doesn't matter if you have one or four (philanthropies), just as long as you're excited and enthusiastic about helping out through your philanthropy," Jantz said.

# Games Promote Charity and Friends

Providing fun, competitive games for greek pledges was the goal of Pledge Games, Sigma Nu's philanthropy.

The Sigma Nus co-sponsored the fifth annual event with the Chi Omega sorority on Sept. 27, raising more than \$3,000 for the American Red Cross.

"The event is always on a Saturday," said Tim Bohling, senior in pre-medicine and philanthropy chairman. "We have track events and other small competitions and give prizes to the winners."

The Sigma Nus tried to get all the greek houses to participate. Bohling said only three sororities and two fraternities chose not to compete.

With so many greek pledges together in one place, Bohling said the event was a good way to meet people.

"We always do it at the beginning of the year when everyone is new," he said. "It gives the pledges a chance to get to know each

other and have pride in their competitions."

The Sigma Nus divided their philanthropy responsibilities with the Chi O's.

"They (Chi O's) handled getting the T-shirts, and we (Sigma Nus) worked to get sponsors," Bohling said. "We had guys coach the sororities, while the Chi O's coached the fraternities."

The coaches were responsible for boosting their teams' spirits and making sure the event ran smoothly.

"We organized the team and explained the events," said Mike Werner, sophomore in business administration and Kappa Kappa Gamma coach. "We took donuts to the house and tried to make the event as fun as possible."

Bohling said the event was successful because it raised money for the American Red Cross while giving pledges the chance to meet others. He said each year the event improved.

Due to complications with liability, the annual Sigma Phi Epsilon Fite Nite was canceled by the National Fraternal Organization.

"There were injuries at other universities, but the most serious injury here was a separated shoulder," said Mike Harders, senior in political science. "I feel disappointed and dejected by their decision to cancel. I personally understand why they did it, but I feel bad because it's cutting the American Heart Association out of a lot of money."

The chapter looked for another service event to replace Fite Nite.

"I wish we could've done it (Fite Nite) again. The University really supported us by letting us use Ahearn (Field House) and Weber Arena," Harders said. "Hopefully we can get that same support with our next philanthropy, and it will be just as successful and benefit everyone as much as Fite Nite did."

Chad Becker, senior in marketing, was also disappointed that the event was cancelled.

"It (having a philanthropy) should be a requirement. It supports a good cause and puts all greek organizations in a good light," he said. "Greek organizations are dying as a whole, so we need all the good publicity we can get."

The philanthropy had involved men from other fraternities or residence halls. The participants were divided into weight classes. The men, outfitted in boxing gear, fought amateur bouts during the four-day tournament.

For the past four years, the event grossed \$25,000 yearly for the American Heart Association. The money was used as research grants for K-State professors in fields such as biology and kinesiology.

Harders said the fraternity wouldn't do anything that didn't benefit or have a direct impact on K-State.

Inspired by the television show "American Gladiators," the Sigma Sigma Sigma sorority sponsored the Greek Gladiator games to raise funds for the Robbie Page Memorial.

Money from the fundraiser helped provide play therapy for hospitalized children.

"When we heard about this (Greek Gladiator games), we thought it was a neat idea," said Rasha Bishara, junior in chemical engineering and philanthropy co-chairperson. "We heard a lot of great comments from the fraternities that participated last year. We hope it will be just as successful this year, as we are hoping to get more sororities involved."

In order to make the event comparable to "American Gladiators," the Tri Sigmas rented equipment and even made some of the items needed to make the event a success.

"We rent from the Rec (Chester

E. Peters Recreation Complex) or Ahearn (Field House), to get most of the equipment that we need," Bishara said. "However, we had to make the giant Q-Tips for the joust competition. Whatever we can't rent, we have to make ourselves."

Even though the Greek Gladiator games were only open to the sororities and fraternities, the members of Tri Sigma found organizing a fundraiser was hard work and time consuming.

"We have been planning since the beginning of the school year, even though the actual event is not until February," Bishara said. "It is a lot of work, but everyone does their part."

The philanthropy was mandatory for all Tri Sigmas. However, instead of actually competing, the women served as coaches to the fraternities that were involved. They also made sure that the different competitions

moved smoothly and helped to organize the Mr. and Ms. Gladiator contest.

"We had two girls from the house assigned to each fraternity that participated," said Kim Johnson, senior in sociology.

"My partner and I made a good luck banner and took candy over to the fraternity we were assigned to," she said. "While at the Greek Gladiator competition, we also escorted our fraternity to their events and helped to get them organized."

Johnson said the house members planned to advertise their philanthropy extensively and hoped they would have increased participation from the sororities.

"Last year we did a good job of organizing everything," Bishara said. "We hope this year will go smoothly as well. If the (greek) houses will be enthusiastic about it (Greek Gladiators), it should be fun."

# Rushing to Help Special Olympics

The Tau Kappa Epsilon's Powder Puff football season provided sororities the chance to have fun while showing their team's unity and skills.

The season started at the beginning of the fall semester and continued through the end of October. Eleven participating sororities were divided into two leagues based upon their rankings from the previous season. In the end, the Kappa Alpha Thetas triumphed over the Delta Delta Deltas to capture the championship title. The money raised was donated to Special Olympics.

"Though there is a tremendous amount of work to be done to pull off this large of a philanthropic event, it gives us satisfaction to know that our efforts went to a good cause," said Heath Funston, sophomore in animal sciences and industry.

The philanthropy allowed all of the TKEs to participate. Spencer Wallace, sophomore in business

administration, learned some lessons during the season from being a coach.

"As a coach, I was forced to deal with some unhappy players but with excellent junior and senior leadership, we were able to finish second overall," Wallace said.

Through the combined efforts of coaches, assistant coaches supporters and the players themselves, the TKE's powder puff football season provided a competitive way to raise money for the Special Olympics. The players spent time practicing to improve their football skills.

"As a new member of the P Beta Phi football team, I was surprised at how dedicated everyone was," said Randyll Johnson, freshman in environmental design. "At times it was difficult getting up for our 6:30 a.m. practices but with support and encouragement from our coaches we had a very profitable season."

## No Pain, No Gain

Look closely at the words, "The Taxi." Successfully disguised in the name of this triathlon was the name of the greek fraternity who sponsored it — Theta Xi.

"When the event first started, our fraternity thought we wouldn't get people to participate if they knew it was put on by greeks," said Gary Chisam, junior in kinesiology.

The triathlon's proceeds were donated to Multiple Sclerosis.

"The participants swim 700 yards, bike 14.5 miles and run 3.1 miles," Chisam said. "The money is raised through an entry fee and donations."

Unlike most greek philanthropies that only involved other greek houses, The Taxi involved people from Kansas communities.

"We don't really get a lot of involvement from the other houses since it's such an intense competition," Chisam said. "About one-fourth of the people come

from the community, and the others are from all over the state."

Chisam said the event helped dispel the stereotype of fraternities as party houses.

"The Taxi shows that we want to do something good for the community," he said. "We raise money for a good cause. This shows there are good traits in fraternities."

To become involved with other greek houses, the Theta Xis started a new philanthropy — a giant game of Twister.

Money was raised from the \$50 entry fee from participating groups. The Theta Xis donated the money to Big Brothers/Big Sisters of Manhattan. Chisam said the fundraiser was one that required few skills.

"It's easy to participate," he said. "Freshmen and sophomores will be in one category, and juniors and seniors will be in another. In the finals, the winners will be against each other."

Triangle members participated in their philanthropy, Cut-A-Thon, by working in a beauty salon.

"The Cut-A-Thon is fun," said Wayne Glantz, graduate student in mathematics. "It's part of the house — you get out into the community and do something worthwhile."

The annual Cut-A-Thon was sponsored each fall by the Hair Experts Design Team.

Lin Ward, co-owner of Hair Experts, said the event raised

about \$4,000 for the Big Lakes Development Center in Manhattan.

"Big Lakes is a local charity," Ward said. "If we're going to do a fundraiser, I want it to work for my community."

The Cut-A-Thon lasted for 12 hours. Ward said the cost of haircuts was reduced by half, which kept the stylists so busy they completed four times the amount of work they did in a regular day.

The Triangle members volunteered to work shifts at jobs

including washing hair and sweeping the floor.

"I usually go every year and wash people's hair for about two hours," said Garrett McCallum, senior in electrical engineering.

Illene Adams, Big Lakes Developmental Center public relations supervisor, agreed the volunteers were crucial to the event's success.

"We couldn't do it without the volunteers," Adams said. "We have a wild day. It's long day, but worthwhile and rewarding."

# JUGGLING ACT

K-State-Salina students offer a different perspective

BY RENEE MARTIN

*"The most challenging part about going back to school is trying to juggle study time. I study at night after the kids go to bed. My family is my first priority, but I'm glad to be able to attend college."*

Susan Meyers

**W**ithout her calendar, Susan Myers, freshman in technology, was lost. Juggling roles as a mother, wife and student, Myers constantly relied on her calendar for her daily schedule.

"My calendar is my saving grace," Myers said. "I don't have much time to spare, so I write my schedule down."

Myers was one of many non-traditional students who attended K-State-Salina. She squeezed study time in between caring for her husband and two daughters. Nineteen years after graduating from high school, Myers enrolled in college classes.

"The most challenging part about going back to school is trying to juggle study time," Myers said. "I study at night after the kids go to bed. My family is my first priority, but I'm glad to be able to attend college."

At K-State-Salina, Myers' situation was not unusual.

"Probably about 50 percent of the students here are non-traditional," said Bonnie Scranton, director of college advancement. "We hope in a few years enrollment at K-State-Salina will be about one-third non-traditional students and

two-thirds traditional students."

After the merger with K-State in 1991, Scranton said enrollment at the Salina campus increased about 30 percent.

"People recognize the K-State name and associate it with a quality institution," she said. "It makes a big difference in getting people to enroll."

Although K-State-Salina hired two admission representatives to recruit more high school students, Scranton said the school still attracted non-traditional students.

"We're visible in the community and are constantly working with employers, the Social and Rehabilitation Service and the military," Scranton said. "We want them to encourage their clients to get additional education."

Myers chose to attend K-State-Salina because her daughters, ages 6 and 9, were both enrolled in school.

"You just reach a point when you need something else," she said. "My daughters are not so dependent on me anymore. I had to have something to do."

Some students returned to school because of unexpected circumstances. Marji Martin, sophomore in civil engineering technol-

ogy, enrolled in college after years of working for the same company.

"I was in a career and the company went bankrupt," Martin said. "I'm only 42 years old, and I thought I needed to do something with the rest of my life."

Martin balanced her time between 18 hours of classes and a part-time job.

"I'm trying to earn two associate degrees," she said. "I'm up at 5 a.m. and don't go to bed until midnight. If I don't have time for everything, I go without sleep."

Myers said she was not always successful in balancing her time.

"Some days are more hectic than others," she said. "I try to keep to my schedule. If I get a curve thrown at me, I just try to squeeze everything in."

Although her studies took time away from her family, Myers said she was setting an example for her daughters.

"My third-grader will look at my math problems, shake her head and say, 'Wow,'" Myers said. "I tell her if she studies now, eventually she will work her way up to these problems. I am teaching my children that learning never stops, no matter how old you get."

Hoping to attract more traditional students to its campus, K-State-Salina adopted the Phase V renovation plans. Construction was scheduled to begin in 1994. (Photo by Mike Welchans)

## K-STATE-SALINA ENROLLMENT

Since 1981, enrollment at the Kansas College of Technology was sporadic. On May 2, 1991, K-State and the Kansas College of Technology merged to form the Kansas State University-Salina College of Technology after a recommendation by the Kansas Board of Regents and Legislative approval was secured. Following the merger, enrollment increased as expected, but K-State-Salina officials hoped that the school would attract even more technology students. Enrollment figures are averages from fall and spring enrollment numbers.

Relaxing with her husband and two daughters, Susan Myers, freshman in technology, takes a break from attending K-State-Salina where she enrolled 19 years after she graduated from high school. The K-State-Salina campus had a 50 percent non-traditional population. (Photo by J. Matt Rhea)

Gary Spani's transition from college student to professional football player didn't loosen his ties to K-State.

Spani, linebacker for the Wildcats from 1975-78, was named Kodak all-American and all-Big Eight player in both the United Press International and Associated Press polls during his senior year. After leaving K-State, Spani was picked up by the Kansas City Chiefs. For 10 years he played on the team, until an injury caused him to retire in 1988.

Spani, a Manhattan native, often returned to the University to visit friends and family and to watch the football games. He said K-State had a lot to offer both on and off the field.

"K-State gave me the opportunity to learn in the classroom, as well as a chance to play Big Eight football," he said.

"The opportunity to compete in a major collegiate conference would make anyone a better player."

Spani not only kept in contact with the football program, but was actively involved in the football team's search for a new coach in 1990. He served on the committee that chose Bill Snyder as the new coach.

A resident of Lee's Summit, Mo., Spani also kept close ties with the Chiefs. He worked in the sales and marketing division of the franchise, handling major corporate accounts for print and scoreboard advertising. He attributed some of his personal success to his experiences at K-State.

"My linebacker coach, Dick Selcer, inspired me to do my best," Spani said. "Playing football at a major university definitely had a positive effect on me."

United States Congressman Pat Roberts said his K-State education helped him achieve in his career.

Born in Holton, Kan., Roberts graduated from K-State in 1958. Majoring in journalism and mass communications encouraged Roberts to make political connections and establish supportive friendships.

"When running for public office, you need friends to support what you are doing," he said. "I look to my K-State friends for that."

Roberts returned to K-State for visits and to help out the University whenever he could. He supported grants in favor of K-State and occasionally worked out financial situations with University administration.

"I was back for the 80th anniversary of the Interfraternity Council," he said. "I also worked with President Wefald on behalf of K-State."

Roberts came back in the fall

of 1992 for a campus visit with his daughter who was planning to attend K-State.

On behalf of the University, Roberts, a member of the United States House of Representatives' agriculture committee, supported a farm bill that included a grant for the Throckmorton Hall expansion project. Roberts was also a member of the House's admission committee.

The classes Roberts chose exposed him to situations that benefited him in the long run.

"My education and hands-on experience in journalism and mass communications helped me a great deal to prepare for public relations," Roberts said.

Roberts was proud to be a K-State alumnus. He credited many of his accomplishments to his college experiences.

"The Kedzie experiences were very helpful," he said. "That outstanding education headed me down the road."

# Working for a Living

By Lisa Staab

Some students earned money for rent and utilities at the expense of their grades.

Colinda Thompson, freshman in chemical engineering, balanced her time between two jobs and classes. Thompson worked on campus at McCain Box Office and at Hardee's in Aggieville. Despite both jobs, she managed to find time to study.

"I do my homework between classes and after work in the evenings," she said. "I'm doing okay, but it gets a little tense."

Heather White, junior in elementary education, also had two jobs. White worked at Hardee's in Aggieville and at Cactus Jack's.

"I usually work at Hardee's two days a week from 5 a.m.-1 p.m., go to school, study, work at Cactus Jack's until 11 p.m. weekdays and study some more," White said. "I get most of my sleep on weekends."

Although Danielle Emmel, sophomore in apparel and textile

marketing, had a job, she still found time to be involved with several student organizations including the Fashion Interest Group, College of Human Ecology committee and American Association of Textile Chemists and Colorists.

"It is better for me to stay busy or I'll get bored," Emmel said. "Sometimes my schedule gets cramped up because I have to plan my time well, but I prepare myself everyday or I'll get behind."

Balancing time was a skill the students learned.

"I'm lucky I am the type of person who doesn't need to study a lot," White said, "but it's also easier to be distracted because I am tired in the evenings when I should be studying. I know I'm not putting in the effort to get a 4.0 grade point average."

Thompson said balancing her time was not as difficult as she had expected.

"My classes are okay. Calculus

was difficult my first semester because I didn't know what to expect," Thompson said. "Other than that, I am getting good grades."

Cathy Hill, junior in journalism and mass communications, said working her jobs at Vanity and Runza helped her perfect her time management skills.

"I wouldn't study more if weren't working because I know how much time I need to study to get good grades," she said.

White said she worked to earn extra money to pay for bills and rent.

"I work because I am a fanatic with spending money," she said. "I also work to have more friends. Since I live by myself, Cactus Jack's has been a life-saver in seeing faces."

Hill agreed.

"Everybody I have met is great," Hill said. "It is fun working two different jobs. I don't dread working because I meet a variety of people who range in different ages."

# Journalist Write on the Money

By Aaron Graham

Scott Stuckey, executive editor of Boys' Life magazine in Irving, Texas, said his K-State education gave him the fundamental skills necessary for him to succeed in his journalism career.

A 1979 graduate, Stuckey returned to K-State for individual question and answer sessions with students in the A. Q. Miller School of Journalism and Mass Communications. As part of his job, Stuckey visited various journalism schools throughout the nation.

Besides his college classes, Stuckey said he learned a lot through a summer internship with the American Society of Magazine Editors (ASME).

"The internship made all the difference," he said. "That is when I first became interested in magazine journalism."

In addition to his internship,

Stuckey sharpened his writing skills by working as a Collegian reporter.

"It is important to get as much writing experience as possible," he said, "so you will have a variety of articles to present to future employers."

After graduation, Stuckey used his journalism degree to gain writing experience with various Kansas newspapers before earning his master's degree. He said the reporting and writing techniques he learned at K-State were the most important skills he needed in his career.

"The strong writing training K-State had to offer made me more marketable to employers," he said. "Other journalism schools with exceptional reputations don't always teach the most practical skills that are demanded in magazine journalism."

Bill Featherston's rent was cheap. Featherston, junior in life sciences, paid \$90 a month for rent and utilities — the cockroaches were free.

Featherston lived in a large house divided into nine different bedroom apartments.

"It was in bad shape," he said. "There was only one bathroom for all of us. It was so gross, I refused to use it."

After his landlord kicked out another tenant for having five cockroach nests in his room, Featherston decided to move out. He found an apartment for only \$200 a month, but he was not able to move in until January.

While he waited for his new apartment, Father Keith Weber of St. Isidore's Catholic Church let Featherston live in the apartment above the church for \$50.

He said living at the church only had one minor inconvenience.

"One time they had a wedding at the church. Since my room

was the one brides used to get dressed in, I had to leave," Featherston said.

Lisa Meuli, senior in applied music, didn't share Featherston's apartment problems. Her one bedroom apartment with two balconies cost her and her roommate \$175 each.

"I like living off campus a lot more than living in the dorms," she said. "It's a lot quieter."

Looking for a quiet place to live, Jack and Theresa Taylor found the city of Wamego. Jack, senior in political science, said their neighbors went to bed early.

He and Theresa, sophomore in business administration, paid cheap rent in Wamego.

They lived in a large three-bedroom house with extras including a dining room and garage for only \$295 a month.

"The only bad thing about living in such a big house was we had to buy more furniture to fill it up," he said.

# Using the Ads to Find Room- mates

By Scott Oberkrom

Needing a new roommate, Melissa Prenger and Katrina Goering placed a classified ad in the Collegian.

"We ran the ad for weeks," said Goering, senior in marketing. "We interviewed applicants before we made a decision."

Goering said some applicants thought they had the final say as to whether or not they were going to live in the apartment.

"They felt it was a first-come, first-serve situation," Goering said.

Goering was unable to be present when the final selection needed to be made, so Prenger, senior in journalism and mass communications, chose their roommate.

"I was nervous about choosing the roommate," Prenger said. "I didn't want to do it by myself."

Prenger chose Kelli Darting, junior in hotel and restaurant management. Darting said responding to the ad was nerve-racking.

"I didn't know what to ex-

pect," Darting said. "I didn't have a place to live and I needed one."

Darting said she was leery about responding to an ad, but Prenger made her feel at ease.

"I was nervous at first," Darting said. "But my first impression was really good."

Darting said a strong bond developed between the roommates. She said they worked well together and alternated cleaning duties every week.

"We have a bulletin board and every week we rotate responsibilities," Darting said. "One week you vacuum, the next you do the dishes and after that you clean the bathroom."

Goering said finding a roommate through the classified ad wasn't difficult.

"I would do it again," she said. "I don't have a problem with it. But I might be a little more specific about characteristics in the ad to cut down on wasted interviews."

“ I think it’s a good idea to put an ad in the paper (for a roommate). It lets you find people you are compatible with who are not your friends. It’s better not to live with good friends because that sometimes puts a strain on the relationship. It can ruin friendships.”

## Going the Extra Mile

By Belinda Potter

The man working at the travel plaza on Interstate 70 knew Caron Citro by name. The gas station attendant saw Citro, freshman in journalism and mass communications, three times a week as she filled up her car on the way to Manhattan.

Citro lived with her husband in Topeka and commuted to K-State for classes. Although the drive was 58 miles, Citro used her time wisely.

"I would ask myself questions in a tape recorder as I read my notes," Citro said. "During my drive I would play the tape back and try to answer the questions."

Patricia Sommerfeld, junior in accounting, also tried to use tapes to study during her hour-and-a-half drive. However, she said reading her notes during the drive was more effective.

"Reading my notes was a lot easier than reading the textbooks," Sommerfeld said. "The print in the books is too small to read

while driving."

Sommerfeld said receiving a K-State education was worth her 144-mile drive from Brookville, a town 20 miles west of Salina.

"I had to make the sacrifice," she said. "I could have gone to other schools, but I wanted K-State's name behind me."

The semester before he graduated, Kurtis Gardner, senior in history, found a rent-free house. The only problem was that the house was in Shawnee, Kan., 110 miles from Manhattan.

"My fiancee lives here, so I just decided to commute during my last semester," Gardner said. "I only had classes on Tuesdays and Thursdays."

Gardner's living arrangement saved him money, but he said it had disadvantages.

"I couldn't get involved in any activities," Gardner said. "I didn't mind too much; I was always busy with wedding plans and trying to find a job."

Strolling past the pingpong tables stacked with merchandise displaying masking-tape price tags, the home furnishings came into view. Who wanted to get rid of that perfectly good lamp or the old chair with a small tear? While some students lived in furnished apartments, others tried saving money by shopping at auctions and garage sales for home furnishings.

Blake Picinich, senior in business administration, found a microwave at an auction. He and his roommates decided they would all chip in to buy it.

"Our microwave works just as well as a new one," Picinich said. "We had a subconscious feeling whether it would work or whether we were getting ripped off."

Picinich said he looked at other garage sales for apartment furnishings, but items were either priced too high or the good things were already taken.

"College students have to settle

for lower-quality items even though they work the same," Picinich said.

Becky Delhotal, junior in food and nutrition-exercise science, went to garage sales searching for a coffee table to put in her apartment.

"It's nice to get things at garage sales because they are cheap enough to do anything you want with them, without worrying about ruining them," she said.

Delhotal said she paid \$7 for the table.

"The table we bought wasn't that expensive — it was cheap and a piece of junk, but I didn't care since I'm in college," Delhotal said. "I suggest students go to garage sales, but go to more than one to check for better deals. These items help students get through college. I know how people treat their furniture, so garage sale items can be good enough."

However, she said the cheap prices were not always worth it.

"I was looking for a couch, but

they were too ugly even if they were cheap," she said.

Matt Markel, junior in psychology, bought many second-hand items, including two tables, a television stand and a lamp.

"They are pretty old and gaudy, but they were cheap," Markel said.

After searching for a couch at a rummage sale, Nancy Sherrer, junior in journalism and mass communications, said she and her roommates found one that was inexpensive.

"It's perfect because you don't have to make an investment," she said. "It can still serve its purpose."

Andrew Huff, junior in life sciences, bought a chair for \$20 at a garage sale. He said it had been re-upholstered for \$250, which doubled its worth.

"Sometimes you find an item that actually turns out to be worth something," Huff said. "My roommates thought it was a great deal."

# Securing the Home-stead

By Tom Doocy

Some students who threw parties had headaches before the first guests even arrived because of the time they spent preparing for the event.

Julie Marshall, senior in psychology, said she always took proper precautions before hosting a Friday night beer party.

"The last party my roommates and I had, I decided I was going to make sure nothing was stolen. I was going to make darn sure my cat was safe from the drunken crowd," Marshall said. "I put a lock on my bedroom door and locked my cat and valuables in."

Some people had problems with strangers joining their parties.

"I love having parties with close friends," said Mary Anne Blum, junior in psychology, "but when people I don't know start showing up, I get uneasy."

Other people avoided these hassles because they had apartment leases that didn't allow parties. But some students broke the no-party rule in their leases.

"My old lease said absolutely no parties and no drugs, but it didn't stop us from throwing the occasional party," said Marla Paul, senior in education. "On one occasion, we had a band playing and kegs, but the landlord showed up and put a halt to the action."

Those without party restrictions in their leases could throw parties at any time. Emma Shotton, sophomore in fisheries and wildlife biology, said this privilege often brought damage to their home.

"The only thing about a party at your own place is the fact that in the morning you realize how people can trash a place," she said.

*“ The east side of campus is the ideal location (for parties), just for the simple fact that you are near Aggieville. No matter how great a party is, everyone eventually will wander down to see how the 'Ville is hopping. When we have a party, it's usually a spur of the minute kind of thing, so not many people know. The place usually stays intact. ”*

Noisy neighbors kept the Riley County Police Department busy during the year.

"There is no way to track all the many, many noise complaints we get over the course of time," said Sergeant Adam Angst. "We have a good number of complaints come in about the noise ordinance in effect in Manhattan. Noise is the most common reason why neighbors turn in neighbors."

Barbara Gray, junior in chemical engineering, said she tried to keep a peaceful relationship with her neighbors.

"I've never had any real problems," Gray said. "Everyone has trouble with the neighbor who likes to play loud, obnoxious music at four in the morning. But I try to keep on good terms with the people I live by. It just makes things less stressful."

Some students had neighbors' complaints aimed toward them.

"I had a neighbor who complained about my sister and

me constantly," said Betty (not her real name), sophomore in social science. "At our apartment complex, the lease said, 'No pets, no parties, no others,' which was fine because we had none of those things.

"But this guy who lived downstairs complained to the management at least three times a week. We couldn't make dinner or watch TV without being harassed," she said.

Betty said the complaints escalated.

"This guy even went so far as to say that we would have to pay him off to keep his mouth shut," Betty said. "But he soon got his (own problem) — he was arrested recently for assaulting his roommate with a spatula."

Too many complaints from neighbors caused some landlords to evict tenants. Jeff Sockel, senior in industrial engineering, said three friends at his complex had been evicted.

Michele Lane, a Market Source employee, sets up a tent frame outside the K-State Union. Tents were used by businesses and organizations during the Campus Fest, which took place at the beginning of the fall semester. (Photo by Cary Conover)

Baby, a six-foot Burmese python, belonged to Kim Moos, junior in psychology. Fed a diet of live rats, Baby was expected to grow up to 30 feet long. (Photo by Elizabeth Ferguson)

Hand-raised cockatiels were a popular pet for students because of their small size and bright coloring. The birds ranged in price from \$70-80. (Photo by J. Matt Rhea)

Jeff Heinei, 1992 K-State graduate and employee of Pets 'n' Stuff, holds a one-year-old green iguana. The iguana was one of many unusual pets the business sold to students. (Photo by J. Matt Rhea)

Unusual pets provide companionship

# CRAZY CRITTERS

and educational opportunities

BY BELINDA POTTER

**K**im Moos, junior in psychology, placed live rats near her "Baby." But the rats did not live for long, for as soon as they were placed next to her, Baby attacked and strangled them.

Baby, a six-foot Burmese python, lived in a large aquarium. However, Moos said her pet preferred to be in places other than her cage.

"She likes any place warm," Moos said. "She loves being in my bathtub when I fill it with warm water."

Once, after a long night of studying, Moos fell asleep in her waterbed. In the morning, she was surprised to discover Baby in her bed.

"I didn't even know she was there until the next morning," she said. "I got up and she wasn't in her cage. I started looking around, and I finally found her up at the foot of my bed."

Not even a year old, Baby was growing rapidly.

"This type of python may grow up to 30 feet," Moos said.

Caring for Baby was easy, she said. After Baby shed her skin, Moos put body lotion on the snake's body.

"She just slithers through my fingers," she said.

Some students preferred pets

with fur. After Aaron Daily, senior in environmental design, visited a pet shop, he became interested in furry, gray chinchillas from South America. A year later, he bought two of the rodents and named them

South America, they like to climb around a lot."

To keep their fur soft and fluffy, chinchillas required unusual care. Daily put a bowl of dry lava dust into the cage. The animals rolled around in the dust, which absorbed excess oil off their fur.

Mike Pisani, senior in park resources management, didn't worry about keeping his pet's fur soft — especially since his pet was an iguana.

Measuring over three feet long, Igor the iguana was only three years old. Pisani fed his pet a daily diet of fruits and vegetables.

"When he gets a little bigger, I'll start feeding him mice," Pisani said.

Pisani bought Igor for a high school class project.

"I needed a critter for environmental education," he said. "Part of the class focused on sharing our pets with first-graders."

Pisani's sister enrolled in the same high school class, and also used Igor for her project. This meant Igor had to temporarily stay with Pisani's parents.

"My mom wasn't crazy about the idea (of keeping Igor)," Pisani said. "Now, at least she talks to Igor — but she won't ever touch him."

In their attempt to find unusual pets, students often traveled to Pets 'n' Stuff, which was located in the Manhattan Town Center Mall. The unique marking of the carpet chameleons pushed their cost to \$100 at pet stores. (Photo by J. Matt Rhea)

Chip and Chelsea. More chinchillas were on the way because Chelsea was pregnant.

Chinchillas had mouse-like ears, squirrel-like tails and were famous for their soft fur. Daily said chinchillas were friendly pets.

"My dog even loves them," Daily said. "The chinchillas jump on my cocker spaniel's back all the time."

He kept the animals in a 5-by-5 foot cage.

"There are a lot of levels in the cage," Daily said. "Since they are originally from the mountains of

*"My mom wasn't crazy about the idea (of keeping Igor). Now, at least she talks to Igor — but she won't ever touch him."*

*What is the one thing you cannot tolerate?*  
 "Busy work. My calculus professor gives us 120 problems and only grades five."  
 III  
**JED ARCHULETA**  
 FRESHMAN IN MECHANICAL ENGINEERING

A K-State student walks past the white 20-foot fork sculpture near King Hall. More than 20 years old, this statue, along with other art-work around campus, was as old as many students at K-State. (Photo by Vincent P. LaVergne)

BEYOND THE SURFACE

*What do you think you will be doing five years from now?*

*"I'll be married with no kids. Hopefully working in a church full-time in the children's ministry or Christian education ministry. Maybe teaching elementary education, first or second grade."*

**HOLLY ANDERSON**

## BEYOND THE SURFACE

### BEYOND THE SURFACE

*What is your most embarrassing moment at K-State?*

*"Getting my shorts pulled down at Tuttle on the Rocks. It was one of those nice spring days when there were tons of people out there, too."*

Enjoying the nice weather, Michael Sadler, junior in interior design, flies through the bowls on his mountain bike near the Tuttle Creek spillway. Although Sadler heard about the trails during first semester, he didn't find the time, or weather, to try them out until second semester. (Photo by Darrin Whitley)

**BEYOND THE SURFACE**

///

*What was the best time you had in college?*

*"My sophomore year during the middle of the semester some of my friends and I decided to go to Texas. Someone said, 'Let's go to Texas,' on a Tuesday night, so we did. We drove to Texas, spent the night and the next day there and then headed home. It was fun to just get up and leave. It was stupid, but fun."*

BEYOND THE SURFACE

What was the best time you've had in college?

"The weekend before school started, a bunch of us piled in a pickup. We drove to Dairy Queen and ate some ice cream, and then we drove through Aggieville singing at the top of our lungs. A cop stopped us and said we couldn't have people riding in the back of the pickup. The girl who was driving told him we were all drunk, and she didn't know how else she was going to get us all home. He let us go believing that we were really drunk when we weren't."

SHARRA NORRIS

BEYOND THE SURFACE

What is your most embarrassing moment at K-State?

"Well, when I lived in the dorms I went out in the hall with just a towel on and there were three guys who saw me."

SHARI PETERSON

Between Farrell Library and Lafene Student Health Center, David Bradford, junior in mechanical engineering and employee of the Division of Facilities, sets a globe atop a light post after changing the bulb inside. The globe-style lamps replaced China hat-style lamps during mid-campus sidewalk renovations. (Photo by Cary Conover)

BEYOND THE SURFACE

Whom do you admire the most? In what way does that person inspire you?

"I admire my parents. They've had a lot of hard times they've overcome. They taught me to believe in myself, and they told me I can do anything."

LESLIE RICH

JUNIOR IN MUSIC EDUCATION

BEYOND THE SURFACE

Why did you come to K-State?

"I liked the size of the campus. Everyone seemed friendly, and it was the right distance from home — not too close, not too far."

### BEYOND THE SURFACE

What was your most embarrassing moment at K-State?

I was in the production of "Flowers for Algernon." It was opening night and the stage floor had just been painted with an oil-based paint. I walked onto the stage, my shoes stuck to the floor and I walked out of them. I went back and stepped into them again and somehow dragged them across the floor with me."

### Wayne Feeds Salutes The Leaders Of Tomorrow

Congratulations K-State Agricultural School graduates. All of us at Wayne Feeds applaud your accomplishment.

As a staunch supporter of the agricultural community, we recognize the importance education and knowledge have on the continued growth and development of this industry. In fact, the formation of a strong knowledge base has been the driving force behind the Wayne Feeds commitment to Research and Development of nutritional inputs for producers of meat, milk and eggs. It's a legacy that goes back to 1895.

Products and answers that work.

### SIGMA CHEMICAL COMPANY

We're Meeting The Challenge Of The 1990s With Quality

Sigma Chemical Company is beginning a new decade of success. Backed by 40 years of experience, the future looks brighter than ever. The world's foremost supplier of research and organic chemicals as well as the leader in development of diagnostic kits and reagents, SIGMA is strategically positioned on the leading edge of the biomedical industry.

This dynamic field is one of the fastest growing, creative and meaningful areas of business expansion today. Throughout the 1990s, an exciting new area of research is progressing that depends on our products. To provide the quality and service this essential work demands, we offer challenging careers in:

- Immunology
- Cell Biology
- Microbiology
- Molecular Biology
- Protein Chemistry
- Analytical Chemistry
- Organic Chemistry
- Clinical Chemistry
- Electrophoresis
- Tissue Culture

To explore an opportunity in our state-of-the-art environment, send your confidential resume to: **Personnel Manager, SIGMA CHEMICAL COMPANY, Position KSU, P.O. Box 14508, St. Louis, MO 63178.** An Equal Opportunity Employer.

# K-STATE UNION

## Serving you for over 36 years

### Bookstore

The K-State Union Bookstore, located on ground and first floors, carries a variety of textbooks, reference and general reading books, computer hardware and software, K-State clothing and memorabilia,

health and beauty aids, greeting cards and magazines. We are a major on-campus ticket outlet for McCain events, Bramlage Coliseum events, campus entertainment, concerts and athletic events. Our ticket outlet is located at the service counter on the lower level.

Other services and merchandise we offer include pre-orders for textbooks, reserve-a-copy that reserves textbooks that haven't been delivered to the store and special orders for trade books not in stock, supplies, class rings, graduation apparel, announcements, gift items, floral arrangements, balloons, seasonal or holiday gifts, gift certificates and free gift wrapping make the Bookstore an enjoyable place to visit.

### Stateroom

The Stateroom, on the first floor of the K-State Union, offers a wide variety of food in the Stateroom including pizza-by-the-slice, fried chicken, and Mexican food. Our grill features fresh burgers, fries, and sandwiches. We also offer a cafeteria line with soup, hot entrees and a variety of vegetables. Our salad bar and freshly baked cookies are popular with everybody! We also offer a full selection of party foods, appetizers, decorated cakes and other specialties available by special order, prepared by our talented cooks and bakers. Our fruit juice bar is located just inside the Stateroom and offers a number of blended drinks. Another unique feature of the Stateroom is our ice cream bar. We have hand-dipped cones and frozen treats made from ice cream produced at K-State's own Call Hall. Our malts, shakes, hot chocolate floats and flurries are made-to-order.

Need a break from your busy day? There's always something special on the buffet line in the Bluemont Room. Located on the second floor, we are open for lunch Monday thru Friday when school is in session.

### Copy Center

Conveniently located within walking distance from your classes, the K-State Union Copy Center offers quick, quality copies, enlargements and reductions, and instructor hand-outs for courses. We have both Zenith and Macintosh computer systems with laser printers available for you to use at a minimal cost.

We offer fine resume and recycled papers with

matching envelopes for professional looking resumes and invitations, low cost, quality diazos available in blue-line, blackline, brownline and sepia prints for engineering, architecture and art majors. Also, spiral and velo binding, laminating, typesetting and button making services exist at this location.

### Information Counter

Stop by the K-State Union Information Counter and we'll help you find your way on campus. We have campus maps, post cards, area newspapers, pens, pencils, envelopes and more... all at one stop!

Grab a quick snack on your way to or from class. We offer fresh hot popcorn, candy bars, candy by the pound, cold drinks, film, film processing, video transfer service and limited check cashing.

### Wildcat Card

Another fine service of the K-State Union is the Wildcat Card. Your K-State Photo I.D. Card can be encoded with a Wildcat Account. You simply deposit money into your account at the K-State Union Wildcat Account window located on the first floor of the Union, right next to the check cashing window. You can use your card in place of carrying cash or writing a check in any department of the K-State Union, at The Bakery in Derby Food Center, The Quick Cat Store in Van Zile Hall, and the Veterinarian Hospital Cafeteria in Trotter Hall. There's no service charge, and you never have to worry about overdrafts.

### Vending Services

The K-State Union Vending Services brings you every vended need from sodas, candy bars, chips and sandwiches to laundry detergent.

We are the K-State vendor, striving to offer you the best in convenient vended products to serve your needs no matter where you are on campus. Look for our vending machines in each building across campus.

### Union Station

Union Station offers a relaxing atmosphere for meeting friends. Located on the ground floor of the Union, we feature a variety of entertainment, that include comedians, performers and musicians,

fashion shows and variety shows.

Union Station is one of the first of its kind on a college campus. Our menu includes made-to-order deli sandwiches, sour dough pizza, mini-burgers, reubens, nachos, salads, chicken sandwiches, specialty coffees, desserts, bar snacks, bottled spring waters, and of course, non-alcoholic mixed drinks. We also offer daily specials...there's something different on the menu every day!

### Recreation

When you want something fun to do, stop by the K-State Union Recreation Area, located on the lower level. A variety of leisure activities, including bowling, billiards, video movie rentals, snooker, video games, checkers, chess, foosball, a big screen television, a snack bar and more are offered here seven days a week. We offer bowling and billiard leagues each semester, and have a complete pro shop for your bowling needs.

We also feature engraving and metal photo services for personalizing your gifts, plaques, and diplomas or professionalizing your name tag, desk plate or information signs.

### Union Program Council

Union Program Council (UPC) has provided programming excellence to K-State students for over 36 years. UPC provides a diverse array of campus entertainment for members of the K-State and surrounding communities, with over 500 different programs offered each year. Made up of nine student committees, UPC is responsible for selecting, promoting and executing their programs. The 150 dedicated volunteers make UPC a leader among K-State organizations, providing a well-rounded program of exciting events. UPC committees include Special Events, Eclectic Entertainment, Issues and Ideas, Travel, Outdoor Recreation, Feature Films, Kaleidoscope Films, Multicultural, Arts and Promotions.

UPC is a great way to get involved with campus activities at K-State. If you would like more information, stop by the UPC Office on the third floor of the Union.

### International Student I.D. Cards

Students wanting to travel abroad may get an application for an International Student I.D. Card in the UPC Office, located on the third floor. The service is available to those who have been a full-time student anytime during the academic school year.

**The K-State Union is proud to be such an important part of the lives of the students, faculty, staff, alumni and guests at Kansas State University. Your patronage is appreciated as your dollars continue to help us sponsor a variety of programs, activities and services. From movies, to shopping, to eating, to bowling, to just finding a quiet place to visit with friends, we offer something for everyone.**

The 84th volume of the Kansas State University Royal Purple was printed by Herff-Jones of Mission, Kan. The press run was 5,750 and was submitted camera-ready. Copy was written and edited by the Royal Purple staff and contributing writers. Pagination was done on Macintosh computers using Aldus PageMaker 4.2. Candid photos were taken by the photography staff.

The cover is Pantone 276C with Mission grain Pantone 192C

and silver foil were applied to the cover. Endsheets are grey with Pantone 276C

The four-color photographs were printed at Custom Color, Kansas City, Mo. Organization group photos were taken by Varden Studios of Syracuse, N.Y., K-State Photographic Services, and Cary Conover, photography staff. Academics and Sports group pictures were taken by K-State Photographic Services. The living-group portraits

were taken by Varden Studios. The portrait sitting fee was \$5. The Manhattan Mercury and LA Youth News Service provided pictures for the news section.

Body copy is Goudy, except for the Organizations section, which is A Garamond. Student Life headlines are Futura Light, and the special section headlines are Benguiat. Academics headlines are L Futura Light Organizations headlines are Trajan and Trajan Bold. Sports

headlines are B Benguiat Bold, Benguiat, and Weiss. Headlines in Housing are Bookman Bold and I Goudy Italic.

The Royal Purple was distributed to students on campus during the last week of April. The book was sold to students for \$16 and to non-students for \$25.

The Royal Purple business office is Student Publications Inc., Kedzie Hall 103, Kansas State University, Manhattan, Kan. 66506, (913) 532-6557.

The history of K-State was brought to the surface when President Clinton mistakenly referred to the University of Arkansas as the oldest land-grant school west of the Mississippi. To correct his error, Student Body President Jackie McClaskey sent Clinton a sweatshirt bearing the words "Founded in 1863," a jogging cap and a letter that said, "Please accept these gifts as a token of goodwill from proud students at the first land-grant college west of the Mississippi."

Traveling *beyond* the borders of 95 different countries, 1,121 international students attended K-State. The students' home countries ranged from Yugoslavia to Kazakhstan, and nearly one international student in five was from the People's Republic of China.

Campus controversy arose over Housing and Dining Services' decision to eliminate free laundry in residence halls while raising *the* rent from \$360 to \$395. The decision was to take effect in fall 1993, and the extra money raised was to help purchase equipment for exercise, computer and study rooms.

Monetary concerns also extended to faculty members. A report by Faculty Senate revealed faculty salaries were 16 percent lower than the average of peer institutions. After faculty complaints came to the *surface*, a request for more funding was sent to the Kansas Legislature and Gov. Joan Finney, who took it under consideration.

University pride ran high after the Cats defeated KU 74-67 in the Big Eight Tournament. Although Missouri won the championship game 68-56, Anthony Beane, Vincent Jackson and Askia Jones were named to the all-tournament team.

Chosen as the NCAA tournament's No. 6 seed, the Cats were led by Coach Dana Altman, who was selected

Bodies begin to twist during the first round of Twistermania at Ahearn Field House March 7. Theta Xi and Alpha Chi Omega sponsored the fundraiser, which featured 75 Milton Bradley Twister mats taped together to make one huge square. As contestants inched toward the middle of the mat, judges rolled up the edges to quicken the game's pace. (Photo by Vincent P. LaVergne)

“*I*n my apartment next year, I will have to pay for my laundry, but they (students) will have to pay here, too.”

*Nuradi Hidayat,*  
freshman in  
computer engineering

Nuradi Hidayat, freshman in computer engineering, puts a load of clothes into a washing machine in the basement of Marlatt Hall. Due to a scheduled rent increase and elimination of free laundry services, some students living in residence halls decided to move off campus. Hidayat wanted to get an apartment in order to have more privacy. (Photo by Cary Conover)

by his peers as the Big Eight Coach of the Year. Beane boosted the team's spirit and was selected the Associated Press' Newcomer of the Year.

***K*nown for making last-minute baskets to capture wins, Beane sank two free throws against Oklahoma with 3.6 seconds left on the clock, and the Cats surfaced in the AP poll for the first time in three years.**

A successful track season was marred by former track coach John Capriotti's confession of altering scholarships and giving athletes money from his own pocket. Capriotti said he broke the rules to attract top athletes.

"I knew what I was doing the whole time, and I knew what I was doing was against the rules,"

Capriotti said in a Wichita Eagle interview.

As a result, the athletic department faced an internal investigation and potential penalties from the NCAA.

The danger of terrorism was brought to the surface after the New York Trade Center was bombed by terrorists, killing six people, injuring more than 1,000 and closing the twin 110-story buildings for at least a month.

Despite this reminder to beware the unexpected, life on campus was safer, according to a report by the KBI, which showed campus crime decreased by nearly 10 percent.

From correcting Clinton to supporting athletics, college-life experiences were made memorable by those who worked behind the scenes and beyond the surface. **///**

Wildcat center Jerrell Roberson gives high fives to fans at Bramlage Coliseum. The team traveled by car to Manhattan Municipal Airport for their flight to Orlando, Fla., for their first-round NCAA tournament game against Tulane. The Cat's lost 55-53, ending their season with a 19-11 record. (Photo by Mike Welchans)
